No. II.

A bill further to amend the Indian Stamp Act, 1899.

II of 1899.

WHEREAS it is expedient further to amend the Indian Stamp Act, 1899; It is hereby enacted as follows:—

I. This Act may be called the Indian Stamp (Amendment) Act, 1906.
Short title.

II of 1899.

2. In section 2, clause (19), of the Indian Stamp Act, 1899 (hereinafter referred to as "the said Act"), sub-clause (c), and the word "and" prefixed thereto, are hereby repealed.

3. In section 11, clause (a), section 32, proviso, clause (c), section 35, proviso, clause (a), section 69 and 74, Act II, 1899. 40, section 41, section 69 and section 74, of the said Act, after the words "one anna", wherever they occur, the words "or half an anna" shall be inserted.

4. For section 29, clause (b), of the said Act, the following shall be substituted, namely:—
Substitution of new clause for clause (b) of section 29, Act II, 1899.

"(b) in the case of a policy of insurance other than fire-insurance—by the person effecting the insurance;

(bb) in the case of a policy of fire-insurance—by the person issuing the policy;"

5. To section 30 of the said Act the following paragraph shall be added, namely:—
Addition to section 30, Act II, 1899.

"Any person receiving or taking credit for any premium or consideration for any renewal of any contract of fire-insurance, shall, within one month after receiving or taking credit for such premium or consideration, give a duly stamped receipt for the same."

6. In section 51 of the said Act, after the word "instruments" the words "by any banker or", and after the word "said" the word "banker," shall be inserted.

. In Schedule I of the said Act, the following amendments shall be made, namely:—
Amendments of Schedule I, Act II, 1899.

(1) For clauses (b) and (c) of the exemptions from Article No. 24 the following shall be substituted, namely:—

"(b) Copy of, or extract from, any register relating to births, baptisms, namings, dedications, marriages, deaths or burials."

(a) In clause (b) of Article No. 41, for the words "one year" the words "eighteen months" shall be substituted.

(3) For divisions A and B of Article No. 47 the following shall be substituted, namely:—

	If drawn singly.	If drawn in duplicate, for each part.
"A.—SEA-INSURANCE (see section 7)—		
(1) for or upon any voyage—		
(i) where the premium or consideration does not exceed the rate of two annas or one-eighth per centum of the amount insured by the policy;	One anna.	Half an anna.
(ii) in any other case, in respect of every full sum of one thousand rupees and also any fractional part of one thousand rupees insured by the policy;	Two annas.	One anna.
(2) for time—		
(iii) in respect of every full sum of one thousand rupees and also any fractional part of one thousand rupees insured by the policy—		
where the insurance shall be made for any time not exceeding six months;	Two annas.	One anna.
where the insurance shall be made for any time exceeding six months and not exceeding twelve months.	Four annas.	Two annas.
"B.—FIRE INSURANCE—		
(1) in respect of an original policy—		
(i) when the sum insured does not exceed Rs. 5,000;		Eight annas.
(ii) in any other case;		One rupee.
and (2) in respect of each receipt for any payment of a premium on any renewal of an original policy.		One-half of the duty payable in respect of the original policy in addition to the amount, if any, chargeable under No. 53."

(4) To Article No. 53 the following note shall be added, namely:—

"See also POLICY OF INSURANCE [No. 47-B (2)]."

J. M. MACPHERSON,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill further to amend the law relating to merchant seamen was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 2nd March, 1906 :—

WE, the undersigned, Members of the Select Committee to which the Bill further to amend the law relating to merchant seamen was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report, with the Bill as amended by us annexed thereto.

From Government, Bengal, No. 268 Marine, dated 6th February, 1906 [Paper No. 1].

From Government, Bombay, No. 16G., dated 29th January, 1906, and enclosure [Paper No. 2].

Telegram from Government, Burma, No. 103, dated 1st February, 1906 [Paper No. 3].

Telegram from Government, Eastern Bengal and Assam, No. 91P., dated 2nd February, 1906 [Paper No. 4].

Telegram from Government, Madras, No. 78, dated 3rd February, 1906, and letter No. 77, dated 4th February, 1906, and enclosures [Paper No. 5].

2. In deference to certain observations made by the Board of Trade, we have suggested a further proviso to the clause which clause 2 of the Bill proposes to add to section 23 of the Indian Merchant Shipping Act, 1859, with the object of safeguarding the interests of the crew in the event of a running agreement in the new form proposed by the Bill terminating at a port out of British India. It provides that every such agreement shall contain such stipulations as the Governor General in Council may direct for the discharge of the crew and payment of their wages, for securing their return to a port in British India, and for other purposes, on the termination of the agreement at a port out of British India.

3. We have omitted the word "final" before the words "port of destination" in the same clause of the Bill as introduced, as that word does not occur either in section 23 or section 24A of the principal Act, with the language of which that of the new clause should obviously coincide.

4. The publication ordered by the Council has been made as follows :—

In English.

<i>Gazette.</i>	<i>Date.</i>
Gazette of India	20th January, 1906.
Fort Saint George Gazette	23rd January, 1906.
Bombay Government Gazette	25th January, 1906.
Calcutta Gazette	24th January, 1906.
Burma Gazette	3rd February, 1906.
Eastern Bengal and Assam Gazette	3rd February, 1906.

5. We think that the Bill has not been so altered as to require re-publication, and we recommend that it be passed as now amended.

The 28th February, 1906.

No. II.

[The portion printed in italics denotes the addition proposed by the Select Committee.]

A Bill further to amend the law relating to merchant seamen.

WHEREAS it is expedient further to amend the law relating to merchant seamen; It is hereby enacted as follows:—

1. This Act may be called the Indian Merchant Shipping (Amendment) Act, 1906.

2. To section 23 of the Indian Merchant Shipping Act, 1859, the following shall be added, namely:—

"Notwithstanding anything in this section, in the case of any such foreign-going ship as aforesaid, being a ship—

(a) registered in British India under the Merchant Shipping Act, 1894, or

(b) registered in the United Kingdom under the said Merchant Shipping Act, 1894, but not employed in trading with any port in the United Kingdom,

a running agreement with the crew may be made to extend over two or more voyages so that it shall terminate either within six months from the date on which it was executed or on the first arrival of the ship at her port of destination in British India after the

expiration of that period, or on the discharge of cargo consequent upon such arrival, whichever of these dates shall be the latest:

"Provided that no such agreement shall continue in force, if, after the expiration of such period of six months as aforesaid, the ship proceeds on a voyage from a port out of British India to any other such port which is not on the direct road or a customary route to her port of destination in British India:

"Provided also that every such agreement shall, in addition to any other particulars required by law, contain such stipulations for the discharge of the crew and payment of their wages, for securing their return to the port at which they were shipped or to some other port in British India, and for other purposes on the termination of the agreement at a port out of British India under the foregoing proviso, as the Governor General in Council may direct."

3. In section 24A of the said Indian Merchant Shipping Act, 1859, as amended by section 2 of the Indian Merchant Shipping Law Amendment Act, 1891, after the word "December" the words "or, as the case may be, after the expiration of a period of six months from the date on which it was executed," shall be inserted.

J. M. MACPHERSON,
Secretary to the Government of India.

Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA,
ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS,
UNDER THE PROVISIONS OF THE INDIAN COUNCILS ACTS,
1861 AND 1892 (24 & 25 VICT., CAP. 67,
AND 55 & 56 VICT., CAP. 14.)

The Council met at Government House, Calcutta, on Friday, the 2nd
March, 1906.

PRESENT :

His Excellency the Earl of Minto, P.C., G.C.M.G., G.M.S.I., G.M.I.E., Viceroy
and Governor General of India, *presiding*.
His Honour Sir A. H. L. Fraser, K.C.S.I., Lieutenant-Governor of Bengal.
His Excellency General Viscount Kitchener of Khartoum, G.C.B., O.M.,
G.C.M.G., Commander-in-Chief in India.
The Hon'ble Sir A. T. Arundel, K.C.S.I.
The Hon'ble Sir Denzil Ibbetson, K.C.S.I.
The Hon'ble Mr. H. Erle Richards, K.C.
The Hon'ble Mr. J. P. Hewett, C.S.I., C.I.E.
The Hon'ble Mr. E. N. Baker, C.S.I.
The Hon'ble Major-General C. H. Scott, C.B., R.A.
The Hon'ble Rai Sri Ram Bahadur, C.I.E.
The Hon'ble Mr. L. A. S. Porter.
The Hon'ble Mr. L. Hare, C.S.I., C.I.E.
The Hon'ble Mr. H. A. Sim, C.I.E.
The Hon'ble Nawab Fateh Ali Khan, Kazilbash, C.I.E.
The Hon'ble Mr. A. A. Apcar, C.S.I.
The Hon'ble Mr. S. Ismay, C.S.I.
The Hon'ble Mr. W. T. Hall, C.S.I.
The Hon'ble Mr. A. C. Logan.
The Hon'ble Nawab Bahadur Khwaja Salimulla of Dacca, C.S.I.
The Hon'ble Nawab Saiyid Muhammad Sahib Bahadur.

INDIAN COINAGE BILL.

The Hon'ble MR. BAKER moved that the Report of the Select Committee on the Bill to consolidate and amend the law relating to Coinage and the Mint be taken into consideration. He said :—"My Lord, it will be seen from the report that the Select Committee have made somewhat numerous alterations in the Bill. Most of these are of comparatively small importance, and they are sufficiently explained in the report. I think, however, that it may be worth while for me to offer a few supplementary remarks in regard to the sections relating to the treatment of defaced and light weight coin which have been entirely recast by the Select Committee.

"Taking first the case of defaced coins, the Bill as originally drafted made a distinction between coins which had been defaced by being shroff-marked, or for the purpose of converting them into an ornament, and all other kinds of defaced coins. It was provided that the two first kinds of defaced coins should be received and paid for at special rates; but that all others should be cut and returned to the tenderer.

"These proposals have been subjected to a good deal of criticism, much of which we consider to be substantially just. It was pointed out that considerable hardship would be caused if coins which had merely been used as ornaments were to be received at a discount. It was also observed that coins might be defaced in other ways than by shroff-marking or by use as an ornament, yet without any intent to defraud; and that hardship might be caused if such coins were cut and reduced to mere bullion value. For instance, in the west of India, rupees which have been circulating in Portuguese Mozambique are frequently stamped with the letters P. M. This would constitute defacement; yet as the value of the coins has not been impaired it would not be just to demonetize them. It was also observed that there was no definition of defacement, and that its absence might lead to uncertainty in the interpretation of the law.

"We have accepted these views, and have revised the Bill accordingly. We have inserted a definition of the word "deface," and we have provided that every defaced coin which is not light weight shall be received at its full face value, unless there is reason to believe that it has been defaced fraudulently. As most cases of defacement with which we are acquainted are not fraudulent, this gives a very wide measure of protection to the public, and it completely covers the case of rupees which have been defaced only by use as ornaments. The only case of fraudulent defacement which is of sufficient importance to call for specific notice is defacement by means of sweating, and we have accordingly provided that coins which there is reason to believe have been defaced by sweating shall be deemed to have been fraudulently defaced.

"Turning now to the case of light weight coins, there seems to have been a certain amount of misapprehension on the part of some of the persons consulted as to what was actually intended. It appears to have been supposed in some quarters that Government proposed in some way to recede from the position that loss of weight due to reasonable wear and tear should be borne by the State, and that we desired to impose it on the last holder of the coin. That is not the case at all. We have for many years, in fact since 1881, accepted the responsibility of making good the loss of weight due to fair wear, and we have never contemplated going back from this position. What these gentlemen have failed to understand is that when the loss of weight exceeds a certain proportion, it cannot be due to fair wear, and must be due to the maltreatment of the coin, in other words, to fraud. In 1896, a series of very careful and extensive enquiries were instituted by Colonel Baird, then Master of the Calcutta Mint, and these have been continued down to the present time. The result of these has been to show that the average life of a coin, when subjected only to fair wear, is a little over 55 years, *i.e.*, that it will not have lost more than 2 per cent in weight and thereby have ceased to be legal tender for that period. The enquiries also showed that among coins issued prior to 1873, not more than one in 1,000 had lost more than 4 per cent in weight by honest wear, while in the case of coins of later date, the percentage of light

weights was less than $\frac{1}{2}$ per cent. Now, according to our system, coins are recalled from circulation when they have reached a certain age. Thus the coinages which bear the dates 1835 and 1840 (which include all coinages down to 1861 inclusive) have been called in, and very few of them are now in circulation. It follows that scarcely any coins now outstanding can have lost so much as 4 per cent by honest wear, and any loss exceeding, say, $6\frac{1}{2}$ per cent must be due to maltreatment. When that is the case, there is no ground for requiring the State to bear the whole loss. It is only equitable that the holder should contribute towards it. Accordingly, in 1899 we issued rules, not based on any provision of the law, but on executive authority, that coins reduced in weight by more than $6\frac{1}{2}$ per cent should be received at a slightly reduced rate; and that when the reduction of weight amounted to more than 25 per cent, or one-fourth of the whole, the coin should be cut and returned. This is based exactly on the provisions of the English law, with the exception that our rates are much more liberal towards the public. In England, for instance, the loss of weight allowed on a sovereign is only 3 grains or about $2\frac{1}{2}$ per cent.

"The Bill as revised merely takes formal power to do by rule what we have been doing for the last seven years by executive order. There is no ground whatever for the extraordinary apprehension, which has been expressed in one quarter, that the new law will necessitate the actual weighing of each individual coin received in payment of rent or in the course of business: and I will venture to hazard the prediction that when the Bill becomes law, no one will be aware that any change whatsoever has been made.

"I do not think I need offer any observations on any of the other clauses of the Bill."

The motion was put and agreed to.

The Hon'ble Mr. BAKER moved that the Bill, as amended, be passed.

The motion was put and agreed to.

PRESIDENCY SMALL CAUSE COURTS BILL.

The Hon'ble MR. RICHARDS presented the Report of the Select Committee on the Bill further to amend the Presidency Small Cause Courts Act, 1882.

INDIAN STAMP (AMENDMENT) BILL.

The Hon'ble MR. BAKER presented the Report of the Select Committee on the Bill further to amend the Indian Stamp Act, 1899.

INDIAN MERCHANT SHIPPING (AMENDMENT) BILL.

The Hon'ble MR. HEWETT presented the Report of the Select Committee on the Bill further to amend the law relating to merchant seamen.

The Council adjourned to Wednesday, the 21st March, 1906.

SUPPLEMENT TO
The Gazette of India.

No. 9.}

CALCUTTA, SATURDAY, MARCH 3, 1906.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 hrs., on Thursday, the 1st March 1906, based on the India Daily Weather Reports of the period.

The storm which entered north-west India on the 21st, disappeared at the beginning of the week. Weather became settled, and strongly marked anticyclonic conditions prevailed during the remainder of the week over northern and central India. On the 23rd general rain fell in north-east India and the submontane districts of the Himalayas, and very light rain in the Indo-Gangetic Plain (west) and the Jaipur sub-division. The principal amounts recorded were:—Jessore 2·06", Burdwan 1·59", Balasore 1·23", Calcutta 1·09" and Berhampore 1·07". During the next twenty-four hours the rainfall practically ceased over northern India—the only stations reporting falls over ten cents, being Chittagong, Burdwan, Bahraich, Bareilly, Dehra Dun and False Point; small amounts were also reported from Maymyo, Lashio and Bhamo.

On the 25th well marked cold weather conditions were established over northern India, and rainfall was restricted to Upper Burma and the extreme north-west of India, while on the 26th it was confined to the latter area. During the remainder of the week the weather was dry over the whole country, except in the south and east of the Peninsula: in this area rain occurred at Cuddalore on the 26th, in the Waltair sub-division of the East Coast on the 27th, in the Madras division on the 28th and 1st and in South India from the 27th to 1st. The chief falls were:—Bangalore 0·88" on the 27th, Wellington and Kodaikanal about two and a half inches on the 28th and Nellore about one inch on the 1st. Snow fell on the Himalayas on the 23rd and on the west Himalayas from the 25th to the 28th, the total fall during the week amounting to about 5 feet at Sonemarg and 4 feet at Murree.

The rainfall during the week has been in excess of normal in the interior districts of Burma, in north-east India, the United Provinces, the Lahore sub-division of the Indo-Gangetic Plain, the Himalayas, Konkan, South India and the East Coast. The rainfall from the 1st December to date is now in defect in the Jhansi, Jubbulpore, Akola, Calicut and Madura sub-divisions and the Madras division, normal in the Cawnpore, Lahore and Jaipur sub-divisions, and more than 20 per cent. in excess elsewhere.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 24th February 1906.

Burma.—About one quarter of an inch of rain fell in Akyab, one and a half in Bhamo one and a quarter in Katha, and amounts varying from 7 cents to 78 cents in eight other districts of Upper Burma including the Northern Shan States. Threshing and winnowing are nearly completed in Lower Burma. Ploughing for dry weather paddy in Pakokku and for early wet weather paddy in Kyaukse has commenced. Transplantation of dry weather paddy is completed in Kyaukse, in the Momeik township of the Ruby Mines District, and in parts of Katha. Gathering of onions and beans in the Taungdwingyi sub-division of Magwe and sowing of island crops in the Magwe sub-division have been completed. Reaping of wheat and gram has commenced in Sagaing and that of jowar is completed in Lower Chindwin. Ploughing for sessamum has commenced on low lands in Kyaukse. The condition of the standing crops is generally good but the paddy crop in parts of Kyaukse is threshing out lighter than last year and the outturn expected is below normal. The price of paddy has risen at Rangoon, Pegu, Thayetmo, Myitkyia and Kyaukse and has fallen at Prome, Pyapon, and Amherst.

Eastern Bengal and Assam.—The weather is cold and cloudy. There was slight to moderate rain in all districts during the week. Pruning of tea is in progress. The prospects of the crops are generally fair. Lands are being prepared for early rice and jute. Fodder is insufficient in parts of Bogra, Sylhet, and the Khasi and Jaintia Hills. Prices of common rice :—Chittagong and Sibsagar 11; Rampur Boalia, Silchar, Gauhati, and Tezpur, 10; Bogra, Mymensingh, and Sylhet 9½; Dinajpur 9⅞; Pabna 9½; Jalpaiguri, Rungpur, Dacca, Rangamati, Dhubri, Nowgong, Dibrugarh and Tura 9; Faridpur, 8½ to 9; and Comilla and Noakhali 8½ seers per rupee.

Bengal.—Rain was general throughout the Province. The fall was rather heavy in most of the districts of the Burdwan and Presidency Divisions and also in parts of Monghyr, the Sonthal Parganas and Manbhum. The rainfall is reported to have caused some damage to poppy and other spring crops, especially the pulses and oilseeds. Fodder is still insufficient in parts of Darbhanga. Water-supply is plentiful. The price of common rice has risen in eight and is stationary in the remaining districts. It continues still high in the districts of Hooghly, Howrah, Nadia, Jessore, Khulna, Monghyr and Purnea.

United Provinces.—More rain was received during the week in every district of the Province but the fall generally was lighter than in the preceding week. The standing crops are now doing well in most districts and extra crops have been or are being sown in several. The condition of the poppy crop is also good. Pressing of sugarcane continues all over the Province. The crops in parts of Partabgarh and Fatehpur have been seriously injured by hail which had also caused some slight damage in parts of nine other districts. The condition of agricultural stock is generally fair but cattle are suffering from want of fodder which continues scarce and dear in fifteen districts. Prices are still high but are falling or have fallen in sixteen districts, they have risen slightly in Shahjahanpur, Hardoi, Sitapur, Jaunpur, Gorakhpur, Hamirpur, and Banda. The total number of persons on relief at the end of the week was 159,000.

The weekly report on the famine and scarcity is as follows :—The rainfall in distressed districts was :—Jalaun 65, Jhansi 16, Hamirpur 21, Cawnpore 73, and Muttra 63 cents. The rain will provide some pasture and improve growing crops but it has not materially affected the situation. Harvesting has commenced in parts of Cawnpore, Jhansi, and Hamirpur. Scarcity of fodder continues and loss of cattle is reported from Konch in Jalaun. The cheapest food grains are jowar and maize which are selling at between eleven and a half and twelve and a quarter seers per rupee. The physical condition of the people is normal. The numbers on relief have risen and are now as follows :—workers Jalaun 47,000, Jhansi 17,000, Muttra 10,000, Cawnpore 12,000, Hamirpur 15,000; on gratuitous relief Jalaun 31,000, Jhansi 13,000, Muttra 6,000, Cawnpore 1,000, Hamirpur 7,000; total workers 1,01,000; total on gratuitous relief 58,000; grand total 1,59,000. Some falling off in the numbers is expected during harvesting operations.

Punjab.—There was good rain throughout the Province during the week. Prices show a slight downward tendency. Sowings of extra spring and ploughings for autumn crops are in progress. Sugarcane is being sown in Delhi. The standing crops have benefited greatly by the recent rain and are generally in good condition. Crops have been

slightly damaged by hail in Ambala and parts of Amritsar and Sialkot and by locusts in parts of Multan. Cattle are still weak and suffering from insufficiency of fodder in most districts. Fodder is still scarce except in Jullundur, Rawalpindi, Lyallpur, and Multan; leaves of trees, etc., are being substituted for fodder. Green fodder is available to a limited extent in Ferozepore and Sialkot. There is no complaint about the water-supply. The daily average number of workers on four famine works in Rohtak was 4,169 against 3,279 last week. In Gurgaon the test works have been closed.

North-West Frontier Province.—Good rain ranging from two to four inches has fallen all over the Province and has much benefited the standing spring crops which are now assured against drought. Extra spring crops are being sown. The condition of the standing crops is now excellent and the area is above average. Sugarcane is being pressed in Bannu and the outturn is average. The rivers have been in flood and there has been some hill torrent irrigation in Dera Ismail Khan. Fodder is sufficient except in the Daman tract of Dera Ismail Khan. Prices are falling slowly. Prices:—wheat 13 to 15, gram 14 to 19, maize 17 to 20, and bajra 15 to 16, seers per rupee.

Jammu.—There was heavy rain during the week. Prices are stationary. Prices:—wheat 13 to 22 and maize 16 to 34 seers per rupee. The condition of the standing crops is good. Fodder is sufficient.

Kashmir.—The weather is cloudy and cold. There was heavy snow during the week which has disappeared now. Prices are stationary.

Rajputana—Rain is reported from all States and Ajmer-Merwara, the maximum fall was in Bikaner two inches five cents and the minimum in Tonk twelve cents. Spring crops have generally benefited especially in Bikaner but the rain is too late to extend cultivation. As regards pasturage and fodder there is no change since last week except that Bikaner now reports sufficient grass till next monsoon. Some damage to opium is reported from Mewar owing to rain. Prices are practically unaltered. The numbers on famine relief were:—Ajmer-Merwara 54,053; in Native States 31,628; on test works:—North Mewar 2,656, Shahpura 852, Tonk 1,153, Jaipur 4,430, Alwar 2,745; on gratuitous relief:—North Mewar 471, Shahpura 57, Tonk 84; grand total 99,138 or an increase of 997.

The weekly report on the famine and scarcity is as follows:—Ajmer-Merwara—on works:—Ajmer 17,550, Merwara 20,274; on gratuitous relief:—Ajmer 7,505, Merwara 8,724, total 54,053 or an increase of 842. Prices in both districts are 10½ seers per rupee. Native States:—Marwar on works 3,543; on gratuitous relief 1,740, total 5,283; Kishangarh on works 2,405; on gratuitous relief 2,668, total 5,073; Eastern Agency on works 17,457; on gratuitous relief 4,815, total 22,272. Prices:—Marwar 11½, Kishangarh 12½, Karauli 9½, Bharatpur 11½, Dholpur affected area 10½ seers per rupee. The prospects of the spring harvest are distinctly improved by the recent rain.

Central India.—There was general rainfall during the week in parts of Gwalior and Malwa, at Pachal in Bhopal and in Bhopawar. Irrigation of spring and harvesting of autumn crops are in progress. The standing crops are fair in Bhopal, Malwa and Bhopawar; average in Bundelkhand; and indifferent in Baghelkhand. Irrigated spring crops are normal in parts of Gwalior. The probable outturn is fair in Bhopal and Bhopawar, and below average in Baghelkhand, Bundelkhand and Malwa. The crops have been slightly damaged in parts of Gwalior and Malwa. Agricultural stock is bad in parts of Gwalior; fair in Bhopal; good in Baghelkhand; and average in Bundelkhand. Pasturage is bad in parts of Gwalior, and scarce in north of Bundelkhand. Prices are high in Gwalior; are rising in Bhopal; continue high in Baghelkhand; and are steady in Bundelkhand. Opium has been slightly damaged in parts of Gwalior.

The weekly report on the famine and scarcity is as follows:—The general position in Gwalior and Bundelkhand is unaltered. Some rain has fallen over the affected area in Gwalior which will do considerable good to the standing crops in unirrigated tracts and contribute towards maintenance of water in wells. Prices of staple food grains vary from 11½ to 13 seers per rupee in Bundelkhand. The numbers on works were as follows:—In Gwalior 25,000, on gratuitous relief 4,500, total 29,500; in Orchha, Datia, Samthar, Baoni, Charkhari, Bijawar, Chhatarpur, Pauna, Sarila, and Jagirs on works 23,000; on gratuitous relief 3,250; total 26,250; grand total 55,750.

Central Provinces.—With the exception of very light showers in Saugor, Raipur, and Bilaspur the week has been rainless. The weather has been generally clear and the mornings cold. The harvesting of winter crops is in progress and threshing has commenced in a few districts; the outturns are fair to good. Damage estimated at 60 per cent. of a normal crop has been caused by hail in a few villages of Seoni. Caterpillars have appeared in two circles of the Jubbulpore tahsil but no appreciable damage has been caused to the standing crops. The preparation of land for autumn sowings continues. The price of wheat has fallen in nine districts but has risen by 2 seers in Buldana; elsewhere prices are steady with a tendency to fall.

Baroda.—For week ending 17th February. The numbers on relief were as follows :—on works 2,780 ; on gratuitous relief 165 ; total 2,945.

Bombay.—During the past week there was general and beneficial rain in Sind and elsewhere slight showers. There is no appreciable change in the condition of standing crops. The irrigated crops are generally fair but water in irrigation canals and wells is giving out. Cotton picking is still in progress in Gujarat, the Karnatak, Baroda, Cutch, Rewa Kantha and Kolhapur. The drinking water-supply is running short in some affected districts and measures are in progress for its improvement from Government grants and takavi advances. The condition of cattle is deteriorating in affected districts and their sale continues in Ahmednagar and Bijapur at prices below normal. Measures for the supply of fodder by Government agency to affected districts are in progress. Local fodder is two to three times dearer than normal. Stocks of food grains are generally sufficient. The rate per rupee is 28 to 60 per cent. over the normal in the Deccan, from 40 to 50 per cent. in the Karnatak, and from 10 to 30 per cent. elsewhere. Relief works are in progress in Belgaum, Ahmednagar, Bijapur, and the Southern Maratha Country States. The daily average numbers on relief works for the week ending 17th instant were :—Ahmednagar 2,243, Bijapur 783, Belgaum 3,249, Kolhapur 550, Sangli 1,036, Jath 211, Mudhol 261, total 8,333 ; dependants :—Ahmednagar 300, Bijapur 326, Belgaum 784, Jath 68, Mudhol 74, total 1,552 ; the numbers on test works are increasing in Satara, Bijapur, and Aundh, the numbers on the last day of the week were :—Poona 339, Sholapur 505, Satara 548, Bijapur 729, Belgaum 138, Jath 23, Aundh 136, total 2,418. The test work opened in Phaltan does not attract labourers. The numbers on gratuitous relief were :—Ahmednagar 4,596, Poona 1,048, Sholapur 2,215, Bijapur 4,481, Belgaum 3,776, Dharwar 12, Jath 995, Daphlapur 51, Aundh 92, Kolhapur 48, Sangli 111, total 15,435. Distress is gradually increasing in Ahmednagar, Poona, Sholapur, Bijapur, and the Southern Maratha Country States, but is not yet acute. Petty cultivators are coming to the end of their resources but do not yet come to the works in large numbers. The condition of the people on works is fair to good. Emigration from affected tracts is decreasing. There is no aimless wandering and no emaciation is noticed except among paupers in Sholapur, and in one taluka of Belgaum. Charitable fund committees are being organised in Bijapur and Belgaum.

Hyderabad.—There was no rain during the week. The spring harvest is progressing. The late rice crop is in good condition. Fodder and water scarcity exists in 29 and 16 taluqs, respectively. The attendance on road works in the affected taluqs was :—2504 persons ; the poor-house at Ashti 35 persons. The price of jowar has risen from half to four seers per rupee in 26 taluqs and fallen from half to two seers in 10 taluqs. Prices :—wheat 9 ; coarse rice 7½ ; and jowar 14½ seers per rupee.

Mysore.—Prices are steady. Paddy and sugarcane are being sown in parts and the crops are in fairly good condition. Prospects in Kolar depend on early rainfall and are not encouraging in Tumkur, but are fair in other districts. Cattle are healthy except in parts of Tumkur, Hassan and Chitaldroog. The supply of water and fodder is limited in Chitaldroog and in parts of Tumkur, Mysore, Hassan and Shimoga.

Coorg.—Picking of coffee is completed and threshing of rice continues. Prices of food grains are normal. Water and fodder are sufficient.

Madras.—The rainfall of the week was good in Ganjam ; fair in Godavari and the Vizagapatam littoral ; light in Kistna, Madura, Vizagapatam agency, Guntur, Cuddapah, Chingleput, and North Arcot ; there was no rain elsewhere. Irrigation supplies are insufficient except in Kurnool, Cuddapah, parts of the Carnatic, North Arcot, the West Coast districts and Nilgiris. Ploughing, sowing, weeding and transplanting are in progress in parts. The standing crops are generally fair but some in parts of Bellary, Coimbatore, Trichinopoly, and Madura require more rain and some in parts of Anantapur, Salem and the Southern districts are withering. Harvests continue with outturn poor to normal and bumper. Pasture is sufficient except in parts of the Circars, the Deccan, Salem, Coimbatore, Tinnevely, and South Canara. Fodder is scanty in parts of South Arcot, Salem, Coimbatore, Tanjore, and Madura. The condition of cattle is generally good. The price of rice is stationary in six districts ; has fallen in eleven ; and has slightly risen in six. The prices of millets have fluctuated as follows :—ragi is stationary in eight districts ; has fallen in seven ; and has slightly risen in six. Cholam is stationary in four districts ; has fallen in six ; and has slightly risen in four. Cumbu is stationary in nine districts ; has fallen in one ; and has slightly risen in five.

STATISTICS.

ORDERS OF THE GOVERNMENT OF INDIA ON THE REPORT OF THE
COMMITTEE ON INDIAN TRADE STATISTICS.

RESOLUTION.

No. 1650—1660-3, Calcutta, the 2nd March 1906.

READ—

Resolution by the Government of India, Finance and Commerce Department,
No. 401 S. R., dated the 19th January 1905.

Report of the Committee on Indian Trade Statistics.

The Government of India have had under their consideration the report presented by the Committee appointed in the Resolution quoted above. The recommendations which have been made by the Committee have the general approval of the Government of India, who are of opinion that the adoption of these suggestions will do much to improve the accuracy, and to increase the usefulness, of the trade statistics at present published by the Government. They desire to record their appreciation of the manner in which the difficult duty entrusted to the Committee has been carried out, and to tender their thanks for the valuable suggestions which have been made. In this Resolution only the more important changes advocated in the report are dealt with; all subsidiary matters will be subsequently disposed of under the orders of the Government of India, or of the Director General of Commercial Intelligence.

2. In paragraph 20 of their report the Committee recommend that, in addition to the information based on the present system of registration according to the "port of shipment," an attempt should be made to compile statistics of the import trade according to the "country of consignment," as defined in paragraph 15. The Government of India approve this recommendation; but they consider that the supplementary tables should not, as is proposed by the Committee, be compiled in such a manner as to show merely the extent to which the total trade with each country is affected by the adoption of the "country of consignment" as the basis of registration, as compared with the statistics prepared under the present system. They are of opinion that it is necessary both in the interests of the Government and of merchants, that as accurate information as it is possible to obtain should be available in respect of the origin of all imports of any appreciable magnitude; and they are therefore pleased to direct that the statistics showing the imports from foreign countries into India shall be prepared under both the systems referred to, and that these statistics shall be published, concurrently, for a period of five years. If the new system proves satisfactory in actual practice, it can then be definitively adopted without occasioning any serious break in continuity owing to the abandonment of the present method of registration.

3. Similar remarks apply to the recommendation in paragraph 24 of the report regarding export statistics. Although, as the Committee point out, the discrepancies between the figures compiled according to the "final port of destination" and those based on the present indefinite system will not be of much practical importance, yet the Government of India consider it most desirable that the import and export statistics should be treated in precisely the same manner. The statistics will then be more useful for comparative purposes and will also be more readily intelligible. In this connection, it may be added that the Government of India agree that the procedure recommended in paragraph 26 (iii) of the Report should be introduced.

4. The forms suggested for the bill-of-entry and shipping bill, which are referred to in paragraphs 61 and 62 of the report, are approved by the Government of India, and they should now be prescribed for general adoption by the Chief Customs Authority in each maritime Province, under sections 86 and 137 (a) of the Sea Customs Act, 1878 (VIII of 1878). As suggested by the Committee, no alterations in these forms should be made without the previous sanction of the Government of India.

5. The Government of India concur in the remarks and proposals made in paragraphs 47, 48, 50(8), 58, 59 and 72 of the report, and they desire that action may now be taken by the Local Governments concerned to give effect to these suggestions and recommendations.

ORDER—Ordered, that a copy of this Resolution, together with 50 copies of the Report of the Committee on Indian Trade Statistics, be forwarded to the

Government of Madras, Revenue Department
Bombay, Revenue Department
Bengal, Financial Department
Burma, Revenue Department
Eastern Bengal and Assam, Financial Department, for information and further necessary action.

[* Copy of notes will follow in print.] Ordered, also, that a copy* of this Resolution, together with a copy of the Report of the Committee be forwarded to the Finance Department
Director-General of Commercial Intelligence for information.

Ordered, also, that a copy of this Resolution, together with $\frac{1}{2}$ copies of the Report of the Committee, be forwarded to the President
Members of the said Committee, for information.

Ordered, also, that the Resolution, and the Report of the Committee, be published in the Supplement to the *Gazette of India*, for general information.

W. L. HARVEY,

Secretary to the Government of India.

REPORT

OF THE

COMMITTEE ON INDIAN TRADE STATISTICS

The orders under which our Committee was constituted directed us to undertake the revision of the statistical publications relating to trade and cognate subjects, with the object of rendering them more accurate and more generally useful. We were instructed more particularly to consider certain changes which had been proposed in the system of registering the external trade of India, as well as other suggestions, which had been made from time to time, for the improvement of the statistical publications.

In compliance with these orders, our examination has extended to the following publications:—

- I.—The Statistics of the Sea-borne Trade and Navigation of British India with the British Empire and Foreign Countries.
- II.—The Annual Statement of the Coasting Trade and Navigation of British India.
- III.—The Annual Statements of the Sea-borne Trade and Navigation, both foreign and coasting, of the different Provinces.
- IV.—The Accounts of the Rail and River-borne Trade of British India.
- V.—The Accounts of the Land Frontier Trade of British India.

We propose to discuss these publications in the above order, and to state what alterations, whether in the methods of registration and compilation, or in the published accounts, will in our opinion conduce most favourably to the desired results.

I.—STATISTICS OF THE SEA-BORNE TRADE AND NAVIGATION OF BRITISH INDIA WITH THE BRITISH EMPIRE AND FOREIGN COUNTRIES.

2. We have considered these statistics under the following general heads:—

- | | |
|--|---|
| <p>Statistics of Sea-borne Trade.</p> <p>(i) The goods to be registered.</p> <p>(ii) The methods of checking quantities and estimating values.</p> <p>(iii) The time and place of registration.</p> <p>(iv) The means of obtaining information and the forms and procedure in registration and compilation.</p> <p>(v) The arrangement of the results in returns and publications.</p> | <p>(i) Registration of the origin and destination of goods.</p> |
|--|---|

(i) *Registration of the origin and destination of goods.*

3. The first and most important matter which we have considered is that of the countries which should be registered in the statistics as those of origin and destination; or, in other words, what should in each case be regarded as the country from or to which goods are imported or exported. For imports the existing practice is to register the country containing the port from which the goods were shipped direct to India. This, when transshipment takes place, means the place of transshipment and not the original port of despatch, except in the case of goods received on a through bill of lading. Such goods are ordinarily credited to the country containing the port at which the bill of lading was given, but we find that this rule has not been rigidly observed. For exports the practice has been to record, what the form of shipping bills in use at the most important ports describe as the port or place of destination, which, we believe, has been usually interpreted by declarants as the place of final discharge from shipboard. The existing

practice as regards both imports and exports is understood to have originated under orders issued in 1875, and corresponds generally to that adopted in the United Kingdom.

4. For many years the exports to Egypt, recorded in the Government

Defects resulting from existing practice.

accounts of sea-borne trade, were unduly exaggerated by the inclusion of cargoes which were sent to Suez or Port Said for orders (that is, with a destination which was undecided at the time of leaving India, and would be determined on arrival at the Egyptian port), and which subsequently passed out of those ports in the same bottoms. In 1903 it was decided that an attempt should be made to ascertain and record the ultimate port of destination of such goods, and orders were issued accordingly. Meanwhile attention had been drawn to the fact that the Indian accounts of sea-borne trade were defective in other points, which tended to obscure the real course of trade. In particular it was pointed out that the trade recorded with large distributing ports such as Colombo, Singapore, and Hongkong in the East, and London, Hamburg, and Antwerp in the West, included considerable quantities of goods, which had merely passed through these ports in transit; while inland countries such as Switzerland, which possessed no seaboard, did not appear at all in the Indian accounts. Various proposals were put forward with a view to remedying these defects, but no satisfactory conclusion was arrived at. In the meantime the same question had arisen in the United Kingdom, and representations were made to the Board of Trade by several British Commercial Associations suggesting that endeavours should be made in the case of imports to specify the countries of original consignment. In consequence of these representations, it was decided that an attempt should be made by the English Customs to record statistics on the basis suggested, in addition to those relating to the countries of shipment, which were still to be recorded as before. The question then arose whether it would not be desirable to follow the example of the Board of Trade in the Indian registration of trade, and it was decided to refer the whole question for the consideration of our Committee.

(a) Imports.

5. In dealing with imports we have attempted first to ascertain the extent

Comparison of Indian figures with those of other countries.

to which the Indian statistics fail to record the real course of the foreign sea-borne trade. With this object in view we have in the first instance examined the published statistics of the United Kingdom and various other countries, in order to ascertain how far the figures of exports to India, as shown in those accounts, differ from the imports into India from those countries as shown in the Indian accounts.

In the trade with Europe and America the countries of transit and transshipment to which goods are wrongly credited include, chiefly, the United Kingdom, Germany, Belgium, Holland, France, Italy, and Austria, whilst in the trade with China, Japan, Australasia, and other countries or islands in the Pacific or Indian oceans, the chief centres of error are, as already mentioned, the Straits, Hongkong, and Ceylon. The following table shows the divergencies traced in the accounts of imports into India for 1902, the last year for which we have complete figures for all the countries mentioned :—

COUNTRY.	IMPORTS INTO INDIA.		Difference from the Indian accounts.	Percentage of difference on Indian accounts.
	As shown in Indian accounts	As shown in accounts of each foreign country.		
	£	£	£	Per cent.
United Kingdom	*39,115,805	*36,641,950	+2,473,855	+6
Belgium	1,945,098	803,700	+1,141,398	+58
Germany	1,481,485	2,899,550	-1,418,065	-96
Austria-Hungary	2,407,895	1,852,066	+555,829	+23
Italy	577,289	1,132,760	-555,471	-96
Holland	414,219	116,666	+297,553	+72
France	970,979	1,029,814	-58,835	-6
Straits	1,578,330	1,125,194	+453,136	+29
Ceylon	515,577	445,832	+69,745	+13

* Including Government stores.

6 In estimating the value of any conclusions drawn from the above figures, it must not be overlooked that anything approaching an exact reconciliation between the trade statistics of different countries is a recognized impossibility. We have eliminated from the published figures of French and Belgian trade with India the figures of the trade between those countries and Ceylon and the Straits, which they treat as part of India; and a similar deduction has been made from Austrian exports on account of trade with Ceylon. But other sources of error remain, arising from the different methods of registration and classification employed, which it is impossible to eliminate. Thus, the differential registration in the United Kingdom of free goods in transit on a through bill of lading from goods in transit under bond, put the comparison with that country's figures on an altogether special footing. Again all values of Indian imports are naturally higher than the corresponding values recorded by the exporting countries, since the former include freight and charges to India; while the valuations for Italy seem unreliable and in the case of one article (Coral) give an immensely exaggerated view of the trade. We recognise further that it is not altogether safe to draw conclusions from the figures of a single year, though we find that on the whole the results for other years do not greatly differ in respect of the countries for which the discrepancies are most marked.

7. However, after making due allowance for the various considerations above indicated, it is apparent that the general results are largely what might be anticipated from a study of the routes followed by the trade of different countries. It is known, for instance, that owing to the excellent canal systems of Germany and Belgium, much of the trade of Central Germany and the Rhine Valley, and even of a portion of Austria, finds its outlet at Antwerp, and that the exports from Marseilles and Trieste include a certain quantity of Swiss and Italian goods. On the other hand, goods from Denmark and Sweden are consigned to Hamburg, and are reshipped from thence to India. Similarly, in the eastern trade, imports of gold and unwrought copper at present credited to Ceylon in our accounts must represent cargoes transhipped from other countries, probably Australia, whilst the matches, silk, and sugar attributed to Singapore have in reality come from Japan, China, and Java.

The conclusions therefore that appear to us to stand out from a consideration of the figures in the above table are that whilst on the one hand our Indian import statistics do not give a misleading impression of the trade, when large groups of countries are considered, on the other hand they tend to exaggerate the value of the trade to those countries which have important distributing centres.

8. It is of interest in this connection to observe that precisely the same conclusions have been arrived at by the Board of Trade in regard to the import trade of the United Kingdom on a study of the results obtained from the provisional registration of the country of consignment to which reference has already been made.

The following table, which is taken from a Memorandum* issued by the Board of Trade, shows the value and proportion of the imports into the United Kingdom from various groups of foreign countries and British Possessions during the first six months of 1904, distinguishing the value imported from the value consigned from each group.

Source.	GOODS IMPORTED.		GOODS CONSIGNED.	
	Total.	Per cent.	Total.	Per cent.
<i>Foreign Countries.</i>				
In Europe	£ 115,529,274	42.5	£ 113,629,706	41.8
Out of Europe	97,699,982	36.0	99,072,665	36.4
Total Foreign Countries	213,429,256	78.5	212,702,371	78.2
<i>British Possessions.</i>				
Self-governing Colonies	32,764,085	12.0	33,511,066	12.3
Other British Possessions (including India)	25,703,142	9.5	25,687,946	9.5

* Second series of Memoranda, Statistical tables, and charts prepared in the Board of Trade with reference to various matters bearing on English and Foreign Trade and Industrial conditions, 1904, pages 348 and 349.

The general conclusion to be drawn from these figures is thus summarized by the Board of Trade—

The general result of the analysis is to show that a certain amount of our imports from non-European sources reached us indirectly through Europe, so that in our statistics of imports classified according to country of shipment, the European element is exaggerated, and the non-European element diminished to the extent of about £1,900,000 in the six months.

This difference is too slight to have any material effect on calculations made in previous calculations with regard to the proportion of our imports derived from various groups of countries and colonies.

Nevertheless it is pointed out that as a means of adjusting the trade with individual countries the corrections are conspicuous; we quote the following passages from the same Memorandum :—

‘Turning to Imports from particular countries we find that, as was to be expected, the most conspicuous instances of difference are those to which attention has frequently been directed in Board of Trade publications, *vis.*, the countries in Northern Europe through which much of our import trade with Central and Southern European States must naturally pass. Thus it is seen that during the first six months of this year our direct imports from Germany were to the value of 16·5 million £, including 3·2 million £ worth of goods consigned to the United Kingdom for other countries, largely Austria-Hungary and Russia, but that she also sent us over 10 million £ worth of her own produce by way of other countries, mainly Holland and Belgium. Again, more than half of our direct imports from Holland are seen to consist of goods consigned to us by other countries, principally Germany. Belgium and France are also striking examples, being the countries through which the bulk of our imports from Switzerland and from Italy largely come in transit. Belgium also sends us a large amount of goods really consigned by Germany.

On the other hand, Switzerland, which has not figured in our import returns at all hitherto, owing to her having no seaboard, is seen to have been the country of consignment of nearly 4 million £ worth of goods in the first six months of 1904.’

9. The conclusions suggested by the comparison of our Indian Statistics

Results of examination of Bills of Entry at the different ports.

with those of other countries and from the results obtained in the United Kingdom as above described, have been further confirmed by the examination of about 800 bills of entry selected at random at the different ports, in order to test, independently of the foreign accounts, the differences that might be anticipated if imports were traced through to the countries from which they originally started for their Indian destination. This test indicates that for the United Kingdom and the chief European countries concerned a change would have been effected in the registration of from 10 to 20 per cent. of the consignments received.

10. It may therefore be stated, as the result of our enquiries, that our

General conclusions as to the extent to which Indian Statistics are inaccurate.

present system of classifying imports according to the country of shipment yields results which are generally accurate except in respect of particular and well-defined sections of trade: and that, where the results are inaccurate, the inaccuracy lies rather in the distribution of trade between individual countries belonging to particular groups than in the distribution between different groups of countries. Finally, so far as any estimate is possible, it may be said that these inaccuracies affect from 10 to 20 per cent. of the total import trade.

11. Assuming that our statistics of foreign imports under the existing

Possible alternatives to existing system.

system of registration are to this extent misleading, we have proceeded to examine whether any other system, as the basis of registration, is likely to yield more accurate results. Upon a full consideration of the question there appeared to us to be three possible alternatives, which might be adopted, in place of the country of direct shipment as at present registered. These are the country of origin, the country of purchase, and the country of consignment.

12. Before proceeding to discuss these alternatives, it will be convenient to

Sources of information available.

indicate briefly what sources of information are available to the Customs authorities for checking any declaration, which may be made by importers, regarding the country from which their goods have come. Such a check may be afforded either by the documents relating to the goods in the possession of the merchant or the shipping agent, or by the marks on the goods themselves.

The documents usually available in India are (a) the ships' manifest, (b) the bill of lading, (c) the invoices. The ships' manifest, which contains a complete list of all goods imported in the vessel, merely shows the port at which the goods were shipped on board the vessel, and, unless there is a through bill of lading, does not as a rule show whether cargo has been transhipped from another vessel or not. The bill of lading, which is the receipt for the goods granted by the shipping company to the shipper, is, so far as it goes, the best indication of the place from which the goods are shipped. As, however, through bills of lading are by no means generally granted, it is frequently impossible to say in the case of goods, *e.g.*, shown on a bill as shipped from London, or Singapore to Calcutta, whether the goods to which it refers had been originally shipped from those ports or had been transhipped at those ports from some other vessel. Original manufacturer's invoices, where they exist, afford information, which may generally be regarded as reliable, regarding the country from which the goods have come, but such invoices are by no means generally available. In the case of foreign goods purchased by a London agent to the order of an Indian importer, the agent frequently prefers not to send on the original invoice; or if it is forwarded to indicate the specification of the goods, he is sometimes careful to remove the heading or anything which might furnish a clue to the firm or locality from which the goods were obtained. Again, in the trade with the Far East and the Persian Gulf, especially when such trade is carried on by native firms, no regular invoices exist. Marks on goods, when applied under the Merchandise Marks Act, indicate the country of origin; but though this may be, and probably in a majority of cases is, identical with the country of purchase, or the country of consignment, such marks cannot, taken by themselves, be regarded as affording any reliable indication on this point.

13. The adoption of the country of origin as the basis of registration

Country of origin. appeared at first to offer many advantages. The administration of the Merchandise

Marks Act has made the expression familiar both to importers, and to the Customs officers who have to check their declarations; whilst the balance of mercantile opinion as expressed by the Chambers of Commerce, and by the other Associations and individuals who were consulted by us, was found to be decided in favour of its registration. Moreover, the form of the bill of entry in use in the Provinces of Bengal, Madras, and Burma already provided for a declaration of the country of growth, produce, or manufacture of the goods imported, whilst at Bombay and Karachi we were informed by the Customs authorities that no difficulty would be experienced in introducing a similar declaration in the forms there in use.

We have, however, after careful consideration, arrived at the conclusion that the disadvantages of this alternative are overwhelming. We may state them, in brief, as follows:—

- (1) Owing chiefly to the difficulties of definition, the attempt to register the country of origin has been condemned by a series of conferences and committees, including the International Statistical Conference at Paris in 1889, the British Committee on Colonial Import and Export Statistics in 1891, and the Committee on the Accuracy and Comparability of British and Foreign Statistics of International Trade appointed by the British Association at their meeting in 1904.
- (2) Although the administration of the Merchandise Marks Act may have led to a reasonably consistent interpretation of the term in India, and would afford materials for checking the declarations of origin by means of the marks on goods, these advantages are liable at any time to be seriously reduced by the repeal of the Act, or even by modifications in its working; as, for instance, if the words 'foreign make' were permitted as a counterindication in place of the name of the actual country of manufacture. Moreover, the Act does not cover imports which, having no marks, require no counterindication.

(3) The registration of the country of origin would place the Indian statistics on a different basis from those of the United Kingdom, whereas the importance of their assimilation with the latter has been repeatedly emphasised.

(4) The Board of Trade's tables show re-exports to the value of about £800,000 of foreign and colonial produce from the United Kingdom to India, a fact of which the Indian statistics would contain no indication if this produce were registered in India according to their country of origin. Moreover, about £75,000 value of this represents wine, some of which may have been warehoused for many years in the United Kingdom, so that for such goods the registration of the country of origin would equally render the Indian statistics a fallacious guide to the course of current trade.

14. The essential difference between the country of origin and the country of purchase is that the one states the country in which the goods are made or produced, while the other states the country in which the goods are purchased. The term purchase is, however, somewhat ambiguous in view of the complex conditions of modern trade. The purchase of goods for the Indian market is to a large extent not a simple exchange between two parties, one selling in one country, and the other buying in the other, because middlemen intervene; and the middleman's country is very often not that from which the goods are sent, nor, very often, is it even a country through which they pass on the way. Thus A in Bombay may send an order to B in London, who indents upon C in Germany, by whom the goods are sent to Antwerp, and shipped from there direct to India without passing through the United Kingdom at all. Further, the case of the middleman who merely passes on an indent, has to be distinguished from that of the merchant who has collected and stocked in anticipation of orders. In the former case the commercial exchange is through the middleman with the original vendor, in the latter it is with the middleman himself, whose transaction with the original vendor has been independently and previously completed. Moreover, in the latter case the goods enter much more decisively into the trade of the country in which they have been collected and warehoused on the intermediate merchant's account than in the former, in which, if they touch the middleman's country at all, it is merely in order to pass through it in transit.

The definition we tentatively adopted as the best guide, amidst these involved conditions, to the country to be declared was *the country of original purchase to order for the particular transaction*; but we found upon consulting the members of commercial associations, and the customs officers at the different ports, that in the opinion of the majority any such definition was likely to prove too complicated in practice to lead to any trustworthy result.

15. If, however, instead of following the commercial transaction and attempting to ascertain the country of purchase, we follow the course of the goods and endeavour, as is now being done in the United Kingdom, to record the country whence the goods are despatched or consigned to India, we believe that the difficulties of definition are much reduced, while we arrive at what is accepted, in Germany at any rate, as leading to the same result; since the country whence the goods are consigned to India will in nearly every case be the country of purchase so far as the Indian importer is concerned. The term consignment has not been defined in England, where its meaning appears to be well understood. In India generally, however, it is not equally well known, while in Bombay the word is used in a somewhat special sense. We would therefore define the country of consignment as *that from which the goods have come whether by land and sea or by sea only without interruption of transit save in the course of transshipment or transfer from one means of conveyance to another*.

16. The meaning of the term as thus defined will, we think, be rendered clear from a study of the following illustrations. It will be seen that in each

Country of purchase.

Country of consignment.

Illustrations.

case the question turns on whether the journey has been continuous from the point of departure:—

No.	Course of goods.	Country of consignment.
(i)	Goods sent from Switzerland by rail to Trieste and shipped immediately for India from there: the journey being continuous.	Switzerland.
(ii)	Goods sent from Sweden on a through bill of lading to Hamburg and transhipped thence for India.	Sweden.
(iii)	Goods sent from Sweden to Hamburg and transhipped immediately for the Indian destination; the journey being continuous though not on a through bill of lading.	Sweden.
(iv)	Goods sent from Austria to Antwerp by Canal and shipped immediately from Antwerp; the journey being continuous.	Austria.
(v)	Goods sent from Japan to Singapore and thence to India either on a through bill of lading from Japan, or on a continuous journey though without a through bill of lading, as in the last two cases.	Japan.
(vi)	Goods of Japanese origin supplied from stock collected at Singapore.	Singapore.
(vii)	Wine of French origin supplied from a Wine Merchant's stock in the United Kingdom.	United Kingdom.
(viii)	Sugar of Austrian origin supplied from a stock collected in Germany on account of an English firm.	Germany.
(ix)	Miscellaneous goods supplied from a London firm from warehouse stock.	United Kingdom.
(x)	Miscellaneous goods ordered from a London firm but shipped from Germany and Belgium and transhipped at London, the journey being continuous.	Germany and Belgium.

17. We have, however, to recognize that the importer may in certain cases be no more able to give us information regarding the country of consignment than regarding the country of purchase.

But the difference is that in the case of the former he will have less difficulty, at any rate, in understanding what is required. Thus to take the case of goods supplied from America but shipped to India from Liverpool. The importer may, in the absence of a through bill of lading, have no information whether the goods were consigned from America or whether there was a break of transit at Liverpool. But he would equally be unable to say whether the goods had been purchased to order in America or supplied from stock warehoused at Liverpool. It is, however, a simpler demand upon a merchant to ask him to consider from what country the goods have come without interruption of transit than to consider in what country they were purchased to order for the particular transaction.

18. It will be apparent that the country of consignment as defined above may or may not be the same as the country containing the port of shipment. Thus in the case of American goods supplied from stock warehoused at Liverpool and despatched to India from that port the two would be identical; and similarly in the case of American goods shipped from New York *via* Liverpool on a through bill of lading, the country of consignment and the country of shipment would be the United States in both cases. On the other hand, the country of consignment and the country of shipment would differ in the case of goods consigned from Germany by rail to Antwerp, and thence shipped to India.

19. We find that no difficulty has been experienced in the United Kingdom in obtaining information regarding the country of consignment, and we do not apprehend that any special difficulty is likely to be experienced in India either on the part of importers in making the declaration or on the part of the Customs officials in checking the declarations made. On this point the test cases examined at the Custom Houses, to which reference has already been made, afford some interesting information. They show

that in 80 per cent. of the 800 instances examined the country containing the port of shipment was identical with the country of consignment, whilst in other instances amounting to 15 per cent. of the total there was material of one sort or other, such as original manufacturing invoices, by which the country of consignment could be determined with reasonable accuracy.

20. We consider that information regarding the country of consignment

Country of consignment to be recorded for imports in addition to country of shipment.

will afford useful material for checking the results obtained under the present system of registration, and placing the

real course of Indian trade in a clearer light, and we therefore recommend that an attempt should be made to record the country of consignment for imports in all cases. We do not recommend that the country of consignment should be substituted in the statistical records for the country containing the port of shipment, which is at present declared. The existing system of registration, resting as it does on an ascertained basis of fact, which can be accurately checked in all cases, possesses many substantial advantages; while, as already indicated, the results which it yields are not largely inaccurate except in respect of particular and well-defined sections of trade. Moreover, it would in any case be premature to make a change of such radical importance until the results obtained from declarations of the country of consignment had been examined and tested over a series of years. We recommend therefore that, following the example of the Board of Trade, registration on the present basis should be continued, at any rate for the present, and that an attempt should be made to record, in addition, information regarding the country of consignment as defined above. The information so obtained should, we think, be published in separate tables as is done by the Board of Trade in England. These tables should indicate, by totals only, how each country's share of the trade would be affected by substitution of registration according to the place of consignment for registration according to the port of direct shipment. In a subsequent section of our report, when dealing with the documents for registration, we have suggested the necessary addition to the forms of bills-of-entry to provide for the additional declaration, and we have also formulated certain instructions for the use of declarants which will, we hope, indicate clearly what is required. We would suggest also the desirability of issuing a circular to the different Chambers of Commerce and other commercial bodies indicating the nature of the change proposed, and inviting their co-operation in the supply of the additional information, which it is desired to collect. Merchants might also, as in England, be invited to include in their instructions to correspondents at home such directions as will ensure correct information being supplied by them also.

21. We have not found it possible to frame any exact estimate of the

Cost of recording additional information.

cost of recording this additional information. We do not, however, consider that

the proposal need involve any serious increase of establishment or expense. As will be explained later, the posting registers in the local offices are usually arranged according to the description of goods, and, under the description, according to the country and port of shipment; all that will be required therefore will be to make a further sub-division so as to show the country of consignment under port of shipment, and to total the monthly results for each article. The increase of work that this process involves will, we hope, be partly met by the economies of labour which we recommend later in other directions. In the Statistical Bureau also the additional abstraction required will not be of a seriously onerous description, provided that the additional information given is limited, as suggested above, to stating the extent to which the total trade with each country would be affected, and does not involve a separate compilation by articles.

22. Before leaving this part of our subject there are two further matters

Port of shipment in case of through bill of lading.

to which we think it desirable to draw attention. In describing the existing

practice in regard to the registration of the port of shipment, we observed that, though the general practice in the case of goods arriving on a through bill of lading has been to record the port at which the bill of lading was granted, this rule has been by no means rigidly observed. The place at which a through bill of lading is granted is clearly the place at

which the goods are shipped direct to India, and in so far as such through bills are available, they afford reliable and valuable evidence of the real course of trade. In order to render this matter clear, we recommend that definite instructions should be issued defining the port of shipment as *the port from which goods are shipped to India, which in the case of goods on a through bill of lading is the port or place at which the through bill was granted.*

23. The forms of Bill of Entry in use in Bengal, Madras, and Burma provide for a declaration of the country of growth, produce, or manufacture. This declaration, which was inserted for reasons connected with the administration of the Merchandise Marks Act, is not found necessary at Bombay or Karachee, whilst we found that it was apt to be carelessly entered, and was in practice seldom, if ever, referred to at Madras and Rangoon. At Calcutta, where it is entered with more care and regularity, no very definite utility can be assigned to it. If it is retained there will be three declarations, each with a different significance, to be entered and checked at the ports in the provinces mentioned, which will, we consider, be a serious cause of confusion. We therefore recommend that this declaration should be abolished.

(b) Exports.

24. Coming now to Exports we find that at present, owing to the want of definite instructions, the port declared on the shipping bill is not in practice invariably the port of final destination as contemplated in such orders as have from time to time been issued. Thus we have found several instances of goods declared for Hongkong or Singapore, and credited to these ports in the statistics, when the marks on the packages showed that they were really destined for San Francisco, or elsewhere. It would be possible to remedy this defect by a change in the form of declaration which would render it clear that the port of final destination, and not the port of transshipment, is required. We would, however, as in our proposals for imports, endeavour to trace goods further than the mere port at which they are discharged from shipboard; whence they may be intended for a further destination by rail or river. Thus goods unloaded at Trieste may be really intended for a further destination in Germany or Switzerland, whereas under existing orders they are credited to Austria as the country containing the port of disembarkation. We propose accordingly to define the country of final destination as *that to which goods exported from India are intended to pass whether by sea and land or by sea only, without interruption of transit save in the course of transshipment or transfer from one means of conveyance to another.* This is the counterpart of the definition of country of consignment for imports. We do not, however, think it necessary in the case of exports to record in the published statistics both the country containing the port of discharge and the country of final destination, since, so far as we are able to estimate, the percentage of cases in which the two will differ will be so small that it can be safely disregarded. The distinction will nevertheless be preserved in the statistical offices and in the monthly returns sent to the Statistical Bureau in respect of all the countries with which the trade is shown by ports, so that a special compilation can be made if required to ascertain to what extent the trade with each country has been affected by the change proposed, but we do not consider it necessary to publish such a statement. We therefore recommend that the statistics should record only the country of final destination as defined above. We recognise that this proposal involves the anomaly that an inland country may from time to time appear amongst the countries of export, whereas it will not appear in the main tables for imports, but this is not a consideration to which we attach importance.

25. We realise that declarations for exports can never be checked as effectively as those for imports, and that the correctness of the results obtained will, as in the United Kingdom, and elsewhere, depend in the main on the care taken by declarants. We see, however, no reason why, provided that special provision is made for certain classes of cases, the declarations ordinarily made should not be reasonably reliable.

26. The classes of cases for which some special provision seems necessary include the following :—

Special cases.

(i) Cases in which the exporter does not know the final destination at the time of shipment, namely,

(a) when goods are shipped 'for orders'; or

(b) when goods are shipped on optional bills of lading.

Subsequent registration of the destination of shipments 'for orders' has been already arranged, and, as these arrangements appear to be working satisfactorily at each port, we recommend that they should be confirmed. Optional bills of lading are issued principally for tea, and the option is exercised at London on or before arrival. We understand that the Indian Tea Association are making enquiries with a view to ascertaining particulars of these cargoes, and the arrangements to be made may be settled locally in communication with them.

(ii) Cases in which the destination is changed after shipment, often without the exporter's knowledge until a considerably later date.

For these we can only recommend inviting the co-operation of exporting firms to communicate the change when known.

(iii) Cases in which the exporter is unwilling to declare the final destination of his goods for fear of disclosing the course of his business to competitors.

We understand that if the country is declared rather than the actual place of destination, this objection will be to a certain extent reduced. In the United Kingdom and Germany, however, exporters are permitted in such cases to report the destination of their goods by letter direct to the Statistical Office, where it is treated as confidential, and we recommend that a similar concession should be granted in India. Exporters would then be permitted to declare on their shipping bills the port only at which their consignments are to be first discharged, with a note that the final destination would be communicated separately. They would be asked to furnish this later to the Statistical Office, where the information would be treated as confidential, and would not appear in the Daily lists and other publications issued locally to subscribers.

List of countries.

27. A list of the countries to be specified in the returns was prescribed by the Government of India in 1875. Since then the commercial intercourse between India and other parts of the world has greatly extended, but no corresponding expansion appears in the list, which has been changed only by an amended enumeration of the countries in Africa, by the separation of Turkey in Asia into the two divisions "Ports in the Levant and the Black Sea" and "Ports in the Persian Gulf", by the amalgamation of European and Asiatic Russia, and by the separate enumeration from April 1904 of all British possessions and dependencies. The deficiencies in the list have, however, largely escaped notice owing to the direction contained in a footnote, that endeavours should be made to show the trade with each port; and as the Custom Houses have followed this direction to the extent of recording in the monthly returns the ports in all unspecified countries, it has been possible to publish, in the Annual Statements of the Trade of British India, tables of the trade with the British Empire and Foreign countries which leave little to be desired in the matter of completeness. This arrangement is, however, open to the objections that the official list is still regarded as the only authoritative guide in the preparation of the provincial statements of trade, and that the absence of any special directions as to which ports are to be distinguished causes the enumeration in the monthly returns sent to the central Statistical Bureau of unnecessary details in some cases, and the omission in other cases of important information. Thus the returns mention thirteen ports in Chili and seventeen in Peru, but none in the United Kingdom, though trade with each British port is recorded at the Custom Houses. We therefore recommend that a revised list should be prescribed showing the countries to be specified in the

Circular Nos. 78 to 81, dated 22nd January 1875.

Defects on existing list

trade returns, and the details as to ports required under each country. The latter, we may add, should include all the Free Ports.

28. We have compared the list of countries, which was in course of preparation for the forthcoming edition of the annual statement of trade, with the list adopted by the Board of Trade, and we do

Differences between Indian and Board of Trade lists.

not find any material differences, except in the following instances in which the classification or published details seem defective; namely, that Turkish Ports in the Red Sea are shown as belonging to Arabia instead of Asiatic Turkey, that no provision is made to record trade with the Portuguese Port of Macao except as a Treaty Port of China, and that the published tables give figures only for the Australian Commonwealth, and the whole of the West India Islands (to be divided from 1904-1905 into the two groups comprising British and foreign possessions respectively), though details for each colony and for each island are reported in the monthly returns. We recommend that in these cases the Board of Trade classification be followed as far as convenient.

29. The trade recorded in the annual accounts is nominally that of British India, but actually it is the trade registered at British Indian ports. This

Trade of British India an incorrect description.

trade can hardly be said to be that of the British Indian portion of the dependency only, that is of the portion directly under British administration; it is rather that of the whole of India and Burma including the Native States. We think that this might suitably be explained in the introduction to the Annual Volumes. We observe also that, as so regarded, there is a certain leakage in the registration of the trade, owing to the portion which passes through the ports of Native States not being recorded. This trade, however, is small, owing to the absence in these States of large harbours for Ocean-going steamers, and to the prohibition of direct transshipment at British ports. We do not therefore consider the leakage at present of sufficient importance to call for any special arrangements; but we consider that its existence should not be lost sight of, and that enquiries should be made from time to time, especially as railway communications with native ports develop, as to whether there has been a sufficient increase in the trade at any Native State port or ports to justify any steps being taken to record the trade.

30. For the trade of French and Portuguese Possessions information is obtained from local authorities and

Trade of French and Portuguese Possessions.

separately published. It would make the Indian Volume more complete if this trade were included in it, but we understand that the information is received too late for that purpose.

31. The Indian tables show merely imports and exports, and do not record goods in transit or transshipment. The

Transactions of Trade to be recorded.

only transit trade is in such goods as are forwarded from the ports without breaking bulk to Persia, the countries beyond Cashmere and elsewhere, which are registered at present as imports into India by sea and again as re-exports over the land frontier; whilst Indian ports are not transshipment centres for foreign countries to an extent sufficient to necessitate a record of these operations. There is no improvement trade or other specialisation such as is recognised in the statistics of some Continental countries. We have therefore no changes to suggest under this head.

(ii) *The goods to be registered.*

32. Goods may be imported and exported (1) as cargo, (2) by post, and (3) as baggage. The statistics distinguish

Goods to be registered.

private merchandise and treasure from Government Stores and treasure: and Indian produce exported from British and Foreign produce re-exported. Goods imported by post fall under a special head in the statistical list.

33. The practice of recording imports and exports of Government Stores appears to be peculiar to India; in the

Imports of Government Stores.

Annual Accounts of the United Kingdom mention is made of the value of Stores exported for the Indian Government, which are expressly excluded from the trade accounts, but no reference occurs to the transactions of the British Government in the statistics of the United

Kingdom, nor to those of their respective Governments in the accounts of any other country whose volumes we have consulted. The position of India is however exceptional, and in respect of imports we would not propose to change the practice; but we have the following recommendations to make with a view to the improvement of the present record.

34. A comparison of the value of stores for the Indian Government, mentioned in the statement of the Annual Trade of the United Kingdom, with the

Stores for Railway Companies.

Indian figures for Stores imported from the United Kingdom, shows an excess in the latter of £1,500,000 on the average per annum in the past five years. The principal cause of the difference appears to be that importations of Stores for certain Railway Companies, which are the lessees of State-owned lines, are treated, under orders passed in 1880, as Government Stores for statistical purposes, although for fiscal purposes they are held to be the property of the companies and not the State. We recommend that this anomaly should be removed, and that all such importations of stores, which are in reality privately owned, should be credited to private trade.

35. We consider that imports of Government Stores are of sufficient importance to merit a place in the Abstracts of trade with the British Empire which appear in the Annual Accounts as well as in the detailed Statement of trade with the United Kingdom, from both of which they are at present excluded.

Imports of Government Stores to be included in Abstracts of trade.

36. Exports of Government Stores are of less importance, and, unlike Imports, are not in most cases the subject of transactions of a commercial

Exports of Government Stores.

character, consisting in a large measure of Stores shipped to supply Indian garrisons, or troops on small expeditions, or the like. When, however, these stores are shipped in vessels chartered by Government they do not appear in the accounts, because these vessels do not clear at the Customs, and no information regarding them is available. In this way during the South African War and the China Expedition great quantities of material escaped record. Further, much of this material having been sold to His Majesty's Government represented a true commercial transaction affecting the balance of trade. Thus the Financial Statement for 1904-05 records the following payments on the part of the Home Government in return for Stores so shipped, namely, £1,471,048 in 1900-01, £521,028 in 1901-02, and £153,266 in 1902-03. We consider that it would usually be impossible, within the period allowed for the publication of the Annual Accounts, to ascertain what proportion of the exports of stores constitute a commercial transaction, so that even if an attempt were made to complete the record by including stores exported in chartered vessels, it would still remain untrustworthy as a guide to the balance of trade. Under these circumstances it does not appear to us worth while that the record should be made complete, and as in its present incomplete state it is of still less value for statistical purposes, we consider that it may suitably be discontinued, and the labour of compilation saved. We therefore recommend that the registration and publication of statistics of exports of Government stores should be dispensed with for the trade accounts. Remittances of treasure, other than in military chests, should however still be shown.

37. Condemned Admiralty Stores sold on Government account at Bombay appear to be registered twice over in the

Second-hand sales of Admiralty Stores.

accounts, as Government Stores at the time of original importation, and as imports of private merchandise under the heading of "all other manufactures" at the time of sale. The second registration is anomalous and should in our opinion be discontinued.

38. Imports and Exports by Post include (a) Parcels and (b) Registered letters. The procedure followed in Bombay, with the approval of the Government of India, has been to show Imports and Exports by Post, with the exception of Treasure, under the following general heads:—

Imports by post (unspecified) Value only
Exports by post (unspecified) Value only
(for Indian as well as British and Foreign produce).

Treasure by Post is included in the general import and export figures for Treasure. In 1900 this procedure was extended to Calcutta. No special orders appear to have been issued to the other ports.

It has been somewhat difficult to ascertain the exact practice at the different ports, but a considerable divergence appears to exist. Thus at Bombay, Calcutta, and Karachee the contents of foreign registered letters received are ignored; at Rangoon they are recorded but are classified under their detailed descriptions instead of under the single head, Imports by Post. At Madras the contents of these letters are recorded only when they are liable to duty, and it rests with the Postmaster to decide whether any cover should be opened to ascertain if the contents are dutiable. Contents of letters registered in India for transmission abroad are not recorded in the export returns, and owing to this omission pearls re-exported from Bombay do not appear in the statistical accounts. The value of the unrecorded re-export trade in pearls from Bombay has been estimated as high as from 1 to 1½ crores. Similarly gems exported through the post by the Burma Ruby Mines Company did not appear in the trade accounts until last year when, under a special arrangement, they were reported by the Company to the Collector of Customs at Rangoon, and their value for the year was found to amount to 8½ lakhs.

With reference to parcels there appears to be no registration at Rangoon of parcels by the Bombay mail. It seems to have been understood that these were registered at Bombay; but that is not the case. At Calcutta the word 'unspecified' in the descriptive heading has led to the impression that such goods as could be specified should be shown under their appropriate heads.

We recommend (1) that the word 'unspecified' should be left out of the descriptive heading, (2) that the postal authorities should be consulted as to whether imports and exports by registered letter both of free and dutiable goods can be recorded as well as parcels, (3) that the contents of parcels and registered letters arriving in India by post should be recorded at the port at which they are examined and appraised, and (4) that clear and uniform instructions for the statistical registration of postal goods should be issued to all ports. If, as we understand, the contents of registered letters can under recent orders be examined and appraised at inland post offices, we would suggest that, if the proposal to record these at all be approved, a return containing the necessary details be furnished monthly by the Postal Department to the Statistical Office at the port of entry.

39. Imports of dutiable baggage are at present registered but not of free.

Baggage.

Baggage proper has not a commercial character and strictly speaking should not be registered in trade statistics. As however in practice it occasionally covers jewellery and other light articles imported for sale, we advise the continuance of the existing practice.

40. The articles to be specified in the monthly and annual returns of the foreign sea-borne trade of India as well as the units of quantity, measure, or value,

Lists of articles.

to be applied to each, are shown in a series of official lists, which we may call Statistical List, arranged as follows:—

- | | |
|-------------------------|---------------------------|
| 1. Imports | { I.—Private Merchandise. |
| | { II.—Government Stores. |
| 2. Exports | { I.—Private Merchandise. |
| | { II.—Government Stores. |
| 3. Re-exports | { I.—Private Merchandise. |
| | { II.—Government Stores. |

The Export list is more concise than the Import list and the Re-export list than the Export list, but they are all framed on the same model so that for the most part the same heads and sub-heads appear in all the lists. The lists for Government Stores are on the same lines but briefer than the corresponding lists for private merchandise. The classification is independent of that adopted in the Tariff, though the two often closely agree. It was modelled on that adopted in the returns of the Board of Trade, especially as regards the denominations and the grouping of sub-heads, but it has nevertheless preserved an individuality of its own by retaining, contrary to the Board of Trade practice, uniformity of classification for imports and exports. The last general revision

of the lists was made by the Director-General of Statistics in 1897, but there have been several subsequent alterations of various headings in accordance with the developments of Indian trade.

41. The arrangement of the main heads in the Statistical lists is alphabetical; but the sub-heads appear in the order in which they are to be entered in the

Alphabetical Index

published accounts. There are further Alphabetical Indices of articles not specifically enumerated in the Statistical lists which state the denominations under which each article is to be entered, and which have been circulated from time to time by the Government of India to facilitate uniformity of entry at the various Custom Houses. A revised and greatly expanded Index was prepared by the Director-General of Statistics and circulated to the Collectors of Customs for opinion in 1898, but it erred on the side of over-elaboration, and as the result of the opposition it met with, it was eventually withdrawn after a comparative statement of the opinions on it had been prepared. The old indices meanwhile appear to have gradually fallen into disuse or to have been locally modified, so that no authoritative index applicable to all Custom Houses is now recognised, and various instances of lack of uniformity in the classification of articles at different ports, which have come to our notice, are attributable to the want of a recognised guide. We are therefore of opinion that the task of preparing a revised index should be resumed, and we would suggest that the simplest and quickest method will be to obtain from each Custom House a list of the articles now recorded under each of the prescribed heads or sub-heads of the Import and Export Statistical lists. We are indebted to the First Assistant Collector at Bombay, Mr. M. M. S. Gubbay, I.C.S., for a test collection of material on this plan, and we believe that the material from all provinces could be collected without much delay.

42. In addition to the prescribed heads in the Statistical lists of Imports and Exports, which appear in the monthly accounts received by the Statistical

Record of special sub-heads.

Bureau from the five chief ports, special sub-heads are recorded in the Annual statements of the foreign sea-borne trade of the various provinces; the trade in many articles or classes of merchandise is also registered without publication of the details. We are of opinion that it is desirable that the head of the Statistical Bureau should be consulted before any special sub-heads are added to the published provincial statements of trade, and that all details which are registered but not published should be reported to him for information.

(iii). *Methods of checking quantities and estimating values.*

43. The statistical lists prescribe the particular denomination of quantity such as number, weight, gallons, yards, and the like, which is to be applied to each

Quantity.

article. In the case of articles of which weight is the prescribed denomination different units of weight (tons, cwts, lbs, and ozs) are specified according to the nature of the various articles. It has been suggested to us that the use of so many different denominations of weight is unnecessary and confusing, and that it would suffice if two units only, cwt and ozs, were used. We are however unable to concur in this proposal. The prescribed denominations follow in every case the denominations in common use in trade, and we consider that this principle should be adhered to.

44. We find that when weight is the denomination the general practice is to record net weight; and this is presumably what is intended, though we are

Net weight to be recorded in all cases.

unable to discover that any definite instructions have been issued on the subject. We think it desirable that the point should be made clear, and a simple definition issued distinguishing gross from net weight. Gross weight may be defined as the weight of goods with their coverings or receptacles; net weight as the gross weight less the weight of the coverings or receptacles. Quantities are, as a rule, checked with care for dutiable imports and exports, and at most ports for free imports, but there is a tendency at some ports to accept the tares declared in invoices without checking, and the arrangements for recording tares, when checked by actual weighment, are not very systematic.

We recommend a more systematic record of the latter, and occasional verification of invoiced tares.

45. Free Exports are as a rule not checked, but we learn that there are reasons for believing that in some cases the quantity shipped is understated with

the object of defrauding the Port Trusts and the shipping agents. Such under-statements are said to occur especially in the case of free exports from Bombay to Aden and the Persian Gulf. We think it desirable therefore that an occasional check should be exercised over these exports. We also find that at some of the chief ports goods short-landed from a vessel are not reported to the Statistical Office for deduction. The quantities are sometimes considerable and should be reported. We propose later that a set of instructions should be prepared for the observance of Customs officers in verifying declarations, in which directions on these matters may suitably be incorporated.

46. Under the orders of the Government of India the value to be shown in the Statistics is the real value as defined in section 30 of the Sea Customs Act

Value.

Section 30.—For the purposes of this Act, the real value shall be deemed to be—

(a) the wholesale cash price, less trade discount, for which goods of the like kind and quality are sold, or are capable of being sold, at the time and place of importation or exportation, as the case may be, without any abatement or deduction whatever, except (in the case of goods imported) of the amount of the duties payable on the importation thereof; or

(b) where such price is not ascertainable, the cost at which goods of the like kind and quality could be delivered at such place, without any abatement or deduction, except as aforesaid.

by the custom of the trade, and (2) in the case of dutiable imports (not exports) the equivalent of the duty paid on importation. When no wholesale cash price is quoted in the local market, then the real value is the cost with all charges for freight and insurance, without counting the duty payable, at which goods can be delivered off the ship at the port of import, or for shipment at the port of export, after deducting trade discount again according to the custom of the trade.

Deduction on account of duty under section 30 (b).

(1) In Rangoon it has been the practice when assessing value under the second alternative to make a deduction on account of duty in the same way as under the first.

This practice was corrected at Calcutta some years ago, and although justifiable under a possible reading of

Resolution by the Government of India, Nos. 257 to 260, dated 22nd May 1877 (page 26, Collection of orders of the Government of India relating to the registration of the Maritime trade of India).

5. The Governor General in Council requests that the local authorities will arrange that the values entered in future in the returns of the sea-borne trade of all imported goods subject to duty, whether at tariff rates, or *ad valorem*, or according to quantity, shall be their wholesale market value when ascertainable, less duty (if dutiable), and trade discount (if any is allowed); and where such value is not ascertainable, the estimated cost to the importer of the goods laid down at the port of entry (before payment of duty), or, in other words, the wholesale cash price of the goods in bond.

Nos. 121 to 124-C. of the 1st May 1879, to the Maritime local Governments.

Act. We understand, however, that orders are about to issue bringing the practice at Rangoon in this respect into accordance with the practice prevailing at other ports.

48. (2) At Bombay and Karachee it is the practice to add landing charges

Addition of landing charges under section 30 (b).

freight and insurance, but they are assessed in a somewhat arbitrary way by taking R151 as the maximum current rate of exchange for £10, and regarding the difference between this and the actual rate of exchange, which may be R149

which is quoted in the margin. We find that with the exceptions detailed later, the interpretation placed upon this section is that, when a wholesale cash price is known or ascertainable in the local market at the port of import or export, that price is to be regarded as the real value after making deductions on account of (1) whatever trade discount is allowed for the particular goods

under the second alternative to the definition to the charges for

47. The exceptions to which we refer are the following:—

the section, appears illogical, as well as contrary to the intention of the Government of India as conveyed in the marginally-quoted passage, and confirmed in a subsequent circular. The amount of duty should be deducted from the values shown in the invoice in those cases only in which the invoices specifically state that the values given are inclusive of Customs duty at the rates shown in the Indian Tariff

or a little more, as landing charges. At Karachee these charges are calculated at the rate of 2 annas 6 pies on the equivalent of £1 sterling. The rates at both ports thus amount to between 1 and 1½ per cent. on the value of imports *ex-ship*. We hesitate to recommend the general adoption of an additional element of complication in calculating values, but it is, in our opinion, clear that landing charges should be included within the meaning of the legal definition, and, by adopting an all-round rate, the calculation may be greatly facilitated. An additional reason for their inclusion is that, unless they are reckoned, values under the second alternative are less by the amount of these charges than values under the first, and we think that both should be on a uniform basis. We recommend therefore that an all-round rate should be assessed at each port in terms convenient for calculation, and as near as possible in the result to the actual charges levied. The values will then be consistent for goods as delivered after landing (but without reckoning duty) for imports, and before shipment for exports. As compared with the *c. i. f.* (cost insurance freight) and *f. o. b.* (free on board) values adopted by the Board of Trade, the value for imports will differ, by (1) the deduction for trade discount, if any, and (2) the addition of landing charges; and that for exports by (1) the deduction again of trade discount (if any), and (2) by the omission of charges for shipment on board.

49. At Bombay a question was raised whether the wholesale cash price

Meaning of wholesale cash price.

intended by the first clause of the definition is the price at

which the importer supplies to the wholesale dealer, or the price at which the wholesale dealer distributes to retailers. We consider that it should be the price at which the importer supplies to the wholesale dealer, in order that the valuation under the first clause may be, as far as possible, on a par with that under the second clause. We believe further that this is the valuation to which market prices tend.

50. A number of minor points have been brought to our notice in which

Minor errors and inconsistencies in calculating values.

the practice at different ports varies in assessing values, or in which there is in other respects a danger of incorrect

assessment. These may be briefly summarised:—

- (1) The practice at the different ports relating to trade discounts and discounts for cash is not very clear or well-defined. We therefore recommend that a list of values showing trade and cash discounts on the lines of that submitted monthly to the Government of India for tariff-valued articles should be maintained for all goods at each port, and kept corrected to date for use.
- (2) Discounts in amounts rising to 30 or 50 per cent. are often shown in invoices and sometimes two or three discounts are allowed together. It is desirable that such rates should be very carefully checked.
- (3) Exchange is calculated sometimes at the rate for the month, sometimes at a uniform rate of Rs 15 to the £. We recommend that the latter should be uniformly adopted. For exchange with foreign countries the local rate should be ascertained monthly.
- (4) We were informed at the chief ports that tariff valuations are never accepted as the real values required for statistical purposes, but a doubt on this subject was expressed at a meeting of one of the Chambers of Commerce at which we were present. We think that the instructions issued on previous occasions regarding the checking of declarations of real values in the case of tariff-valued articles should be reiterated.
- (5) Invoices are accepted at certain ports practically without question for a large proportion of the trade. These documents are altogether distrusted in the United Kingdom and the Continent, and it is known that the values given in those sent to India are not infrequently overstated in order to deceive the importer's purchasers. They may be similarly understated to deceive the Customs. They should therefore be accepted with the greatest caution.
- (6) There appears to be a tendency with exporters to overstate values with a view to obtaining a better price on sale in the country to which

the goods are to go. A warning seems desirable on the subject. To facilitate the checking of values for exports we recommend the maintenance at each port of statements of standard rates of value for staple articles, which should be revised weekly or fortnightly, and supplied to all Customs officers whose duty it is to check these valuations.

- (7) All round rates are sometimes assessed for freight and insurance charges. These are by no means uniform at the different ports, and appear to vary from 5 to 10 and 15 per cent. Uniformity is not to be expected, but the desirability of verifying the rates adopted in such cases may be emphasised.
- (8) Shipping bills for exports at Calcutta do not pass through the hands of the Appraisers, who are the officers best qualified to check the values declared. We think that a change should be made.
- (9) We found a complaint at Calcutta, Madras, and Rangoon that the appraising staff is insufficient to permit of officers being sent into the local markets to study local values. It is of the first importance, not only from the point of view of Statistics, but also from that of revenue, that this disability, if it exists, should be removed, and we recommend that the attention of the local Governments may be drawn to the subject.
- (10) The Committee did not visit any subordinate ports, but it is probable that valuations as well as declarations of quantity are less carefully checked at these than at the chief ports: and we would advocate the desirability of specially testing these points at the time of inspection.
- (11) The check that might be exercised on values in the Statistical offices, where the values given for different quantities in different consignments can be easily compared, is generally neglected.

(iv) Time and Place of Registration.

51. Under the orders * of the Government of India goods are said to be imported for the purpose of trade returns on the date on which they are passed over the ship's side, whether they are then entered for bond or passed at once into consumption; and the date on which imports are entered in the statistical accounts are to a certain extent governed by these instructions. So far as we can ascertain no similar instructions have been issued determining the date for exports. In practice the delivery of the bill of entry under section 87 of the Sea Customs Act, VIII of 1878, and of the shipping bill under section 137, mark the time selected for the registration of imports and exports respectively. In the first case it is after the goods are landed but before they are cleared for bond or home consumption; in the latter before they are shipped or water-borne to be shipped for exportation.

Procedure followed in the case of imports.

52. The procedure on delivery of the bill of entry includes briefly—

- (i) a comparison with the ship's manifest which is usually called the 'noting.'
- (ii) An examination of the bill of entry in the Appraisers' department with the invoices or other documents produced by the importer with a view to checking the details entered.
- (iii) A calculation of the duty if leviable.
- (iv) The payment of the same.
- (v) The Collector's or Assistant Collector's order to have the goods passed for clearance or examination.
- (vi) The examination of the goods to see that the details agree with those checked from the documents, after which the goods are allowed to pass.

At some ports the examination of the goods takes place at the same stage as that of the documents, and before the Collector's orders are obtained. With free imports the calculation and payment of duty are of course omitted. The

bills of entry are presented in duplicate or triplicate and one copy is forwarded to the Statistical office, in most cases as soon as the Collector's signature or initial has been affixed. Before entry in the statistical registers the documents pass through the hands of the Daily List writers, who compile the statements of daily imports and exports which are published daily by the local offices for issue to subscribers.

53. In the following cases the time of registration differs considerably from Irregularities in the time of registration. that indicated in the preceding paragraph :—

- (1) With imports passed upon security deposits under section 41 of the Sea Customs Act, the duty debited against the deposits is collected at many ports once a week, and the documents do not go to the statistical office until the weekly recoupment has taken place, although the goods have been long cleared.
- (2) There is a special system at Calcutta by which goods may be entered prior to arrival in the port. Under this system documents are accepted, and dealt with up to the stage of passing to the Statistical office at any period less than seven days before the vessel's arrival. In this case the registration may take place a week before the goods are landed.
- (3) At Bombay the subordinate ports close their monthly accounts on dates ranging between the 18th and the 31st of the month, whilst at Madras, where the original documents are received from the subordinate ports for registration, they are sometimes sent in ten days or a fortnight late.
- (4) Statements for Government Stores are frequently received late and sometimes come in a month or more after the stores have been cleared.

We recognise that it is impossible to remove these irregularities altogether, but believe that the following recommendations will serve largely to reduce them—

- (1) Bills of entry for goods cleared on deposit account should be forwarded to the Statistical office at the same stage as others, without waiting until the amount of deposit is recouped.
- (2) The bills of entry for goods entered prior to the vessel's arrival at Calcutta should be held back till the vessel has commenced to discharge.
- (3) With reference to the receipt of materials from the subordinate ports we propose in dealing with the procedure for registration later to recommend that instead of the subordinate ports sending in returns as they do for most provinces at present, they should send in the documents of entry themselves in daily batches as is done at Madras. The difficulty of closing the accounts will then be removed, whilst, if greater punctuality is insisted on locally, the delay in receipt of the documents will be lessened.
- (4) The delay in the receipt of information regarding Government Stores is not a matter upon which we can advise because so many departments are concerned. We would recommend however that the attention of officers concerned should be drawn to the importance of forwarding statements of the stores* imported with reasonable punctuality.

54. In regard to exports the procedure in force in the majority of ports is as follows. When the goods are not liable

Procedure in the case of exports. to duty, the documents are merely numbered and scrutinized to detect any obvious errors of valuation, after which a copy goes to the Statistical office through the daily list writers. In the case of dutiable exports, the documents are sent to the Statistical office, after payment of duty, but usually before weighment of the goods. The documents are recorded in the Statistical offices immediately on receipt, the entries being subsequently corrected if any notices of short shipments are received. At Madras, however, registration is postponed until the goods have

* We have recommended discontinuing the registration of Exports of Government Stores.—*Vide* para. 86.

been actually shipped and the duplicates of the shipping bills used to pass the goods on board have been returned with the short shipments noted on them. These duplicates are then compared with the vessel's manifest (which must be filed five days after her clearance), after which the documents are recorded.

55. We recommend the general adoption of the Madras system in the case of exports. The advantages are, first, that under it the time of registration corresponds with what we are informed is that in force in the United Kingdom for the great bulk of exports, the specifications for which have to be submitted by the exporter within six days after the vessel's departure; and secondly, that the somewhat cumbrous systems of registering and detecting short shipments necessitated at the other ports will be done away with, and thus a great deal of labour and risk of error saved. Registration will be postponed a week by the change, but as goods are often not shipped at present until two or three days after the shipping bill is put in, the actual divergence will in many cases be no greater than it is at present, whilst in other respects more accurate results should be obtained.

56. We have considered whether imports might not be registered after the goods have been finally passed, as with exports. But we find that in practice there is apt to be so much delay in returning the documents that this would be inadvisable; whilst there is less reason for the change, because short landings are far less in quantity and importance than short shipments. We propose, however, to recommend, in dealing with the procedure in Statistical offices, that short landings should be independently communicated, and, as an additional check, that entries made in the registers from the copies of the documents first received should be afterwards checked from those on which the goods have been passed out.

57. Variations of procedure have occurred as to the port at which goods transhipped from one British Indian port to another on their way to a foreign country should be credited. Thus goods despatched from Karachee to Bombay to be transhipped to the United Kingdom might be credited at either port. The question is at what point they pass from the coasting to the foreign trade. Instructions were issued in 1904 by the Director General of Statistics that in such cases the port of transshipment should be ignored and goods credited to the port at which they were originally shipped, and that when a change of destination takes place after goods have left the first port of departure (as, for instance, when goods entered at Karachee for export to Bombay are transhipped on arrival at the latter port, to be conveyed to the United Kingdom) an intimation should be sent to port of original shipment, which in the instance quoted would be Karachee, to transfer the item from the coasting to the foreign trade. These orders correspond in principle to the treatment prescribed under section 131, Sea Customs Act, for the entry of goods imported after transshipment at a Customs-port and we recommend that they be adhered to.

(c) *The means of obtaining information and the forms and procedure of registration and compilation.*

58. The statistics for by far the most important portion of the foreign seaborne trade are based on declarations made upon the documents of entry and export. For the accuracy of these the Government is and always will remain dependent upon the good will and intelligent co-operation of private traders, because, although customs officers are employed to check misdeclarations, the staff available can never permit of the check being effective, especially in matters not affecting the revenue, unless errors are in the first instance minimised by the care taken by declarants. On the other hand, merchants are as much concerned as the Government in obtaining a correct record of trade, provided that it is not at too great a sacrifice of individual interests, and it has been impressed upon us by the mercantile representatives we have had the privilege of meeting that they are willing to give every assistance in supplying fuller

information in regard to destination and the like, so long as the new requirements do not become a source of harassment or inconvenience in passing their goods through the Customs.

59. Following these considerations the general policy should in our opinion be to aim at obtaining correct information by willing co-operation rather than by attempting to enforce it under penalty. In all reasonable ways the course of business should be lightened; goods should not be detained, when detention can reasonably be avoided, for misdeclaration affecting the statistics only; nor should documents be sent back to merchants for the correction of petty errors when the latter can be summarily corrected by the Customs officers who detect them; nor should a fee be levied for the amendment of a document whether made by a merchant (including his authorised agent) or by a Customs officer, when the amendment is only of statistical interest; finally, resort should only be had to penalties or other severe measures when misdeclarations in particular cases become persistent and show that the reciprocity expected is not observed.

60. Subject to this general policy the measures we would recommend for securing greater accuracy in the statistical results are the following:—

- (1) The forms of bills of entry and other documents of declaration in use at the different ports should be reconsidered and adapted to suit the new information needed.

Forms of Documents of Declaration.
- (2) A simple set of instructions should be framed for declarants; and steps should be taken to ensure that these instructions are understood by Custom House Agents whether independent or in the service of firms.

Instructions for Declarants.
- (3) A similar set of instructions should be issued for the Customs officers who are employed to verify declarations.

Instructions for officers verifying Declarations.
- (4) The forms at present in use in the various Statistical offices for the registration and compilation of the statistics, should be simplified and a uniform procedure should be prescribed for all the Chief Ports.
- (5) A complete set of rules should be issued for the guidance of the Customs and Statistical offices.
- (6) The Statistical offices at the chief ports should be periodically inspected in the light of the rules issued.

Inspection of Offices.

We proceed to state our proposals and reasons in greater detail under these heads.

Forms of Bill of Entry and Shipping Bill.

61. The important documents are the Bill of Entry for imports and the Shipping Bill for exports. The forms for these documents are prescribed by the Chief Customs authorities for the different ports under various sections of the Sea Customs Act (VIII of 1878). The existing forms differ a good deal in detail and some are undoubtedly better adapted than others for the purposes in view. If our proposals in regard to the declaration of the country of consignment and the country of final destination are accepted, it will in any case be necessary to modify these forms, in order to provide for the additional information required; and the opportunity may be taken to consider whether it may not be feasible to prescribe a single set of forms for adoption at all the different ports. The forms have to fulfil the same duties at all ports, and *primâ facie* there is no reason for a divergence in India which is not, in fact, found necessary elsewhere. In the United Kingdom, Germany, Belgium and France the same forms are in use at all ports, and it cannot be said that the ports of India differ more widely from each other than those within some of these countries. We anticipate, however, that objections on points of detail will probably be raised at the different ports on the ground of differences of local practice. We are not ourselves

convinced that these objections will be found to have any permanent validity : but we recognize that, until there is more correspondence between Customs usages at the different British Indian ports, a difficulty may be found in introducing forms that are entirely identical. In recommending therefore the adoption of a uniform set of forms, we suggest that they may be issued to the Maritime Local Governments for general adoption, with the request that no variations should be permitted without the sanction of the Government of India.

62. We have examined the various existing forms and, selecting what appeared to us to be the best features of each, we have framed models,* which we append to this Report and which we

Model forms recommended.

* Appendices A and B.

recommend for general adoption. Explanations are attached to the forms showing the reasons for the main details adopted. The features of chief importance are that columns for the country of consignment and final destination, respectively, have been inserted, the declarations of port of shipment made more precise, and those of country of growth, produce and manufacture at present shown in the Calcutta, Madras and Rangoon forms dispensed with ; while the declarations of value have been simplified. We advocate the adoption of different coloured ink, and of different coloured paper for the different purposes specified in the explanations attached to the forms. These forms should be adopted also as far as possible for the statements received from Government departments, the Post Offices, etc.

(2) *Instructions for Declarants.*

63. We append* to our Report a set of instructions to declarants which we have prepared, and which we think might usefully be issued at the different Customs Houses with such additions or alterations

Instructions for Declarants.

* Appendix C.

as local circumstances may suggest. But it is desirable that if local modifications are made, the aim should be to keep the instructions as simple as possible. The class for which these instructions are intended are the more or less ignorant representatives of small traders, of whom there are a great number at Calcutta, engaged in transacting business at the Customs Houses either as general Custom House agents, or in the employment of individual firms. Such agents have under sections 202 and 203 of the Sea Customs Act VIII of 1878 to obtain the permission of the Collector of Customs to act for their principals, and it is recommended that it should be a condition of their acting that they understand the declarations which it is often part of their duty to make. We do not of course intend in any way to imply that such a condition should be harshly applied so as to impede a firm's business at a Custom House ; but rather that it should be made the occasion of questioning agents and explaining to them what is required, so that they may at any rate understand what information they are expected to enter in the forms. Every agent should be required to have a copy of these instructions.

(3) *Instructions to Verifying Officers.*

64. We consider it advisable that a similar set of instructions should be prepared for the guidance of officers employed in verifying declarations. Such instructions should summarize the checks

Instructions to Officers employed in verifying declarations.

to be exercised at the various stages through which the documents pass, and fix the responsibility of the officers. Attention should be specially drawn to the need of observing the marks on exported goods and the information conveyed by the bill of lading in determining the country of consignment for imports.

(4) *Forms and Procedure for the Registration and Compilation of Statistics.*

65. Such rules on this subject as exist at present are not we find in any complete or connected form ; whilst the procedure in different details at all the

Rules of Registration and Compilation.

ports is in some respects unnecessarily cumbrous, and the forms in use in many

instances ill-adapted for the object in view; with the result that unnecessary work is done, and the necessary task of checking to a more or less corresponding extent neglected. It may in fact be said that at all ports, in one direction or another, the work can be better concentrated on the object in view. In order to remedy these defects we recommend that a uniform system of procedure be prescribed for the registration and compilation of the statistics in the Statistical offices at the various ports. We foresee no valid objection to the adoption of uniformity in this respect because, although local circumstances may suggest differences of procedure before the documents reach the Statistical office, the conditions that rule thereafter are identical, subject only to the greater complexity which the collection of materials from multiplied sources may necessitate, as from the subordinate ports of Madras. Otherwise from the same material the same results have to be produced, and the way which they can be best reached in one port is likely to prove the way in which they can be best reached at all.

66. The procedure which we would suggest for general adoption, is described in some detail in a memorandum attached as Appendix D to this Report.

The system of procedure recommended.

Appendix D.

In framing our proposals our policy has been, as with the new forms for Bill of Entry and Shipping Bill already discussed, to select from the different forms and procedures in force at each port those that seem upon the whole simplest and best. We have adopted also a few details of procedure from the system followed in the Statistical Branch of the London Custom House.

67. There are three features in our proposals to which we consider it desirable to draw special attention. In the first place we propose that one copy of the documents of entry should in all cases be forwarded to the Statistical office at the chief port, instead of the diaries, draft returns, or registers, which are forwarded in some cases at present, and that the same course should be adopted in the case of the returns submitted from the subordinate ports. This system is already in force in Madras, where the subordinate ports are most numerous, and is found to work satisfactorily. It also corresponds with the practice in the United Kingdom. The chief advantage of the procedure is that documents from the places where the supervision is necessarily least efficient can be subjected to an expert scrutiny which they now escape. This is of importance from a revenue as well as from a statistical point of view. At Madras we were informed that over Rs. 5,000 had been recovered in duty from undervaluation since the adoption of the present system. If it should seriously increase the posting work at the chief ports in other provinces, we assume that suitable adjustments of staff will be found possible with the subordinate ports.

68. Secondly, we recommend that the Customs Revenue and Duty returns which are at present prepared in the Statistical offices, should be prepared in the Customs Accounts offices in future, following in part the procedure in the London Customs House. These returns follow the Tariff instead of the Statistical classification, and under present circumstances involve elaborate adjustments of figures. Under our proposals these will be done away with, whilst the essential check involved in the comparison of the results of the separate compilations will be retained.

69. We propose thirdly that corrections involving differences not exceeding Rs. 5,000 in the value of the entry corrected, should be adjusted at the local offices by fresh entries under the month in which the correction is ascertained. Thus if a correction within this limit be ascertained in February affecting an entry in the posting registers for January, it will be effected by a fresh addition or subtraction in the February registers, leaving those for January unaltered. Corrections above the limit mentioned, or within it if occurring after the year's accounts are closed, will be communicated as at present to the Statistical Bureau. This proposal follows in part the system of making corrections in force in the Statistical Branch of the London Customs House, and will reduce to a minimum the embarrassing number of errata at present communicated to the Statistical Bureau throughout the year.

Corrections in returns.

Revenue and Duty Returns to be prepared in the Accounts offices.

(5) Rules for the guidance of Customs and Statistical Offices.

70. We recommend that a set of rules should be issued for the guidance

Preparation of a set of rules.

of the Customs and Statistical offices embodying the recommendations, which are contained in our report and in the Appendices above referred to, regarding the procedure to be adopted in preparing and verifying and registering the documents, and in compiling and checking the returns. We have not been able in the time at our disposal to undertake the preparation of such rules, but Mr. Morshead has expressed his willingness to undertake the task, and will in due course submit a set of draft rules for approval.

(6) Inspections of Statistical Offices.

71. The Statistical offices are not at present subject to the regular inspec-

Inspections.

tions prescribed for other offices under the various administrations. We advocate annual inspections to be carried out by the Collectors of Customs at each chief port, and occasional inspections, if possible, by an officer deputed from the Statistical Bureau. We consider that much of the unnecessary labour at present performed would have been done away with had periodical inspections been the rule.

Ancillary Matters.

72. Before leaving this branch of our subject we would draw attention to

Daily lists and other unprescribed publications.

two matters in connection with the preparation of the returns in the Statistical offices which call for some notice. The daily lists of Imports and Exports and other unprescribed publications including Weekly Manifests, Monthly Guides and the like, which are prepared by the Customs offices and issued to the public on subscription at Calcutta, Madras and Rangoon, are prepared at Bombay and Karachee by clerks in the employment of the Chambers of Commerce, who have access to the Custom House records for the purpose. It is in our opinion undesirable to have in the Custom House outside clerks, however responsible, handling documents which bear to a certain extent a confidential character. We recommend therefore that the compilation of these publications at Bombay and Karachee should be transferred to the Custom House staff as at other ports. We have sounded the Bombay and Karachee Chambers of Commerce on this proposal and understand that no objection is likely to be raised on their part.

73. Under recent orders limiting the receipt of fees for overtime work at the

Supply of information to the public.

Custom Houses the fees previously levied for the supply of statistical information on special requisition have been discontinued at some of the ports. It has been brought to our notice that thoughtless applications are not infrequently made upon which the levy of fees places a convenient and suitable check. We believe it to be the case that in most other departments of the administration fees are levied for the supply of copies or information required, and we strongly recommend the framing of a reasonable scale of uniform application for the supply of information from the Statistical offices.

(vi)—The arrangement of the results in returns and publications.

74. We have examined in detail the various returns submitted and

Examination of returns and tables in connection with foreign sea-borne trade.

tables published in connection with the statistics of foreign sea-borne trade and desire to make the following observations and recommendations regarding them.

(1) Separate returns of free and dutiable articles.

75. The forms of the monthly returns prescribed in 1875 for submission to

Preparation of separate returns of free and dutiable imports and also of free and dutiable exports.

the Government of India by the Government of each province having sea-borne trade require separate returns for imports free of duty and imports subject to duty, and similarly free exports appear in a different return from dutiable exports.

At the time that these returns were prescribed the annual statements, which were modelled on those of the United Kingdom, had separate trade tables for dutiable articles and for free articles, but from 1895-96 this distinction was abolished except in the annual statements of Madras and Burma where we have now recommended their discontinuance. The only remaining object of the separate returns for dutiable and free imports is therefore to enable a total to be struck of the value of free imports and of the value of dutiable imports, and to supply figures for the sub-heads "Subject to duty", and "Free of duty" in the Grand Total of all imports.

76. The value of dutiable exports (Rice is the only article) can be picked out without difficulty from the consolidated table, but this cannot be done, except very imperfectly, from the table of imports, since the statistical classification gives articles which are dutiable and articles which are free under one head. This is indeed unavoidable as some of the tariff heads have many exceptions, while sometimes the liability of an article to duty is determined by the use to which it is to be put. It is therefore necessary to keep a separate record of the free imports of each article. The present procedure is however open to the objection that the free return is a complete statement of the articles imported, and the places from which they come, while the dutiable return gives the same details for dutiable imports only, and consequently the figures in two returns under many articles with details of countries have to be added together before postings can be made in the tables of the monthly accounts and the Annual Statement. Much of this labour would be avoided if there were only one detailed statistical account of articles imported whether dutiable or free, and if the free imports were also posted in an abstract form by articles but not by countries. This system, which we suggest for adoption, would greatly facilitate the preparation of the monthly and annual accounts in the Statistical Bureau, and would also, we believe, lessen work in the Custom Houses. Our proposals do not refer to dutiable articles of imported merchandise admitted free of duty under executive orders, which are recorded in a special return, for in the trade accounts these appear as dutiable articles.

(2) *Trade and Shipping via the Suez Canal.*

77. The separate registration of trade and shipping with each country *via* the Suez Canal was commenced from the 1st April 1883 under the orders of the Government of India. Tables showing the total trade and total shipping *via* the Canal were published in the provincial trade volumes until 1900 when they were discontinued. Tables prepared from special returns received from the Custom Houses, are, however, still published in the Annual Statement of the trade of British India, showing the total trade and shipping and the trade and shipping with each country *via* the Suez Canal. We consider that the information which these tables supply is no longer of sufficient value to justify the labour of separate compilation and we recommend their discontinuance.

(3) *Annual Statement and Monthly Accounts of the Sea-borne Trade and Navigation of British India.*

78. The last issue of the Annual Statement relating to the trade of the year 1903-1904 and four preceding years was enlarged by giving five years' figures in the detailed tables of Imports and Exports, and by grouping the countries so as to distinguish under each article the total trade of the United Kingdom and British Possessions from the total trade with foreign countries. Owing to its bulk the Statement of the foreign trade was divided into two volumes arranged on the same lines as the Annual Statement of the Trade of the United Kingdom, and the Accounts of the Coastwise Trade were published in a separate Annual Statement. We approve generally of these arrangements, but we would suggest the addition to both annual statements of detailed tables of the trade of each of the five principal ports, *viz.*, Calcutta, Bombay, Madras, Rangoon, and Karachi, following, as in the Annual Statement of the Trade of the United Kingdom, the abstract tables of the total trade at each port, and similar in form to tables of the trade of each

port which we have proposed for the separate Annual Statements of the trade of each province.

79. The Monthly Accounts seem to us defective in respect of the summaries.

Monthly Accounts.

The general summary on page 2 gives the figures for the current month as well as for the expired portion of the year, but the important summary of imports and exports by articles gives only the figures for the expired portion of the year, mentions very few articles, and is printed on a loose sheet. We consider that this summary should be bound with the other tables as an integral part of the Accounts, that it should show in separate parts the figures of the last month and the progressive figures for the year compared with the corresponding periods of the previous year, and that it should specify all the important articles (as, for example, those which are mentioned in the Review of the Trade of India) grouped under the seven main classes or divisions followed in the statistical tables. Arranged thus the summaries of Imports would cover four pages and the summaries of Exports (including re-exports) the same number of pages or eight pages in all.

80. The corresponding summaries in the Accounts of the Trade of the United Kingdom, covering 6 pages, specify the several sections under which articles are grouped under four main classes, and these are followed by a statement, covering 20 pages, of the increases and decreases under each article. This system cannot be exactly followed because only two of the seven classes of the Indian Accounts are divided into sections, and each of these has only three sections. This raises the question whether the grouping of the heads in the Indian Accounts might not be readjusted on the plan adopted by the Board of Trade. On this point we find ourselves unable to make any definite recommendation.

Grouping of articles.

We find that when a similar proposal was made to the Government of India in 1891 at the suggestion of the Committee on Colonial Import and Export Statistics it was held that there were no grounds for a change in the Indian practice. Improvements in the Indian classification might, we think, be attempted, but we recognise the difficulties of conforming throughout to the British classification. Thus the position of Opium and Indigo in Indian Trade are quite different to their position in British trade. The distinction between unmanufactured and manufactured articles in the British classification also seems to us arbitrary and not always satisfactory. For instance bark (for tanning), gambier, myrabolams, and valonia are to be found in the class of "Articles wholly or mainly manufactured," while all the refined products of petroleum are treated as "Raw materials and articles mainly unmanufactured." Also vegetable oils are classed as raw materials, but oil-cake appears as a manufactured article. Almost any division is, however, open to criticism, for what is the manufactured product of one trade is the raw material of another.

(4) Duplicates of Monthly Returns sent to India Office.

81. The monthly returns prepared in the Custom Houses are written out

Duplicates of Monthly Accounts sent to the India Office.

and despatched in duplicate to the Statistical Bureau which forwards the duplicate to the India Office. This practice originated with the suggestion of the Statistical Committee of 1874 that monthly trade statements should be sent to England by each of the Local Governments as well as by the Government of India, "not with the view of making general use of them on receipt but for reference in case of particular inquiry." It is not known to us whether during the last thirty years these manuscript statements have been employed in any special enquiries, but in any case they cannot be regarded as reliable since no correction statements affecting them are communicated to the India Office, while many corrections of very large amounts are reported by the Custom Houses which are carried out in the monthly accounts for India as well as the annual statements of India and the provinces. Corrected copies of the printed monthly accounts for India are regularly supplied to the India Office, and these show the provincial share of the trade in important articles. It therefore seems doubtful whether any useful purpose is served by sending to England manuscript uncorrected copies of the provincial monthly accounts and we recommend their discontinuance.

(b) Special Compilations.

82. At most of the ports statements are compiled for different special purposes, as for the Provincial Annual Administration Report, etc., for the information of the Excise Departments, etc., which follow different lines from those compiled for the trade returns. We think that whenever possible the information required should be accepted in the form in which it is prepared for the latter, which is sufficient for most purposes, without necessitating the labour of a separate compilation. The existing special statements of the kind referred to should be examined by the Collectors of Customs at the chief ports to see if the ordinary trade tables will not reasonably convey the information required, and representations made to substitute copies of the latter in such cases or give references for them to the printed volumes. A similar course should be prescribed when any new statements are called for.

Explanatory Introductions to Printed Volume.

83. We are of opinion that the introduction to the Annual Statement which has been recently enlarged, should be still further extended so as to show concisely, under the main subjects dealt with in this report, the main principles upon which the statistics have been compiled and the exact nature of the information that may be obtained from them. We consider that similar introductions, suitably adapted, should be inserted in the monthly accounts and in the Provincial Foreign trade volumes. We would advocate introductions on similar lines in the other statistical volumes published by the Government of India.

II.—ANNUAL STATEMENTS OF COASTING TRADE AND NAVIGATION.

84. The compilation of the Coasting Trade Returns is a comparatively simple matter. We consider that the documents should in all cases be sent to the Chief port for registration, and that the procedure and forms should follow the lines laid down for the Foreign Trade.

III.—ANNUAL PROVINCIAL ACCOUNTS OF SEA-BORNE TRADE AND NAVIGATION.

85. In June 1904 the Director-General of Statistics formulated certain proposals for the improvement of the Annual Provincial Volumes of Sea-borne Trade and Navigation. These proposals may be summarized as follows :—

- (1) That in Part I (Foreign Trade) the general tables (Nos. 16 and 17) showing the Imports and Exports of the Province or Presidency by articles and countries should (like the corresponding table in the Annual Statement of Trade of the United Kingdom) contain figures for five years.
- (2) That when in these tables there are two or more countries with which the trade is unimportant, i.e., with a value of less than Rs. 1,000 in each case, they should be grouped under the head "Other Countries," and that similarly when the value of the trade under any major, subordinate, or detailed head is less than Rs. 1,000 it should be merged in the case of major heads in the head "All other articles," and in the case of subordinate or detailed heads in the sub-head "Other sorts" under the major or sub-head, unless special reasons exist for specifying it separately.
- (3) That the abstract tables of Imports, Re-exports, and Exports (Nos. 5, 6, 7) should be converted into abstracts of the trade of the chief port.
- (4) That similar abstract tables should be added for those subordinate ports only which possess any considerable volume of trade, the

total trade of other ports being shown in a general consolidated abstract.

- (5) That in the case of the three provinces of Madras, Bengal, and Burma, where the foreign trade of the subordinate ports is of some importance, the abstract tables 3 and 4 should show, as they did prior to 1900, the total value of the imports and exports at each port from and to each principal country, as the present abstracts which state the total trade of the whole province with each country merely repeat what is stated in table 14 for Treasure and table 18 for Merchandise.
- (6) That the separate tables for free and dutiable imports which appear only in the Annual Statements of the Trade of Madras and Burma should be discontinued, as well as the practice, followed only in Bengal, of recording in many instances the ports in lieu of the countries trading with India.
- (7) That in the Accounts of the Coasting Trade (Part II) the general tables of Imports and Exports (Tables 7, 8, 9, 10) should, as in the corresponding tables for the Foreign Trade, contain figures for five years, and that similarly only those ports and provinces should be specified under each article the trade in which amounts to Rs. 1,000, and all detailed heads with a smaller value than Rs. 1,000 should be omitted.
- (8) That the existing abstract tables of the trade of province (Tables 3, 4, 5, 6) should as in the Accounts of the Foreign Trade be replaced by abstract tables of the trade of the Chief Port and of those of the subordinate ports of which the trade is of sufficient importance; the trade of the remainder being shown in a separate abstract as a group under the head "Other ports."
- (9) That the general tables should continue to show the trade with ports in other provinces and in foreign territory, but not the trade between British Ports within the Presidency or Province.

These proposals were placed by the Director-General of Statistics before the Chambers of Commerce at the different ports and met with general acceptance. Their design is to record the imports and exports of the province for five years both by articles and countries (or by provinces in the case of the Coasting Trade) as well as the imports and exports of most of the ports during the same five years by articles only, and further to show the distribution by countries of the total trade of each port of any standing in the same way that the distribution of the trade of each port by provinces is now recorded in abstract table 2 of Part II relating to the Coasting Trade.

86. We have carefully examined these proposals afresh and recommend their adoption with the exception of the last one, to which the Bengal Chamber of Commerce have objected on the ground that information in regard to this interport trade is of considerable value from a mercantile point of view. We recognise that the information which these figures convey must be defective since the direction of the trade is not stated, but still nowhere else, except from the general tables, can the quantity and value of each article of merchandise shipped between ports in the province be ascertained. The objection that such transactions are neither imports nor exports of the province is in our opinion sufficiently met by their being recorded both as imports and exports, so that their real effect is only to exaggerate the figures as the balance of net imports or net exports is not disturbed. We therefore consider that this proposal should be abandoned. We further consider that in the accounts of the Coasting Trade the limit of value for separately recording both provinces and articles should be Rs. 10,000 instead of Rs. 1,000 as originally proposed.

87. We do not consider it necessary in the case of these Provincial statements to distinguish trade with the British Empire from trade with foreign countries by giving separate sub-totals for each under each article as is done in the Annual Statement of the Trade of British India.

Unnecessary in these statements to show separately trade with the British Empire.

IV.—ACCOUNTS OF THE TRADE CARRIED BY RAIL AND RIVER.

88. The next subject which has engaged our attention is the record of
Accounts of Trade carried by rail and river. Inland Trade carried by rail and river.
 The volumes in which this is at present
 contained are :

- (a) The Quarterly and Annual Accounts of Internal Trade carried by rail and river in India, which are prepared in the Statistical Bureau.
- (b) The Annual Accounts of Provincial Trade which are compiled by each province except Burma.

The method in which these accounts are compiled is succinctly described in appendix E of our Report.

89. The Imperial Accounts have since 1900 recorded only the quantity and
Values. not the value of the rail and river trade
 of India, and we have considered whether
 values should similarly be omitted from the Provincial returns. We recognise that for certain class of articles the values recorded represent only a very vague approximation to the truth. In the case of grain and other foodstuffs, however, the return of values approximates as a rule fairly closely to the actual values. We fully admit that no exact debtor and creditor account exhibiting the true balance of trade can be extracted from the returns. The assignment of value, however, provides the only possible common measure by which the relative importance of each article can be ascertained. On these grounds therefore we are in favour of retaining values in the Provincial Trade returns. As it is not easy at present to ascertain the rate of value adopted for each article, we recommend that an appendix should be added in each report showing the value rates adopted for each quarter, and that a note should be added indicating the extent to which these rates may be regarded as reliable, or as only approximately accurate, or as merely conventional. The tables should also contain an introductory note explaining briefly the system on which the returns are compiled; and the methods by which the value rates are arrived at. The Imperial Tables stand on a somewhat different footing to the Provincial Returns, and we have not discovered that any inconvenience has been experienced from the omission of values from these tables. We do not therefore consider that it is necessary to restore values in the Imperial Returns.

90. It has been suggested that more reliable results would be obtained if
Consignors to declare values. consignors were required to declare values
 when despatching goods by rail or steamer.

We are not in favour of this proposal. Apart from the fact that Government appears to have no legal power to require value declarations from consignors, we apprehend that to require such declarations would cause a considerable amount of harassment, especially to small Native traders, by whom the bulk of goods are consigned, and would also involve a not inconsiderable increase of labour and expense in the various offices in which these returns are compiled. On the other hand, it seems to us more than doubtful whether the values so recorded, over which it would be impossible to exercise any appreciable check, would approximate more closely to the truth than the values obtained under the present system.

91. It has been suggested to us that it would be preferable to adopt cwt
Advisability of adopting cwt instead of maunds as the unit of weight. instead of maunds as the unit of weight
 in the published returns. We recognise
 that such a step would possess some obvious advantages, in view of the fact that the English measure of weight is at present that adopted in the returns of both the Sea-borne and the Frontier trade. All weights are, however, declared in the railway and steamer way bills in maunds, and the conversion of these figures into cwt would involve some increase of expense, and would at the same time create an additional possible source of error. We consider therefore that the maund should be retained as the unit of weight, at any rate in the provincial returns.

92. We are impressed by the fact that there is at present no sufficient provision for exercising any check to secure
Appointment of auditor. that these returns are accurately compiled
 in the railway audit offices. The nominal check afforded by the fact that the

imports and exports between certain blocks must tally is fallacious, inasmuch as both imports and exports are compiled from a single return; and there is, we consider, reason to believe that not inconsiderable errors occasionally find their way into these returns. We therefore recommend the appointment of a travelling Inspector or Auditor who would visit the different railway audit offices in turn; and in each office check a complete set of weekly or fortnightly returns taken at random. Apart from any errors which might be discovered on the occasion of this audit, the appointment of such an officer would in itself act as a check on clerical carelessness. We believe that a suitable man for the post could be obtained for a salary of Rs 200—250.

93. It appears to us advisable that the constitution of the internal blocks in the different provinces should be revised from time to time as fresh railway lines are made and trade develops. Any change should, however, be in the direction of subdividing existing blocks, since otherwise comparison with the figures of previous years would be rendered impossible. In this connection we recommend that Cawnpore City, in view of its increasing industrial importance, should be constituted as a separate block as Delhi City is at present in the Panjab returns. We are informed that there would be no difficulty in giving effect to this proposal, which would, we believe, be welcomed by the commercial community of Cawnpore.

94. It will be observed that no statistics are compiled of the rail and river-borne trade of Burma. The trade by river between the Upper and Lower portions of the province was registered for some years before and after the annexation of Upper Burma, but it does not appear that the desirability of compiling statistics of the rail and river-borne trade of the province, on the lines adopted in other parts of India, has hitherto been considered. We understand that there is at present no demand for such statistics on the part of the mercantile community of Rangoon. Such statistics have, however, elsewhere been found to be of use to Government, as affording trustworthy information of the general course and volume of trade between different parts of the country, and in particular as indicating the movement of grain, which at times of impending scarcity is often the first indication of agricultural distress; and we see no reason why these statistics should not be similarly found useful in Burma. As, however, trade between Burma and other provinces in India is at present entirely carried by sea, and as therefore any statistics recorded would be of purely provincial interest, we consider that the question is one which should be left to the decision of the Burma Government.

95. Turning now to a consideration of the forms in which the statistics of rail and river trade are presented in the published volumes, we have first considered whether any improvement could be effected in statements in the Annual Imperial Volume. We find that Tables III and IV give respectively the total quantity of each article imported and exported, and the places to or from which imported or exported, for a period of five years; while Table V gives a general view of the trade in certain principal articles between different places for the year of report. These tables at present occupy 158 pages. We have considered various proposals, and recommend that Tables III and IV should be amalgamated by printing imports and exports on the same page, and showing all provinces and chief ports under each article, and all articles of which the trade is registered; while Table V should also be a complete record for the year of report of the trade in each article. In both tables sub-totals for British Provinces, Native States and Chief Sea Ports which serve no useful purpose should be omitted.

96. In the form in which the accounts are at present compiled, details are given only of the more important articles under each main head, while the total for the main head includes also the amount of trade in "other kinds" for which no separate details are given. This arrangement appears to be misleading, as it may often be overlooked that the grand total is not the arithmetical sum of the recorded sub-totals. We recommend therefore that a reversion should be made to the practice in force

prior to 1901, and that 'others' should be entered as a separate sub-head. On the other hand, the total of each main head, which is treated as a trade heading, so that full details of the imports and exports are recorded thereunder, may with advantage be omitted or be shown in a single line.

97. The accounts at present contain four tables (VI to IX) giving the trade by rail and river of the ports of Calcutta and Bombay for five years. We recommend that similar tables should be added for Karachee and for the Port of Madras.

Additional tables to be added for Karachee and Madras.

98. In the Quarterly Accounts, Tables III and IV should be amalgamated, the imports and exports of each article being shown on opposite pages. The amalgamated table should show both for imports and exports the figures for the quarter, and also for the expired portion of the year as at present. Separate sub-totals for British Provinces, Native States and Chief Sea Ports and of 'Totals of all kinds' may be omitted as in the Annual Volume.

Quarterly Tables.

99. The accounts of rail and river-borne trade contained in the various Provincial Reports may, speaking generally, be divided into three main statements or divisions:

Provincial Statements.

Statement I.—Trade of the province with other provinces.

Statement II.—Trade of the internal divisions of the province with other provinces.

Statement III.—Trade between the internal divisions of the province.

100. It has been represented to us that Statement I is in some cases little more than a repetition of the totals in Statement II, and that in other cases it is possible to modify Statement II so as to include all the information given in Statement I. We recognise that the proposal would in many cases effect a material reduction in the bulk of the tables. The circumstances of each province are, however, widely different, and it is therefore necessary to examine the proposal separately for each Report.

Avisability of retaining Statement I.

101. In the case of the Central Provinces, which has no sea port and no river traffic, the first statement (Statement C) showing the trade of the province with other provinces is a mere repetition of the figures in columns 7 and 8 of the second statement (Statement D), which shows the trade of the internal divisions of the province with other provinces. It serves no useful purpose while occupying 92 pages, and should, we consider, be discontinued in future.

Central Provinces.

102. In the reports of the United Provinces, and the Panjab, the figures in Statement I (showing the trade of the provinces with other provinces) are, as in Statement C of the Central Provinces Report, merely a repetition of the totals in Statement II (trade of the internal divisions of the province with other provinces); except that in Statement I the figures for rail and river traffic are separately shown, and that Statement II of the Panjab report omits the river traffic. The volume of river traffic is, however, small in both provinces and might be shown in a separate table, which would not in either case occupy more than a few pages. Statement II would then show in the Panjab Report, as it now does in the United Provinces Report, the combined figures of rail and river traffic. Statement I would in that case be superfluous and might be omitted altogether, thus effecting a saving of space amounting to between 70 and 90 pages in the two reports.

United Provinces, and Panjab.

103. In the case of Assam, Statement II is in two parts, the former showing the rail-borne traffic and the latter the river traffic, the value of which is about four times greater than the rail-borne traffic. If, however, the rail and river-borne traffic be combined in the first part of Statement II, and the second part, which gives details of river-borne traffic, be retained in its present form, Statement I, which covers 41 pages, becomes superfluous and may be omitted. We recognize that under this arrangement the tables will not show traffic by rail separately. Such traffic is, however, in some cases only partially rail-borne, since in the case of the through-booked traffic by steamer and rail between

Assam.

Assam and Bengal, Assam treats as rail-borne the goods that cross its frontier by rail, but as river-borne those arriving or leaving by river, while in Bengal such traffic is in both cases treated as rail-borne. We think in both provinces traffic carried partly by rail and partly by river should be so described instead of being classed as rail or river traffic only.

104. In the Bombay, Madras and Bengal Reports, Statement I shows the trade of the province separately from the trade of the chief port, so that trade between the province and its chief port is recorded in each sub-division, as well as trade with other provinces; while in Statement II the chief port is treated as an internal block of the province, and trade between the chief port and the other internal blocks of the province is recorded in Statement III (trade between internal blocks of the province). The trade between the chief port and the internal blocks of the province can, however, be recorded in Statement II, by adding two lines of figures under each article, and by that means the necessity for retaining Statement I will be removed. Against the saving thus effected, there must be set, in the case of the Bengal Report, the addition of a table to show the river traffic of Assam and the United Provinces with Bengal and Calcutta, and of Calcutta with Bengal, but this will be very much briefer than Statement I, and will also give the distribution of the river-borne traffic by internal blocks, thus affording additional information regarding a very important branch of the trade. The defect in the arrangement indicated above is that the tables when printed on foolscap paper will be somewhat crowded and will thus present a more complex appearance than the present arrangement of splitting up the tables, and for this reason we have some doubts as to the expediency of altering the existing arrangement of the tables.

105. We do not consider that it is necessary, when the transactions to be recorded are unimportant, to show in the different statements the distribution of the trade in each article by enumerating each province or internal block. We therefore recommend that all the statements should be abbreviated by lumping together under the description 'other places' trade which does not exceed a certain minimum. For this purpose we consider that a value of ₹10,000 may ordinarily be taken as a suitable limit.

106. Separate sub-totals for British Provinces, Native States, Chief Sea Ports and the separate totals for each main head should be omitted as in the Imperial Volumes.

107. One important object of these returns is to enable the distribution of the sea-borne trade to be traced in the interior of the country. This cannot easily be followed at present owing to the differences between the lists of articles on which the two classes of returns are based. We have examined the classified list of articles appearing in the accounts of the rail-borne trade, which was revised in 1899, and the alphabetical list of all articles entering into the trade which was prepared for the use of compilers in 1900. Although the classification is modelled on that of the foreign sea-borne trade, the headings enumerated are much fewer for the inland trade than for the foreign trade, so that uniformity in detail is impossible, but still it appears to us that many differences exist which might have been avoided. The question is, however, a difficult and technical one as the classification for these accounts is that adopted for the Revenue Statistics of the Indian Railways, and has been partly based on the general classification of the Goods Tariff. We are not therefore able to propose definite amendments except as regards the head "Iron and Steel," the sub-heads of which seem to us defective, inasmuch as they make an unnecessary distinction between articles of cast iron and articles of wrought iron, while they do not distinguish machinery separately. The word "wrought" is also here used in a special sense, though when used with reference to all other metals and articles it means "manufactured." We therefore suggest the following sub-heads for Iron and Steel, viz. :—

Unwrought—

(Dust, ore, slag, pig, and old for remanufacture.)

Wrought—

- (a) Bars, sheets, girders, and other commercial forms of iron and steel.
- (b) Machinery and millwork.
- (c) Other manufactures, including hardware and cutlery.

V. ACCOUNTS OF THE EXTERNAL LAND TRADE OF INDIA.

108. In connection with the accounts of the land frontier trade we have considered how far the existing system of registration of the trade at the frontier posts is satisfactory and what improvements can be effected in it. The system is fully described in appendix F to our report and is briefly as follows.

109. A cordon of registering posts is established on the frontier of each province at such places as may be considered sufficiently important thoroughfares, and ordinarily the fact recorded is that the traffic enters or leaves the province at a particular point, without reference to the place of its original departure or final destination. A statistical writer (with sometimes an assistant capable of relieving him) is located at each post and is supplied with a classified list of the articles he is required to register together with forms and registers for recording the traffic. As a consignment of goods passes he enters in his day-book the weight or number of each description of goods :—

- (1) from the invoice, if there is one ; or
- (2) from the statement of the person in charge ; or
- (3) by counting the number of vehicles or animals carrying the goods, and multiplying them by the quantity of an average load according to a table supplied by the District Officer.

In the last case the number of vehicles, etc., is also recorded.

Ordinarily the statistical writer does not give a valuation to the main staples of commerce which do not vary greatly in value. These articles are valued by the District Officer according to tariff values. Miscellaneous articles, the value of which cannot be fixed according to any scale of general application, are however valued by the writer, the value being ascertained—

- (1) from the invoice, if there is one containing values ; or
- (2) from the person in charge.

District Officers are expected to carefully scrutinise the value thus entered.

The contents of the day-book are abstracted by the statistical writer in a ledger, the consignments of goods of the same description being brought together, and added up from time to time. From this ledger the writer compiles the statements which are forwarded periodically to the District Officer, who in his turn embodies the returns received from each post in a statement which is submitted to the central provincial authority.

110. It is evident that these simple arrangements, even under the most favourable conditions, can only give approximate results, and that it is futile to expect any approach to literal accuracy comparable with what is obtained in the registration of the sea-borne trade by the more complete and better-paid customs establishments, who possess statutory powers to exact any information they may require. If, however, we except treasure, jewellery, or other articles of large value in a small bulk, which for the sake of security are concealed on the persons of the traders, or otherwise hidden, it would appear that on the whole articles are described with a fair amount of accuracy ; otherwise the figures would not be so consistent as they are, and the variations would not follow known causes as they certainly do. Even when least accurate the figures indicate the relative importance of the trading routes and the articles forming the chief staples of the trade. On the whole therefore we consider that the present system, notwithstanding its obvious limitations, is suitable to the conditions now prevailing.

111. The want of truthfulness in the declarations of traders, owing to the absence of any compulsion to describe their wares, is doubtless a fruitful source of error in the accounts. It has been

Proposal to obtain written declarations from traders.

suggested that an improvement might be effected by the adoption of optional forms of declaration which traders would be invited to fill in or sign. Apart, however, from the fact that the greater part of the men engaged in the trade are illiterate, we believe that the delay and friction, which such a measure would cause, would very likely result in getting less accurate information than is now obtained from the replies to the questions put by the registering official. Any attempt to confer by law powers of inspection on the officers at the registration posts, or to require statutory declarations of the nature of their goods by the traders, would in our opinion be wholly inadvisable, since such a law could not be enforced and the attempt would merely hamper trade.

112. The imperfection of the record is no doubt in some cases due to insufficiency of establishment. In the case of one important trade route in Burma we

Sufficiency of establishment.

were informed that a small increase in the registering staff had resulted in doubling the amount of the trade recorded. We do not consider it possible to prescribe any general scale of establishment, the details of which must be settled by local authorities with reference to the particular circumstances of each post. It is however in our opinion desirable that the existing scale of establishment in each province should be reconsidered. It will doubtless be found that in most provinces a small sum of money might be usefully expended in improving and strengthening the establishment at present entertained.

113. In considering this question special attention should be paid to the case of posts which are in charge of a

Posts in charge of single writer.

single writer. It seems evident that,

working singlehanded and without supervision, a clerk will often absent himself from his post; and there is reason to believe that, where he is secured from detection by the remoteness of the post, such absence is often prolonged for days at a time. We do not consider that it is necessary in all cases to provide the writer at such posts with an assistant capable of relieving him. Such a measure would involve a considerable increase of expenditure, which could not be justified by the importance or the extent of the trade recorded. The case of each post should therefore be considered separately, taking into account the volume of the trade and whether it arrives at the post continuously throughout the day or only at regular and well-defined hours. The distance of the post from the nearest village or bazaar is a factor which should not be overlooked. We recommend that quarters should be provided for the writers at each post where this has not already been done.

114. It is desirable that the clerks employed at the frontier posts should, if possible, have some acquaintance with

Additional allowances for language qualifications.

the languages of the different nationalities engaged in the trans-frontier trade, and

we suggest that small additional allowances should be given to clerks who possess special qualifications of this kind.

115. A matter of yet greater importance is, in our opinion, the appointment in some form of a regular inspecting

Supervision.

staff. The Allahabad Conference of 1875

recommended that for the purpose of supervision of the posts an officer of the District Staff—where practicable a European Assistant or Extra Assistant—should be placed in charge of collection of trade statistics, and further that existing establishments should be utilised as far as possible in local supervision. While we do not desire that any responsibility at present imposed on the District Staff in regard to the supervision of these posts should be in any way diminished, we consider that such supervision might with advantage be supplemented by the appointment in each province of an officer who would be specially entrusted with the inspection of these posts. In Burma there is a Superintendent of Trade Registration on a pay of R200—250 and a personal allowance of R50 whose business it is to inspect the registration posts, and who is also in charge of the Trade Statistics Department of the office of the Director of Land Records. In addition to the Superintendent a Supervisor on R80 a month is specially employed to look after the posts in the Bhamo Trade Range. In the United Provinces two Inspectors on R50—60 are employed directly under the Director of Land Records.

116. In Burma the duties of the Superintendent include periodical visits to the various trade stations, which enable the Superintendent by personal enquiry on the spot to test the accuracy of the returns submitted and to detect any fabrication of fictitious statistics, and also to give instructions to the trade writers, and to see that they fully understand their duties. Such visits also afford the Superintendent an opportunity of studying local trade conditions. He is thus able to ascertain how far the location of the trade posts is that best suited to secure the registration of the bulk of the traffic, and to arrange, in consultation with the District Officers, for the closing or opening of posts in order to meet the changing requirements of trade. Similar duties are performed by the Inspectors in the United Provinces who report the results of their inspections to the Director of Land Records. The Directors of Land Records both in Burma and the United Provinces bear emphatic testimony to the useful results obtained by the employment of an inspecting staff, and we recommend that other provinces should be invited to consider the advisability of adopting similar measures.

117. We recognize that the nature and extent of the supervising staff employed must necessarily vary with the circumstances of each province, and that the question is therefore one which should be left entirely to the discretion of the Local Governments concerned. We would, however, suggest that an Inspector on R150 or R200 might with advantage be appointed for the Punjab and North-West Frontier Province jointly, and that a similar appointment might be created for Bengal. In the latter province the Inspector, in addition to reporting on the frontier trade posts, would probably also be able to undertake the supervision of the internal road and river traffic, and of the registration of the river traffic between Bengal and Assam. For Baluchistan, where the frontier trade is for the most part registered either at the rail head or under the supervision of Political Agents at Quetta or Chagai, it will perhaps be found that no special supervising staff is required. The frontier trade of Sind does not appear to be of sufficient importance to require any separate supervising staff.

118. In most provinces the general supervision of the frontier trade registration forms part of the duties of the Director of Land Records and Agriculture, or some other officer who is heavily burdened with other work. It is not, therefore, as a rule, possible for him, owing to the remoteness of the posts, to carry out any personal inspection without detriment to other and more important work. We suggest therefore that a junior civilian might with advantage be deputed from time to time to make a tour of the various posts, reporting the results of his inspection to the supervising authority.

119. Our attention has been drawn to the errors and discrepancies in the compilation of land trade statistics in the District and Agency Offices which are from time to time brought to light. Such errors in many cases indicate either gross carelessness or an entire absence of an intelligent scrutiny of outpost returns.

In this connection we desire to draw attention to the remarks recorded by the Government of India on this subject in 1881 :—

* Finance and Commerce Resolution No. 2242, dated 24th August 1881.

“The Governor General in Council desires to point out to Local Governments the necessity for greater care in the preparation of the monthly and annual returns of the land trade. At present a great many errors are found in these returns, due, primarily, to carelessness on the part of the mohurrirs or registering officers at the outposts. Items are posted against the wrong head or are omitted altogether, and quantities and values are sometimes given which are manifestly quite wrong. Many of these mistakes admit of detection at the central compiling office, where the returns should be carefully checked and scrutinised and discrepancies enquired into without delay; but sometimes, not only are the errors of the registering officers overlooked, but additional mistakes are made in the central office in posting, totalling and fair-copying returns.”

We think that periodical inspections of the district central compiling offices by the officials in charge, if intelligently conducted, would assist materially to remove this cause of error.

120. The method of valuing the trade differs in each province. The main differences are that in certain localities declared values are accepted for most

Method of valuation.

articles, while in other localities conventional or tariff values are adopted for the bulk of the trade. Again the conventional values may be assigned by the District Officers as in the North-West Frontier and the Punjab according to the local market rates, or provincial tariff values may be calculated by the central authority as in the United Provinces and Bengal. The system in Burma is to take the traders' declaration of value for every article. Average rates are worked out from these declared values as a check on the declarations. They are also compared with and, if necessary, corrected by values obtained from brokers and the prices ruling at the nearest local market. Whatever system is adopted the valuations can be only approximate, and we consider that each province has a reasonable procedure which need not be interfered with.

121. One matter which appears to merit attention in the preparation of these returns is the method of assigning weights according to certain standard

Testing of standard loads.

loads. We think it improbable that the customary loads should have varied much in the past 30 years. It is, however, possible that the standards as originally framed may have been based on inaccurate data, and we therefore recommend that steps should be taken to ascertain whether the assumed average standard loads do in fact represent accurately the actual average loads for carts or pack animals.

122. Finally, we have considered the question of the classification of the trade with Kashmir and the Shan States

Trade with Kashmir and the Shan States.

which, although it is in both cases, speaking strictly, internal trade, is at present recorded as trans-frontier trade. We recognize the anomaly involved in this classification, but consider that it is in a matter of this kind desirable to be guided rather by practical than theoretical considerations. The trade from Tibet and Central Asia, which passes through Kashmir, is at present registered at Leh on entering Kashmir, and so far as external trade properly so-called is concerned, the registration of trade between Kashmir and the Panjab is superfluous. Unless therefore it is considered that special reasons exist which render it desirable to record the trade between Kashmir and the Panjab, the existing system of registration might be discontinued and a considerable saving of expense effected thereby. In the case of the Shan States, however, circumstances are different, and it would be practically impossible to maintain any effective supervision over isolated posts situated on the confines of the feudatory States, while it would be difficult to obtain returns with any regularity. As a matter of convenience therefore we consider that the trade between Burma and the Shan States should continue to be dealt with as trans-frontier trade. There seems no sufficient reason why trade between Assam and Manipore and Hill Tipperah should be treated as foreign trade.

123. One further matter is discussed in the papers dealing with the frontier

Registration of Persian Trade.

trade which have been referred for our opinion, namely, the question of arranging for the registration of the Persian trade at a post at or near the Persian frontier instead of at Nushki as at present. We have, however, not sufficient information before us to enable us to form an opinion in the matter.

VI—CONCLUDING REMARKS.

124. In concluding our report, we desire to express our obligation to the members of the several Chambers of Commerce and the Trades Associations for the ready and valuable aid which they have afforded us in the prosecution of our enquiries. We are also indebted to the Customs House officials at the various ports for the ready manner in which they have complied with our requisitions for information, and for the willing assistance which we have received from them.

L. F. MORSHEAD.

J. A. ROBERTSON.

R. E. V. ARBUTHNOT.

Appendix A.

Explanations—Bill of Entry.

(1) *Port.*—This may be printed at the different ports. It is convenient to have the name of the port in a prominent place in sorting papers from subordinate ports.

(2) *Importers' name and address.*—It is convenient to have this in a prominent place, as a particular importer's transactions have sometimes to be traced.

(3) *Details of vessels, and port from which goods shipped.*—The form in which these details are to be declared is adopted from that in use in the British form. The "port from which goods shipped" is the port of shipment as defined in the report. The headings in this form are simpler than 'Be pleased to grant a permit to pass into town, etc.', at present in force at some ports.

(4) *Packages.*—The details of packages should be distinctly separated from those of goods.

(5) *Details of goods.*—Nominally at Calcutta, Madras and Rangoon the contents are to be stated separately for each package, but in practice this is found impracticable, and we have therefore abandoned the heading. Values are given separately for each class and description at the same ports, and we have adopted this arrangement.

(6) *Quantity.*—The column for quantity is placed before that for description to separate the figures from those for value. A separate column is given for the unit of quantity for the sake of clearness. At Bombay and Karachi, the quantity column is sub-divided for weight, number, length and breadth, and liquid measure, but this is a refinement not found necessary at other ports, or in the United Kingdom, Germany, Belgium and France. When different units are required they can be specified underneath each other.

(7) *Value.*—Two columns for value seem to be all that is needed. There are separate columns in the Bombay form to show whether duty is leviable upon market value or tariff valuation, but an entry in the tariff valuation column, which is used only for assessment purposes, makes this point clear. At Madras there are separate columns for real value and wholesale market value. The former is only required. In Calcutta the expression tariff valuation does not appear at all, although columns are used for this entry.

(8) *Totals.*—These totals are ordinarily written across the columns now. It is less likely to lead to mistakes to have a clear space for them.

(9) The declaration of growth produce and manufacture at the foot of the Calcutta, Madras and Rangoon forms has been done away with to prevent risk of confusion with the declaration in the column for country. The declaration of inability to state contents and value has been added because Custom House Agents at Calcutta have sometimes sought to avoid the responsibility for misdeclaration by saying that they had entered these details after consulting an Appraiser. This declaration which must be made beforehand leaves no room for doubt.

Black, blue, and violet ink respectively should be used for printing originals, duplicates, and triplicates (if in use). Red ink is objectionable as manuscript entries in the same colour would not show against it.

Adaptation of Forms for Bonded Goods.—For *Entries into Bond* the following changes should be made:—

- (1) The words 'For Consumption' should be deleted and the words 'For Bond to be warehoused at substituted along the top of the form.
- (2) The columns for rate and amount of duty should be omitted.
- (3) Buff paper should be used for the forms.

For *Clearances from Bond* the changes should be—

- (1) The words 'For Consumption' should be deleted and the words 'From Bond' warehoused at under No., dated substituted along the top of the form.
- (2) Green paper should be used for the forms.

Thin paper may be used for the forms, so that the duplicates and triplicates may be prepared by carbon paper for free goods, and for dutiable goods if the Customs authorities see no objection.

Appendix B.

SHIPPING BILL FOR INDIAN PRODUCE (3) FREE GOODS.

Port (1) _____ Exporter's Name (2) _____ Address _____

NAME OF VESSEL (4)		MASTERS OR AGENTS.		COLOURS.		PORT AT WHICH GOODS TO BE DISCHARGED.		REMARKS.	
PACKAGES. (5)		DETAILS OF GOODS TO BE GIVEN SEPARATELY FOR EACH CLASS OR DESCRIPTION. (5)							
Number and Description.	Marks and Numbers.	Quantity.		Description.	Value		Country of Final Destination.		
		Unit.	Amount.		Rate.	Amount.			

N.B.—Henceforward the Export Shipping Bills will be presented to Shippers in triplicate.

The Triplicate of these will be taken with the first boat-load of each consignment to the Ship or Steamer, as the case may be, and delivered to the Master or Commander, who will keep it with him until the lading of the vessel is completed; and at the time of applying for Port Clearance, deliver all such Export Shipping Bills, duly endorsed, to his having received on board the quantity covered by these Bills, with the Export Manifest in duplicate as usual.

The original copy will be delivered to the Gate-keeper, who will endorse on the back of it the quantity as will be passed by him.

The duplicate will remain in the Customs House as office record.

Contents received.

Master or Commander of the Vessel.

Appendix B.

Explanations—Shipping Bill.

1 & 2. The headings for Port, and Importer's name and address are required prominently as on the Bill of Entry.

3. The heading 'Shipping Bill' for ^{Indian produce} Foreign produce to be re-exported is adapted from the simplest of those in force. In some forms 5 alternative descriptions of goods are given namely,

- (1) Warehouse or drawback goods.
- (2) Foreign goods and for drawback.
- (3) Goods exported under special rule of restriction.
- (4) Country goods subject to duty.
- (5) Country goods not subject to duty.

In the form proposed the declaration of claim at the foot of the form will suffice to show that the goods are under claim for drawback. In addition the words Drawback may be written prominently at the top of the form. For exportations from bond which are not very numerous, the words 'From Bond' and 'bonded under No. of

can be added in manuscript at the top of the form. For goods exported under special restriction, whenever this occurs, the words 'Special restriction' can be written in manuscript at the top of the form. For dutiable goods a separate form may be used. With this provision for alternative cases it seems unnecessary to overload the heading in the form. The alternatives of Indian and Foreign produce are those of most importance for Statistical purposes.

4. The headings for the details of vessel and port at which goods to be discharged follow the plan adopted in the Bill of Entry. The port at which goods are to be discharged corresponds to the port at present declared, namely, the port of final discharge as far as that is known to the exporter. It will be defined in the rules proposed as the port at which goods are to be finally landed either from the vessel in which they leave the port of clearance, or, in the case of goods to be transhipped, from the vessel to which they are transferred. This can be checked as at present with the list of ports for which cargo is to be shipped given in the application for outward entry of the vessel.

5. Details of packages are distinguished from those of goods, and the columns for quantity separated from those of value for the same reason as in the Bill of Entry. A column for country of final destination is inserted.

As with the Bills of Entry, black, blue and violet ink should be used for original duplicate and triplicate (if required).

Thin paper may be used for the forms, so that the duplicates and triplicates may be prepared by carbon paper.

The warning to communicate short shipments which appears on some forms has been embodied in the instructions for making declarations in Appendix C, and is therefore omitted from the form.

Adaptation of form for Dutiable goods. The following adaptations may be made :—

- (1) The words 'Free goods' may be deleted at the head of the form.
- (2) The words "Shipping Bill for ^{Indian produce} Foreign produce to be re-exported may be changed to Shipping Bill for Dutiable Goods."
- (3) A column for ^{Duty} rate amount may be inserted in the body of the Form.
- (4) The declaration of claim for drawback may be omitted.

Appendix C.

Instructions for making Declarations.

1. Bills of Entry for goods going into consumption should be on white paper, for goods going into Bond on buff, and for goods cleared from Bond on green. The originals of the Bills of Entry should be printed in black ink, the duplicates in blue, and the triplicates (if used) in violet.

Port from which goods shipped.

2. The following instructions should be observed in writing up the forms :—

- (1) In the heading, *port from which goods shipped*. Care should be taken in the case of goods on a through bill of lading to enter the port at which the through bill of lading was granted.

Description.

- (2) In the column for Description in the body of the form the ordinary trade description of the goods should be given.

Description.

Quantity.

- (3) The unit of quantity should be that shown against the class to which the goods belong in the list appended.*

Quantity.

When the unit is a unit of weight, it should be stated at the heading of the column for amount under Quantity whether the weight declared is gross or net. Net weight should be declared when known. Gross weight is the weight of the goods with their coverings or receptacles. Net weight is found by deducting the weight of the covering or receptacles from the gross weight.

Tariff Valuation.

- (4) The rate in the column for Tariff Valuation in the Bill of Entry should be that shown against the goods in the Tariff schedules. Care should be taken to have the current year's schedules for reference.

Tariff Valuation.

Real Value.

- (5) The columns for Real Value as defined in the Sea Customs Act should be entered even for goods for which there is a Tariff Valuation, and care must be taken to give the correct real value independently of the Tariff value. The real value is the wholesale cash price at the port of import whenever such a price is known or can be ascertained in the local market, after deducting (1) whatever trade discount is allowable according to the custom of the trade, and (2) the duty paid on importation. When no wholesale cash price is quoted in the local market, then the real value is the cost with all charges for freight, insurance, packing and landing, but not including the duty payable, at which goods can be placed on shore for delivery to the importer, less a deduction on account of trade discount according to the custom of the trade. Landing charges should be reckoned at per cent on the real value as calculated before these charges are added in.

Real Value.

Country whence consigned.

- (6) The column for country whence consigned should show the country from which the goods have come whether by land and sea or by sea only without interruption of transit save in the course of transshipment or transfer from one means of conveyance to another. As distinguished from the Port from which shipped, this column should show the country from which the goods came before shipment, that is, from which they originally started on a continuous journey to India whether by land or sea. The following illustrations may be studied :—

Country whence consigned.

No.	Course of goods.	Country to be declared as country whence consigned.
(i)	Goods sent from Switzerland by rail to Trieste and shipped immediately for India from there; the journey being continuous.	Switzerland.
(ii)	Goods sent from Sweden on a through bill of lading to Hamburg, and transhipped thence for India.	Sweden.

* A copy of the Statistical list for Imports of Private Merchandise should be issued with the instructions.

† An all-round rate to be assessed locally.

No.	Course of goods.	Country to be declared as country whence consigned.
(iii)	Goods sent from Sweden to Hamburg, and transhipped immediately for the Indian destination; the journey being continuous though not on a through bill of lading.	Sweden.
(iv)	Goods sent from Austria to Antwerp by Canal, and shipped directly from Antwerp; the journey being continuous.	Austria.
(v)	Goods sent from Japan to Singapore, and thence to India either on a through bill of lading from Japan, or on a continuous journey though without a through bill of lading, as in the last two cases.	Japan.
(vi)	Goods of Japanese origin supplied from stock collected at Singapore.	Singapore.
(vii)	Wine of French origin supplied from a Wine Merchant's stock in the United Kingdom.	United Kingdom.
(viii)	Sugar of Austrian origin supplied from a stock collected in Germany on account of an English firm.	Germany.
(ix)	Miscellaneous goods supplied from a London firm from warehouse stock.	United Kingdom.
(x)	Miscellaneous goods ordered from a London firm but shipped from Germany and Belgium, and transhipped at London, the journey being continuous.	Germany and Belgium.

The question in each case turns on whether the journey has been continuous from the original point of departure.

3. The attention of importers is drawn to the alternative declaration at the foot of the Bill of Entry, which is to be used when they have not sufficient information of the contents and value of goods to enter these details.

4. The Originals, Duplicates and Triplicates (if used) of Shipping Bills should be printed in black, blue and violet ink respectively like those of Bills of Entry. Separate forms are prescribed for free and dutiable goods respectively.

5. The following instructions should be observed in writing up the forms:—

(1) In the heading 'Port at which goods to be discharged,' the port should be entered at which the goods are to be finally landed from the vessel in which they leave the port of clearance; or, in the case of goods to be transhipped, from the vessel to which they are transferred. This may be regarded as the port to which freight has been paid or is payable.

(2) The columns for *Description* and *Quantity* should be filled in according to the instructions given for filling in these columns on the Bill of Entry.

Value.

(3) In this column the Real Value as defined in the Sea Customs Act should be entered. The Real Value for exports is the wholesale cash price at the port of export whenever such a price is known or can be ascertained in the local market, after deducting whatever trade discount is allowable according to the custom of the trade. When no wholesale cash price is quoted in the local market, then the Real Value is the cost with all charges for freight, insurance, packing, etc., at which the goods can be delivered at the port prior to shipment, less a deduction on account of trade discount, if any, allowable according to the custom of the trade.

Country of Final Destination.

(4) The country to be shown in the column for country of Final Destination on the shipping bill is the country to which the goods are intended to pass whether by sea and land or by sea only, without interruption of transit save in the course of transshipment from one means of conveyance to another. This corresponds to the country whence consigned for imports. The following illustrations may be studied:—

No.	Course of goods.	Country of Final Destination to be declared.
(i)	Goods shipped from India to Antwerp to be forwarded by rail or Canal to Austria, the journey being continuous.	Austria.
(ii)	Goods shipped on a through Bill of Lading to Colombo to be transhipped for Australia.	Australia.

No.	Course of goods.	Country of Final Destination to be declared.
(iii)	Goods shipped to Colombo to be transhipped immediately for Australia though not on a through Bill of Lading; the journey, however, being intended to be continuous except for the break of transhipment.	Australia.
(iv)	Goods shipped to Egypt 'for order' the final destination to be determined on arrival at Egypt.	'Egypt for orders' to be shown, and the final destination communicated when determined.
(v)	Goods shipped to London on an optional Bill of Lading, the option to be exercised on arrival at London.	'United Kingdom optional' to be shown, and final destination communicated as soon as known.
(vi)	Goods sent to Trieste, but the destination changed on arrival to Venice.	Austria will naturally be shown, but if the change of destination becomes known to the Exporter later he should communicate it.
(vii)	Goods sent to a final destination which the Exporter wishes for business reasons to conceal.	The words 'will follow' only should be entered in the column for country of Final Destination and the actual country communicated by letter to the Statistical Superintendent as early as possible.

Particular attention is drawn to the last four illustrations which are of course applicable whatever countries are concerned. As distinguished from the 'Port at which goods to be discharged' to be shown at the head of the forms the column for country of Final Destination should show the country to which the goods are intended to pass after discharge by an inland route on a continuous journey from India. In cases such as that illustrated under (vii) the Port at which goods are to be discharged as shown in the heading will be published in the Daily lists, in which the final destination in such cases will not be published.

6. When the marks on goods exported include the name of the place of final destination as 'San Francisco' or any indication of the route such as 'San Francisco *via* Hongkong,' these details should invariably be reproduced in entering the marks in the column for marks and numbers.

7. Exporters are reminded that under section 140 of the Sea Customs Act they are required to give notice at the Custom House within five days after the vessel's departure when goods mentioned in the shipping bill are not shipped or are reloaded. Should such notice not be given, they are liable to a penalty under clause 57 of section 167 of the Sea Customs Act.

Appendix D.

Memorandum on the system of procedure to be followed in the registration and compilation of returns in the Statistical offices.

1. *The materials to be sent to the Statistical office and the stage at which they should be forwarded.*—Materials go to the Statistical offices from the chief ports in which they are situated, and from the subordinate ports. For private merchandise at the chief ports usually one copy of the document is sent, but the original, duplicate, and even triplicate, are used somewhat indiscriminately for the purpose at the different ports, whilst at Rangoon diaries written up from the documents are sent for dutiable goods and short shipments, and departmental registers for bonded goods; at Madras Import and Export Summaries accompany the documents, and practically reproduce what is written in them. From the subordinate ports returns following the forms prescribed for the Monthly returns to the Statistical Bureau are received at Calcutta, Bombay and Karachi, originals of the documents at Madras, and diaries at Rangoon. The terms original, duplicate, and triplicate do not appear to bear the same meaning at all ports, and it is, therefore, desirable to define the original as the copy for recording operations in the office, and assessing duty, when leviable; the duplicate as that used for passing the goods either through the gates, or on board ship; and the triplicate as that returned to the presenter or otherwise utilised. The original should be sent to the Statistical Office in the case of imports, and the duplicate in the case of exports. The time of despatch should follow the recommendation made in paragraphs 55 and 56 respectively of the Report. Similarly the documents submitted from out-ports to the Statistical Office at the Chief Ports should consist of the original and duplicate of the Bill of Entry and Shipping Bill respectively. In both cases the use of Customs diaries or registers or draft returns should be done away with, and the import and export summaries dispensed with.

2. *Daily Lists and other unprescribed publications.*—These are mentioned here because

Daily Lists.

documents generally pass through the hands of the Daily List writers before reaching the Statistical office. The publications include Daily Lists of Imports and Exports, Weekly Manifests, Monthly Guides and the like, which are issued locally at each port on subscription. At Calcutta, Madras and Rangoon they are prepared and published by the Custom Houses; at Bombay and Karachi by the Chambers of Commerce, whose clerks have rooms in the Custom Houses for the purpose. In Calcutta the Daily Lists are prepared in the Statistical department, at Rangoon they are prepared independently in the General department. We recommend that the compilers should be under the supervision of the Statistical Superintendent, but as a separate branch of his department. This recommendation is made because we think the preparation of these publications should be under expert control. It is, however, desirable that the compilers should be separate from the rest of the office, partly because the Daily Lists when independently prepared form a useful secondary check on the statistics, partly because certain information regarding the ultimate destination of cargoes is not intended to be communicated to them, and for this reason we recommend that they should be constituted as a separate branch of the department. We do not propose otherwise to regulate their procedure, and the changes we recommend are not intended to apply to them.

3. *Receipt and distribution of documents in the Statistical Office.*—The documents specified should be forwarded both at the chief port, and at the subordinate ports in daily batches with simple advice sheets on the model of those used in the United Kingdom. For such documents as pass through the hands of the Daily List writers on the way, the advice sheet will be sent direct from the Customs Department to the Statistical office to enable the latter to check the documents received from the Daily List section. The advice forms will specify the documents by number only, but will have certain columns to show their subsequent distribution in the Statistical office. Counterfoils to be returned as receipts will be attached to them showing the first and last numbers of the series sent. From the subordinate ports the documents dealt with each day will be despatched by post the same evening, or by the first available mail to the Statistical office as in the United Kingdom. A special clerk in each Statistical office will receive, check and distribute the documents to the posting clerks.

4. *Classification of Posting Registers.*—At present posting registers are classified on many different principles; sometimes according to the class of goods, sometimes according to the countries, sometimes according to the return for which they will be required, sometimes according to the subordinate ports from which the materials are received, or the vessel carrying the goods. In our opinion the volumes should be arranged in main divisions according to the different categories of goods, such as Private Merchandise, Government Stores, Imports for Consumption, and for Bond, etc., etc., and these main divisions should again be sub-divided into sets covering the chief port and subordinate ports, either singly or in groups. Within these sub-divisions the arrangement should be uniformly by articles in the order of the Statistical lists under their heads and sub-heads, the articles being distributed, for imports, according to countries whence shipped, according to ports under countries, and according to countries whence consigned under ports; and for exports, according to countries of final destination, and according to ports of discharge, under these countries. A suitable number of heads or sub-heads of articles should be allotted to each posting clerk, who will

make entries for these items in all the sets of registers in which they may have to appear. The proposal made in the next paragraph will facilitate this distribution, the advantages of which are that the posting clerks will be enabled by having their attention concentrated on a few articles to attain expert knowledge and especially to check variations in value at the different ports.

5. *Separate registration for the Duty returns.*—We recommend that the duty returns should be prepared independently of the trade returns. The former include Returns Nos. 15 and 16, and the monthly statement of "Gross Indian Sea and Land Customs Revenue," of which details are telegraphed in advance to the Statistical Bureau. Promptitude is required with these, and exact correspondence with the Treasury accounts; they follow also the tariff classification and not that of the Statistical list. If these are compiled either in the Treasury department, or in the departments to which they immediately pass from the latter before they are forwarded to the daily list writers, these conditions will be most satisfactorily met. The registration will take place a day earlier and the very elaborate checking and abstraction at present found necessary in the Statistical offices at some ports in the process of reconciling discrepancies will be dispensed with, at any rate until the returns have been completed. The check effected by this reconciliation can still be retained, but done at leisure and by simple methods after the returns have gone in, and as the two sets of returns will be more independently prepared it should be correspondingly more efficient. Clerks from the Statistical establishment in proportion to the labour saved can be transferred to the Cash or other department in which the duty return will be compiled. It may be observed that the returns for duty goods in the United Kingdom are prepared altogether in the Accountant and Comptroller General's branch of the London Custom House, whence abstracts for the trade returns are sent to the Statistical department. Our recommendation follows in part this precedent.

6. *Scrutiny by Posting Clerks.*—The documents should be carefully scrutinised before entry by the Posting Clerks, and any doubtful entries detected brought to the notice of the Statistical Superintendent, who should decide whether it is worth while taking steps to have it cleared up. Simple query forms with spaces for replies should be prescribed for issue in such cases whether to Customs officers or to declarants direct as the Superintendent may decide in each case.

7. *Completion of documents, correction of errors, etc.*—Documents containing incomplete declarations such as those affecting shipments 'for orders,' or on optional bills of lading and the like should be provisionally entered and separately filed. To complete them reminders in some simple form should be issued a week before the close of each month. If the replies are received before the accounts for the month containing the provisional entries are closed, the latter will be corrected; otherwise the correction will appear in the ensuing month as suggested below. The method of making corrections adopted in the United Kingdom is on a running account system: errors occurring in the entries relating to one month are corrected by addition or deduction against the entries in the month in which the corrections are communicated. This saves the communication of errata, and effects an adjustment which is sufficiently correct for all practical purposes. We have proposed that the same method should be adopted in India for all items completed or corrected in the course of the year in which a difference of Rs. 5,000 or less in value is involved. All corrections, however, made after the close of the year and relating to the past year's figures, should be communicated as at present.

8. *Forms and Procedure in Registration and Compilation.*—The stages in the Compilation of the General Import and Export table returns should be three in number, the posting, the abstraction according to chief and subordinate Indian ports, and the entry of the draft copy of the monthly return to be sent to the Statistical Bureau. Intermediate abstractions which are somewhat unnecessarily multiplied at present should be dispensed with as far as possible, and totals transferred direct from one set of registers to the next.

Posting register forms should be simplified, and unnecessary information eliminated. At present different forms of these registers are used at all ports, and at some they are antiquated and ill-adapted for the purposes required, so that entries have to be made in them regardless of the printed headings, whilst practices have crept in of registering the names of importers, and vessels, and sometimes other details which appear superfluous for statistical purposes, and can be ascertained from Customs registers or records if required for other reasons. Simple forms should be prescribed like those in force in the United Kingdom, to which the Madras

* This column will be doubled to meet the case of goods described in more than one denomination.

and Karachi registers alone approximate. The essential columns are for (1) Date and number of documents, (2)* Quantity, (3) Value, and (4) Duty (for dutiable goods). These will take the

place of 8 or 10 separate columns in some of the existing forms.

The Port abstract registers should show the ports vertically, and the totals for the articles to which the page relates horizontally; the descriptions of articles should follow those in the monthly returns for imports or exports. The draft return should be entered from the page totals in this register. Where there are few out-ports to record as at Calcutta and Rangoon the draft return can be combined with the Port abstract register, by printing the names of articles vertically, and having separate sets of columns horizontally for each port.

All intermediate abstraction as of totalling details for foreign ports under countries, or for additional sub-heads under those recognised in the returns, or to arrive at totals for quantities landed and quantities cleared in the returns, and the like should be done as far as possible on the last page for the month of the main posting register concerned. A considerable number of unnecessarily complicated abstractions will, we believe, be thus swept away. Progressive totals

should be made in all the registers at suitable intervals throughout the month. The monthly accounts will close with the documents received on the morning of the last day of each month.

9. *Compilation of Miscellaneous returns.*—For the Miscellaneous Returns of Refunds and Drawbacks, Goods remaining in Bond, etc., and for those of Navigation, statements will be received from the subordinate ports, and the Customs departmental registers at the chief port utilised for compilation as in many cases at present.

10. *Supervision and Check.*—There are three means of check (1) by examination of the actual entry or total, (2) by working up the results separately, and seeing if they agree, (3) by comparing details or results with a record independently made. All three are indifferently in use at the different ports. For the first the examination is sometimes carried out by a fellow clerk of the same status, sometimes by special examiners, and sometimes, but to a necessarily limited extent, by the responsible head of the office. For the second and third there are great variations in practice. On the whole there is no very definite system, and it is questionable how far this very important task is efficiently performed at many of the ports:—

- (1) Comparison by a fellow clerk should be replaced by the selection in each office of experienced and reliable clerks as examiners, who should be required to verify all totals, and a certain percentage of entries in detail. They should mark the entries tested, and the Superintendent of the office will again verify a percentage of these to check the examiner's work, in addition to his examination of independent entries. For Imports the Posting clerks should be required to go over all their entries made from the originals with the duplicates when received later, and the examiner should test from the latter. As a check on values the examiners and Superintendents should regularly glance down the columns to detect any want of relation between quantities and values. This has been found a most useful check in the United Kingdom.
- (2) The check by comparing results arrived at in different ways is useful in verifying totals, provided the process is not too elaborate; thus the total of a return arrived at by adding the totals of each class of articles can be checked by adding the totals for countries independently, whilst horizontal totals in a register must agree with vertical, etc. This check should be continued in certain cases, but its application should be limited.
- (3) The independent records with which results may be compared are chiefly (1) for dutiable goods, the registers kept for the duty returns, and (2) the Daily Lists and other Custom House publications. The advantage of the comparison is that it is a reciprocal check on both compilations. At present it is done in some cases daily for the Duty returns; this appears to be unnecessary and it should suffice if the results are reconciled once a month after they have gone in. The comparison with the Daily List is not necessary if there is an effective comparison with the original documents, which latter is more important, although more troublesome. If therefore the comparison with the Daily List is continued, it should supplement, but not replace, the comparison with the original documents.

The important check on the receipt and disposal of documents to see that all are ultimately brought to account should be carried out on the advice slips received with them. At some ports at present it is omitted altogether.

To economise labour in checking, the Superintendents should be required to keep records of each clerk's work as shown by the mistakes detected, and the extent to which each individual's work is tested should be adjusted accordingly.

11. *Annual Abstracts and Ledgers.*—The chief portion of the task of the local offices in supplying the Statistical Bureau with materials is completed when the monthly returns are submitted. But materials have to be compiled for the Provincial Annual Statements, and a record has to be maintained in detail of all trade for the year in order to supply any information that may be especially applied for. These requirements are not very fully or satisfactorily met by the many different forms at present in use. We think that two sets of annual records are required for the purposes indicated, the first called Annual Abstracts, to be compiled from the monthly returns submitted, showing the items vertically as in the returns, and the figures for each month horizontally, with arrangements for progressive totalling; and the second called Annual Ledgers, to be written up from the posting registers showing the totals for each month under all the detailed heads of the latter. This register will be paged by articles, by countries, by ports under countries, and by countries whence consigned under ports, and will show separately for each sub-head locally registered the quantity and value for each month against the chief Indian port and each subordinate port, the months being printed vertically and the ports horizontally. This register will be written up monthly and will form an immediate means of reference for all information the local offices are in a position to give. The reconciliation of its totals with those in the Annual Abstracts will afford an effective check on the compilation of both.

The annual accounts will close like those of each month with the documents received in the morning of the last day of the year.

Appendix E.

Note on the system of collecting and tabulating the Inland Trade Statistics.

The main feature of the system of Inland Trade registration is the division of the entire net-work of railway communications into blocks corresponding, with certain exceptions,

The Block-system. with the provincial boundaries. The railways within a province constitute a "block" and the trade registered is the trade which comes into, or goes out of, each block by rail, exclusive of passing traffic. In the provinces of Sind, Bombay and Bengal the chief seaport town is a distinct block or separate unit of registration, and in Madras eight seaports form a single principal block.

At present there are in all 15 principal blocks, namely, eight blocks representing the British Provinces—Assam, Bengal, United Provinces, Punjab, Sind, Central Provinces and Berar,

Number of Principal or External Blocks. Bombay, and Madras; four representing the principal Port-towns—Calcutta, Bombay, Karachi, and Madras seaports; and three representing Native States—Rajputana and Central India, the Nizam's Territory, and Mysore. Burma does not at present come within the general scheme of Inland Trade registration.

The British Provinces, Sind excepted, are sub-divided into internal or minor blocks on the same plan, and each of the eight seaports of Madras is an internal block of the principal block

Number of Internal Blocks. "Madras seaports." The Native States have no internal blocks. The formation of the blocks is not on a uniform principle; in some cases their boundaries follow administrative divisions, while in others they are determined by geographical or other considerations.

The work of registration is entrusted to the principal Railway Audit Offices which register the goods carried for delivery to consignees on their own lines or passing over their lines for

Registration. delivery on connected lines.

These Railways register (1) the trade between the internal blocks of a province and (2) the trade between the internal blocks of a province and the internal blocks of other provinces. Arrangements for the registration and supply of (1) are left to provincial offices. For the registration and supply of (2) certain lists known as appendices A and B were prescribed and are used by the registering offices. A shows by what audit offices the rail-borne trade of each province with external blocks should be registered, and B the returns to be supplied by railway registering offices and the offices to which they should be furnished. There are also two alphabetical lists prescribed for the guidance of the registering offices:—

- (i) List of railway stations showing the different railways to which they belong, the internal blocks of a province and the provinces in which they are situated.
- (ii) List of articles showing their classification, to which are added the rates per cent to be deducted from the gross actual weight on account of packing.

The required information is collected from railway invoices which, among other particulars, show the description of goods, the station from which they are sent and at which they are received, and their gross actual weights.

The returns prepared in the provincial offices contain three principal statements showing:

Preparation of Provincial returns. I the trade of a province with other provinces; II the trade of the internal blocks of a province with other provinces; and III the trade between the internal blocks of a province. Provincial officers receive from the different Audit offices statements II and III, and then combine them and prepare statement I. In the case of the maritime provinces statement I is based on statements II and III, as in these provinces the statement includes local trade between the province and its chief port, as well as the external trade of both with other provinces; in the case of the non-maritime provinces it is based on statement II only.

In some provinces the river-borne trade is also registered and included in the Inland Trade returns. Such trade exists between—

River-borne trade.

Bengal and Assam,
Bengal and United Provinces,
United Provinces and Assam,
Panjab and Sind.

The river-borne trade represents the trade carried by country boats, as well as the trade carried by inland steamers. The forms in which the trade is registered are similar to those used for the registration of the rail-borne trade. The boat traffic is registered at certain selected river stations by clerks who collect the required information from the boatmen, and forward the returns to the provincial officers; that carried by steamers is registered by the steamer agents or by clerks from provincial offices who extract the information from the invoices recorded in the offices of the steamer companies. The trade carried partly by rail and partly by

river, when through booked and carried by steamers running in connection with railways, is recorded by the railway Audit offices concerned.

As the railway and steamer invoices do not contain figures of value the returns prepared by the Audit offices contain only figures of quantity in maunds. Statement I which the provincial

How values are assigned.

offices forward to the Statistical Department each quarter in manuscript also contain only figures of quantity. The figures of value which appear in the annual provincial returns are assigned by the provincial officers. The price of each article is ascertained by the provincial offices in accordance with rules laid down by the Government of India from time to time, and rates are fixed every quarter except in the case of certain articles such as "other grains," "other dyes," "other oils," etc., for which conventional value rates have been fixed once for all. The quantity of each article in each quarter is multiplied by the value rate for that quarter, and the sum of the values thus obtained for the four quarters forms the value for the year. The value rates fixed by a province are adopted for valuing the exports of that province, as also its trade with the Native States; for valuing the imports the rates fixed by the exporting provinces are adopted. In order to arrive at these values provincial offices interchange lists of value rates every quarter.

The accounts for India of the Inland Trade are compiled from the manuscript statement I of the provincial quarterly returns. As the Native States furnish no returns the trade between one

India accounts how compiled.

Native State and another is not ascertainable. The trade between those States and British Provinces is however obtained thus—the imports into the provinces represent the exports from the Native States and the exports from the provinces represent imports into Native States.

The accounts for India both quarterly and annual contain only figures of quantity. There are eight tables in the quarterly accounts and nine in the annual. In the quarterly accounts three years' figures for the quarter, as also the progressive figures are stated. Table I shows the total trade of each province in merchandise; table II the trade of each province in treasure (gold and silver separately); tables III and IV the trade of certain provinces in principal articles; and tables V to VIII the trade of Calcutta and Bombay port in principal articles. The annual accounts are compiled from the progressive figures of the accounts for the 4th quarter and each issue exhibits statistics for five years. The annual accounts contain in addition to the tables in the quarterly accounts a table giving a general view of the trade in principal articles by allotting to each article a separate page on which the blocks of departure and arrival are both shown.

Appendix F.

Note on the system of registration of the External Land Trade of British India.

The Agency proposed by the Government of India on the report of the conference held at Allahabad in 1875 for the registration of the external land trade of the country was by means of district posts to be located on the principal thoroughfares of trade on or near the frontier—the arrangement for the location of the posts being left to each Local Government. The mode of registering trade at the district posts is also described in that report, and is briefly as follows—

Agency employed. at each post. This person is supplied with a list of the articles which he is required to register, and with forms to be observed in registering the traffic. As a consignment of goods passes he enters in his day-book the weight of each description of goods—

- (1) from the invoice, if there is one, or
- (2) from the statement of the person in charge, or
- (3) by counting the number of vehicles or animals carrying the goods, and multiplying them by the quantity of an average load, according to a table supplied by the Deputy Commissioner.

In the last case, the number of vehicles, etc., is also recorded.

The statistical writer has nothing to do with the valuation of such articles of commerce as do not vary greatly in value, *e.g.*, cotton and cotton goods, grains of all kinds, skins, metals, oils, salts, seeds, etc. These articles are valued by the Deputy Commissioner according to tariff values. It was considered necessary to leave as little as possible to the discretion of the statistical writer in the matter of valuation. Miscellaneous articles, the value of which cannot be fixed according to any scale of general application, are of necessity valued by the statistical writer, the value being ascertained—

- (1) from the invoice, if there is one containing values, or
- (2) from the person in charge.

Deputy Commissioners (or other inspecting officers) are expected carefully to scrutinize the values thus entered by the statistical writers.

The contents of the day-book are abstracted by the statistical writer in a ledger, the consignments of goods of the same description being brought together and added up from time to time. From this ledger the statistical writer compiles the statements which are forwarded quarterly or monthly to the District Officer, or in some provinces the Director of Land Records who embodies the returns received from each post in a statement for the province.

The provincial arrangements by which the registration of this trade is carried on will now be explained in detail for each province.

Provincial arrangements.

SIND AND BRITISH BALUCHISTAN.

The province of Sind and British Baluchistan now registers the traffic by land with the outlying foreign territories of:—

Afghanistan,
Baluchistan, and
Seistan.

Trade where registered. B.

The trade is carried on partly by rail and partly by road and is registered at:—

Chaman and Kila Abdulah (Railway stations)
Samungli, Mianghundi, Nushki, and Miran;

under the supervision of the Huzur Deputy Collector of Karachi, the Political Agent, Quetta, the Political Agent, Chagai, and the Examiner of Accounts, North Western Railway, Lahore. The returns are made to the Chief Collector of Customs, Karachi, and this officer combines all the returns into consolidated tables of Imports and Exports and transmits them to the Statistical Department.

Afghanistan.—This trade is now registered into two divisions (a) Northern and Eastern Afghanistan (including Kabul and Ghazni), and (b) Southern and Western Afghanistan (including

How divided.

Kandahar and Herat).

The trade of Northern and Eastern Afghanistan with Sind and British Baluchistan is comparatively small; it is carried by road and is registered at Chaman under the supervision of

Relative value of the trade.

the Political Agent, Quetta. The bulk of the trade carried on is that with Southern and Northern Afghanistan. This trade comes and goes from and to Kandahar and the regions beyond, and is registered under the supervision of the Examiner of Accounts, North-Western Railway, at the Chaman and Killa Abdullah Railway stations, where it takes and leaves the rail. About a fourth of the trade with Kandahar and the regions beyond is also carried by

road only and the registration is likewise effected at Chaman, but is supervised by the Political Agent, Quetta. Some of the road traffic with Afghanistan also passes the Nushki route where it is registered by the Political Assistant, Chagai.

Baluchistan.—This trade represents the Imports and Exports from the Kelat and Lus Bela territories.

There are three blocks in Kelat, *viz.*, Ournak, Nal, and Wad, and other minor towns, among which the trade is distributed. The traffic with the former two is carried on, by the Rajroad with Karachi and is registered at Miran under the supervision of the Collector of Karachi. Whilst the traffic from the minor towns passes from Nushki to Quetta and *vice versa* and is registered at Samungli and Mianghundi under the supervision of the Political Assistant, Quetta.

There are four blocks in the Lus Bela territory, *viz.*, Sonmiani, Utal, Belo, and minor towns.

The whole of this trade is registered at Miran under the supervision of the Collector of Karachi.

Seistan.—The trade with Seistan is carried on by the Nushki-Quetta route and is registered at Nushki under the supervision of the Political Assistant, Chagai.

As to the method of valuing the articles which enter into the frontier trade of Sind and

British Baluchistan, references were made to these offices on the subject in 1901, and the replies received from them are summarised below :—

- (1) The Huzur Deputy Collector, Karachi, states, that the values entered in the returns supplied by him are obtained from the owners or carriers of the goods in transit.
- (2) The Political Agent, Quetta, states that the goods passing *via* the Chaman route are valued according to the actual prices at which similar articles are sold in the Chaman market. The values of the articles entered in the trade returns of Killa Abdulla, Mianghundi, and Samungli are shown as stated by the owners and carriers thereof. In cases in which the values cannot thus be obtained they are calculated according to the current market rates.
- (3) The Examiner of Accounts, North-Western Railway, Lahore, states that the values of the articles entered in the returns prepared in his office are obtained from the railway invoices. When the values are not stated in the invoices, they are worked out in his office according to the rates published in the *Bombay Gazette* or in the quarterly lists of value rates prepared for the report on the rail and river-borne trade of Sind.

PANJAB.

Since the formation of the North-West Frontier Province in 1901, the Panjab registers trade with—

- (1) Kabul (through Dera Ghazi Khan only) ;
- (2) Kashmir (excluding trade through Hazara) ;
- (3) Ladakh ; and
- (4) Chinese Tibet.

(1) **Kabul.**—As regards Kabul, the trade so far as the Panjab is concerned is now limited to that registered at the single post of Khar in the Dera Ghazi Khan District. The continued decline in the trade is ascribed to the waning popularity of the route *via* Khar in consequence of the opening out of the Chunar Khel Dhana route through Dera Ismael Khan.

(2) **Kashmir.**—Most of the external land trade of the Panjab is with this State.

The trade is registered on the following routes :—

Rawalpindi—

- (a) The Murree-Kohala cart-road, registered at Murree, catches the Srinagar trade ;
- (b) The Kahuta Ferry route, registered at Lachman Ferry, catches the Panch trade.

Jhelum—

Routes cross, and trade is registered at the following ferries :—Dangrot, Mangla, Gatalian, Pind Ratwal.

Gujrat—

Trade was registered on the main roads at Gujrat and Daulatnagar and on the border at Channi, but, since April 1903, the North-Western Railway stations of Gujrat, Lala Musa, Karian and Kangala have been substituted.

Sialkot—

- (a) By the Sialkot-Jammu Railway ;
- (b) on the main roads at Daluwali, Salehpur, and Zafarwal.

Gurdaspur—

On the main roads at Sukho-Chak, Dandot, Basuli, Marot,

of these routes the Murree-Kohala road takes the largest share of traffic, and carries most of the trade described as Central Asian. The Kahuta road is largely used by traffic for Panch, while the Gujrat and Sialkot routes carry for the most part traffic to Jammu. The Jhelum routes seem to take purely local traffic. It may be mentioned also that Gujrat and Jhelum trade almost entirely with the adjacent districts of Kashmir, and even the trade of the Gurdaspur, Sialkot, and Rawalpindi districts does not, as a rule, go beyond Srinagar, as Yarkand, and Ladakh

traders seem to prefer the Kulu route, which is probably shorter than the route through the Kashmir Valley.

(3) *Ladakh*.—The trade with Ladakh is that which passes through the Kulu Sub-division of the Kangra district and is registered by the Assistant Commissioner of Kulu. In Kulu there is one registration post at Sultanpur. This place is twelve marches from the British Frontier; but the country traversed is neither populous nor rich. The route from Simla to Leh is a long and difficult one and will never be a rival to the Kashmir and Kulu routes.

(4) *Chinese Tibet*.—This trade is registered where the Hindustani Tibet road crosses the Sutlej, at Wangtu, by the Deputy Commissioner, Simla. It has lately been reported that this post has really been maintained at Nachor (see report for 1900-1901).

The commercial capital of Western Chinese Tibet is Gartok. Rudokh is also a place of importance in connection with the trade and goods are also imported from and exported to other places of minor importance. The trade post at Wangtu (or Nachor) on the Sutlej is a long way from the British Frontier and no doubt some trade escapes record; but the whole commerce of these regions is trifling and further the country between Wangtu and the extreme point of British territory is mountainous and poor. The routes into Tibet appear to be three in number, passing through the following parganas of Bashar, *vis.*, Inkpa Bhitara, Tukpa Bahala, and Ghirya. On the first route are three passes—Kiobrang, Sacha, and Sholarang; on the second are Chagarghati or Baspa; and on the third Shipki and Manirang.

For further particulars as to principal trade routes leading from foreign territory to British registration posts, Appendix No. III of the report of the external land trade of the Panjab for 1897-98 may be referred to. This list dealing as it does with routes passing through a vast extent of independent territory and based necessarily on the information given by traders themselves, does not pretend to be complete. Local authorities, it is said, have, however, in some cases, bestowed a considerable amount of careful and minute enquiry on the matter, and the results obtained have been carefully collected and checked with the lists of routes published from time to time in previous reports.

As to the method by which values are assigned to the articles of the frontier trade of the Panjab, the Financial Commissioner explained in 1901 that (briefly) the value for articles to which a tariff value per maund can be assigned are calculated in the offices of the Deputy Commissioner or other officer charged with the supervision of the statistics, and are based on the monthly prices current in the district. The values of the commodities commonly reckoned by tale or the value of which cannot be calculated by the tariff are ascertained by the registering clerks at the trade posts from traders.

As to the difficulties and shortcomings in the system, the Financial Commissioner's report for 1900-01 may be quoted.

"Posts appear to have been duly inspected in most cases by the officer in charge, sometimes the Revenue Extra-Assistant Commissioner more often the Tahsildar; but many of these posts are in remote places difficult of access, and anything like constant inspection is an impossibility. It is, therefore, only reasonable to believe that a good deal of trade escapes registration through the indifference of the registering mohurrirs. This coupled with the fact that the system of computing weights and values is necessarily very rough, impairs to some extent the value of these returns. In spite of this, however, it is remarkable how steadily the registered figures follow known causes. It may then be fairly concluded that in spite of a rough method of calculation, and the occasional negligence of registering officials, these returns are sufficiently indicative of the real value, bulk and movements of trade to be of practical use."

NORTH-WEST FRONTIER PROVINCE.

Statistics are kept in this province of the entire import and export trade with—

- (1) Tirah, (2) Bajaur, and (3) Buner;
- (4) of all the Kabul trade except the small portion that passes through the Dera Ghazi Khan District of the Panjab; and
- (5) of that portion of the Kashmir trade that passes through Hazara (the rest being registered in the Panjab).

The work is under the supervision of the local officers and the Revenue and Financial Secretary to the Chief Commissioner, in whose office the combined statements are prepared for the whole province.

Tirah.—This trade, which is unimportant, is registered in Peshawar and Kohat. There are several routes leading into Tirah from Kohat, traffic on which is registered at the Naryab and Kohat posts. A certain, though minor, quantity of trade also goes to and from Peshawar, part of which is registered at the Burj Hari Singh trade post.

The trade routes are given in detail in Appendix III to the Land Trade Report of the Panjab for 1897-98.

Bajaur.—The trade passes Hazara, Peshawar, and Malakand, it includes also the territories of Dir and Swat. The expansion of this trade is largely attributed to the opening of the Nowshera-Dargai Railway.

Buner.—This trade passes through Peshawar, it was up to 1900-1901 included with the Bajaur trade.

Kabul.—This trade passes through Peshawar, Kohat, Dera Ismael Khan, Tochi, and Wana and is registered at—

Peshawar *via* the Khyber route, at Burj Hari Singh. The Partana and the Michi routes at Darbangi. The Shabkadar route at Bakshi.

Kohat.—The route to Khost and to Kurram at Thal. The Tirwani-Kurram route at Naryab.

Dera Ismael Khan.—*Via* the Chunar Khel Dhana Pass registered at Domandi; *via* the Zao Pass at Zarkanni; *via* the Gomal at Khajuri Kach.

Tochi.—Trade is registered at Saidgi in the Tochi Valley.

Wana.—Trade is registered at Kachjuri Kuch.

Kashmir.—The trade which passes through the Hazara District only is registered in the North-West Frontier Province, the bulk of the trade is carried on with the Panjab direct through Rawalpindi, Gujrat, and Sialkot.

The method of assigning values is that described in the notes on the Panjab Frontier Trade, and like the Panjab no absolute accuracy can be claimed for the results obtained from the registration of the trade generally. The solitary position of many of the posts, the class of mohurrir employed and the temptation to submit more fictitious returns if close supervision is not exercised are enumerated among the difficulties experienced in the work of registration.

UNITED PROVINCES.

The only foreign countries with which these provinces trade directly are Tibet and Nepal.

The traffic with Tibet which is of comparatively small extent and value amounts to about ten to twelve lakhs a year. It is registered at five posts maintained in the Garhwal and Almora Districts. They are:—

Garhwal	{	Jangla. Pondu Kesar. Japoban Bhomgra.	Almora	{	Lilam. Darchula.
---------	---	---	--------	---	---------------------

The trade with Nepal is important and amounts to over a crore and a half of rupees annually. It comprises ordinarily about 95 per cent of the total external trade of these provinces.

The character of the traffic with Nepal differs considerably from that transacted with Tibet. Nepal has a strip of land of uncommon fertility just at the foot of the hills, which not only supplies the wants of its people, but enables them to export a large quantity of agricultural and forest produce to these provinces. But the trade centres and routes are said to be at the mercy of arbitrary tariffs and are liable to executive interference.

About three years ago a general re-allocation of the frontier registering posts, found necessary owing to railway extensions to the border of Nepal, was settled by the Director of Land Records in communication with the District Officers concerned. Minor changes have since been made and the trade is now registered at a cordon of 33 posts kept up along the frontier in the districts of Almora, Pilibit, Kheri, Bahraich, Gonda, Basti, and Gorakpur. The following is the list of the posts:—

Almora	{	1. Tanakpur.	Gonda	{	17. Mokhampur or Sograpur.
		2. Newria Hasanpur.			18. Tulshipur.
Pilibit	{	3. Madho Tanda.			19. Marui.
		4. Mahap.			20. Sarahwaghat.
		5. Puranpur.			21. Sohas.
		6. Sohila.	Basti	{	22. Lodwa.
		7. Singhai.			23. Lotan.
Kheri	{	8. Ramnagar.			24. Mangarh.
		9. Chaudan Chauki (Railway station.)			25. Kakrahwa Bazar.
		10. Sujauli (Railway station.)			26. Jogialari.
		11. Katghar.			27. Mantauwan.
		12. Babaganj.			28. Daoghati.
Bahraich	{	13. Jamanha.	Gorakpur	{	29. Baitulia.
		14. Bichia (Railway station.)			30. Thunthibari.
		15. Bharathapur.			31. Kharkhor.
		16. Ketarniaghat.			32. Jackhimpur.
					33. Bhagwanpur.

The original returns are combined by the Department of Land Records and Agriculture in a general statement which is sent to the Statistical Office. The work is done at a total cost of something over six thousand rupees a year. The registration on the Nepal frontier is inspected by the Inspectors attached to the Provincial Agricultural Department and that on the Tibet frontier by the District Officers. The posts in the hills, especially those on the Tibet frontier, are however said to be too remote from the plains for departmental inspection except at a prohibitive cost.

The trade with Tibet continues to be transacted in a primitive fashion; the system of barter still prevails, while sheep and goats are the means of conveyance along the steep hill paths which form the only means of communication. The difficulties and expense of transport

hinder the development of the trade with Tibet, and fully account for its stationary character. The principal traders are Bhotias, or the residents of Bhot, a territory which may be said to comprise the valleys and lower spurs of the snow-topped Himalayas. These Bhotias from November to May or June descend into the lower portions of the hills to collect articles of Indian produce and manufacture, fixing their head-quarters either in some valley within a few miles of the borders of Bhot, or at one of the main marts, such as Tanakpur, at the base of the hills. During the rest of the year their women folk and a few of the men live in Bhot cultivating their fields, while the majority of the men proceed into Tibet as soon as the passes open. The difficulties of transport in the hills make the variations in the price of grains and similar articles very great even between places situated within comparatively short distance of each other.

Method of assigning values in the United Provinces.

The following is the method by which values are assigned to the articles in the frontier trade of these provinces.

Value rates are furnished each month by the District officers of all frontier districts. These are supplemented by value lists which are furnished each month by traffic registration clerks in respect of the unspecified heads "Other kinds" and miscellaneous articles, the price of which is not returned by the District officers. For a few heads, *e.g.*, all other articles of merchandise, the rates have been fixed once for all. The value rates so obtained monthly are multiplied into the quantities of each article in that month. The product is the value of articles shown in the monthly statement. For the annual report the monthly values are summed up and the total for the twelve months is shown in the report.

BENGAL.

The system of registration introduced in Bengal from 1879 to obtain a record of the frontier trade with Nepal, Sikkim, Bhutan, and later on with Tibet, is by means of a cordon of stations, which now number 43, situated on all the recognized principal routes of traffic between Champaran and Jalpaiguri.

Except with Nepal, the trade is insignificant. With Tibet commercial intercourse is still of the slightest, while the trade with Sikkim and Bhutan is also trifling. The trade with

Nepal constitutes nine-tenths of the whole trade carried across the frontiers of Bengal; much of the trade with Nepal is carried by rail to and from several localities in and near the Terai, whence is imported the rice and paddy which form the principal import from Nepal into Bengal. The export trade consists largely of cotton yarn and piece goods.

The several trade routes on which the registration is effected are detailed below :—

Champaran.—There are five stations established in this district for the purpose of registering the Nepal trade, *viz.*—

- | | |
|-----------------|----------------|
| 1. Tribenighat. | 3. Adapur. |
| 2. Raksaul. | 4. Chauradana. |
| | 5. Ghorasan. |

On the west the first frontier station is at Tribenighat, on the river Gunduck, which is one of the chief thoroughfares in this part.

Muzaffarpur.—There are also five stations in this district for the purpose of registering the Nepal trade, *viz.*—

- | | |
|---|-----------------------------------|
| 1. Bairagnia (20 miles north-west of Sitamari.) | 3. Sonbarsa (20 miles north.) |
| 2. Majorganj (15 miles north-west.) | 4. Bela (27 miles north-east.) |
| | 5. Sursaud (17 miles north-east.) |

It is reported that numerous as the marts are on both sides of the frontier, and scattered as the traffic becomes after reaching this side, the number of points where the great body of the traffic crosses the frontier line is small.

Darbhanga.—The number of registration stations established in this district is seven. All catch the Nepal trade. They are :—

- | | |
|--|---------------|
| 1. Madhwapur (since removed to Basuki Behari from 1st March 1904.) | 3. Jainagar. |
| 2. Hatwari. | 4. Khatawna. |
| | 5. Sidhap. |
| | 6. Phulparas. |
| | 7. Jhitki. |

It is said that there are several places along the frontier where there are gaps in the frontier hedge, and where most of the carts crossing either backwards or forwards collect. The two great points of attraction are Darbhanga and Muzaffarpur. The river Tiljoia, which forms the eastern boundary of the sub-division, and which separates it from north Bhagalpur, effectually checks any large amount of traffic going east. The boundary on the western side prevents no such obstacle, and much of the traffic crosses the western boundary at several points.

Bhagalpur.—The registering posts opened in this district to catch the Nepal trade also are :—

1. Kaudauli.
2. Panchpandaria.
3. Birpur.

The two stations Kaudauli and Birpur are situated at the two extremities of the boundary line between Bhagalpur and Nepal, and Panchpandria lies half way between them. Between these points there are cart tracks crossing the frontier at every half mile. No one track is said to be more important than the other, so that whilst, on the one hand, it would be quite impossible on the ground of expense alone to keep up a traffic registration office at each one, on the other hand, no one of these places is sufficiently important to warrant its being singled out from the rest for the purposes of traffic registration.

Purnea.—The Nepal trade is also intercepted at eleven stations in this district, *viz.* :—

- | | |
|-----------------|--------------------|
| 1. Pathardewa. | 6. Korhabarihat. |
| 2. Kusumbha. | 7. Gandharbadanga. |
| 3. Mirganj. | 8. Teragach. |
| 4. Kauri. | 9. Bhatgaon. |
| 5. Pahara. | 10. Dhursa. |
| 11. Panthamari. | |

Darjeeling.—The posts in this district number 8 :—

- | | |
|----------------|------------------|
| 1. Sukiapukri. | 5. Ranjit-river. |
| 2. Karjulia. | 6. Pedang. |
| 3. Siliguri. | 7. Laba. |
| 4. Ranjit. | 8. Singla. |

The first three catch the Nepal trade only. At Siliguri the registration is made by the Eastern Bengal State Railway, from which office the returns are received. The Ranjit post registers, in addition to the Nepal trade, that portion of the Sikkim trade which passes that way; while the Ranjit River post registers only trade to and from Sikkim. Pedang and Laba register Sikkim and Bhutan trade. And the Singla post intercepts some of the Nepal and some of the Sikkim trade.

Jalpaiguri.—The stations in this district are :—

- Buxa.
Hantupura
Ambari.

These stations record only the trade with Bhutan, the two last named are kept open for five months only of the year owing to the rains. The station of Ambari is in a corner of Buxa sub-division, above 20 miles from Jalpaiguri. Considerable traffic passes upwards and downwards through Buxa, which is the main passage into Bhutan. The second passage of importance is by Bala dooar, near which is the traffic registering station of Hantupura.

The registration of the trade is done, as already stated, by mohurrirs under the supervision of District Officers, who send their returns monthly in the prescribed forms to the Statistical Office. From those returns are compiled monthly statements for Bengal.

For the Tibet trade there is one station only at Yatung which is under the control of the Chinese Commissioner of Customs. Special returns are made to the Political Agent at Sikkim by the Assistant Commissioner at Yatung. The import trade from Tibet consists for the most part of raw wool.

Method of assigning values in Bengal.

The method by which values are assigned to the articles in the frontier trade of Bengal may be briefly stated thus :—

Value rates are obtained monthly from certain frontier districts, and these are supplemented in the case of certain articles by the prices entered in the half-monthly statements of the wholesale prices published in the *Calcutta Gazette*. The value rates so obtained monthly are multiplied by the quantity of each article in that month.

ASSAM.

The foreign tribes and countries with which a trading intercourse is maintained across the frontier of this province are :—

- | | |
|---------------------------|------------------------------------|
| (1) Bhutan. | (4) Abor, Naga, and Khamti tribes. |
| (2) Towang. | (5) Manipur. |
| (3) Aka and Dafia tribes. | (6) Hill Tipperah. |

This trade, as might be expected from the poverty and uncivilised condition of nearly all the border tribes, is insignificant in value, and very limited in extent. It is in a large degree confined to transactions at the annual fairs held in the vicinity of the border, or at the different bazars which have been established beyond the border—an account of the different fairs held in the province is given further on.

Statistics are obtained partly by the agency of the frontier tahsildars, mauzadars, and the police, as owing to the extreme insignificance of the trade, the expense of maintaining accurate means of registration would be excessive in comparison with the value of the results.

The returns are therefore merely approximations to the truth. There are, however, 4 regular registering stations opened :—

- (1) at Jirighat in Cachar, where the trade with Manipur is registered ;
- (2) at Mao thana on the Golaghat Manipur cart-road to register the trade between Manipur and Kohima in the Naga Hills and the Assam Valley ;
- (3) in Sylhet at Muchikandi
- (4) „ „ „ Noakhali } to register the trade with Hill Tipperah.

The work is under the control and supervision of the Provincial Director of Land Records who sends to the Statistical Office combined monthly statements for the province.

Bhutan.—The trade with Bhutan is confined to the districts of Goalpara, Kamrup, and Darrang. The routes by which the Bhutias descend are the Bijni, Sidli, Ripur, and Guma Duars leading into Goalpara, the Subankhata and Daranga passes leading into Kamrup, and the Lakhi pass leading into Darrang. The transactions are registered by the frontier mauzadars and tahsildars at stations selected for the purpose, and at the different fairs mentioned later on.

Towang.—The trade with Towang is transacted at the Udalguri and Daimara fairs on the borders of the district of Darrang, and is of small importance.

Aka and Daffa tribes.—The trade with Aka and Daffa tribes is carried on with the districts of Darrang and Lakhimpur.

Abor, Naga, and Khamti tribes.—Trade with the inhabitants of these hill tribes is almost confined to the district of Lakhimpur.

Manipur.—The trade with Manipur which constitutes about 35 per cent of the total frontier trade of the province is registered at Jirighat in the Cachar district and at Mao thana on the Golaghat-Manipur cart-road. The principal imports are cattle, caoutchouc, canes and rattans, timber, bamboos, and husked rice and the exports are cotton yarn and piece-goods, mineral oils, dried-fish and betelnuts.

Hill Tipperah.—The most important foreign trade of the province is still that which is carried on between Hill Tipperah and the neighbouring district of Sylhet. It constitutes on an average about 45 per cent of the total trade and is registered at Muchikandi and Maulvie Bazar. The principal imports are timber, bamboos, canes and rattans, raw-cotton, and til, and the exports cotton piece-goods, brass and copper utensils, dried fish, salt and tobacco.

Method of assigning values in Assam.

The method by which values are assigned to the articles in the frontier trade of Assam is briefly stated thus :—

According to standing orders figures of all articles, excepting a few for which value only has to be registered have to be filled in by the offices of the Deputy Commissioners from the prices current and other available sources of information. But the method actually followed is, as reported in 1901, that values are assigned by the registering clerks in some places and by the nazir of the sub-division in other places, or the mauzadars, or police, as the case may be, after local inquiry of the traders.

As the bulk of the commercial dealings with the wild tribes of the northern border of Assam is carried on at fairs, a brief account of them will not be out of place.

Fairs as trade centres.

The fairs are held annually near the Bhutan and Tibet frontiers at Darranga and Subankhata in Kamrup, and at Udalguri and Ghagrapara in Darrang.

The Darranga and Subankhata fairs are held at the mouths of the two passes so named which lead from the Bhutan Hills to the Kamrup district. The value of the transactions recorded at the Darranga fair average annually about Rs15,00 of imports and about the same value of exports. The Subankhata fair is a minor gathering held 10 miles west of Darranga. The imports average about Rs5,000 and the exports Rs1,000 each year. Some eight or nine thousand Bhutias are said to attend these fairs.

The Udalguri fair is held in the Mangaldai sub-division of the Darrang district and is attended by the Tibetans from Towang who also resort to the fair at Daimara, a place three miles north of the frontier near Udalguri. The average imports and exports at those two fairs are about Rs20,000 and Rs15,000, respectively.

The Ghagrapara fair takes place at the foot of the Lukhipass on the north-west corner of the Darrang district, and is attended by Bhutias also. The average annual imports and exports are over Rs20,000 and about Rs15,000, respectively.

BURMA.

The trade exchanged by Burma with the adjoining foreign States of—

Western China,
Northern Siam,
Southern Siam,

Northern Shan States,
Southern Shan States, and
Karennee

is registered at 29 out-stations noted below, situated at the entrance of the various routes leading in to the frontier districts of Burma from Myitkyina to Rangoon.

<i>Districts.</i>	<i>Out-stations.</i>	<i>Registers the trade of</i>
Myitkyina	1. Waingmaw	Western China and Kachin Hills.
	2. Kasu	Ditto ditto.
	3. Maingna	Ditto ditto.
Bhamo	4. Bhamo Nyaungbinyat	Western China, North Shan States, and Kachin Hills.
	5. Bhamo Tatkali	Ditto ditto.
	6. Bhamo Mingun	Ditto ditto.
	7. Bhamo River	Western China.
	8. Myohit	Western China and Kachin Hills.
Ruby Mines	9. Sawadi	Northern Shan States and Kachin Hills.
	10. Kyaukpyn	Northern Shan States.
Mandalay	11. Ma-ugon	Ditto ditto.
Kyaukse	12. Maymyo	Western China, North and South Shan States.
	13. Taungdaw	Southern Shan States.
Meiktila	14. Langwa	Southern Shan States and Western China.
	15. Kawalebin	Ditto ditto.
Yamethin	16. Theingon	Ditto ditto.
	17. Pyawbwe	Ditto ditto.
	18. Pyinmana	Ditto ditto.
Toungoo	19. Toungoo	Southern Shan States and Western Karennee.
Amherst	20. Tadanku	Southern Siam, Northern Siam and Raheng.
	21. Kyeikdon	Siam.
Thaton	22. Kwanbi	Northern Siam.
	23. Pa-an	Ditto.
	24. Yinbaing	Ditto.
Salween	25. Kawlode	Northern Siam and Karennee.
	26. Kyaukhnyat	Ditto ditto.
Tavoy	27. Dagwin	Northern Siam.
Rangoon	28. Maitta	Southern Siam.
	29. Rangoon	Northern Shan States.

The most important route to Western China is that passing from Bhamo through Nawpaung and Manwaing to Tengyueh and Yuunanfu.

The values assigned to merchandise in the frontier trade of Burma is by the following method: Traders furnish the registering clerks

Method of assigning value in Burma. with the value rate of every article and they are verified from time to time from information obtained from the brokers and from the prices ruling at the nearest market, also from the weekly value rates which the registering clerks enter in a register, and on which a monthly average rate is taken which serves as a check on the rates stated by traders in the following month.

PART I.

Government of India Notifications, Appointments, Promotions, etc.

HOME DEPARTMENT.

NOTIFICATIONS.

PUBLIC.

Calcutta, the 6th March 1906.

No. 562.—The Governor General in Council is pleased to sanction the admission to the 3rd class of the Civil Division of the Indian Order of Merit of Recruit Niaz Ali, 13th Duke of Connaught's Lancers, for conspicuous bravery displayed by him at Jhelum, on the 20th October 1905, in apprehending, while himself unarmed, a Sowar of the 22nd Cavalry who was running amok armed with a sword with which he had already killed the son of a Jemadar of the regiment.

No. 563.—The Governor General in Council is pleased to sanction the admission to the 3rd class of the Civil Division of the Indian Order of Merit of Driver Naick Changhatta, 21st Kohat Mountain Battery, for conspicuous bravery displayed by him at Kohat, on the 23rd November 1905, in overpowering, while himself unarmed, another driver drugged with *bhang* who was running amok armed with a sword with which he had already grievously wounded a comrade.

The 9th March 1906.

No. 574.—It is hereby notified for general information that the Deputy Director of Land Records and Agriculture, Burma, will take rank in Article 78 of the Warrant of Precedence for India, published with the notification of the Government of India in the Home Department, no. 328, dated the 10th February 1899. District Judges in Lower Burma and the Judge of the Small Cause Court, Rangoon, will take rank in Article 60 of the Warrant when within and Article 74 when without their respective charges.

ESTABLISHMENTS.

The 8th March 1906.

No. 225.—The services of Babu Chandra Kumar Sen Gupta, substantive *pro tempore* Sub-Deputy Collector, are placed at the disposal of the Government of Eastern Bengal and Assam.

The 9th March 1906.

No. 233.—The services of Mr. H. G. Stokes, of the Indian Civil Service, Under Secretary to the Government of India in the Home Department, are replaced at the disposal of the Government of Madras, with effect from the 5th July 1906.

EXAMINATIONS.

The 9th March 1906.

No. 86.—The following list shows the names of the selected candidates and the marks obtained by them in each subject in the recent examination for clerkships in the lower division of the Secretariat offices of the Government of India and the departments directly attached thereto and in the offices subordinate to the Government of Bengal:—

No.	Names of candidates in order of merit.	Date of birth.	Date on which the candidate will attain the age of 25 years.	English composition (essay writing and drafting).	Precis-writing.	History (English and Indian).	Geography.	Elementary mathematics.	Short-hand writing (optional).	Total.	Government under which the candidate is eligible for appointment.	Office in which the candidate elects to serve.

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, MARCH 10, 1906.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 17th November 1905.

From the 25th November next till further notice, the complete *Gazette of India* will be published at Calcutta. After the 18th November all Notifications and other matter intended for publication in the Gazette should be addressed to the Publisher, 8 Hastings Street, Calcutta.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's Gazette, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's Gazette. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next Gazette."

J. P. HEWETT,
Secretary to the Government of India.

- No. 117 of 1906.—William Baker Hartridge, engineer, of Granville House, Arundel street, London, England. *Improvements in or relating to elastic cushion or the like tyres, and in or relating to wheels or rims therefor.*
- No. 118 of 1906.—George Hattersley and Sons, Limited, machine makers, of Keighley, in the county of York, England, and Thomas Perks, mechanic, of 38, Hainworth Lane, Keighley aforesaid. *Improved warp stop-motion for looms.*
- No. 119 of 1906.—William George Wheatley, engineer, of 10, Victoria Terrace, Calcutta, in the province of Bengal, British India. *Improvements in block signalling in railways.*
- No. 120 of 1905.—William Miller Davison, engineer, of Government road, Port Pirie West Extension, Port Pirie, state of South Australia, commonwealth of Australia. *An improved device for vending measured quantities of liquid and for recording the number of measures sold.*
- No. 121 of 1906.—William Miller Davison, engineer, of Government road, Port Pirie West Extension, Port Pirie, state of South Australia, commonwealth of Australia. *An improved pump for vending measured quantities of liquid and for recording the number of such measures sold.*
- No. 122 of 1906.—Charles George Landseer Judge, assistant in the firm or company of Heatly & Gresham, Limited, of 6, Waterloo street, Calcutta. *A new or improved process and machine for withering tea leaf.*
- No. 123 of 1906.—Thomas Dalton, mechanical engineer, c/o The United Coffee Growers Company, Limited, Coimbatore, South India. *A separator for taking iron, wire, nails, metal stones and metal of all kinds from produce such as coffee, rice, etc.*

No. 962 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary

appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, United Provinces of Agra and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 3 P.M., at the Secretary's office, 2 Bankshall street, Calcutta, on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying :—

- No. 175 of 1905.—The Thompson Safety Appliance Company, a corporation of New Jersey, having an office in the Hanover Bank Building, New York city, United States of America. *Track construction and electric signalling and controlling equipment therefor.* (Specification filed 28 February 1906.)
- No. 182 of 1905.—John William Esser, engineer, of 40, Park Ridings, Hornsey, George William Barratt, gentleman, of Ashford, Priory road, Hornsey, and Frank Barratt, gentleman, of Wood Green Villas, Mayes road, Wood Green, all in the county of Middlesex, England. *Improvements in or relating to small arms.* (Specification filed 27 February 1906.)
- No. 337 of 1905.—William Henry Drury, lawyer, of Waltham, in the county of Middlesex, and state of Massachusetts, United States of America. *An improved woven fabric.* (Specification filed 27 February 1906.)
- No. 342 of 1905.—Madame Joschine Marie Louise Fleming, nee Imbert, of Chateau des Ormes sur Voulzie (S et M), France. *Improvements in and relating to the methods of and means for generating and using hydrocarbon-vapours for heating and lighting purposes.* (Specification filed 27 February 1906.)
- No. 343 of 1905.—John Francis Appleby, inventor, residing at 702, Leland Avenue, Chicago, Cook county, and state of Illinois, United States of America. *Cotton harvesting machines.* (Specification filed 27 February 1906.)
- No. 348 of 1905.—Jakob Sulzer, mechanical engineer, of 97, Langgasse, Winterthur, Canton of Zurich, Switzerland. *Improvements in or relating to internal combustion engines.* (Specification filed 28 February 1906.)
- No. 349 of 1905.—Jakob Sulzer, mechanical engineer, of 97, Langgasse, Winterthur, Canton of Zurich, Switzerland. *Improvements in or relating to internal combustion engines.* (Specification filed 28 February 1906.)
- No. 351 of 1905.—James Henry Apjohn, M.I.C.S., of Victoria street, Westminster, in the county of London, England. *Improvements in or connected with compressing tea and the like.* (Specification filed 28 February 1906.)
- No. 353 of 1905.—Fernand Lalau, manufacturer, of 11, rue La Bruyere, Paris, in the republic of France. *Improvement in closing receptacles.* (Specification filed 28 February 1906.)
- No. 529 of 1905.—Albert Lincoln Johnson, civil engineer, a citizen of the United States, and a resident of the city of St. Louis and state of Missouri. *Corrugated bars.* (Specification filed 27 February 1906.)
- No. 531 of 1905.—Charles Henry Bryant, engineer, of 12, The Embankment, Twickenham, in the county of Middlesex, and Arthur Watling, land agent, of 9, Southampton street, High Holborn, London, W. C. *Improvements in carburettors.* (Specification filed 27 February 1906.)

No. 963 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

- No. 1 of 1894.—George Ernest Hudson and George Sanderson. *Improved apparatus for supplying purified and heated feed-water to the boilers of non-condensing steam engines.* (From 12 March 1906 to 12 March 1907.)
- No. 52 of 1896.—William Phillips Hall. *An improved electric signalling system.* (From 3 May 1906 to 3 May 1907.)

No. 295 of 1897.—Ernest Auguste George Street. *Improvements in or relating to the manufacture of explosives and explosive substances.* (From 5 March 1906 to 5 March 1907.)

No. 205 of 1898.—The Linotype Company, Limited. *Improvements in and connected with the distributing mechanism of linotype machines.* (From 1 March 1906 to 1 March 1907.)

No. 211 of 1898.—The Linotype Company, Limited. *Improvements in and connected with the moulding mechanism of linotype machines.* (From 1 March 1906 to 1 March 1907.)

No. 283 of 1899.—Gerhard Ditmar. *Improvements in storm lanterns.* (From 5 March 1906 to 5 March 1907.)

No. 5 of 1900.—Henry James Kimman. *Improvements in and relating to pneumatic drills and the like.* (From 13 August 1906 to 13 August 1907.)

No. 964 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling, and using the said inventions in British India, and of authorising others so to do, has ceased:—

No. 352 of 1901.—Eduard Scharrer. *Improvements in beams or rails for loading and unloading goods and the like.* (Specification filed 30 November 1901.)

No. 365 of 1901.—Manuel Antonio Gomes Himalaya. *Improved apparatus for making industrial use of the heat of the sun and obtaining high temperatures.* (Specification filed 25 November 1901.)

Fee in respect of the continuance of an exclusive privilege—

4 (a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of ₹50 for each of the above inventions.

No. 291 of 1900.—William Lawrence Voelker. *Improvements in the manufacture of filaments for incandescing electric lamps.* (Specification filed 27 November 1900.)

Fee in respect of the continuance of an exclusive privilege—

4 (b) After the expiration of the fourth year and before the expiration of the fifth year from the date of the filing of the specification—

The sum of ₹50 for the above invention.

No. 272 of 1899.—Luis Lagarrigue. *A process of and apparatus for the treatment of auriferous and other minerals by amalgamation.* (Specification filed 24 November 1899.)

No. 323 of 1899.—Henry Valentine Simpson. *Improvements in and relating to the treatment of wood with solutions for rendering it non-flammable and for other purposes.* (Specification filed 24 November 1899.)

Fee in respect of the continuance of an exclusive privilege—

4 (c) After the expiration of the fifth year and before the expiration of the sixth year from the date of the filing of the specification—

The sum of ₹50 for each of the above inventions.

No. 114 of 1894.—Odilon Baltzar Hannibal Hanneborg. *Improvements in ditching and tile-laying machines.* (Specification filed 1 December 1894.)

Fee in respect of the continuance of an exclusive privilege—

4 (b) After the expiration of the tenth year and before the expiration of the eleventh year from the date of the filing of the specification—

The sum of Rs 100 for the above invention.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or, if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo. volumes, paper cover, 13 annas or 1s. 1d. Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,

Secretary under the Inventions
and Designs Act, V of 1888.

- Kala Viveka. Fasc. 7 @ 6a.
- Bodhicaryavatara of Candidevi. Fasc. 4 @ 6a.
- Godadhara Paddhati. Fasc. 1 @ 6a.
- Saddarsana Samuiccaya. Fasc. 1 @ 6a.
- Tantra Vartika (English). Fasc. 5 @ 12a.
- Nityacaraprodipah. Fasc. 7 @ 6a.
- Chaturvarga Chintamani. Vol. 4. Fasc. 5 @ 6a.

LIST OF BOOKS PUBLISHED BY THE METEOROLOGICAL DEPARTMENT FROM 1ST July TO 31st December 1905.

- Monthly Weather Review, January to June 1905. (Illustrated by 8 plates) Quarto. Paper cover. R1 per month.
- Monthly Weather Review, July, 1905. (Illustrated by 8 plates) Quarto. Paper cover. Re. 1.

LIST OF NEW BOOKS PUBLISHED BY THE GEOLOGICAL SURVEY OF INDIA DURING THE WEEK ENDING 17th February 1906.

- Records of The Geological Survey of India, Volume XXXIII, Part 1. By Director, Geological Survey of India, R 1.

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, MARCH 10, 1906.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART III.

Advertisements and Notices by Private Individuals and Corporations.

Estate W. T. Blanford, deceased.

PURSUANT TO SECTION 42, ACT 28 OF 1866.

Notice is hereby given that all persons having claims against the late William Thomas Blanford, who died at 72, Bedford Gardens, Camden Hill, Middlesex, on the 23rd June 1905. Letters of Administration to whose Estate have been granted to George Roberts Johnston, Esq., of Messrs. Grindlay and Co., Calcutta, are required to send in the same in or before 30th March next to the said Messrs. Grindlay and Co., after which date the said Administrator will proceed to administer the assets having regard only to the claims of which he shall then have received notice, and no claims sent in subsequently will be recognized, and all persons indebted to or holding any securities or property belonging to the said Estate are also hereby requested to pay without delay the amount owing by them, or deliver the said security or property to the said Administrator whose receipt alone is valid for the same.

GEORGE ROBERT JOHNSTON,
Administrator to Estate W. T. Blanford, deceased.

CALCUTTA,
15th February 1906.

Estate W. C. S. Hawthorne, deceased.

PURSUANT TO SECTION 42, ACT 28 OF 1866.

Notice is hereby given that all persons having claims against the late William Charles Stewart Hawthorne, who died at Plenty House, Whitechurch, Charmouth, Dorset; on 28th August 1905. Letters of Administration to whose Estate have been granted to George Roberts Johnston, Esq., of Messrs. Grindlay & Co., Calcutta, are required to send in the same on or before 2nd April next to the said Messrs. Grindlay & Co., Calcutta, after which date the said Administrator will proceed to administer the assets having regard only to the claims of which he shall then have received notice, and no claims sent in subsequently will be recognized, and all persons indebted to or holding any securities or property belonging to the said Estate are also hereby requested to pay without delay the amount owing by them, or deliver the said securities or property to the said Administrator whose receipt alone is valid for the same.

G. R. JOHNSTON,
Administrator to Estate W. C. S. Hawthorne, deceased.

SUPPLEMENT TO
The Gazette of India.

No. 10.} CALCUTTA, SATURDAY, MARCH 10, 1906.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

APPROPRIATION REPORT

ON

THE ACCOUNTS

OF

THE GOVERNMENT OF INDIA

FOR

1904-1905.

GENERAL REVIEW.

[Throughout the report the rupee figures are in thousands of rupees and the sterling figures in hundreds of £; thus 10,64 reads as ten lakhs and sixty-four thousands of Rupees, and £71,2 reads as seventy-one thousand and two hundreds of pounds sterling. The rupee figures are converted into sterling amounts at Rs=£1.]

The most prominent feature of the Budget Estimate is the provision for increasing the efficiency of the defensive Military Forces; special attention was paid to new armament and the scheme of special coast defences. For these purposes a provision of £1,619,6 was made including expenditure of £1,081,4 in England, of this sum £700,0 was for new Artillery and Rifles. A provision of £493,9 or Rs74,08 was also made for extra service pay to British Troops at 6*d.* a day, which became payable under Lord Alverstone's decision, from 1st April 1904. Under Civil Works a provision of £353,3 or Rs53,00 was made for expenditure by Local Governments on special public objects, and of £133,3 or Rs20,00 for the extension and improvement of Simla. Providing for this special expenditure the Budget closed with an anticipated surplus of £918,7.

2. During the year under report the Revenue largely exceeded expectations in almost all the important branches except Land Revenue, where there was a decrease owing, in parts of Madras and Bombay, to the partial failure of the monsoon, and in the United Provinces to the failure of the *kharif* crop in Bundelkhand and to damage done to the *rabi* by frost. Under Salt there was an improvement of £221,5, of which £192,4 occurred in Madras and Bombay and was the result of increased consumption. The prosperous condition of the agricultural and commercial classes and settlements of licenses on favourable terms in almost all the Provinces resulted in an improvement of £303,4 under Excise. Under Customs there was an increase of £444,6, which was common to all the Maritime Provinces except Madras, where there was a falling-off in the exports of rice to foreign countries, owing to a bad season. Under Stamps and Forest the revenue exceeded the Budget Estimate by £101,2 and £173,9, respectively.

3. The largest improvements, however, occurred in the Opium Revenue, and in the net earnings of State Railways. The price of Bengal opium was unexpectedly high throughout the year, and the average price obtained was Rs1,587 per chest against Rs1,250 adopted in the Budget Estimate, resulting in an increase of £1,079,5 in the receipts in Bengal. The reduced outturn in Bengal resulted in smaller payments to cultivators, and raised the net improvement under Opium to £1,103,2. Under Railways the net earnings exceeded the Budget Estimate by £1,751,3, of which £849,2 were contributed by the North-Western Railway, owing to the heavy wheat traffic. The improvement was, however, shared in by all the important systems, especially by the East Indian, Great Indian Peninsula, and the Rajputana-Malwa Railways. There was, on the other hand, a considerable increase of expenditure under Army Services (£1,061,0) due to the Reorganisation, and increased charges on account of the Tibet Mission.

4. The net result of these variations, enhanced by savings in expenditure, principally under Civil Departments, was a surplus of £3,456,1, showing an improvement over the Budget Estimate of £2,537,4.

5. One important change of classification was adopted during the year. Formerly the profits on Rupee Coinage swelled the receipt figures, under Mint on one side, and those of expenditure on the other, being entered under the latter as for credit to the Gold Reserve Fund. From the year under report, these transactions have been confined to the more appropriate head of Deposits and Advances.

6. The following summary gives the Budget and Account figures of 1904-5, which are reviewed in this report. The details will be found in the statements on pages 173 to 188:—

RECEIPTS.		REVENUE AND EXPENDITURE.		OUTGOINGS.

Comparison with the year 1903-4.

7. The comparison in respect of revenues with the year 1903-4 is as follows :—

REVENUES.	1903-4.	1904-5.	Difference, 1904-5. Greater (+) or less (—).	
			£	R
Principal Heads of Revenue	49,204,7	50,452,6	+1,247,9	+1,87,19
Interest	896,1	849,6	—46,5	—6,97
Post Office	1,507,1	1,576,0	+68,9	+10,33
Telegraph	857,6	897,9	+40,3	+6,04
Mint	2,884,8	206,4	—2,678,4	—4,01,76
Civil Departments	1,597,3	1,547,3	—50,0	—7,50
Miscellaneous	694,0	690,1	—3,9	—59
Railways	21,557,9	24,022,5	+2,464,6	+3,69,69
Irrigation	2,911,8	3,071,1	+159,3	+23,90
Other Public Works	555,5	538,6	—16,9	—2,54
Receipts by Military Department	1,089,4	960,9	—128,5	—19,27
TOTAL	83,756,2	84,813,0	+1,056,8	+1,58,52

8. The important variations under *Principal Heads of Revenue* are the following :—

	£	R
Land Revenue	—280,4	—42,06
Opium	+285,5	+42,81
Salt	+104,3	+15,65
Stamps	+158,1	+23,71
Excise	+373,3	+56,00
Customs	+395,5	+59,33
Forest	+120,9	+18,13
Other Heads	+90,7	+13,62
TOTAL	+1,247,9	+1,87,19

9. Under *Land Revenue* the decrease was due to unfavourable agricultural conditions in Madras and Bombay. The increase under *Opium* was the result of high prices obtained for Bengal Opium, reduced by a falling-off in the pass fees in Bombay, owing to the small demand in China for Malwa Opium. The improvement under *Salt* was mainly due to the destruction of a large stock of salt, in Bombay by heavy and untimely rain in 1903-04. Commercial prosperity and increased litigation generally, coupled with special receipts of probate duty in Bengal and Bombay, account for the increase under *Stamps*. The prosperous condition of the agricultural and commercial classes, with settlements of licenses on better terms, explains the improvement under *Excise*. Under *Customs* all the maritime provinces shared in the improvement in import duties, which were mainly due to heavy imports of cotton manufactures, woollen goods, petroleum, sugar and articles of food and drink. Under export duties, however, Burma and Bengal were the chief contributors; the increase in Burma (10,92) was due to large shipments of rice to Japan and South America, and that in Bengal (3,23) to exports of rice to Germany and Arabia. In Madras a bad season resulted in decreased exports of rice to foreign countries. The increase under *Forest* occurred chiefly in Burma (6,92), Bombay (2,69), Madras (1,71), India (1,62), the Punjab (1,56), Assam (1,40), and the United Provinces (1,17) and was generally the result of large sales of timber, high prices and large extractions of timber.

10. Under *Interest* the decline occurred chiefly in Bombay, and was due to the interest payable by the Bombay Port Trust in April 1904 having been paid in 1903-04. The increase under *Post Office* was mainly drawn from sales of ordinary stamps (99,9). Under *Telegraph* the improvement occurred in the rent of wires and instruments leased to railways and canals, and in message revenue, owing to increased traffic due to reduction in inland rates, and to increased foreign traffic across India on account of the Russo-Japanese War. Under *Mint* the decrease

is mainly due to the change of classification referred to above, by which the gain on coinage operations is taken to a debt head. Of the decrease under *Civil Departments* 7,09 occurred under *Marine* and was due to the limited employment of Royal Indian Marine Vessels on Imperial Service, and to no vessels being sold, and 2,04 under *Scientific and other Minor Departments* due to a special receipt in 1903-04, owing to the sale in that year of the Aluminium Industry in Madras to a private company. There was on the other hand a small improvement of 1,23 under *Education* chiefly in fees from schools and colleges. The decrease under *Miscellaneous* occurred mainly in contributions for pensions and gratuities of officers in foreign service, under contributions in Bombay owing to a special refund in 1903-04 of the cost of a telegraph line taken over by the Telegraph Department, and in receipts in England on account of Military Funds, partly counterbalanced by larger credits under *Exchange*.

11. Under *Railways* by far the most important improvement occurred under the North-Western Railway (1,12,61) owing to bumper wheat crop in the Punjab, and to unusually heavy exports to Europe. There was also an increase in the traffic in gram, pulse, raw cotton and oil seeds. Other important increases were 52,76 under East Indian Railway, arising out of the improvement in grain, seed, coal, and pilgrim traffic; 41,43 under Great Indian Peninsula Railway owing to bumper crops, favourable markets for exports, a large local demand by mills for cotton, and an increase in 3rd class passenger traffic; 34,94 under Rajputana-Malwa Railway due to increased traffic in grain and pulse owing to a large demand in Gujrat, Kathiawar and Central India following on a scanty rainfall, in oil-seeds resulting from a good crop and large exports, in salt due to increased consumption as a result of the reduction in the salt tax, and in sugar due to increased demand; 32,39 under Bengal-Nagpur due to general development of goods traffic, especially in grain and coal, and to the opening of new sections on the Satpura Railway; 14,57 under Oudh and Rohilkhand Railway due to increased export of wheat; and 10,42 under Burma Railways due to the large increase in paddy traffic.

12. The increase under *Irrigation Receipts* was caused by the development of irrigation from the canals in the Punjab, the Sone canals in Bengal, and the Lower Ganges canal in the United Provinces, and by the introduction, in Madras, of re-settlement rates on the Kistna Project. The decrease under *Other Public Works* was due to exceptional credits having been included in the figures of the previous year. The falling-off under *Receipts by Military Department* was mainly due to credits afforded in the previous year for value of stores issued from stock to South Africa, China and Somaliland, of peace equipment stores sent to China and Somaliland, and of Mounted Infantry ponies sent to Somaliland.

13. A comparison of the expenditure side is given below :—

	1903-4. £	1904-5. £	Difference, 1904-5. Greater (+) or less (—). £ R	
			£	R
Direct Demands on the				
Revenues	8,593,8	8,569,1	—24,7	—3,70
Interest	1,697,6	1,646,9	—50,7	—7,61
Post Office	1,403,2	1,519,8	+116,6	+17,49
Telegraph	916,8	902,3	—14,5	—2,17
Mint	2,785,6	117,9	—2,667,7	—4,00,16
Civil Departments . .	11,979,2	12,399,8	+420,6	+63,09
Miscellaneous . . .	4,349,6	4,264,8	—84,8	—12,72
Famine	905,7	1,000,0	+94,3	+14,14
Railways	20,697,2	21,917,0	+1,219,8	+1,82,97
Irrigation	2,680,0	2,786,4	+106,4	+15,96
Other Public Works .	5,663,5	5,766,1	+102,6	+15,39
Army Services . . .	17,865,2	20,175,7	+2,310,5	+3,46,58
Special Defence Works (1902)	27,1	128,3	+101,2	+15,18
	<u>79,564,5</u>	<u>81,194,1</u>	<u>+1,629,6</u>	<u>+2,44,44</u>

14. Under *Direct Demands on the Revenues* the principal decrease was 38,79 under *Opium*. The actual outturn of the crop in the year under report was 111,539 maunds, against 124,297 maunds in the previous year resulting in smaller payments by 38,45 to cultivators. The only other decrease worthy of notice was that of 5,54 under *Refunds and Drawbacks* in salt refunds in India, and Customs refunds in Bombay. Against these decreases there were increases under almost all the other heads, but chiefly under *Land Revenue* (23,22) mainly in the charges of District Administration, Survey and Settlements, Land Record and Agriculture, and in allowances to village officers; and under *Forests* (8,33) due to the payment of arrears to the Raja of Tehri on account of leased deodar forests in the United Provinces, to the formation of additional forests divisions in Madras, to famine grass operations, and to expenditure on the Tavargatti Dépôt scheme in Bombay.

15. The reduced charge under *Interest* was chiefly the result of increased transfer of interest to the Railway Revenue and Irrigation accounts. Under *Post Office* the increase was mainly due to the expansion of the department, and occurred chiefly in charges under establishment and subsidies. The decrease under *Telegraph* occurred under Indo-European Telegraphs, and was due chiefly to smaller payments in respect of message revenue, and smaller expenditure on the Central Persian Line. The large decrease under *Mint* was due to the change of classification referred to in para. 5. Of the increase under *Civil Departments* 16,83 occurred under *Education* and was due mainly to additional appointments, increased salaries and large grants for buildings and furniture; 13,15 under *Political* due to the large drawings of His Highness the Amir of Afghanistan, to the visit of Sardar Inayatullah Khan to India, and to special political expenditure; 10,72 under *Police* due to large expenditure under District executive force in India, Burma, Bengal and Madras, and to the employment of additional companies of Military Police in the Southern Shan States Battalion; 10,35 under *Marine* due mainly to the construction of vessels in Burma and Bengal; 9,24 under *Courts of Law* distributed chiefly between Civil and Sessions Courts and Criminal Courts; and 7,28 under *Medical* due mainly to the increased emoluments of the Indian Medical Service Officers, to increased expenditure on plague preventive measures in Burma and Madras, and to large grants to hospitals and dispensaries in Burma and Bengal. Under *Miscellaneous* the principal decrease occurred under *Miscellaneous* (20,31) due mainly to the large remissions in 1903-04 of irrecoverable loans in the Central Provinces, Bengal, the Punjab, and Bombay, partly counterbalanced by large payments in England on account of stores lost with the "Den of Seaton." Other variations were a decrease of 2,97 under Civil Furlough and Absentee Allowances in England, and increases of 8,13 under Superannuation Allowances and Pensions, representing chiefly the growth of expenditure in pension charges, and of 3,78 under Stationery and Printing, chiefly in England. Under *Famine* there was a decrease of 2,74 in direct Famine relief expenditure, but the outlay on the Construction of Protective Railways, and Protective Irrigation Works exceeded the actuals of the previous year by 2,88 and 10,59 respectively. The practice of charging to the Famine Insurance grant the net loss on the working of the Bengal-Nagpur and Indian Midland Railways has been discontinued from the year under report. Under *Railways* there was an increase of 1,37,60 in working expenses of State Railways, owing mainly to heavy repairs and renewals of stock and permanent-way, and to the heavy traffic worked. The payment of interest, and annuities in India and England for State Railways, and that of interest on capital deposited by companies, also exceeded the charges of the previous year by 31,69 and 6,60, respectively. Under *Irrigation* the increase was due to heavy maintenance charges on canals in the Punjab, Madras and Bombay, and to large outlay on works in Bengal and Madras. Under *Other Public Works* there was an increase of 26,41 under *Civil Works*, chiefly in the United Provinces (14,63) and Madras (15,03). Other noticeable variations were the increases in India (3,01) and the Central Provinces (5,47), and the decreases in Bengal (6,27) and the Punjab (3,29). In the United Provinces the increase was mainly due to a larger programme of works being carried out; that in Madras was mainly due to a large grant to the Madras Harbour Trust

Board, and to grants to Municipalities. The expenditure under *Military Works* fell off by 8,30 owing to smaller outlay on special works in progress in the previous year drawing to completion. There was also a decrease of 3,04 in the expenditure on construction of Railways charged to Provincial or Local Revenues, in Madras due mainly to the postponement of the construction of certain bridges, and of a permanent station on the Mayavaram-Mutupet Railway. Under *Army Services* there was an increase of 61,67 under Reorganisation, on which account there were no charges in 1903-04; of 21,64 under Special Charges chiefly under Tibet Mission (41,33), partly counterbalanced by reduced charges chiefly on account of the Aden Delimitation Commission (14,26); of 1,04,50 under Other Charges chiefly under Regimental Pay (96,41) due to the grant of service pay to British Soldiers, to the actual strength of British Troops having been in excess of that in 1903-04, and to savings in 1903-04 on account of troops absent on service in Somaliland; under Supply and Transport (8,76) due mainly to more officers having been present on duty, to additional officers having been sanctioned, and to larger payments for stores and animals; and under Ordnance (8,64) chiefly due to additional establishments for Rifle and Cordite Factories, Central Gun Carriage Factory and the Rolling Mills at Ishapore, and to large purchase of local stores for factories. The expenditure in England included a charge of £686,4 for Reorganisation Stores. There was no corresponding charge in the previous year. Apart from this there was an increase of £372,0 mainly in the charges for stores for India. Under *Special Defences* there was an increase of 2,14 in India and £87,0 in England in the charges for stores.

Comparison of Accounts with Budget Estimates of 1904-5.

16. The following figures exhibit the differences in the net accounts between the Budget and the actuals, those in India and England being shown in separate columns. A comparison of the gross figures has been given before in para. 6:—

	INDIA.		England.	TOTAL.
	R	Equivalent in Sterling. £	£	£
Principal Heads of Revenue	+ 2,91,70	+ 1,944,7	—6,6	+ 1,938,1
Interest	—9,02	—60,2	+ 70,2	+ 10,0
Post Office	+ 14,07	+ 93,8	—2,0	+ 91,8
Telegraph	+ 15,96	+ 106,4	+ 52,7	+ 159,1
Mint	+ 19,88	+ 132,6	—8,1	+ 124,5
Civil Departments	+ 76,52	+ 510,1	—37,1	+ 473,0
Miscellaneous	—1,17	—7,7	—43,6	—51,3
Famine	—12,92	—86,2	+ 12,6	—73,6
Railways	+ 2,60,79	+ 1,738,5	+ 12,8	+ 1,751,3
Irrigation	+ 4,48	+ 29,9	—3	+ 29,6

Army Services	—77,30	—515,4	—484,4	—999,8
Special Defence Works	+ 10,61	+ 70,8	+ 57,6	+ 128,4
COMBINED SURPLUS, IMPERIAL AND PROVINCIAL	+ 6,61,31	+ 4,408,7	—391,7	+ 4,017,0

17. Under *Principal Heads of Revenue* the most important improvements occurred under Opium (1,65,48) and Customs (66,77). Under Opium the increase of Revenue (1,59,96) arising from the high prices obtained for Bengal Opium, was enhanced by a decrease in expenditure following on a smaller outturn of the crop, which amounted to 111,539 maunds against an estimate of 115,506 maunds. Under Customs the increase was mainly the result of large exports of rice to Japan, in consequence of the Russo-Japanese war, and to Germany and South America, and of large imports of cotton manufactures, woollen goods, petroleum, sugar, and articles of food, and drink. Increased consumption of salt in Madras and Bombay, combined with reduced expenditure on manufacture in India, and over-estimate for purchase and freight in Madras and Bombay resulted in an improvement of 37,95 under Salt. Increase in litigation and monetary transactions led to the improvement of 14,76 under

Stamps. The improvements under Excise (46,74), and under Forest (29,92) were due to the causes mentioned in para. 9. The large falling off in receipts under Land Revenue (95,64) due to the causes stated in para. 9 were counterbalanced to the extent of 17,35 by a decrease in expenditure chiefly in the charges for Survey and Settlement, and Land Records and Agriculture.

18. Under *Interest* the increase in the receipts occurred mainly in England (£120,5), due to the investment of larger amounts of the available cash balance and at higher rates of interest than was anticipated, partly counterbalanced by a decline in India of 5,98 mainly due to the postponement of payment of interest by a Cantonment Committee, to advance payments in 1903-04 by certain Municipalities, to the non-payment of interest for a half-year by the Kalka-Simla Railway, and to over-estimate of interest on overdrawn Capital of Railway Companies. There was on the other hand an increase in the charges both in England and in India. In England no provision was made for discount on the issue of £2,500,0 India 3 per cent. stock, while a charge of £107,3 was incurred; this excess was reduced by £56,8 owing partly to £1,500,0 bills having been discharged without replacement, and partly to a lower rate of interest on £500,0 bills replaced in June. The excess in India was due to the transfer of smaller interest charges (3,70) to the Railway Revenue and Irrigation Accounts in consequence of short Capital outlay. Under *Post Office* the improvement was due to an unexpectedly large increase in the sale of postage stamps, to the growth of the operations of the Money Order Department, and to a decrease in expenditure chiefly under Establishment and Conveyance of Mails. Under *Telegraph* the increase was due to improved message revenue, and rent of wires and instruments leased to Railways and Canals, and to reduced expenditure owing to non-payment of the Joint Purse Guarantee, to small purchase of stores in England, and to short outlay on repairs to lines in India. The improvement under *Mint* was due to a large dollar coinage for the Straits Settlements, to credit of 2 per cent. on actual coinage, and to absence of charge under net profits on Silver Coinage paid to Gold Reserve Fund, reduced by short receipts under Gain on Coinage Operations owing to the change in the method of adjustment already referred to.

19. Under *Civil Departments* the improvement was mainly due to savings in expenditure. The principal items were 4,02 under Courts of Law, 7,45 under Jails, 3,51 under Police, 12,42 under Education, 7,82 under Medical, and 31,47 under Political. Under Courts of Law the saving was mainly due to the non-utilisation of the provisions for the Judicial Service in Burma, and for Civil and Criminal Courts in Bengal, and to the partial lapse of the provision for Civil Courts in the United Provinces. Under Jails the decrease was due chiefly to low jail population, cheap rates for food grains, small purchase of raw materials, and non-utilisation of certain provisions in Bengal and the Punjab. Under Police the saving occurred chiefly in the United Provinces and was due to the transfer to Civil Works of the provision for the relief of Municipalities from Police charges. The lapse of certain grants chiefly in Bengal, the United Provinces, the Punjab, and Bombay, and of the provision in India for grants-in-aid to other Provinces accounts for the decrease under Education. Under Medical the saving was due to reduced expenditure on plague measures in all the provinces except Burma and Madras, to the provision for increase in the emoluments of the Indian Medical Service Officers not having been fully utilised, to the lapse of certain provisions in the Central Provinces and Burma, and to the transfer to Civil Works of the provision in the United Provinces for cleansing towns and villages through the agency of District Boards. Under Political the decrease was due to His Highness the Amir of Afghanistan not having drawn his subsidy in full. Increased secretariat charges in India, due to the appointment of additional officers, deputation of officers on special duty, and high telegram charges, mainly account for the excess of 5,14 under General Administration. Under Marine there was an improvement in the receipts of 7,10 due to the employment of Royal Indian Marine Vessels on Imperial Service, to work done for other Departments and for the Royal Navy, and to large pilotage receipts in Bengal, reduced by a decrease in England owing to the sale-proceeds of Torpedo Boat

Defence vessels having been paid by the Admiralty in 1903-04. The improvement was further reduced by increased expenditure (5,19) owing to extensive alterations and repairs to vessels of the Royal Navy, and the Royal Indian Marine, to large purchase of coal due to the employment of Royal Indian Marine Vessels in connection with the Somaliland Field Force and Colonial reliefs, partly counterbalanced by reduced expenditure on hire of transports for the Aden Boundary Commission, and for supply of coal to His Majesty's ships of war in Indian waters.

20. Under *Miscellaneous* there was an excess in expenditure under Stationery and Printing of 8,64 due to large purchases of stationery both in India and in England, reduced by an improvement of 1,06 in the receipts in India from sale of gazettes and other publications and in other Press receipts. Under *Miscellaneous* the excess of 8,78 in expenditure, mainly in England, in the charges on account of stores lost with the "Den of Seaton" was counterbalanced to the extent of 1,28 chiefly by increased receipts in India. The excess of 2,45 under Superannuation Allowances and Pensions was the result of the normal growth of pension charges. These excesses were partly counterbalanced by an increase of 3,63 in the credit under Exchange, and by decreases of 1,19 under Territorial and Political Pensions due to lapses by deaths, and to grants remaining undrawn; and of 5,88 under Civil Furlough and Absentee Allowance mainly in England.

21. The total loss due to *Famine* has been brought together in the following table, based on estimates framed by the most competent local authorities, which may be accepted as giving approximately the loss of revenue assignable to Famine. Suspensions of Land Revenue and Provincial Rates, which are not final losses, have been distinguished from remissions under those heads. The total loss of revenue in 1904-5 assigned to Famine was 98,03 as shown below :—

	Central Provinces.	Madras.	Bombay.	TOTAL.
<i>Loss of Revenue.</i>	₹	₹	₹	₹
Land Revenue—				
Remissions	(a) 1,55	16,38	12,35	30,28

INCREASE+

(a) These figures do not include 3 suspended in previous years and remitted in this year or 18 out of those suspensions which have been collected during the year.

(b) Do. do. do. 1 do. do. which have been collected during the year.

22. No provision was considered necessary for expenditure on direct famine relief, but the partial failure of the monsoon in Bombay necessitated an expenditure of 31 in that province. On the other hand the expenditure on the construction of Protective Railways and Irrigation Works fell short of the Budget by 4,68 and 2,75 respectively. These savings, together

with the discontinuance of the practice of charging to the Famine Insurance grant the net loss on the working of the Bengal-Nagpur, and Indian Midland Railways, resulted in the application of a larger amount for the Reduction or Avoidance of Debt. Besides the charges on actual relief, expenditure was incurred under other heads in the grant of compensation for dearness of provisions. These charges have been estimated by the local authorities, and are brought together in the following table, and the total charges direct and indirect may be set down at about 7,44 :—

	India.	Central Prov- inces.	Bengal.	Punjab.	Madras.	Bombay.	TOTAL.
	R	R	R	R	R	R	R
Famine Relief, including Public Works charges	3	-3	...	31	31
Indirect charges due to Famine, including grain compensation allowance—							
Army	1,42	1,25	...	2,67
Public Works Department, Other Public Works	16	16
Post Office	6	6
Telegraph	2	2
Land Revenue	...	1	23	24
Police	1	1
Other heads	10	2,17	...	42	...	1,28	3,97
	1,60	2,18	...	42	1,25	1,68	7,13
TOTAL	1,60	2 18	3	39	1,25	1,99	7,44

23. The total loss of revenue and increase of expenditure due to famine may therefore be put down at about 1,05,47.

24. The improvement under *Railways* was the result of an increase in the receipts partly counterbalanced by an increase of expenditure. The increase in the receipts was mainly due to additional mileage opened, to general development of traffic on the larger railway systems and to heavy wheat and grain traffic on the North-Western, East Indian, and Great Indian Peninsula Railways. The increase of expenditure was owing chiefly to heavy repairs and renewals of stock and permanent way and to extensive traffic. The lines that principally contributed to the net result are :—

	Better.	Worse.
Eastern Bengal State Railway	9,60	...
East Indian Railway	39,22	...
North-Western Railway	1,27,38	...
Rajputana-Malwa Railway	12,63	...
Oudh and Rohilkhand Railway	...	2,05
Bengal and North-Western Railway	...	4,90
Indian Midland Railway	3,51	...
Southern Mahratta Railway	7,56	...
South Indian Railway	7,51	...
Bengal-Nagpur Railway	11,25	...
Great Indian Peninsula Railway	29,00	...
Burma Railway	7,89	...

25. Under *Irrigation* there was an increase of 16,21 in the receipts, and an excess of 11,73 in the expenditure, which reduced the net improvement to 4,48. The increase in the receipts was, as stated in para. 12, due to the development of irrigation from the canals in the Punjab, the Sone canals in Bengal, and the Lower Ganges canal in the United Provinces, and to the introduction, in Madras, of re-settlement rates on the Kistna project, and, in the Punjab, to water rate on the Sutlej and Muzaffargarh Inundation Canal Systems. The improvement under *Other Public Works* was the result of the increase of 7,73, under Civil Works

in revenue from ferry tolls, sales of land and buildings, and miscellaneous receipts, enhanced by a decrease in expenditure of 56,66, due chiefly to the non-utilisation of special grants given to Local Governments, and of 2,24 due to the postponement of certain works connected with the Construction of Railways, the cost of which is charged to Provincial or Local Revenues. Under *Army Services* there was an improvement in the receipts of 9,18, and an excess in the expenditure of 1,59,15. The increase in the receipts occurred mainly in India, and was due chiefly to large sales of malt liquor, transport animals, fodder and farm animals, to recoveries on account of Medical Stores supplied to Municipal, Local Funds, and Government hospitals in connection with plague, to extensive sales of unserviceable ordnance stores, to realisations on account of Ordnance Stores issued on payment to the Nepal Durbar and other Native States, and to the British East African Protectorate, to large sales of surplus stores and condemned animals on account of the Tibet Mission, to recoveries from the African Protectorates of the capitalized value of pensions of families of soldiers, and of pension contributions of men for service in those Protectorates, and to large contributions towards the Indian Military Service Family Pensions, partly counterbalanced by credit to the Imperial Government of the net value of Europe stores issued to and returned from China and Somaliland, and of the value of 110 horses returned from China. Of the excess under expenditure 1,64,63 was on account of Re-organisation for which there was no provision in the Budget. Of these excesses £686,4, or ₹1,02,96, represents expenditure in England; 56,27 occurred under Special Charges, while there was a saving of 61,76 under Other Charges. The excess under Special Charges was chiefly under Tibet mission, due to the augmentation of troops, and their maintenance for a longer period than was provided for; under Aden Delimitation Commission, owing to charges having been incurred for the whole year, instead of for six months as expected; and under Seistan Boundary Commission, due to two-fifths of the expenditure on account of the 58th Silladar Camel corps having been borne by military. Of the saving under Other Charges £210,3 or ₹31,55 occurred in England, and was due to the payments in respect of batteries of Artillery, provided for under Ordnance Stores, having been charged under Re-organisation, and to a smaller number of officers having been provided with passages, otherwise than in transports; partly counterbalanced by increased payments to the War Office in respect of British Forces serving in India, due to a refund expected in 1904-5 having been received in the previous year, by increased charges under furlough pay, by large payments for conveyance of drafts from South Africa to India, by pay and expenses of representatives with the Field Forces in Manchuria, and by the purchase of stallions provided for under Scientific and other Minor Departments. The principal items in the decrease in India were savings in pay and maintenance charges of troops, etc., on service in China and Somaliland; lapses of the whole or portions of the special provisions made in the Budget; less charges for service and good conduct pay of British soldiers; cheap rates for food for men and animals, small purchases of remounts, young stock, and Ordnance mules. The chief items of excess were increased charges for pay, owing to excess strength of British troops; deductions in the Budget for probable savings not having been fully realised; increased charges for conveyance of stores and troops, and the cost of mules taken over from the Imperial Government in Somaliland, and charges for their conveyance to India. Under *Special Defence Works* the decrease in expenditure in India was due to the partial utilisation of the grant, while in England it was due to the suspension of the supply of guns and mountings.

26. The Budget provided for a deficit of £398,1 or ₹59,72 in the revenue on the whole account, but as a sum of £1,316,8 or ₹1,97,52 out of the Provincial and Local Expenditure was payable from past accumulations of balances, a net surplus of £918,7 or ₹1,37,80 was provided for in the Estimates on Imperial accounts. The accounts closed with a surplus on Imperial account of £3,456,1 or ₹5,18,41, and a surplus on Provincial and Local account of £162,8 or ₹24,42. The net Imperial revenue was therefore better by £3,456,1 — £918,7 = £2,537,4 or ₹3,80,61, and the net Provincial and Local receipts by £1,316,8 + £162,8 = £1,479,6 or ₹2,21,94. The improvement in the Provincial and Local accounts was caused

mainly by the large allotments amounting to ₹1,00,00 by the Imperial Government, to the Governments of Punjab (50,00), and Bombay (50,00) to enable them to start under favourable conditions the new Provincial Settlements which came into operation from 1905-06.

27. The details of these fluctuations are given below, the sign + meaning better, and — worse, than the estimate :—

	REVENUE SIDE.			EXPENDITURE SIDE.		
	Imperial.	Provincial.	TOTAL.	Imperial.	Provincial.	TOTAL.
	£	£	£	£	£	£

30. The Budget grants have been exceeded under several heads. The excesses, distinguishing those requiring sanction from those for which extra grants have already been made, have been noticed under each head of expenditure, and the detailed reasons for the excess have also been there stated. The following table brings together the excesses under each head still requiring sanction :—

Excess expenditure over Budget Estimate awaiting sanction of the Imperial Government.

Section A.—PRINCIPAL HEADS OF REVENUE.

1903-4. Accounts.	REVENUE—	Budget.	1904-5. Revised.	Accounts.
₹		₹	₹	₹
73,80,70	India (Rupee figures)	73,15,30	75,57,32	75,67,89
£		£	£	£
49,204,7	Equivalent in Sterling	48,768,7	50,382,2	50,452,6

31. The receipts in this section exceeded the Budget Estimate and the actuals of the previous year by £1,683,9 or ₹2,52,59 and £1,247,9 or ₹1,87,19 respectively. As compared with the Budget the improvement was contributed to by all the heads except Land Revenue and Provincial Rates. The decrease under Land Revenue of £637,6 or ₹95,64, was mainly due to unfavourable agricultural conditions in Madras and Bombay. The increase of £1,066,4 or ₹1,59,96 under Opium was due to the high prices obtained for Bengal Opium; of £221,5 or ₹33,22 under Salt was due to increased consumption in Madras and Bombay; of £101,2 or ₹15,18 under Stamps was due to increased litigation and monetary transactions, of £303,4 or ₹45,51 under Excise was due to keen competition at auction sales for licenses, and to the prosperous condition of the agricultural and commercial classes; of £444,6 or ₹66,69 under Customs was mainly due to heavy importations of cotton manufactures, woollen goods, petroleum, sugar, and articles of food and drink, and to large shipments of rice to Japan, in consequence of the Russo-Japanese war, and to Germany and South America; and of £173,9 or ₹26,08 under Forest was due to large sales of timber, high prices, increased extraction of timber owing to a favourable floating season, large sales of drift timber, and to good prices obtained for firewood.

32. The improvement as compared with the actuals of the previous year occurred under all the heads except Land Revenue and Provincial Rates. The increase under Opium, Excise, Customs and Forest were mainly due to the causes stated above. The increase of £104,3 or ₹15,65 under Salt was mainly due to the destruction of a large stock of Salt in Bombay by heavy and untimely rain in 1903-4; and of £158,1 or ₹23,71 under Stamps was due to commercial prosperity, and increased litigation, and to the special receipts of probate duty in Bengal and Bombay. The decrease of £280,4 or ₹42,06 under Land Revenue was due to a fall in Madras and Bombay owing to the causes stated above, partly counterbalanced by improvements in Burma, Assam and the Punjab. The improvement in Burma was due to revision of settlement, growth of population, extension of cultivation, and to high fishery and petroleum revenue. That in Assam was due to postponement of kists in 1903-4: and that in the Punjab was caused by good harvests and extension of irrigation.

33. The receipts under this head fell short of the Budget Estimate and the actuals of the previous year by 95,64 and 42,06 respectively. As compared with the Budget the decrease was mainly due to the unfavourable agricultural conditions in Madras and Bombay. As compared with the actuals of the previous year the decrease in Madras is attributable to the same cause, while in Bombay the large recoveries of outstandings and better agricultural conditions in 1903-04 account for the fall. Burma, Assam, and the Punjab exhibited considerable improvements over the previous year, due in Burma to revision of settlement in Lower Burma, increase in area under cultivation, growth of population, and increase in fishery and petroleum revenues; in Assam to postponement of *kists* in 1903-04; and in the Punjab to good harvests and extension of irrigation.

34. The decrease under *Ordinary Land Revenue* (1,02,65) occurred chiefly in Madras (38,59), Bombay (58,41), United Provinces (6,65), Burma (6,76), the Central Provinces (1,57), and Assam (1,21). In Madras the unfavourable season necessitated remissions and postponement of collections. Unfavourable conditions also account for the decrease in Bombay. In the United Provinces there was a failure of the *kharif* over large areas in Bundelkhand, and serious damage was done to *rabi* by frost. In Burma the Budget made too high an estimate for increase of revenue in consequence of the extension of cultivation, imposition of higher rates on revision of settlement in certain districts, and the introduction of assessment on all cultivated lands on the completion of settlement in Magwe and other districts of Upper Burma. In the Central Provinces the collections fell short in several districts, and the recoveries of arrears were smaller than was anticipated. In Assam the effect of the postponement of *kists* was miscalculated and resulted in an over-estimate. The only noteworthy improvement occurred in the Punjab (9,75) and was due to good harvests and the extension of irrigation. Under *Assessment of Alienated Lands less Quit Rents* Bombay showed a large decline (5,11) owing chiefly to a change in the method of calculation in the Sukkur District, by which the assessment of uncultivated charitable grants was left out of account, and partly also to an over-estimate in certain districts. Under *Sale of Proprietary Rights, etc.*, the

Section A.—PRINCIPAL HEADS OF REVENUE—continued.

1.—Land Revenue—concluded.

decrease occurred in the Punjab (2,66) owing chiefly to the sale of lands in the Chenab and Jhelum colonies having been much less than was expected. Against this decline there was an increase of 88 in Bengal due to large receipts on account of redemption of land tax (49), to improved receipts (35) under "Twelve per cent. on collections from Government Estates", and to sales of Government Estates in Nadia (4). The improvements in the other provinces are attributable to the fluctuating nature of the receipts. The increase of 8,73 under *Capitation Tax, etc.*, occurred entirely in Burma mainly in the receipts from Thathameda Tax, but partly also under Capitation Tax owing to growth of population. The increase over the previous year is also due to these causes. The most noticeable improvements under *Fisheries and other Receipts classed as Miscellaneous Land Revenue* occurred in Burma (4,61) and Bombay (1,75). Increase in the output of Petroleum and a large demand under leased fisheries account for the improvement in Burma, while in Bombay miscellaneous receipts proved better than the estimate. The decrease in Assam (45) was due to the transfer of elephant revenue to the Forest Department, and that in Bengal (66) to small recoveries on account of Survey and Settlement charges.

35. The explanation of the variations in the *Portion of Land Revenue due to Irrigation* is given in the Public Works Portion of this report under the head Irrigation, *vide* paragraph 251.

36. The following tables A and B give the usual particulars regarding the distribution of the Land Revenue between Imperial and Provincial:—

£		£	£	£
5,73,60	EQUIVALENT IN STERLING	4,955,1	6,044,0	6,021,5

37. The receipts under this head exceeded the Budget Estimate and the actuals of the previous year by 1,59,96 and 42,81 respectively. The increase under *Sale of Bengal Opium* was due to the average price obtained at the sales being Rs 1,587 per chest against Rs 1,250 adopted in the Budget. A similar cause explains the difference between the results of the two years. The decrease under *Bombay Opium Pass Fees* both as compared with the Budget and the actuals of the previous year was due to a diminished demand for Malwa Opium in China. Under *Excise Opium* the increase of 8 was the net result of improvements in the Central Provinces (28), Assam (21), and the United Provinces (17) and on decreases in all the other Provinces. In the Central Provinces the increase was due to large sales in the Native States, and the prevention of smuggling, and in the other two Provinces to increased consumption of the drug. The decrease in Bengal (33) was due to reduced consumption, and that in the Punjab (13) to a fall in the price of home-grown opium resulting in an excellent poppy crop.

38. The following table gives the usual statistics for the last ten years of the produce and sales in Bengal, and the exports from Bombay:—

BENGAL.						BOMBAY.

1902-1903* . . .	1,97,32	18,30	2,67,94	2,03,16	2,40,94	9,27,66
1903-1904* . . .	1,72,13	15,48	2,18,01	1,95,36	1,86,59	7,87,57
1904-1905* . . .	1,69,35	16,38	2,23,62	1,95,38	1,98,49	8,03,22

40. The receipts under this head showed improvements of 33,22 and 15,65 over the Budget and the actuals of the previous year respectively. As compared with the Budget the largest improvement occurred under *Excise on Local Manufacture* in Madras (14,32) and Bombay (12,27). The increase in Madras was due to considerable increase in consumption, and that in Bombay to a good season and better demand owing to the stocks in the previous year having been partially destroyed by untimely rain. These improvements were slightly counterbalanced by a decrease in India (77) due to small sales and reduction of duty, and in Burma (60) where the introduction of direct taxation on output of local manufacture into some districts adversely affected the production and sale of salt. Under *Sale of Government Salt* the increase in India (1,15) was due to larger sales of the high-priced Sambhar Salt, that in Madras (1,03) to increased demand, and that in Bombay (58) to an increase in the sales of Baragara salt. Under *Duty on Imported Salt* the increase in Burma (98) was due chiefly to an under-estimate, that in Bengal (3,41) to increased importation and consumption, and that in Bombay to larger importations of table and packing salt from the United Kingdom. Under *Miscellaneous* the increase in Bengal (21) occurred under Rents of warehouses, and was due to the large stock of bonded salt, and that in Bombay (51) to higher receipts under Bagging and Sewing charges due to increased sales of Baragara salt, and to the traders of the United Provinces preferring to purchase bags of uniform price from salt agents instead of in the local market where prices were high. The destruction of large stocks of salt in Bombay by heavy and untimely rain in the previous year generally accounts for the variations in the actuals of the two years.

* Rate of duty reduced in all provinces, except Burma, from 18th March 1903 (vide Finance and Commerce Department Notification No. 1542-S. R., dated 18th March 1903); and a further reduction in the rate was made from 22nd March 1905.

	Revised		3,743.0
	Accounts	1904-5	3,738.3

41. The receipts under this head exceeded the Budget and the actuals of the previous year by 15,18 and 23,71, respectively. Under *Court-fee Stamps* the increase occurred in the Central Provinces (25), Burma (2,16), Madras (2,24) and chiefly in Bengal (5.64), and was generally due to increased litigation. In Bengal, however, it was also partly due to heavy probate duties in respect of some large estates, and in the Central Provinces partly to poundage fee on the sale-proceeds of a cotton spinning mill, paid in the shape of court-fee stamps. There were small decreases in India (12) due chiefly to less litigation in Ajmer; in Berar (14) to the introduction of revised copying charges; in the United Provinces (27) to less litigation owing to the prevalence of plague; and in the Punjab (7) due to the Punjab Loans Limitation Act having extended the period of limitation of unregistered agreements, and to the recovery of the Province from the depressing effect of the Land Alienation Act. Under *Commercial and Other Stamps* the increase in Bombay (7,32), and the decrease in Bengal (77) were due chiefly to changes in classification which involved the transfer of certain receipts between this head and *Fines and Penalties*. In Bombay the increase was also partly due to high receipts from sale of Bills of Exchange, Hundi Stamps and Foreign Bills Stamps. The increases in the Central Provinces (21) and Berar (54) were due to prosperity of the agricultural classes; in the United Provinces the increase (71) was due to under-estimate in the Budget and in Madras (1,13) to increased monetary transactions due to a bad season. The decrease in Burma (36) was due to the slump which followed the abnormal speculation in land at enormous prices in Rangoon and in Assam (14) and North-West Frontier Province (10) to over-estimates. Under *Fines and Penalties, etc.*, the decrease in Bombay (4,74), due chiefly to the change in classification as stated above, was partly counterbalanced by large receipts on account of composition of stamp duty on debentures issued by local bodies. There were increases in India (15) due to the adjustment for the first time in this province, instead of in Bengal, of the admission fee of attorneys and advocates of the Calcutta High Court paid in stamps; in Burma (34) to special receipts; in Bengal (1,74) to the change in classification referred to above, and larger receipts from duty on unstamped or insufficiently stamped documents and composition duty; and in the Punjab (19) to increased stamping and pressing work, and increasing vigilance in the administration of the Stamp law.

42. As compared with the previous year, the improvements were due generally to commercial prosperity and increased litigation, and in the case of Bombay also to a special receipt of 2,02 as probate duty.

	Budget		5,050.0
	Revised	1904-5	5,302.0
	Accounts		5,353.4

43. The total receipts exceeded the Budget Estimate and the actuals of the previous year by 45.51 and 56.00 respectively. These improvements were spread over all the provinces, except Burma and the North-West Frontier Province, and were attributable chiefly to keen competition among the bidders at the auction sales, to the prosperous condition of the agricultural and commercial classes, and to suppression of illicit practices in some of the provinces.

44. The increase, as compared with the Budget Estimate, was largest under *License and Distillery Fees, etc.*, and was contributed to by all the provinces except Burma, Assam and the North-West Frontier Province. The improvement in India (57) was chiefly due to the realisation of increased rents from retail shops, to large receipts under duty on beer and still-head duty, and to the sale of contracts at higher prices in Baluchistan. The increase in the Central Provinces (4.46) was due to returning prosperity, and to the enforcement of cash payment of a certain portion of the amounts bid, instead of accepting personal security; that in Berar (5.06) to keen competition at the auction sales. In Bengal the increase (3.76) was due to favourable settlement at the annual sales, to increased consumption and to suppression of illicit practices. The increase in the United Provinces (4.17) was mainly due to improved receipts from still-head duty and retail license fees, to enhanced rates of duty on country spirits and to increased license fees on *Ganga, Bhang, etc.*, owing to greater competition to secure contracts which were granted for three years; that in the Punjab (3.61) to brisk biddings at auctions and to increased consumption of licit spirits, partly counterbalanced by a fall in receipts of duty on *Charas* which was over-estimated in the Budget; that in Madras (10.91) to higher rentals, and large realisations of excise duty on country spirits and Toddy Revenue, and that in Bombay (15.78) to certain long-term settlements and realisations of fees not only for the year under report, but also for the ensuing year, to keen competition for licenses, and to increased revenue under still-head duty, owing to large issues of spirits on the fixing of maximum selling prices. These improvements were, to some extent, counterbalanced by decreases in Burma (5.62) and Assam (52). In the former province it was due to a change in the system of holding auction sales of excise licenses in April instead of March, resulting in the non-realisation of one-fourth of the bids during the year under report; and in the latter to the new restrictions on the sale of country spirits and the absence of competition at the sales. Under *Opium* there were improvements chiefly in the Central Provinces (49), Assam (75) and Bombay (94). In the Central Provinces the excess was due to large sales in the Native States, and the prevention of opium smuggling; in Assam, to increased consumption; and in Bombay to more chests having been purchased by Government for supply to the city of Bombay and the Khandesh District, which under the monopoly system draw their supplies direct from Malwa or Bombay. These excesses were counterbalanced by decreases in Burma (55), Bengal (1.60) and the Punjab (78). In Burma the increase anticipated was not realised; in Bengal the Budget was an over-estimate; while in the Punjab the cheapness of the Punjab-grown and Hill States opium led to a decrease in the import of Malwa opium and the duty thereon. Under *Duty on Ganja* the most noticeable increase was in Bombay (2.84) and was due to large quantities of intoxicating drugs having been exported to foreign countries on payment of duty. The increase in the Central Provinces (32) was

Section A.—PRINCIPAL HEADS OF REVENUE—continued.

V.—Excise—concluded.

due to large consumption; and that in Assam (31) and Bengal (57) to the enhanced rate of duty on Chur Ganja. The increase under *Other Receipts* occurred mainly under Bengal (17) and was due to a credit to this head of the wages of coolies, price of gunny, rope, lac, etc., recovered from wholesale dealers for packing Ganja, and to large storage rents realised in Rajshahi. The same causes which led to the increase over the Budget in most cases accounted for the increase over the actuals of the past year.

	Revised		2,835.0
	Accounts	1904-5	2,824.5

45. The receipts under this head fell short of the Budget Estimate and actuals of the previous year by 1,18 and 13 respectively. As compared with the Budget, the decrease occurred chiefly in India (40), Madras (2,77) and Bombay (4,15), partly counterbalanced by improvements in Bengal (3,60), and the Punjab (2,85). The variations in the other provinces are small. The decreases in Madras and Bombay were due to the unfavourable agricultural conditions of the year, and that in India to the adjustment of contributions from the Coorg and Ajmere District Funds under I—Land Revenue instead of under this head. The increase in Bengal was due to revision of assessment in several districts and to better collection of arrears, and that in the Punjab to the favourable agricultural conditions of the year. As compared with the actuals of the previous year the most noticeable variations are the decreases in Madras (4,27) and Bombay (5,19), and the increases in Bengal (3,10) and the Punjab (2,58) due to the causes stated above, and the improvement in the Central Provinces (1,27), due to the failure of crops in some districts in 1903-04.

46. The receipts under this head showed an improvement of 66,69 over the Budget Estimate, and of 59,33 over the actuals of the previous year. These increases were mainly due to heavy importations of cotton manufactures, woollen-goods, petroleum, sugar and articles of food and drink, and to large shipments of rice to Japan consequent on the Russo-Japanese War, coupled with active demands for rice from Germany and South America.

47. As compared with the Budget, the excess of 41,81 under *Sea Customs—Import Duties* was chiefly contributed to by Bengal (21,06) due to large imports of petroleum, manufactured articles, cotton manufactures, sugar ordinary duties, spirits and liquors, articles of food and drink, and metals. The increase (15,12) in Bombay was mainly due to duties on Cotton goods, owing to a good cotton crop in America which caused a reduction in prices and increased the demand for manufactured articles. The increase in Burma (4,97) was chiefly due to heavy importations of cotton manufactures, woollen goods, petroleum, sugar and provisions; that in Madras (66) to larger collections under cotton manufactures, petroleum and articles of food and drink, partly counterbalanced by lower receipts under silver bullion. To the excess (21,86) under *Sea Customs—Export Duties*, Burma contributed 19,54 Bengal 4,50 and Bombay 8, counterbalanced by a fall in Madras of 2,27. The increase in Burma was mainly due to a bumper crop, and large shipments of rice to Japan and South America; and that in Bengal to large shipments of rice to Germany for the manufacture of spirits, and extensive exports to Arabia. The fall in Madras was due to decreased export of rice and paddy to foreign countries—the result of a bad season. Under *Excise Duty on Cotton Manufactures* the improvement of 2,32 was contributed to by almost all the provinces, and was the result of a good cotton crop, and the general prosperity of the local mills. Under *Land Customs and Miscellaneous*, the excess (13) in Bengal was due to enhanced rates of warehouse and wharf rent levied from 1st October 1904, and to large receipts of overtime fees; that in Bombay (1,39) to additional facilities afforded by the Southern Mahratta Railway for imports from Goa, and the establishment of the Kathiawar Preventive Line. Smaller importations of kerosine oil and gold lace explain the decrease of 88 in Madras.

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*IX.—Forest—*continued.*

50. The receipts under this head exceeded the Budget Estimate, and the actuals of the previous year by 26,08 and 18,13 respectively. The improvement, as compared with the Budget, occurred in all the provinces except the Central Provinces. The greatest increase occurred in Burma (11,60) and was due to large sales, increased extractions, a good floating season, and to large sales of drift timber at better prices. There were also considerable increases in Bombay (4,91) due to recovery of outstandings, high prices for coupes, brisk demand for teak trees, and excellent prices obtained for dead trees; in the United Provinces (2,97), and the Punjab (2,74) due to extensive sales of timber and good prices obtained for firewood, and in the former also to the recovery of outstandings; in Assam (1,30) due to the transfer of revenue from elephant mahals from Land Revenue to this head, increased sale of sleepers to the Eastern Bengal State Railway, enhanced sales of plantation rubber, importation of large quantities of foreign rubber, and the increased use of the Manipur State forests by traders; and in Madras (1,29) due to better receipts for minor produce, better prices for firewood, and a large demand for bamboos. The causes which led to the improvements over the Budget also explain the increases over the actuals of the previous year in Burma (6,72), Bombay (2,69), Madras (1,71), Punjab (1,56), Assam (1,40) and the United Provinces (1,17). The increase in India (1,62) was chiefly due to the increased export of Padouk timber, and to a large demand for Gurjan oil.

51. Under *Timber and other Produce removed by Government Agency* the largest increase occurred in Burma (4,30), and was due to large sales at depôts, to a good floating season, and increased extractions. The increase in India (39) was due to large sales of Padouk and other timber (39), and to favourable prices obtained for sandal wood (22), partly counterbalanced by short supplies to the Andamans settlement (24); in Berar (14) the Budget was placed low, as when it was framed it was anticipated that a portion of Basim would be disforested, this, however, was not carried into effect. The increase in Assam (16) was due to the transfer of revenue from elephant mahals to this head, and to increased supply of sleepers to the Eastern Bengal Railway; that in the United Provinces (11) was due to increased demand for firewood, turpentine and colophony (26), partly counterbalanced by small sales of timber, and fuel in the School circle (16); that in the Punjab (1,90) to extensive sales of timber, and a rise in market prices; and that in Bombay (40) to increased revenue from famine grass operations in the Central circle (57), partly counterbalanced by a decrease in the Southern circle owing to a small demand for Jamba sleepers, and to some revenue remaining unrecovered. The decrease in the Central Provinces (1,73) was due to a small sale of sleepers, and to the non-supply of timber to the Ordnance Department; that in Bengal (57) to small sales of timber (74) partly counterbalanced by increased sales of firewood and charcoal (17); and that in Madras (96) to the unexpected stoppage of operations from a depôt in North Malabar during the dry months, and the non-realisation within the year of the value of timber sold in South Malabar, the stoppage of supply of fuel to railways, failure to secure the Commissariat contracts for fuel in the Nilgiris, the non-disposal of hay collected departmentally at Bellary, and a steady fall in the price of gall-nuts in Coimbatore.

52. Under *Timber and other Produce removed by Consumers or Purchasers* the largest increase occurred in Burma (5,25) and was due to the operation of a new lease, to a good floating season and large extractions. Of the large increase in Bombay (4,34), 3,30 occurred in the Northern circle, due to the recovery of outstandings, good prices obtained for coupes in the Thanà District, brisk demand for standing teak trees, and excellent prices obtained for dead trees in the Panch Mahals District, 70 in the Central circle due to a better demand for timber, firewood, bamboos and grass, and 80 in the Sind circle due to sales of coupes of wood to the railways, and of large sales of confiscated wood, of erosion strips of babul poles and of lac; counterbalanced to the extent of (46) by a decrease due to an over-estimate in Belgium, and to the transfer of certain grass lands to the charge of the Revenue Department. The increase in the Central Provinces (1,11) was due to better sales of minor produce on the opening of the Satpura Valley Railway, and to the increased sales of grass *birs* on the introduction of new grazing rules. That in Berar (81) was due to better sales of firewood and to the demand for grass, owing to the scarcity of fodder outside the State forests, partly also to the Budget having been framed low as stated above. That in Assam (63) was due to enhanced receipts from sale of plantation rubber; that in Bengal (60) to large sales of timber; that in the United Provinces (2,60) to the large quantities of timber removed by purchasers under the monopoly system, and to good prices of coupes in the Dehra Dun Division, better sales of timber, and realisation of outstandings of the previous year; that in the Punjab (72) to large sales of firewood and receipts from grazing and that in Madras (2,12) to the large prices obtained for tangedu bark, and the substitution of the lease for the permit system in Cuddapah in connection with the collection of grass and manure leaves from reserved areas (1,20), to good prices obtained for firewood (54), and to the large demand for bamboos for sugarcane cultivation in Gojavari, and for the construction of houses destroyed by floods in the Kisna district (42).

53. Under *Other Receipts* the large increase in Burma (2,05) was due to the collection and sale of large quantities of drift timber at good prices. The improvement in Assam (5) was due to duty on

Section A.—PRINCIPAL HEADS OF REVENUE—continued.

IX.—Forest—concluded.

imported rubber, good receipts from Lac Mahals, and the increased use of the Manipur State forests by traders that in Bengal (14) was due to a refund by the Raja of Hill Tippera of the previous year's payments, and to the sale of worn out steamcutters in the Sunderbun Division; that in the United Provinces (26) to large receipts from fines, confiscations, and forfeitures, and that in Bombay (17) to recoveries of fines, and to the sale of old hay presses, old tents, etc.

54. The receipts under this head exceeded the Budget Estimate and the actuals of the previous year by 70 and 1,76, respectively. The improvements occurred chiefly under *Fees for registering Documents* in Madras (87) and Bombay (33), due in the former to an increase in registration operations caused by the partial failure of the monsoons, and in the latter to an increase in deeds of gift, owing to fear of death from plague, to large sales and mortgages in Bombay City owing to the operations of the City Improvement Trust, and to a return of favourable times. These improvements were partly counterbalanced by decreases chiefly in Bengal (50) due to an over-estimate, and in the United Provinces (18) due mainly to the introduction of the special Bundelkhand and Tenancy Acts, which reduced registration. The only variation worthy of note under *Fees for copies of Registered Documents* is the improvement (14) in Bengal due to an increase in the demand for copies of registered documents. Under *Other Receipts* the increase in Bengal (26) was due to the classification under this head of fees for registration of Powers-of-attorney formerly adjusted under the first head, and that in the United Provinces (10) was due to more frequent inspections of books and indexes. The increase of 5 in Burma is attributed to normal growth. The improvements were largely counterbalanced by a decrease in Madras (40) due to a falling off, caused by a ruling of the High Court, in search fees in connection with the grant of encumbrance certificates.

55. The receipts under this head are for the most part fixed. The variations that occur arise generally either from the non-payment of dues or from advance or arrear collections. The total receipts exceeded the Budget and the actuals of the previous year by 1,18 and 3,72 respectively.

56. Under *Tributes* the decrease of 17 in India, as compared with the Budget, was due to non-recovery of the full amount due from Banswara (10), Dungarpur (8), Ajehgarh (7) and Sailana States (7), partly counterbalanced by arrear recoveries (14) from Amjeera. In the Central Provinces the non-payment of the second instalment of the tribute (35) due from Nandgaon State was covered by the payment of suspended tribute of the same amount by the Khairgarh State. In Burma the tributes from Shan States were under-estimated, while the dues from Mameik State were not received during the year. The

Section A.—PRINCIPAL HEADS OF REVENUE—concluded.**XI.—Tributes from Native States—concluded.**

decrease in Bombay (98) occurred in the Tributes from Kathiawar (59) and Baroda (39), due to the unfavourable condition of some of the States in the former, and of the Mahi Kantha Agency in the latter. Under *Contributions* the decrease in India (1,16) occurred under Malwa Contingent (1,03) due to postponement of payment and under Malwa Bhel Corps (13) due to postponement of the payment of contribution from the Dewas State (21), counterbalanced by arrear recoveries from Amjara (8). Under *Fees on Succession to Native States* the excess in the Punjab (1,12) was due to unexpected receipts from the Rajah of Mundi on his installation, and that in Bombay to higher Nazarana paid by the Sangli (1,87) and Savantavadi States (50).

57. As compared with the actuals of the previous year, the increase was chiefly due to the higher receipts under *Fees on Succession to Native States* in the Punjab and Bombay.

<u>8,593,8</u>	TOTAL	<u>8,823,3</u>	<u>8,595,8</u>	<u>8,569,1</u>

53. The expenditure in this section fell short of the Budget Estimate, and the actuals of the previous year by £254,2 or ₹38,13 and £24,7 or ₹3,70, respectively. As compared with the Budget the saving was contributed by all the heads except Refunds and Drawbacks and Stamps. Under the former there was an excess of £9,0 or ₹1,34 due to special Land Revenue refunds in Burma and Bombay. The principal savings were £115,7 or ₹17,35 under Land Revenue, chiefly in the charges for Survey and Settlement, and Land Records and Agriculture; £41,9 or ₹6,29 under Assignments and Compensations, chiefly in Land Revenue Compensations, due to a change in the method of calculation of assessment of alienated lands in Bombay, and in miscellaneous compensations in Punjab, due to the partial lapse of certain provisions; £36,8 or ₹5,52 under Opium caused by a falling off in the outturn of the crop which amounted to 111,539 maunds against an estimate of 115,506 maunds; £31,5 or ₹4,73 under Salt in charges for manufacture in India, and in purchase and freight charges in Madras and Bombay due to over-estimate, and £25,6 or ₹3,84 under Forest, due to less work than was expected having been carried out, to small outlay on elephants, and on forest settlement surveys in Burma, and to suspension of Khedda Operations and non-purchase of a steam launch in Madras. Under Excise there was a saving of £8,2 or ₹1,23, chiefly in Burma, owing to small outlay on rewards, secret service and contingencies, and to the lapse of a provision for the construction of opium shops. The minor savings under the other heads aggregated £6,3 or ₹94.

54. Of the decrease as compared with the previous year £258,6 or ₹38,79 occurred under Opium due to the smaller outturn of the crop, which was 111,539 maunds against 124,297 maunds in the previous year; £36,9 or ₹5,54 under Refunds and Drawbacks due to large customs refunds in 1903-04, of duty on bounty-fed sugar at Bombay and Karachi and on goods sent to Kashmir and of Salt Refunds in India owing to the reduction of salt duty. Against these decreases there was an increase of £9,7 or ₹1,46 under Assignments and Compensations, due to the compensation to the Khan of Khelat for lease of Nasirabad and Manjuti in India, and increased compensations in connection with "Cho" torrents in the Punjab; of £154,8 or ₹23,22 under Land Revenue chiefly in the charges for District administration, Survey and Settlements, Land Records and Agriculture, and allowances to village officers; of £13,9 or ₹2,08 under Salt owing chiefly to high charges for petty construction in Bombay; of £28,4 or ₹4,26 under Excise, due to the extension of the revised opium arrangements to Upper Burma, and to increased expenditure in Bombay in connection with the prevention of smuggling and illicit distillation; of £11,1 or ₹1,66 under Customs, due to a new bonding establishment in Burma, to a new appointment and heavy overtime allowances in Bengal, and to the revision of establishment in Bombay; and of £55,5 or ₹8,33 under Forest, due to the payment of arrear dues to the Raja of Tehri, on account of leased deodar forests in the United Provinces, to the constitution of additional forest divisions, and to operations connected with the supply of timber to the Kolar Gold Mines in Madras, and to famine grass operations and expenditure connected with the Tavargatu Depot scheme in Bombay. Minor variations under the other heads resulted in a net decrease of £2,6 or ₹3,8.

60. The expenditure under this head exceeded the Budget Estimate by 1,34, but was less than the actuals of the previous year by 5,54. As compared with the Budget, the excess occurred chiefly under *Land Revenue Refunds* in Burma (35) and Bombay (90), owing to some special refunds. As compared with the actuals of the previous year, the decrease occurred chiefly under *Customs Refunds* in Bombay (3,14), and was due to large refunds in the year 1903-4, of duty on bounty-fed sugar at Bombay and Karachi, and of duty on goods sent to Kashmir and under *Salt* in India (1,61) due to large refunds in 1903-4 owing to the reduction of salt duty. Under *Land Revenue* the excess in India (9), as compared with the Budget was due chiefly to the failure of crops in the Nasirabad district of Baluchistan; in the Central Provinces (13), due to large refunds of receipts wrongly credited to Land Revenue, and also to abatements of revenue; and in Berar (12), due to refunds of rents of sites within Municipal limits for the years 1897-98 to 1902-03. The decrease in Bengal (39) was due to an over-estimate. Under *Salt* the refunds in Bengal fell short of that anticipated in the Budget by 16, while in Bombay the falling off in exports resulted in a decrease in the amount of wastage allowance. Under *Stamps* the excess in the Central Provinces (6) and Madras (18), occurred chiefly in the refunds of the value of spoilt-stamps, and in Burma (6) it followed on the increase in revenue. Under *Customs* the falling off in Bengal (42) was due to an over-estimate; while the excess in Bombay (11) was due chiefly to drawbacks on account of silver exported by the Comptoir

Section A.—DIRECT DEMANDS ON THE REVENUES—*continued.*1.—Refunds and Drawbacks—*concluded.*

National D'Escompte de Paris. Under *Assessed Taxes* the decrease in the United Provinces (13) occurred in income-tax refunds, while the excess in Madras (6) was due to a special refund of income-tax paid by a former mortgagee of the Karvetnagar estate. Under *Other Revenue Refunds*, the excess in India (6) was due to a special refund on account of an over-payment for Andaman timber, that in the Central Provinces (5), chiefly to excise refunds; and that in Burma (46), to a remission of tributes having been made by refunds of amounts already collected instead of by short recovery of the amount due.

61. The total expenditure under this head shewed a saving of 6,29, as compared with the Budget, but exceeded the actuals of the previous year by 1,46. The saving, as compared with the Budget, occurred mainly under *Land Revenue Compensations* (5,19), chiefly in Bombay (4,59) in the adjustments in connection with the assessment of alienated lands, due partly to a change in the method of calculation in Sukkur district by which uncultivable charitable grants were left out of account, and partly to an over-estimate for payments to khots of the Devgad Taluka (72) partly counterbalanced by arrear payment (21). In Assam the saving (20) was due to the Rajah of Hill Tipperah not having claimed his compensation during the year; in Bengal (26) it was due to smaller Malikana payments (19), and payments of pensions in lieu of Resumed Lands (7), and in the United Provinces (12) to low payments of allowances to excluded proprietors, and to the Maharaja of Benares not having drawn his allowance for two months. Under *Salt Compensations* the excess in India (36) was due to increased royalty paid

Section A—DIRECT DEMANDS ON THE REVENUES—continued.

2.—Assignments and Compensations—concluded.

to the Jodhpur and Jaipur States under the Sambhar Lake Treaty. The resumption by the Cambay State of the excise management of its territories, caused a saving of 40 in Bombay under *Excise Compensations*. Under *Miscellaneous Compensations* the saving in Bengal (14) was due to the full amount of sayer compensations not having been claimed, and that in Punjab (91) to the provisions for prevention of "cho" torrents and for compensation to Jaigirdars not having been fully utilised. The compensation with effect from April 1904 to the Khan of Khelat (1,18) for lease of Nasirabad and Manjuti in India and increased compensation to Jaigirdars and expenditure in connection with "cho" torrents in the Punjab chiefly account for the increase over the previous year. The excess of 36 (Imperial) in India requires to be sanctioned.

62. The Indian expenditure showed a saving of 17,35 as compared with the Budget Estimate, but exceeded the actuals of the previous year by 23,15. The saving as compared with the Budget was contributed by all the heads except *Management of Government Estates*, but chiefly by *Survey and Settlement* in Bengal (3,63), due to reduced expenditure on survey and settlement operations in Behar, Eastern Bengal and Chota Nagpur; in Madras (3,36), due to large lapses in the provision for survey and settlement operations; and by *Land Records and Agriculture* in the United Provinces (2,32), due to the very partial utilisation of the grants for improving the condition of the Kanungo establishment, and for building advances to patwaris, and to savings under Land Record Surveys; in the Punjab (1,20) due to the lapse of the provision for increasing the pay and field allowance of the Kanungo establishment, and to the saving in the charges on the Patwari Fees Fund; and in Madras (1,06) due to the lapse of the provision for

Section A.—DIRECT DEMANDS ON THE REVENUES—*continued.*3.—Land Revenue—*continued.*

checking field sketches, to the full scale of establishment for the maintenance of Land Records not having been entertained, and to an over-estimate. As compared with the actuals of the previous year the increase was contributed to by all the Provinces but chiefly by Bombay (5,83), Bengal (4,58), Madras (3,08), the United Provinces (2,53) and the Punjab (2,36). In Bombay it was due to heavy charges for the destruction of locusts, and increased allowance to district and village officers on account of the revision of establishment; in Bengal to larger survey and settlement charges; in Madras to the formation of a new district, expansion of survey and settlement operations, and enhanced expenditure on the maintenance of land records; in the United Provinces to charges relating to Partition establishment, shown under this head for the first time in 1904-05, and to extended operations of the settlement department and of Bundelkhand Encumbered Estates Act, coupled with increased expenditure in the Patwari Fund; and in the Punjab to the creation of two new districts, the revision of establishment, and to the formation of the self-contained Provincial Service.

63. Under *Charges of District Administration* the decrease in the Central Provinces (36) was due to savings in the salaries of Deputy and Assistant Commissioners (23), and the non-utilisation of the provision (23) for the Drug Districts, partly counterbalanced by an excess of 12 due to extra charges in connection with the debt conciliation proceedings, and for the destruction of locusts. The saving in Berar (18) and Assam (27) was mainly in the salaries of officers owing to leave vacancies. That in Bengal (2,97) was due to the provision of 1,50 for increase of pay to ministerial establishments not having been utilised, and to savings in salaries and establishments and that in the United Provinces (43) to savings in the partition Amins' establishment (51), the transactions on account of which were included for the first time under service heads in 1904-05, and to absence of district officers on furlough (60) partly counterbalanced by excesses under district and subdivisional establishments (55) owing to promotions, with retrospective effect, in vacancies in which permanent arrangement had not previously been made, and under Record Room establishment (14) owing to entertainment of temporary establishment. The excess in Burma (7) was the result of an excess of 15 under salaries, of 12 under subdivisional establishments, owing to the scheme for a separate Judicial service not having been carried out during the year, of 7 on account of heavy outlay on compensation for lands taken up, and of 9 under contingencies, partly counterbalanced by a saving of 17 due to less outlay on circle establishments under the village head-men scheme and Patta Survey establishments, of 5 under Wards establishment, and of 14 under travelling allowances. The excess in the Punjab (21) was due to the revision of the Naib Tahsildars' Establishment (37), partly counterbalanced by the provision for the new Provincial Service Scheme having been only partially utilised (19). The excess in Madras (98) was mainly due to the formation of the new district of Guntur, but partly also to increased postage charges, and charges in connection with the localization and demarcation of wet lands in inam and proprietary villages commanded by the Ganjam Minor Rivers system. The excess in Bombay (1,91) was due to the heavy charges incurred for the destruction of locusts, for which there was no provision, partly counterbalanced by the provision for the revision of establishment in Sind not having been used, and by savings under supplies and services, and payments to officers of other Provinces.

64. Under *Survey and Settlement* the more important savings in Bengal (3,63) and Madras (3,36) have been explained above. The saving in the Central Provinces (34) was due to the closing of settlement operations in Nimar, to those in Bilaspur having been taken up late in the year, and to the postponement of map amendment work in Jubbulpore; that in Berar (6) to an over-estimate; and that in Burma (19) to the programme of supplementary survey operations not having been fully carried out. In view of the uncertainty of the programme to be followed, the Budget in the United Provinces was pitched too high. In the Punjab also the Budget has proved too liberal, while the saving in Bombay (28) was due to the adjustment by deduction from charges of recoveries in connection with boundary marks, and to the contraction of the operations in connection with the Jamrao Canal Colonisation Scheme. Under *Land Records and Agriculture* the savings in the United Provinces (2,32), the Punjab (1,20) and Madras (1,06) have been explained above. In Berar the provision for the establishment of the Director of Land Records was not utilised. The saving in Burma (94) was chiefly due to the full programme of supplementary survey operations in Pakokku and other districts not having been undertaken; in Assam the saving (15) occurred under District mandals and field allowances of Kanungos; and in the North-West Frontier Province (12) in the local expenditure of the Patwaris Fees Fund, while the excess in Bombay (35) was due to an under-estimate of the increase of pay sanctioned to village accountants; and to recoveries of Survey Charges in Sind having been adjusted by credit to revenue, instead of by deduction from this head. Under *Manangement of Government Estates* the excess was almost entirely in Bengal (1,09), mainly under establishment (45), allowances (19), supplies and services (12), and under outlay on improvements. The small excess in the Central Provinces (7) was due to large outlay on improvements, and in the purchase of villages, while the saving in the United Provinces was mainly due to the small expenditure on improvements. Under *Commission on Collections* the saving in Burma (38) was due partly to the estimate having been placed high in consideration of the estimated

Section A.—DIRECT DEMANDS ON THE REVENUES—*continued.*3.—Land Revenue—*concluded.*

improvement in the Land Revenue collections, and partly to the commission earned on a considerable portion of the revenue collected late in March not having been paid during the year. The excess in the Central Provinces (9) was due to an under-estimate. Under *Allowances to District and Village Officers* the saving in Madras (1,38) was mainly due to allowances of village officers not being regularly drawn, and to the provision (33) for the revision of pay of village establishments in certain taluks of the Malabar District not having been utilised. The small saving in Bombay (6) was the result of a decrease (58) in the adjustment of alienated lands, due to lapses of inams, and an excess (52) on account of allowances to village officers in alienated villages. The Budget in Berar was placed too high. Under *Other Charges* the saving in the United Provinces (1,04) was due to the provision of 1,20 for purchase money of estates not having been utilised, partly counterbalanced by charges on account of a fourth special Judge and his establishment for Hamirpur; and that in Madras (57) to the Budget having erroneously included a provision for advances for cost of labour and stores for survey and demarcation of Village Service Inams in Proprietary estates. The excesses of 12 (Imperial) in the N.-W. Frontier Province, and 1,95 (Provincial) in Bombay have been sanctioned.

2,225,7	TOTAL INCLUDING ENGLAND	2,003,9	1,971,5	1,967,1

65. The total Indian expenditure fell short of the Budget and of the Actuals of the previous year by 5,66 and 38,60 respectively. These decreases were mainly connected with the falling-off in the outturn of the crop, which in the year under report amounted to 111,539 maunds against 115,506 maunds as estimated in the Budget, and 124,297 maunds, the outturn of the previous year. The *Payments to Cultivators* which form the bulk of the charges, fell short of the Budget by 4,87, and of the actuals of the previous year by 38,45 for both the Agencies taken together. These charges depend on the production of opium and are liable to fluctuations. The saving (47) under *Opium Factory* in the Benares Agency was due to smaller expenditure under Freight (60) and Manufacturing Charges (19), partly counterbalanced by an excess under Miscellaneous (29); and that under *District Staff* occurred under Salaries (18), Allowances (5) and Supply and Services (20). Out of the excess of 2 (Imperial) in Bombay 1 has been sanctioned and 1 awaits sanction.

66. The excess (£9) in England was due to increased demands for stores.

67. The Indian expenditure under this head showed a saving of 4,72 as compared with the Budget Estimate, but exceeded that of the previous year by 2,27. The saving as compared with the Budget, under *Salaries, Establishment and Contingencies* (1,80) occurred chiefly in Bengal (90) and Madras (54), the former being due to the full complement of establishment not having been entertained, and the latter to over-estimate. The saving in India (29) occurred under Preventive Establishment. The excess over the previous year occurred chiefly in Bombay and was due to high charges for petty construction. Under *Manufacture and Excavation* the saving (97) occurred mainly under manufacture of salt at the Sambhar Lake (78) and Pachhadra (18), partly counterbalanced by an increase under Through Traffic charges at Sambhar. Under *Purchase and Freight* the estimate both in Madras and Bombay was pitched too high; the excess over the previous year was due to low charges in 1903-04 owing to the unfavourable character of the season for the manufacture of salt and for fishing on the west coast.

68. The expenditure under this head exceeded the Budget Estimate and the actuals of the previous year by 23 and 33 respectively. The variations are small, and do not call for special remarks. The excess under the first head and the saving under the second are mainly due to a change of classification by which certain charges hitherto shown under the latter are now shown under the former. The excess under *Superintendence, Establishments and Contingencies* in India (52), and the saving in Bengal (70), are chiefly due to the transfer from the latter to the former of charges on account of Presidency Executive Establishment.

69. The increase in England (£1,3) was due to a larger demand for stores than was indicated in the Estimates.

70. The total Indian expenditure fell short of the Budget by 1,35, but exceeded the actuals of the previous year by 4,14. As compared with the Budget, the largest saving occurred in Burma (92), and was due to decreases under Rewards, Secret Service and Contingencies, and to the non-utilization of the provision for construction of opium shops, partly counterbalanced by an excess under allowances. In the United Provinces the decrease (16) was due to savings under temporary establishment and allowances, and to partial utilization of the provision for reforms in distilleries. In Madras (17) it was chiefly due to an over-estimate in the charges for rewards, while in Bombay it occurred under Preventive and other establishments, partly counterbalanced by an increase due to the discontinuance of the contributions paid by farmers in Bombay and Khandesh, (which used to be adjusted by deduction from charges), on the introduction of administrative changes. As compared with the actuals of the previous year, the large excess in Burma (3,23) was due to the extension of revised opium arrangements to Upper Burma, with effect from 1st April 1904. The excess in Bombay was due to the employment of larger and better paid establishments as a check on smuggling and illicit distillation; and that in Assam to the employment of an inspecting staff towards the end of 1903-04. The excesses of 1 (Imperial) and 1 (Provincial) in Assam have been sanctioned.

71. The expenditure in England was due to passages of officers on appointment and to purchase of stores for which no provision was made in the Budget.

72. The total expenditure under this head fell short of the Budget by 71 and of the actuals of the previous year by 38. The saving was contributed to by Burma (15) and Bengal (55), and was due in the former to commission on collection of cesses not having been fully paid during the year, and in the latter to savings under process-serving charges. The excess of 2 (Provincial) in Bombay has been sanctioned.

73. The expenditure in India showed a saving of 13 as compared with the Budget, but exceeded the actuals of the previous year by 1,62. Under *Charges at the Principal Ports, etc.*, the saving (19) in Burma was chiefly due to the non-entertainment of the additional establishment provided for in the Budget from the beginning of the year, and (7) in Bombay to savings in the lump provision for the revision of establishment. The excess of 13 in Bombay, under *Charges at other Ports* was due to higher charges for overtime allowances chiefly in Sind. The increase over the actuals of the previous year in Burma (39) was chiefly attributable to a new Bonding establishment for Bharno, to the appointment of an Assistant Collector for Akyab, and to heavy payments for holiday and overtime allowances; in Bengal (25) to heavy overtime and holiday allowances in the Port of Calcutta; and in Bombay (98) to the revision of establishments. The excess of 3 (Imperial) in Bengal has been sanctioned, and that of 6 (Imperial) in Bombay awaits sanction.

74. The expenditure under this head showed savings of 9 and 27 as compared with the Budget and the actuals of the previous year, respectively. The saving in Berar (7) as compared with the Budget, was due to the provision (13) for collection of income tax not having been used, counterbalanced to the extent of 6 by arrear payments in respect of licence tax. Savings under Establishment and allowances account for the decrease in Bengal as compared with the previous year. The Imperial and Provincial excesses in Berar, in the Punjab, in Madras and in Bombay have been sanctioned.

Section A.—DIRECT DEMANDS ON THE REVENUES—*continued.*II.—Forest—*concluded.*

75. The Indian expenditure fell short of the Budget Estimate by 4,33, but exceeded the actuals of the previous year by 8,01. As compared with the Budget the decrease occurred chiefly under *Other Charges* and *Establishment*. Under the former head the principal contributors were Burma and Madras. In Burma (2,13) it was due to less work having been carried out than was provided for, to fewer elephants having been purchased, and to those purchased from the Khedda Department not having been paid for, to small expenditure on forest settlement, surveys and working-plans, and to the provision for certain works and improvements not having been utilised. The decrease in Madras (1,06) was due to the suspension of Khedda operations, the non-purchase of a steam launch for the Godavari, less outlay on communications and surveys, and to the postponement of the demarcation of the Silent Valley reserve in South Malabar. Under *Establishment* the saving, which was largest in the Central Provinces (60) and Burma (59), was mainly due to vacancies, and absence of officers on long leave, and in the latter also to the full complement of officers and establishments not having been entertained throughout the year. As compared with the actuals of the previous year, the excess occurred chiefly in the United Provinces (3,11), Madras (2,35) and Bombay (1,28). In the first it was mainly due to the payment of arrear dues to the Raja of Tehri on account of leased Deodar forests; in Madras to the constitution of additional forest divisions by the splitting up of the large divisions in the Northern circle, and to operations connected with the supply of timber from the Southern Circle to the Kolar Gold Mines; and in Bombay to Famine grass operations and heavy charges in connection with the Tavargatti Depôt scheme in Kanara.

76. Under *Timber and other produce removed from the Forest by Government Agency*, the excess in the Central Provinces (44) was due to the working of the debris of previous year's fellings, transportation of timber, and to the distillation of Russa grass oil; that in Burma (1,20) to larger extractions of timber than had been estimated for; that in the North-West Frontier Province (13) to the extension of timber operations in Kaghan; and that in Bombay (63) to the Famine grass operations, the purchase of tools and plant, and to high charges on account of the supply of Jamba sleepers to the Southern Mahratta Railway. These excesses were partly counterbalanced by savings in India (51) due to low charges for extraction, transport and sawing of timber in the Andamans, partly counterbalanced by Forest Survey charges, provided for under *Establishment* having been charged to this head; in Bengal (30) due to the transport of sleepers to the Siliguri Depôt having been prevented by the closing of the Tista Valley cart road for a great part of the year, and to sales to purchasers in the Kurseong and Angul Divisions in place of departmental working; in the United Provinces (16) due to less expenditure on sleeper works and resin operations, partly counterbalanced by increased expenditure on fuel and turpentine operations; and in the Punjab (57) due to curtailment of departmental operations. Under *Timber and other produce removed from the Forests by consumers or purchasers*, the excess in Bengal (11) was due to extensive repairs to steamers, and large purchase of coal for increased patrol work in the Sunderbuns Division. Under *Establishment* the saving in the Central Provinces and Burma have been explained above. The saving in India (19) was mainly due to the transfer of Forest Survey charges to the second head, as explained above; there was also a saving of 5 in the deputation and travelling allowances of the Forest Entomologist and his establishment, which was, however, covered by an excess of 6 in the Andamans due to the deputation of officers on special duty. The decreases in Assam (18), Bengal (20), and the Punjab (18) were due to the absence of officers on leave, and savings in the pay of Subordinate Forest and Office establishments, while the saving in the United Provinces (20) was due chiefly to a junior officer being in charge of the Central Circle. The excess in Madras (41) was due to the creation of an appointment in the Extra Assistant Conservators class, in connection with the formation of an additional forest division in the Northern Circle, and to too large a deduction in the Budget for probable savings.

77. As compared with the actuals of the previous year, the principal increases in the United Provinces (3,11), Madras (2,35), and Bombay (1,28) have already been explained. There was an increase in Burma of 95 due to large expenditure on roads and buildings, surveys and working plans, on extractions of timber by Government Agency, and on sleepers for the Railway. There was, on the other hand, a large decrease in the Punjab, owing to arrear payments in 1903-4 to the Raja of Chamba on account of his share of profits on the working of his forests.

78. The Imperial and Provincial excesses in Assam, in the United Provinces, in N.-W. F. Province and in Bombay have been sanctioned.

79. The excess in England (£3.3) was mainly due to the cost of Machinery for a steamer, but also to the Budget for stores having been framed before the forecast was received from India.

80. The charges under this head showed a saving of 5 as compared with the Budget Estimate, but exceeded the actuals of the previous year by 47. These small variations call for no remarks. The Imperial and Provincial excesses in Assam, in Bengal, in the United Provinces, in Madras and in Bombay have been sanctioned.

Section B.—INTEREST.

1903-4. Accounts. R		Budget, R	1904-5. Revised. R	Accounts. R
RECEIPTS:—				
1,13,14	India (Rupee figures)	1,09,35	1,06,45	1,03,37
£		£	£	£
754,3	Equivalent in Sterling	729,0	709,7	689,1
141,8	England	40,0	160,0	160,5
896,1	TOTAL	769,0	869,7	849,6

81. The receipts in this section exceeded the Budget by £80,6, or R12,09, but fell short of the actuals of the previous year by £46,5, or R6,98. As compared with the Budget, the improvement occurred entirely in England (£120,5, or R18,08) and was due to the investment of larger sums and at higher rate of interest than was anticipated. There was on the other hand a decline of £39,9, or R5,98, in India. Of this, £11,7, or R1,76, occurred under Interest on Loans to Municipal and other Public Corporations and was due to the postponement of the payment of interest by the Cantonment Committee, Secunderabad, to the payment in March 1904, by certain Municipalities in the United Provinces, of instalments due in April 1904, and short realization in Bombay, chiefly from the Poona Municipality; £3,9, or R58, under Interest on Loans to Native States mainly in India, due chiefly to short recovery on account of Berar Famine Loan and from the Bikaner State; £3,3, or R50, under Interest on Advances to Cultivators chiefly in the Central Provinces owing to reductions in the balance of Takavi Advances due to repayments and large remissions in 1903-04; £14,2, or R2,12, under Interest on Loans to Railway Companies owing to the non-payment by the Kalka-Simla Railway Company of interest for the half-year ending 31st December 1904 due on the loan advanced to them, and £8,3, or R1,24, under Interest on overdrawn Capital of Railway Companies in India due mainly to over-estimate.

82. The decline in India as compared with the actuals of the previous year was chiefly contributed by Bombay under Interest on Loans to Presidency Corporations and was caused by the realization of two years' interest in 1903-4 from the Bombay Port Trust.

Percentage reckoned on balance at end of year	2.652	3.346	3.526	3.874	3.335

85. The interest paid in 1904-5 by Local Governments to the Government of India on account of Loans held on the Provincial account amounted to Rs16,45, or £109,7, while the actual sum realized and credited to the Provincial revenues amounted, in the aggregate, to Rs16,76, or £111,7.

86. *Interest on Loans to Native States* shows a decline of 58 from the Budget. In India, where the principal decrease occurred, the recovery on account of the Berar Famine Loan fell short of the Budget by 36, that from Bikaner by 20, and that from Partabgarh States by 2, while there were no recoveries under loans to Banswara State (6) and Jaora State (3). The decrease of 11 in the Punjab was the result of short receipts from Jhind State (22) caused by the instalment payable in June 1904 having been paid in March 1904, and an increased realization from the Patiala State (10) owing to the loan taken by the State being larger than was estimated. There was, on the other hand, an increase of 21 in Bombay due to the recoveries from the Mahikanta and Kathiawar Agencies.

87. Under *Interest on Loans to Municipal and other Public Corporations* the fall in India resulted from the postponement of the payment of interest by the Cantonment Committee, Secunderabad, on the loan for water works. The Budget in Bengal was pitched too high: this was foreseen in the Revised. The decrease in the United Provinces was due partly to the payment, in March 1904, of instalments due in April, by the Meerut, Nainital and Lucknow Municipalities (23), and partly to the very limited utilisation of the allotments placed at the disposal of the Local Governments for loans to Municipalities. The non-realizations from the Ahmednagar and Belgaum Municipalities (9), and short realisation from Satara Local Board (2), and the Poona (17) and Satara (2) Municipalities, were mainly responsible for the decline in Bombay.

88. The short receipts under *Advances to Cultivators and Advances under Special Laws* occurred chiefly in the Central Provinces (40), and was due to the reduction in balance of Takavi advances, owing to repayments and large remissions in 1903-4; in Bengal (35) due to smaller realization of interest on advances to cultivators, and on embankment and drainage advances than was anticipated; and in the United Provinces (19) due to the non-realization of interest on account of advances under the Bundelkhand Encumbered Estates Act, for which there was a provision of 16 in the Budget, combined with a reduction

Section B.—INTEREST—concluded.**XII.—Interest—concluded.**

tion in the amount of outstandings under advances to cultivators. These decreases were to some extent counterbalanced by increased realizations in Burma (15) due to an under-estimate, and in Bombay (22), to excess receipts under advances for improvement of land.

89. The decrease under *Loans to Railway Companies* was due to the interest on the loan to the Kalka-Simla Railway Company, due for the half-year, ending 31st December 1904, not having been paid in 1904-5.

90. The excess receipts under *Interest on Securities of Provincial Funds* occurred mainly in Madras, and was due to large investments in Government Securities of Cess Receipts realized by District Boards.

91. Under *Interest on Overdrawn Capital* the Budget did not anticipate large overdrawals by the guaranteed Railway Companies, while in the case of other Railway Companies it was over-estimated. The interest realized in the case of the former was consequently much greater, and that in the case of the latter much less than was anticipated in the Budget.

92. Under *Miscellaneous* the excess in India (5) was on account of interest on a special advance to the Bank of Bengal; that in the Punjab (10) represents increased realization on the unpaid portions of the purchase money of waste lands in the Chenab Colony, while the decrease in Madras (11) was due to short realisations of interest on arrears of Land Revenue.

93. In England the increase of £ 120,5 was caused by the investment of a larger sum and at a higher rate of interest than was anticipated.

Section B.—INTEREST.

1903-4. Accounts. ₹		Budget. ₹	1904-5. Revised. ₹	Accounts. ₹
—1,92,89	EXPENDITURE :— India (Rupee figures)	—2,12,77	—2,11,01	—2,09,73
₤ —1,285,9	Equivalent in Sterling	₤ —1,418,5	₤ —1,406,7	₤ —1,398,2
2,983,5	England	2,994,8	3,045,1	3,045,1
1,697,6	TOTAL	1,576,3	1,638,4	1,646,9

94. The total charges in this section were more than the Budget by ₹70,6, or ₹10,59, and less than the actuals of the previous year by ₹50,7, or ₹7,60. The increase as compared with the Budget occurred entirely in England, and was composed of an excess of ₹107,3 due to the absence of provision for discount on the issue of ₹2,500,0 India 3 per cent. stock, and a saving of ₹56,8 due partly to ₹1,500,0 Bills having been discharged without replacement, and partly to a lower rate of interest on ₹500,0 Bills replaced in June. There was, on the other hand, a saving of ₹4,6, or ₹71, in India caused by the favourable rate at which the new loan of 3,00 lakhs was raised, partly counterbalanced by payment of arrear interest on the 3½ per cent. loans. The transfer of interest to Railway Revenue and Irrigation Accounts was less than the Budget by ₹24,6, or ₹3,70, on account of short capital outlay. This produced an apparent excess of ₹20,3, or ₹3,04.

95. As compared with the actuals of the previous year, the decrease of ₹50,7, or ₹7,60, was due to the increased transfer of interest to Railway Revenue and Irrigation Accounts, partly counterbalanced by excess payment in England due to the causes mentioned above, and in India on account of arrear interest.

13.—Interest on Ordinary Debt.

Section B.—INTEREST—continued.

13.—Interest on Ordinary Debt—continued.

97. A 3½ per cent. rupee loan of 300 lakhs, as announced in the Financial Statement, was raised in July 1904 at an average rate of R97-9-2½. Of the balance of loans previously notified for discharge, 65 was paid, consisting of 1, 49 and 15 of the 4½, 4 and 3½ per cent. loans respectively and of the loans bearing interest, 1,200 was paid on account of the Gwalior Loan in accordance with the terms of agreement with the Durbar. The Temporary Loan of 50,00 obtained from the Gwalior Durbar in January 1904, to strengthen the rupee balances, was also discharged.

98. In England the Budget Estimate provided for an addition of £2,500,0 to the sterling debt and the issue of £2,000,0 India Bills to discharge Railway Debentures as well as to make advances to Indian Railway Companies. The Sterling Loan was raised at an average rate of £95-18-6, of which £1,002,1 was applied to the discharge of the G. I. P. Railway Debentures. There was, however, a variation from the Budget programme in the issue of India Bills (Temporary Debt) which was restricted to £500,0 only £2,000,0 were discharged as provided in the Estimate.

99. The total interest on debt paid in India and in England is shown below:—

Debt in India on 31st March 1904—

5,851,7	TOTAL	6,104,3	6,099,5	6,079,3

101. The total payment of Interest in India fell short of the Budget by 71, but exceeded the actuals of the previous year by 10,78. The saving as compared with the Budget was the result chiefly of a saving under *Discount on Loans* (1,72) caused by the favourable rate at which the new loan of 300 lakhs was raised, and an excess in the payment of interest on the 3½ per cent. loans (1,26) on account of arrear interest. The saving of 21 in the payment of interest on the 3 per cent. loans was in consequence of the interest remaining unpaid at the end of the year. The small decrease under *Interest on Provincial Debenture Loans* was in the additional payment on account of surplus profits of the Cawnpore-Achneyra Railway.

Section B.—INTEREST—continued.

13.—Interest on Ordinary Debt—concluded.

102. The transfer of interest charge to Railway, Revenue and Irrigation Accounts was less than the Budget by 3,70 as the total capital outlay on Railway and Irrigation works was lower than the sanctioned estimate.

103. The excess of £50,0 in England was mainly composed of an excess of £107,3, due to the absence of provision of discount on the issue of £2,500,0 India 3 per cent. stock, and a saving of £56,8 under *Interest on Loans contracted in England*, of which £57,2 were in interest on India Bills, due partly to £1,500,0 Bills having been discharged and not replaced and partly to a lower rate of interest being paid on the £500,0 Bills replaced in June.

14.—Interest on other Obligations.

104. The expenditure was more than the Budget and the actuals of the previous year by 5 and 3,59 respectively. The most important fluctuations occurred in India under *Savings Bank Deposits* as the charge for interest increases with the growth in the deposits. The excess over the actuals of the previous year in India was due to the same cause. The decline in Punjab (11) as compared with the Budget was the result of larger withdrawals than were anticipated. Of the saving of 13 under *Interest on Special Loans*, the decrease (2) in India occurred under the 8 per cent. Perpetual Loan (Madras); in United Provinces (6) due to the non-payment of certain Wasika pensions; and in Bombay (5) to the interest on the Grant Medical College Funds not having been claimed in the year. The higher charge in Bombay in the previous year was due to the payment of arrears of interest on Educational Funds and the adjustment of certain erroneous credits in connection with loans to States in the Palanpur Agency. Under *Treasury Notes and Service Funds* the decrease (9) in India, which occurred in the interest on Treasury Notes on account of

Section B.—INTEREST—concluded.

14.—Interest on other Obligations—concluded.

Bhonsla and other Nagpur Temples, was to some extent counterbalanced by an excess in Bombay in consequence of an increase in the balance of the Uncovenanted Service Family Pension Fund. The saving of 22 under *Miscellaneous* in Bengal occurred mainly in the Local Section. The excess of 3 in Bombay was in the interest on deposits, fine funds, etc., of the Great Indian Peninsula Railway.

105. The usual details of the interest on Treasury Notes and Service Funds and Savings Bank deposits are noted below :—

Interest on Treasury Notes and Service Funds.

106. Under Post Office the net receipts were more than the Budget by £91,8 or R13,77 but were less than the actuals of the previous year by £47,7 or R7,15. The improvement as compared with the Budget was caused by an unexpectedly large increase in the sale of Postage Stamps, and to the growth in the operations of the Money Order Department, and by a decrease in the expenditure, chiefly under Conveyance of Mails in the payments to Railways and under Presidency and District Offices, owing to the revision of establishment not having been brought into effect till late in the year. The decrease as compared with the actuals of the previous year was the result of increased expenditure in England, owing chiefly to larger demand for stores than was anticipated, and an improvement in India, due to increased sale of Postage Stamps and Money Order receipts, partly counterbalanced by increased expenditure chiefly under Establishment, owing to the expansion and development of the Department, and under Subsidies due mainly to the new arrangements for carrying mails, and for the New Persian Gulf Section.

107. The net results of the transactions of the Postal Department for the last five years are shown by the following figures:—

	Net Receipts.
	R
1900-01	20,24
1901-02	15,47
1902-03	12,47
1903-04	15,59
1904-05	8,43

Section C—continued.

Mint—concluded.

108. Under Telegraph the net receipts exceeded the Budget, and the actuals of the previous year by £159,1 or ₹23,86, and £54,8 or ₹8,22, respectively. The improvement as compared with the Budget, was due principally to increased message revenue, and rent of wires and instruments leased to Railways and Canals, and to reduced expenditure due to small purchase of stores in England, and to the non-payment of the Joint-Purse Guarantee, and in India to short outlay in the repairs to lines.

109. The improvement as compared with the actuals of the previous year was due to increased message traffic, owing to reduction in the rates of inland messages, and to the Russo-Japanese War, and reduced expenditure under Indo-European Telegraphs in the payments of message revenue, and on the Central Persian Line.

110. Under Mint the net receipts exceeded the Budget by £124,5 or ₹18,67, but fell short of the actuals of the previous year by £10,7 or ₹1,60. The improvement was due to a large dollar coinage for the Straits Settlements, to the credit of 2 per cent. on actual coinage, and to the absence of any charge under Net Profits on Silver Coinage paid to the Gold Reserve Fund owing to change in the method of adjustment reduced by short receipt under gain on coinage operations.

111. The decrease as compared with the actuals of the previous year was mainly due to the change in the method of adjustment of the net profit on silver coinage.

112. The total revenue exceeded the Budget Estimate by ₹12,11, and the actuals of the previous year by 10,33. The increase as compared with the Budget Estimate, occurred chiefly under *Sale of Postage Stamps—Ordinary* (8,67), and *Money Order Receipts* (1,61) owing to an unexpectedly large increase in the sale of stamps, and in the issue of money orders, and under *Mail Cart, Parcel Van,*

Section C—continued.

XIII.—Post Office—concluded.

Passenger and Goods Service (75) due to the Simla Tonga Traffic not having been altogether stopped as was expected. There were also small improvements under *Parcel and other Postage collected in cash* (14), and *Other Receipts* (26) due to under-estimates. These improvements were counterbalanced to a small extent by a falling off in the *District Post Collections* (23), chiefly in the North-West Frontier Province, owing to the transfer of the Tonga and Mail Cart Services to the Postal Department.

113. The increase as compared with the previous year was due to the general expansion of the operations of the Department, and occurred chiefly under *Sale of Postage Stamps—Ordinary* (9,99) and *Service* (1,17), and *Money Order Receipts* (1,87). There were smaller improvements under *Parcel and other Postage collected in cash* (32) and *Other Receipts* (45). These were partly counterbalanced by a decrease under *Mail Cart, Parcel Van, Passenger and Goods Service* (2,53) owing to the opening of the Simla-Kalka Railway, by a larger deduction than in the previous year under *Payments to English, Colonial, etc., Post Offices* (80), and to a falling off under *District Post Collections* (14) chiefly in the North-West Frontier Province due to the cause stated above.

114. The total expenditure in India showed a saving of 1,96 as compared with the Budget Estimate, but exceeded the actuals of the previous year by 10,24. As compared with the Budget the decrease under *Presidency and District Offices* (76) was mainly due to small expenditure under Salaries, (58) owing to the revision of the appointments of Superintendents of Post Offices not having been carried out from the beginning of the year, under Travelling Allowances (26), and construction and repairs of Post Office buildings (7), and to gain in working combined offices (48), partly counterbalanced by

Section C—continued.

15.—Post Office—concluded.

increased payments under Establishment (24), Aligarh Workshop Supplies (18), other Supplies (12), and Contingencies (9). The increase of 7,71 over the actuals of the previous year was due mainly to the expansion of the Department, and the revision in the appointments of Superintendents and Assistant Superintendents, counterbalanced by a decrease arising from the absence of expenditure on account of the Coronation Durbar. The decrease (1,16), as compared with the Budget under *Conveyance of Mails* occurred chiefly under *Railway Charges* (1,07), in the payments to the East Indian, Great Indian Peninsula, the North-Western and the Assam Bengal Railways. The increase (26) as compared with the actuals of the previous year, was due mainly to higher expenditure under *Road Establishment and Contingencies* (1,36) and *Railway charges* (51) partly counterbalanced by a decrease under *Mail Cart, etc., charges* (1,67) due to the opening of the Simla-Kalka Railway. The excess under *Discount on Sale of Postage Stamps* was due to increased sales of ordinary postage stamps. The saving under *Subsidies* (17) as compared with the Budget occurred in the payments to the British India Steam Navigation Company, Persian Gulf Section; while the increase (1,65) as compared with the actuals of the previous year was in the payments to the same Company in connection with the new arrangements for carrying mails, and on account of the New Persian Gulf Section. The increases under *Stationery and Printing* as compared with the Budget and the actuals of the previous year occurred principally under charges for Stationery supplied from Central Stores, and by the Superintendent of Government Printing. The saving (5) under *Miscellaneous* was due chiefly to smaller payments than anticipated as compensation for lost articles (13), partly counterbalanced by the loss (10) by exchange on Continental money orders.

115. Under *District Post Charges* the excess in Burma (18) was due to a subsidy sanctioned for the conveyance of mails between Thazi, Taunggyi and Fort Steadman, and the opening of additional subsidized lines during the year; the increase over the previous year (25) was due to larger payments of subsidies. The saving in Bengal (28) was under Collection of Cesses and Zamindary Dāk, while that in the North-West Frontier Province (23) was due to the transfer of the Tonga and Mail Cart Services, in the Dera Ismail Khan District, to the Postal Department. The Provincial excesses in Berar and in Burma have been sanctioned.

116. The excess in England £2,0 was due to a larger demand than was expected for Stores (6), partly counterbalanced by a smaller payment than was anticipated under the Postal arrangement with the Lords of His Majesty's Treasury.

XIV.—Telegraph—concluded.

Indian Telegraphs.

117. As compared with the Budget Estimate there was an increase of 7,06, which occurred principally under message revenue, and rent of wires and instruments leased to railways and canals. The increase of 5,57 as compared with the previous year falls under the same heads, the increase under message revenue being due to increased traffic owing to reduction in inland rates, and to increased foreign traffic across India on account of the Russo-Japanese War.

Indo-European Telegraphs.

118. The receipts in India were more than the Budget Estimate by Rs. 2,81, but those in England fell short by £2,3. The increase in India occurred in the transit message receipts from the Indian Telegraph Department. The decrease in England was due to non-payment of the Joint-Purse Guarantee. The increase of Rs. 84 in the receipts in India as compared with the previous year is mainly under message revenue.

Indian Telegraphs.

119. The short outlay of £37,4 as compared with the Budget Estimate occurred under capital expenditure in England (£7,6) and revenue expenditure in India (£25,3), and was mainly due to smaller purchases of stores in England, and to short outlay on repairs to lines. As compared with the previous year the total expenditure showed an increase of £28,5 which occurred mainly under Capital owing to the demand for railway works being more in the year under review.

Indo-European Telegraphs.

120. The short outlay of £58,1 as compared with the Budget Estimate was chiefly due to the non-payment in England of the Joint-Purse Guarantee, and to smaller payments in respect of message revenue. As compared with the previous year there was a decrease (£43,0), due chiefly to smaller payments in respect of message revenue and smaller expenditure on the Central Persian Line.

121. The total receipts under this head showed an increase of 1,54 over the Budget, but fell off by 4,01,76 in comparison with the actuals of the previous year. The coinage of dollars for the Straits Settlements was much larger than was provided for in the Budget, resulting in an increase of 1,35 under *Fees for coining Silver*. The variations under *Gain on Coinage Operations*, and *Other Receipts* were due to the change of procedure, under the orders of the Government of India, by which the gain is taken to a debt head; a percentage (2) representing the cost of actual coinage being taken as a credit to the latter head. The increase under *Gain on Copper Coinage* was due to a larger number of coins having passed into circulation during the year under report than was estimated.

122. The difference between the actuals of the two years was mainly due to the method of adjustment referred to above.

Section C—concluded.

17.—Mint—concluded.

123. The Indian expenditure fell short of the Budget by 18,34 and the actuals of the previous year by 4,01,09. The prominent factor in the saving, as compared with the Budget, occurred under *Net Profit on Silver Coinage paid to the Gold Reserve Fund*, in consequence of the introduction of the modified method of adjustment referred to in para. 121 since 1st April 1904. Under *Establishment* there was an excess of 36 in Calcutta and 13 in Bombay. The former occurred under Mint and Assay Master's Establishments, and was due to the appointment of an officer on special duty for which there was no provision (4), entertainment of additional extra establishment in consequence of heavy coinage operations (22), increase under rents, rates and taxes (10) in consequence of enhanced municipal assessment on the Mint Buildings, and increased expenditure under Contingencies (4), partly counterbalanced by saving in the salary of the Mint Master (4) owing to the absence of the permanent incumbent on leave, and the appointment of an officiating officer on less salary. That in Bombay was due to the entertainment of temporary establishment and to overtime allowances. The excesses were covered by additional grants sanctioned by the Government of India. The saving and excess under *Loss on Coinage* in the Calcutta and Bombay Mints, respectively, were chiefly in connection with the recoinage of old coins. The increase under *Other Charges* represented larger purchases of local stores necessitated by heavy coinage operations.

124. The decrease as compared with the actuals of the previous year was chiefly due to the discontinuance of the adjustment of the net profits on silver coinage payable to the Gold Reserve Fund under this head.

125. The increase of £8,1 in England was due to the demands for stores having been larger than was indicated in the estimate.

Section D.—RECEIPTS BY CIVIL DEPARTMENTS.

1903-4. Accounts. R	RECEIPTS—	Budget. R	1904-5. Revised. R	Accounts. R
2,36,14	India (Rupee figures)	2,16,35	2,33,07	2,31,24

23.0	England	27.8	6.2	5.7
1,597.3	TOTAL	1,470.1	1,560.0	1,547.3

126. The receipts in this section exceeded the Budget Estimate by £77.2 or R11.58, but fell short of the actuals of the previous year by £50.0 or R7.50. As compared with the Budget £47.3 or R7.10 of the improvement occurred under Marine due to large recoveries in connection with the employment of Royal Indian Marine vessels on Imperial Service, and for work done for other Departments and for the Royal Navy, and to an increase in Pilotage Receipts in Bengal owing to the large number and tonnage of vessels visiting the ports. These increases were however partly counterbalanced by a decrease in England owing to the sale-proceeds of Torpedo Boat Defence vessels having been paid by the Admiralty in 1903-04. There was an increase of £12.5 or R1.88 under Police due to receipts for Ordnance Stores returned by the Police Department, and high receipts under the Petroleum Act, and from Cattle Pounds in Bombay, and to large receipts from sale of unclaimed cattle, and for rewards to Police in the United Provinces; and of £7.8 or R1.17 under Law and Justice—Jails chiefly from increased sales of Jail Manufactures. Increased receipts under Medical (£5.2 or R78) and Scientific and other Minor Departments (£6.8 or R1.02) also contributed to the improvement.

127. As compared with the previous year £47.3 or R7.09 of the decrease occurred under Marine, due to the smaller employment of Royal Indian Marine Vessels on Imperial Service in 1904-05, and to no vessels being sold; £13.6 or R2.04 under Scientific and other Minor Departments, due to the sale in 1903-04 of the Aluminium Industry in Madras to a private company. There were besides small decreases under Courts of Law, (£3.9 or R59) and Medical (£3.6 or R54). There was an improvement of £8.2 or R1.23 under Education chiefly in fees from schools and colleges, and of £4.8 or R72, and £5.4 or R81 under Jails and Police respectively.

128. The receipts under this head exceeded the Budget Estimate by 2, but fell short of the actuals of the previous year by 59. Under *Sale-proceeds of Unclaimed and Escheated Property* the only important increase occurred in Madras (17), and was due to a special receipt from the sale of an escheated estate. Under *Court-fees realised in cash* the increase in Bombay (35) was due to the payment into the Treasury of fees realised in cash by the Insolvent Debtors Court, and kept for a time in a separate account in the Bank of Bombay. The variations under *General Fees, Fines and Forfeitures* occurred under Magisterial Fines, which are always liable to fluctuations. The large decrease in Madras (33) is, however, mainly due to the fines, payable to Municipalities and to the Society for Prevention of Cruelty to animals having been adjusted by deduction during the year, instead of after its close as hitherto. Under *Other Receipts* the improvement in Bengal (9) was due to increased miscellaneous receipts and pleader-ship examination fees, while a falling off in these examination fees caused a decrease in the United Provinces (6). The decrease in Bombay (18) was due to the introduction of a new rule by the High Court, by which comparing fees formerly credited to Government, are now paid direct to Section-writers.

	Revised	238,5
	Accounts	245,4

129 The receipts under this head exceeded the Budget Estimate and the actuals of the previous year by 1,17 and 72, respectively. As compared with the Budget, the improvement occurred under *Sale-proceeds of Jail Manufactures* chiefly in Bengal (1,86) due to large sale to Public Departments, to which cause the improvements in Burma (17) and Madras (11) are also mainly attributable, while the increase in the Punjab (41) was due to the employment of a larger number of prisoners on manufactures; the decrease in the Central Provinces (27) was due to an over-estimate; that in Berar (10) and Assam (28) to

Section D.—RECEIPTS BY CIVIL DEPARTMENTS—*continued.*XVIB.—Law and Justice—Jails—*concluded.*

a smaller outturn than was anticipated; that in the United Provinces (24) to small outturn owing to unusually high prices of raw materials, prevalence of plague, and low Jail population; and that in Bombay (13) to a small demand for Jail manufactures. As compared with the actuals of the previous year the increase occurred chiefly in Madras (94), and was due to a general improvement in the outturn. The net receipts under this head, after deducting the corresponding charges under 19-B, are given below:—

		India.	Central Prov- inces.	Berar.	Burma.	Assam.	Bengal.	U. P. of Agra and Oudh.	Punjab.	N.-W. Front- ier Pro- vince.	Madras.	Bombay.	TOTAL.

	Budget . }	6	49	4	1,85	11	2,08	1,69	—35	4	1,05	22	7,28
	Revised . }	6	5	7	1,58	—6	2,99	1,19	61	8	67	40	7,64
	Accounts . }	4	25	5	1,88	10	4,35	1,24	88	7	1,18	15	10,19

130. Under *Other Receipts* the decrease in the United Provinces (10) was due to small receipts from hire of convicts; in the Punjab (19) to prisoners having been employed on manufactures, and not on canal works, and in Bombay (19) mainly to adjustment of an excess credit. These decreases were partly counterbalanced by an improvement of 10 in Burma due to a large demand for extramural labour, and of 10 in Madras due to the employment of a large number of convicts on Press work in Madras, in consequence of a strike among workmen in the Government Press.

131. The receipts under this head showed an improvement of 1,88 over the Budget Estimate, and 80 over the actuals of the preceding year. The improvement was chiefly contributed by Bombay (1,16) and the United Provinces (51), due in the former case mainly to receipts on account of Ordnance Stores returned by the Police Department, and to large receipts under the Petroleum Act, and from Cattle Pounds,

Section D.—RECEIPTS BY CIVIL DEPARTMENTS—*continued.*XVII.—Police—*concluded.*

and in the latter, to large receipts from sale of unclaimed cattle, and on account of rewards to Police, and clothing. The increase (36) under *Presidency Police* occurred chiefly in Bengal (12) and Bombay (17), due in the former to large recoveries of fines for cruelty to animals, and Fees, Fines and Forfeitures, and in the latter, to the increased demand for private Watchmen in consequence of plague, and to large receipts under Cattle Pounds and Miscellaneous. The increase (1,30) under *Fees, Fines and Forfeitures, etc.*, was due generally to high receipts under Cattle Pounds, enhanced by Steam Boiler inspection fees, gambling fines and slaughter-house license fees in Burma, and by receipts under the Petroleum Act in Bombay; and partly counterbalanced by lower receipts under Cattle Pounds in Assam and Bengal. The increase under *Other Receipts* (1,73) was due to leave and pensionary contributions of the Hyderabad Railway Police in India, to recoveries on account of village police in Bengal, to recoveries on account of rewards to Police and for clothing in the United Provinces and to a return of Ordnance Stores by the Police Department in Punjab, Madras and Bombay. The decrease (1,30) under *Police Supplied to Public Departments, Private Companies and Persons* occurred chiefly in Madras (1,00) due to recoveries for the Punitive Police Forces, stationed in Tinnevely and Madura, having been made in advance in 1903-04, in Bengal (31) to smaller recoveries for Punitive Police, and in Bombay (14) to low recoveries for additional Police. On the other hand there was a small improvement in Burma (15) in the recoveries for Punitive Police. The falling off in the receipts (17) under *Police supplied to Municipal, Cantonment and Town Funds*, was chiefly the result of recoveries from Municipalities and Cantonments, on account of Police supplied to them, having been adjusted by deduction from 20—Police instead of by credit to this head.

132. The receipts under this head exceeded the Budget by 10,39, but fell short of the actuals of the previous year by 4,54. The improvement, as compared with the Budget, was spread over all the

Section D.—RECEIPTS BY CIVIL DEPARTMENTS—continued.

XVIII.—Marine—concluded.

minor heads, but chiefly under *Dockyard Services, etc.* (7,11), due to large recoveries in connection with the employment of Royal Indian Marine Vessels on Imperial Service (4,29), and for work done for other Departments and for the Royal Navy, partly counterbalanced by non-realisation of the greater portion of the provision for recovery in connection with the fitting of hired transports for return of troops from Somaliland (2,82). There was also a large improvement in Bengal (2,32) under *Pilotage Receipts*, due to the number and tonnage of vessels visiting the ports being larger than was anticipated. Under *Sale-proceeds of Vessels and Stores* the increase in India (13) was due to large sales of chain cable and iron of obsolete sizes. The increase in Bengal (10) and Bombay (14) under *Registration and Other Fees* was due to increased shipping of the ports. Active import and export trade accounts for the increase in Burma (52) under *Coast Light Dues*. Under *Other Receipts* the increase in India (8) was due to the adjustment, by debit to Civil Departments, of the value of coal supplied to His Highness the Sultan of Muscat, hitherto recovered in instalments. As compared with the previous year, the decrease occurred mainly under *Dockyard Services* (4,81) and *Sale-proceeds of Vessels, etc.*, (1,91), due under the former to smaller employment of Royal Indian Marine Vessels on Imperial Service during 1904-05, and under the latter to the absence of sale of vessels in the year under review.

133. The decrease in England (£22,0) as compared with the Budget, was due to the sale-proceeds of Torpedo Boat Defence vessels, included in the Estimate, having been received from the Admiralty in 1903-04.

134. Total receipts fell off by 39 as compared with the Budget Estimate, but exceeded the actuals of the previous year by 1,23. The decrease as compared with the Budget was contributed mainly by the Punjab under *Fees from Schools and Colleges* and was due to schools not having been taken over until later than was expected. There were smaller decreases in Berar (4), Burma (10) and Bengal (13) due in Berar to low receipts under Fees from Schools—General, in Burma to the transfer of the Rangoon College, from the Educational Syndicate to Government, with effect from the 16th November 1904, instead of from the beginning of the year, and in Bengal to short realisation of fees from Government Colleges—General, partly counterbalanced by increases under Government Colleges—Professional and Schools—General and Special. There were, on the other hand, improvements in Assam (4) under Fees from Schools—General; in the United Provinces (27) due chiefly to high receipts from fees of Government Colleges and District Board Schools; in Madras (12) to better receipts from the Presidency and Kumbakonam Colleges and from Training Schools; and in Bombay (8) to better attendance at the Colleges. Increased contributions from Native States and private persons in Bengal, and from Municipalities in the Punjab, mainly account for the improvement under *Contributions*. The decline under *Other Receipts* (18) was chiefly contributed by the United Provinces (12) and Bombay (11). The fall in the United Provinces was due chiefly to the abolition of some of the Book Depôts in the Province of Agra, and that in Bombay to a decrease in the number of candidates for the School final examination, and in the sale of books at Book Depôts. There was an improvement in Madras (5) due to the realisations by the Madura District Board of the sale-proceeds of articles made in the Industrial Department of the Board's Technical Institute.

135. The receipts under this head showed an improvement of 82 over the Budget, but fell short of the actuals of the previous year by 50. The improvement as compared with the Budget was contributed by all the heads. Under *Medical College and School Fees* the increase in Madras (11) was due to the inclusion of the Minor Sanitary Engineering class fees under this head. Under *Hospital Receipts* the increase in Bengal (15) was in the receipts from paying patients. Under *Lunatic Asylum Receipts* the improvement in Burma (10) was due to insufficient allowance for the annual growth, while low receipts from the Dairy farm attached to Bareilly Lunatic Asylum account for the decrease in the United Provinces. Under *Contributions* there were larger receipts from Municipalities and private persons in Bengal (14), and from private persons and excluded local funds in the United Provinces (10). Under *Other Receipts* the increase in the United Provinces (10) was due to large sales of quinine, and that in Bengal (5) to large receipts under Miscellaneous.

136. The receipts under this head exceeded the Budget by 1,00 and fell short of the actuals of the previous year by 2,02. The improvement as compared with the Budget was spread over almost all the heads. As compared with the previous year the decrease occurred in Madras, and was due to the special receipt of 2,92 in 1903-04 for the sale of aluminium ware and the Aluminium Industry to a private company. Under *Receipts on Account of Experimental Cultivation*, the increase in India (4) occurred in the sale proceeds of farm produce at Pusa, and that in the Central Provinces (6) in receipts from new experimental farms. The improvement under *Botanical and Other Public Garden Receipts* was due to increased receipts from Botanical and Taj Gardens in the United Provinces (9), and from sale of grass, trees, etc., by Local Boards in the Punjab (8). Increased receipts from the sale of Quinine and Febrifuge account for the improvement in Madras (26), and Bengal (9) under *Cinchona Plantations*. In the latter there was, however, a decrease in the sale of Cinchona Alkaloids. The decrease under *Receipts on Account of Public Exhibitions and Fairs* in the United Provinces (16) was due to the prevalence of plague. The large improvement under *Veterinary and Stallion Receipts* was mainly due to the sale-proceeds of bulls, mules and donkeys at the Government Cattle Farm at Hissar in India (41), to the gradual extension of the operation of this Department in Bengal (9), and to grants by certain Municipalities to Veterinary Dispensaries, and by the realisations of an old investment in Bombay (11). A contribution of 22, sanctioned by the Government of India, from the Central Provinces to meet the deficit in the Bengal portion of the Inland Labour Transport Fund increased the receipts in Assam under *Labour and Emigration*, while the decrease in Bengal was the result of small receipts from fees for registration of emigrants. The fall (19) under *Sale of Maps, etc.*, occurred chiefly in the sale of instruments by the Mathematical Instrument Department. Under *Other Receipts* the increase in Assam was due to a write-back by Bengal of a debit in 1903-04, and that in Madras, to fees for Lower Secondary and Primary Examinations (21), partly counterbalanced by small receipts in the weaving and carpentry departments of the School of Arts (18.)

137. In England the increase of £2 was due to larger sales of books, maps, etc.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS.

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
R	EXPENDITURE—	R	R	R

11,979,2	TOTAL	12,795,6	12,353,5	12,399,8

138. The expenditure in this section showed a saving of £395,8 or ₹59,37 as compared with the Budget Estimate, and an excess of £420,6 or ₹63,09 as compared with the actuals of the previous year. As compared with the Budget the saving was contributed by all the heads except General Administration and Marine, under which the excess aggregated £68,9 or ₹10,33. There was a saving of £26,8 or ₹4,02 under Law and Justice—Courts of Law chiefly in Burma, Bengal and the United Provinces, due to the non-utilisation of the provision for the revision of the Judicial Service in Burma, the grant for revision of the Ministerial establishments of Civil and Criminal Courts in Bengal, and to the partial lapse of the provision for revision of the establishments of Civil Courts in the United Provinces; of £49,7 or ₹7,45 under Jails, in all the Provinces except India, due mainly to low Jail population, cheap rates for food grains, small hospital charges, small purchase of raw materials, savings in salaries, and the non-utilisation of certain provisions in Bengal and the Punjab; of £23,4 or ₹3,51 under Police chiefly in the United Provinces, due to the transfer of the provision for the relief of Municipalities from Police charges to Civil Works, under which head the relief afforded was recorded; of £82,8 or ₹12,42 under Education due mainly to the lapse of certain grants chiefly in Bengal, the United Provinces, the Punjab and Bombay, and to the provision in India for grants-in-aid to the other provinces not having been used; of £52,1 or ₹7,82 under Medical due chiefly to reduced expenditure on plague measures in all the Provinces except Burma and Madras, where the charges on this account increased, to the provision for the increase to the emoluments of the Indian Medical Service officers not having been fully utilised, to the lapse of certain other provisions in the Central Provinces and Burma, to the transfer to Civil works of the provision in the United Provinces, for cleansing towns and villages through the agency of District Boards, and to an over estimate in Madras on account of vaccine establishments; of £200,8 or ₹31,47 under Political due mainly to His Highness the Amir of Afghanistan not having drawn his subsidy in full; and of £17,8 or ₹2,67 under scientific and other Minor Departments due to the lapse of the provision for Diamond Drilling, and to vacancies and absences of officers of the Geological Survey and Veterinary Departments. The excess of £34,3 or ₹5,14 under General Administration occurred mainly in Secretariat charges in India, due to appointment of additional officers, deputation of officers on special duty, and high telegram charges. The increase of £34,6 or ₹5,19 under Marine was due to extensive alterations and repairs to vessels of the Royal Navy and the Royal Indian Marine, and to large purchases of Coal, due to the employment of Royal Indian Marine vessels in connection with the Somaliland Field Force, and with Colonial reliefs, partly counterbalanced by reduced expenditure on hire of transports for the Aden Boundary Commission, and for the supply of coal to His Majesty's ships of war in Indian seas.

139. Of the excess, as compared with the previous year, £112,2 or ₹16,83 occurred under Education, spread over all the Provinces, and was due to additional appointments, increases of salary, and large grants for buildings and furniture; in Burma the excess was also partly due to the transfer to Government of the Rangoon College and Law classes, and i

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

Bengal to a special grant of 2,00 to the Calcutta University; £61,5 or R9,24 under Courts of Law chiefly in Burma, Bengal and Bombay, due in Burma to the entertainment of additional Myooks with their establishments, to large expenditure under diet and travelling of witnesses, and under process-serving establishment, and in Bengal and Bombay to higher payments on account of salaries; £71,5 or R10,72 under Police chiefly in Burma, Bengal, Madras and India, due in Burma to increased charges for salaries under District Executive force, the employment of additional companies of Military Police in the Southern Shan States Battalion, and heavy expenditure on arms and accoutrements, clothing, and petty construction and repairs; in Bengal the increase was under supplies and services of the District Executive Force; in Madras it was due to large additions to the force in consequence of the spread of plague, and to increased expenditure for clothing, and arms and accoutrements, and in India to the re-organisation of the Thagi and Dacoity Department; £69,0 or R10,35 occurred under Marine due chiefly to the construction of a steamer in Bengal, and to outlay on construction of launches in Burma; £48,5 or R7,28 under Medical due mainly to the increased emoluments of the Indian Medical Service officers, increased expenditure on plague preventive measures in Burma and Madras, and to large grants to Hospitals and Dispensaries in Burma and Bengal; and of £87,7 or R13,15 under Political due to the larger drawings of His Highness the Amir of Afghanistan, to the visit of Sardar Inayat Ullah Khan to India, and to special political expenditure. The more important decreases occurred under District Administration (£17,9 or R2,68) and Scientific and other Minor Departments (£12,8 or R19,2). The former was caused by the high charges in connection with the Delhi Coronation Durbar, included in the actuals of 1903-04, partly counterbalanced by increases in the year under report in salary, establishment and travelling allowance charges of Secretariats in India and Account Offices; and the latter by the large grant in 1903-04 for structural improvement and re-arrangement of exhibits in the Indian Museum.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*18.—General Administration—*continued.*

140. The expenditure in India exceeded the Budget Estimate by 4,55, but fell short of the actuals of the previous year by 1,58. The excess as compared with the Budget occurred mainly under *Secretariat* (4,33) chiefly in India due to the appointment of Additional Officers, deputation of officers on special duty and to high telegram charges. As compared with the previous year, the saving occurred mainly under *Tour charges* (3,64) owing chiefly to the charges of 1903-4 having included high charges on account of the Delhi Coronation Durbar, partly counterbalanced by increases under *Secretariat* (2,58) chiefly in India, and under *Account Offices* (1,45) in salaries, establishments and travelling allowances. Under *Staff and Household* the excesses in the Central Provinces (6), Burma (30) and Punjab (32) were chiefly on account of purchase of furniture; the increase in Bengal (13) was due to expenditure on motor cars, and saloon charges for which provision was not made; in the United Provinces (29) chiefly to a change of classification by which certain charges are shown under the next head, and partly (6) to outlay for maintenance of furniture, and in Bombay (11) to charges for the Bodyguard establishment. Under *Expenditure from contract allowance* the savings are due to the transfer of charges to the *Tour charges*. The saving in India (21) under *Durbir Fund* was due chiefly to the contract grant for furniture for 1904-5 having been paid in the previous year. Under *Executive Council* the excess in India (17) was due partly to the absence of a member on leave, and partly to the appointment of a member for the new department of Commerce and Industry. Under *Legislative Council* the saving occurred in salaries and allowances of both official and non-official members.

141. The *Secretariat* charges exceeded the Budget Estimate in India (3,27), the Central Provinces (1), Burma (12), Assam (2), Bengal (67), the Punjab (1), Madras (49), and Bombay (5), and fell short of it in the United Provinces (27), and the North-West Frontier Province (4). The details of the India *Secretariat* charges are given below:—

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
	<i>Secretariat (India).</i>			
3,76	Financial Department	3,48	3,92	3,96
3,37	Home Department	3,51	3,40	3,45
1,75	Legislative Department	1,59	1,62	1,67
5,86	Foreign Department	5,12	6,65	7,20
2,01	Revenue and Agriculture Department	2,18	2,31	2,34
7	Translator's Department	7	7	7
32	Record Department	39	36	37
3,53	Public Works Department	3,51	3,75	3,76
5,26	Military Department	5,26	5,15	5,31
5	Special charges for messing (Civil)
...	Commerce and Industry Department	40	25
<u>25,98</u>	TOTAL	<u>25,11</u>	<u>27,63</u>	<u>28,38</u>

142. The employment of officers on special duty contributed to increased charges in most of the Secretariats; apart from this, the excess in the Financial Department was due chiefly to increased charges under establishment, owing to absence on leave and employment of temporary establishments; that in the Foreign Department chiefly to the appointment of Additional Assistant Secretaries, absence of officers on privilege leave, revision of establishment, entertainment of extra establishment, and high telegram charges; and that in the Public Works Department, chiefly to the newly constituted Railway Board. The Commerce and Industry Department is a newly constituted department for which an additional grant was sanctioned. The excesses in Burma (12), Bengal (67) and Madras (49) were mainly due to the deputation of officers on special duty, and to absence of officers on privilege leave. The decrease in the United Provinces (27) was due to savings in the grant for officers on special duty and in privilege leave allowances. Under *Tour charges* the excess in India was due chiefly to high charges for special trains, and those in the other Provinces to the transfer of charges from the head *Expenditure from contract allowance*. Under *Board of Revenue, etc.*, the excess in the United Provinces (10) was due to absence of officers on privilege leave, the payment of arrear allowances of a Member of the Board, and to high expenditure under establishment; in the Punjab (10) and Madras (7) it was chiefly due to privilege leave allowances, and in the latter partly also to frequent touring of the members, and to increased contingent charges. The saving under *Commissioners* in the United Provinces (10) occurred in leave allowances, and in Bombay (13) chiefly under allowances and supplies and services, while the excess in Burma was due to privilege leave arrangements, and the deputation of a commissioner on special duty (26) partly counterbalanced by an excess under establishment due to vacancies. Under *Inspector General of Stamps, etc.*, the excess in the Central Provinces (27) was due to the special committee appointed in 1903-4, to report on the excise administration of the Central Provinces and Berar having continued till November 1904, instead of up to 31st March 1904 as anticipated.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*18.—General Administration—*concluded.*

143. The total charges for Account and Currency Offices are shown below :—

		Civil Account.	Currency Offices.	Total Civil Account and Currency Offices.	Office of A. G., P. W. Dept.	TOTAL.
Accounts	1903-4	23,63	3,21	26,84	2,44	29,28
Budget	1904-5	25,11	3,25	28,36	2,55	30,91
Revised		25,01	3,27	28,28	2,39	30,67
Accounts		25,16	3,24	28,40	2,36	30,76

144. The excess under Civil Account Offices was chiefly due to additional establishment sanctioned for the office of the Comptroller, India Treasuries, and the Examiner, Press Accounts, the local and house rent allowance sanctioned for the Deputy Comptroller General and the Comptroller, India Treasuries, respectively, and the permanent monthly travelling allowances sanctioned for the Deputy Auditors General and their establishments, partly counterbalanced by the absence of officers on leave and the deputation of Superintendents to act as Chief Superintendents. The saving in the office of the Accountant General, Public Works Department, was chiefly due to vacancies and absence of officers on leave, and to the deputation of accountants to State Railways. The excess under *Allowance to Presidency Banks* was due to the increase of interest on new loans.

145. The excess of £4,0 in England was due to a higher demand for stores than was expected (£6,5) and an increase of £2 in the Home Establishment charges, partly counterbalanced by a saving (£2,7) in the provision for the passage and outfit allowance of a new Viceroy and Governor General.

146. The expenditure in India showed a saving of 3,98 as compared with the Budget Estimate, but exceeded the actuals of the previous year by 9,28. The saving as compared with the Budget, was chiefly contributed to by Burma (1,40), Bengal (1,38), the United Provinces (1,09) and the Central Provinces (91). In Burma it was due to the provision for a new Judicial Service not having been utilised; in Bengal to the non-utilisation of the provision for increase of pay of the ministerial establishments of Civil and Sessions, and Criminal Courts; in the United Provinces to the partial utilisation only of the provision for revision of establishments of Civil Courts, and to savings in salaries, and in the Central Provinces to savings in salaries, and to the non-utilisation of a provision for process-serving establishment. The excess, as compared with the actuals of the previous year, was contributed to by all the provinces but chiefly by Burma (1,82), Bengal (2,14), and Bombay (1,79). It was due in Burma to the entertainment of additional myooks with their establishments, and to larger expenditure under diet and travelling allowances of witnesses, and under process-serving establishments; in Bengal to higher charges for salaries under *High Court* and for payments to pleaders; and in Bombay to higher payments on account of salaries of Civil and Sessions and Criminal Courts.

147. Under *High Courts, etc.*, the savings were generally due to vacancies and absence of officers; the excess in Bengal was due to too large a deduction for probable savings. Under *Law Officers* the variations, which are not large, except in Bengal (44), occurred mainly in the payments to pleaders in criminal and civil cases. Under *Civil and Sessions Courts* the savings in Burma (1,47) and the United Provinces (77) have been explained above. The decrease in the Central Provinces (7) and the North-West Frontier Province (13) occurred under salaries. In Bengal apart from the saving due to the lapse of the provision for increase of pay of the ministerial establishments, there was an excess which occurred under salaries of District and Sessions Judges (20), under salaries and establishments of munsiffs (30), under supplies and services (40), and to too large a deduction for probable savings (37), partly counterbalanced by savings under establishment of District and Sessions Judges (12), under salaries and establishment of Subordinate Judges (22), under contingencies (10), and under process-serving establishment (30). The excess in Bombay (48) was due chiefly to the revision of the salaries of Civilians, and the posting of a larger number to Judicial work. Under *Courts of Small Causes* the saving in the Punjab (14) was due to the employment of Extra Assistant Commissioners as Judges, their salaries being charged in moieties to *Criminal Courts* and 3—Land Revenue, and that in Bombay (15) to too large a deduction for probable savings. Under *Criminal Courts* the decrease in the Central Provinces (60) was due to savings under salaries (23), and process-serving establishment (17), and to the non-utilisation of the provision (20) for the Drug Districts; in Assam (25) it was mainly due to leave vacancies; in the United Provinces (18) to the absence of officers on furlough (45), and to the non-utilisation of the provision for increasing the establishment of readers in Oudh (15), partly counterbalanced by excesses mainly under diet of witnesses (18) and purchase of tents (12); in the Punjab (29) it was mainly due to the provision for the new Lyallpur District not having been fully utilised. The excess in India (13) was due to the higher rate of pay drawn by an Assistant Cantonment Magistrate, and to the leave allowance of the Cantonment Magistrate of Quetta having been paid in India; that in Burma (32) to salaries and establishment of Civil Myooks (27) provided for under *Civil and Sessions Courts* having been debited in moieties to this head and to 3—Land Revenue, and to heavy expenditure on diet and travelling allowances of witnesses (52), partly counterbalanced by savings due to vacancies, and the non-entertainment of the full Judicial establishment provided for (24), and to low expenditure on travelling

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*19A.—Law and Justice—Courts of Law—*concluded.*

allowances (12), and contingencies (13); and that in Bombay (17) to an over-estimate of the probable savings under salaries. Under *Other Courts of Justice* the excess in Bombay (10) occurred under Presidency Magistrates in the charges in connection with the Honorary Magistrates' Courts and changes in personnel. Under *Refunds* the excess in India (6) was on account of estates lapsed to Government, while that in Bombay (17) was due to the rectification of an erroneous credit to the corresponding revenue head. The excess of 21 (Imperial) in India requires to be sanctioned. The excesses of 30 (Provincial) in the Punjab and 88 (Provincial) in Bombay have been sanctioned.

148. The decrease in England (£3) was due to only one Judge having come out, while provision was made for the outfit allowance of two.

149. The expenditure in India fell short of the Budget Estimate and the actuals of the previous year by 7,42 and 98 respectively. Under *Jail Manufactures* the more important savings occurred in the Punjab (82), Bengal (41), Assam (27) and Berar (11), while there were excesses in Burma (14) and the United Provinces (21). The decrease in the Punjab was due to the non-utilisation of the provision of 60 for wool, spinning machinery in the Montgomery Jail, and to savings of 16 in the purchase of raw material; that in Bengal to the non-utilisation of the provision for freight charges, cost of machinery, etc., and to savings under establishment; that in Assam to small purchase of raw materials owing to the large quantity in stock at the close of the previous year, and to manufacturing work not being done to the extent anticipated; and that in Berar to less outlay on raw material. The excess in Burma was due to large purchase of raw materials, while that in the United Provinces was due to the high prices of cotton and raw munj. Under *Other Jail Charges* the saving was contributed to by all the Provinces. In India it occurred chiefly in dietary charges. A decrease in the number of prisoners and cheaper rates of food-grain account for the saving in the Central Provinces. In Berar it was due to a decrease in the Jail population and a revision of establishment. In Burma it was due to the Mandalay Jail having been in charge of the Civil Surgeon for a portion of the year, to vacancies in the Jail and medical establishments, and to less outlay on rations, hospital contingencies, clothing, bedding, and on conveyance of under-trial prisoners. In Assam the decrease occurred under clothing and bedding. In Bengal there was a decrease of 97 in dietary charges, partly counterbalanced by an increase of 18 under services and supplies. Low Jail population and the storage of grain while the market was cheap, account for 58 of the saving in the United Provinces; the remainder of the decrease was due to savings in salaries of Jail Superintendents (13), low hospital charges (22) owing to the Jail being practically free from serious outbreaks of epidemic diseases, less outlay for moving prisoners (14), and for bedding and clothing (9) owing to low Jail population, partly counterbalanced by an excess of 14 due to the maintenance of plague camps at many

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—continued.

19B.—Law and Justice—Jails—concluded.

jails. The Mung Rasul Jail not having been opened explains the saving in the Punjab. In the North-West Frontier Province the saving occurred in dietary charges. The non-utilisation of the provision for raising the status of certain jails mainly accounts for the saving in Madras, while that in Bombay was due to a decrease in the Jail population. The excess under *Convict Charges at Port Blair, Nicobars, etc.*, occurred chiefly under subsistence allowance to Eurasian and Native convicts (10), marine supplies (8) and passage money (34), partly counterbalanced by savings under Commissariat Supplies and Judicial and Police establishments. The excess of 8 (Imperial) in India has been sanctioned.

150. The saving in England was due to the absence of a demand for stores.

151. The Indian expenditure showed a saving of 3,49 as compared with the Budget Estimate, but exceeded the actuals of the previous year by 10,78. As compared with the Budget the saving occurred

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*20.—Police—*continued.*

chiefly in the United Provinces (4,32), and was mainly due to the transfer of the provision of 3,50, for the relief of Municipalities from Police charges, to 45—Civil Works, as the relief was given in the shape of grants-in-aid and was recorded under that head. As compared with the previous year the increase occurred in all the provinces except Berar, the N.-W. Frontier Province and Bombay, but chiefly in Burma (4,84), Bengal (1,53), Madras (1,42), and India (1,11). The increase in Burma was mainly due to the payment of personal allowances to District and Assistant District Superintendents of Police, to the employment of additional companies of Military Police in the Southern Shan States Battalion, and to heavy expenditure on arms and accoutrements, clothing and petty construction and repairs. In Bengal the excess occurred under *District Executive Force* mainly under supplies and services. In Madras the excess was due mainly to large additions to the force in consequence of the spread of plague in the Presidency, and to increased charges on account of clothing, uniforms, and arms and accoutrements; and in India it was chiefly due to the re-organisation of the Thagi and Dacoity Department.

152. Under *Presidency Police* the saving in Bengal (55) was mainly due to the provision of 50 for additional Police Force having remained unused. The saving in Madras (7) occurred under salaries and clothing and uniform of the Town and Suburban Police, partly counterbalanced by increased charges under Superintendence; and that in Bombay under establishment charges of the sanitary and Municipal Police, and under leave allowances of Police Officers. Under *Superintendence* the excess in the Central Provinces (5) was due to the payment of local allowance, with retrospective effect, to the Inspector General of Police, and to the deputation of an officer on special duty; in Bengal (19) it was due to large expenditure under supplies and services (4) and contingencies (15); in the Punjab (7) it was due to leave arrangements; and in Madras (14) to the payment of the furlough allowance of a Deputy Inspector-General of Police, the deputation of an officer on special duty, and to increased charges on account of travelling allowances and contingencies. Under *District Executive Force* the large excess in Bengal (2,62) was due to increased expenditure under salaries of officers (16), Police Force (17), Hospital Charges (9), allowances (59), and under supplies and services (2,71) partly counterbalanced by savings (1,24) under contingencies. There was a smaller excess in India (37) due to the transfer of Thagi and Dacoity charges in the Rajputana and Central India Agencies to this head from 1st September 1904 (33), and to charges on account of the Frontier Chowkidari in Hyderabad (11) for which there was no provision, partly counterbalanced by an increase of 8 in the contributions from Local Funds towards the cost of the Central India Agency Police, and in the recoveries from Native States on account of mooghia operations; in the Central Provinces, (15) due to increased expenditure under allowances (10) special duty Police (6), and under purchase of arms and accoutrements (39), partly counterbalanced by saving under salaries of officers (10), Police Force (13), petty construction and repairs (7) and under clothing (7); in the Punjab (47) chiefly under clothing, arms and accoutrements, and carriage of constabulary, and in Madras (71) due to too large a deduction in the Budget for probable savings (26), to increased expenditure under travelling (36), clothing and uniform (19) and under arms and accoutrements (69), partly counterbalanced by savings under Police Force (57), due to the disbandment of the greater portion of the Punitive Police Force in Tinnevely from 1st October 1904, and under petty construction and repairs (35), due to most of the Police works having been executed by the Public Works Department. Against these excesses there were savings in Berar (27) chiefly under salaries and pay of the force (17), and supplies and services (10); in Burma (35) due to less outlay on travelling allowances, clothing and arms and accoutrements, and to the adjustment by deduction from expenditure, of the contributions towards the cost of the police supplied to Municipalities and Cantonments, partly counterbalanced by increased expenditure on construction of Police cottages and rewards; in Assam (73) due mainly to savings under salaries (16) and over-estimate; in the United Provinces (12) due to savings under salaries (31), Police Force (52), establishment (7) and Police Training School (15) partly counterbalanced by increased expenditure under travelling allowances (34), supplies and services (26), contingencies (23), and general police (7); in the N. W. Frontier Province (68) chiefly due to the non-utilisation of the provision for re-organisations; and in Bombay (1,03) due to insufficient deduction in the Budget for probable savings, to low charges for clothing, and to the transfer of the provision for Ghāt paths to other heads. The excesses as compared with the actuals of the previous year in Burma (1,70), Bengal (2,01), Madras (1,20), and India (65) have been explained in the preceding paragraph. The increase of 96 in the United Provinces occurred mainly under salaries and pay of the force, while the decrease of 1,29 in Bombay was due to the high charges in 1903-04 for the supply of new rifles. Under *Municipal and Cantonment Police* the saving in Burma (6) was due to the amalgamation of certain Municipal Police with the District Police; in the Punjab (11) it was due to small expenditure on clothing and travelling allowances; and in the N. W. Frontier Province (5) it was due to the provision for re-organisation not having been used. Under *Government Railway Police* the excess in the Punjab (9) occurred in the charges of the North-Western Railway (5), and the Rewari-Ferozepore (4) section of the Rajputana-Malwa Railway; in Madras (18) it was due to expenditure for fitting the inspection carriage with electric lights and fans, and to increased travelling charges; while in Bombay (5) it occurred in the charges of the Police of the Rajputana-Malwa, and Southern Mahratha Railways. These excesses were partly

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*20.—Police—*concluded.*

counterbalanced by a saving of 12 in Bengal which was spread over several heads, and of 14 in the United Provinces chiefly in the charges of the Oudh and Rohilkhand Railway. Under *Village Police* the saving in Berar (12) was the result of the full strength of the force not being on duty. In Bengal the saving (25) occurred chiefly in the charges of the District Chowkidari Reward Fund; in the United Provinces (31) it occurred under Chowkidari; while in Bombay (5) it was due to the Police Establishment in Sind not having been employed to the full sanctioned strength. Under *Special Police* the excess in Burma was due to the recruitment for the seven extra companies of the Military Police for the Southern Shan States having commenced with the commencement of the year, instead of later, as anticipated in the Budget, and to heavy expenditure on petty construction and repairs, and purchase and carriage of supplies, partly counterbalanced by savings under clothing, arms and accoutrements, and hospital charges. There was also an excess of 15 in the Punjab, chiefly in the charges of the Dera Ghazi Khan Border Military Police. These excesses were largely reduced by savings in Assam (41) chiefly due to low charges under Police Force (14), clothing (10) and purchase of arms, etc., (16); in Bengal (21) due to low expenditure under Police Force (4) and supplies and services (16); and in the N.-W. Frontier Province (41) due partly to the provision (31) for increase in the pay of the Border Military Police not having been used, and partly to low contingent charges. The excess as compared with the previous year occurred chiefly in Burma and has been explained in the preceding paragraph. Under *Cattle Pounds* the saving in the United Provinces (30) was due to a change in the system of adjustment under which receipts from cattle pounds are credited to District Boards after meeting the cost of feed separately provided for under this head. Under *Other Charges* the saving in Berar (11) was the result of the transfer to India of the cost of the Najeeb Establishment in Hyderabad. The excess in Bengal (6) and United Provinces (4) occurred under refunds. The excess of 37 (Imperial) and 4 (Provincial) in India require to be sanctioned, while those of 19 (Provincial) in the Central Provinces, 1,18 (Provincial) in Burma, 1,62 (Provincial) in Bengal, 84 (Provincial) in the Punjab and 84 (Provincial) in Madras have been sanctioned.

153. The Indian expenditure under this head exceeded the Budget Estimate and the actuals of the previous year by 3,33 and 8,64 respectively. The excess as compared with the Budget occurred chiefly in India (4,76) under *Marine Stores and Coal, etc.*, due to extensive alterations and repairs to vessels of the Royal Navy and the Royal Indian Marine, and to heavy purchases of coal due to the employment of Royal Indian Marine vessels in connection with the Somaliland Field Force and on Colonial reliefs, partly counterbalanced by savings under *Other Charges* (3,27) due chiefly to reduced expenditure on hire of transport for the Aden Boundary Commission, and on the supply of coal to His Majesty's Ships of War in Indian Seas. As compared with the previous year, the excess occurred mainly under *Other Charges* in Bengal (7,50) due chiefly to the cost of construction of a new steamer, and in Burma (1,57) due to heavy outlay on the construction of launches.

154. As compared with the Budget, the increase under *Dockyards* in India (39) was due to heavy expenditure on works for the Royal Indian Marine and other Departments, counterbalanced by less expenditure than was expected on account of Somaliland and the Aden Boundary Commission. Under *Salaries and Allowances, etc.*, the excess in India (18) was due to the employment of Royal Indian Marine vessels on Imperial Service throughout the year instead of for a part of it as provided for, and to the purchase at Aden of a large quantity of water at high rates, partly counterbalanced by savings due to absence of a large number of officers on leave out of India and lower prices of provisions. The saving in Burma (5) was due to the partial use of the provision for upkeep of new launches. Under *Marine Stores and Coal for Building, etc.*, the excess in India has been explained above. In Burma (65) and Assam (13) the excess was due to large purchase of stores and to repairs to vessels not anticipated in the Budget. The saving in Bengal (36) occurred chiefly under Building, Repair and Outfit of Ships. Under *Pilotage, Pilot Establishment and Vessels* the excess in Bengal (84) was in the Allowances to Free List Pilots (96), partly counterbalanced by a saving under Pilotage Allowance to licensed Pilots. Under *Other Charges* the saving in India has been explained above. That in Burma (59) was due to the partial utilisation of the provision for construction of new launches, to absence of European light-keepers on long leave, to replacement of some of them by natives on lower pay, to revision of light-vessel establishment and to reduced outlay on repairs and stores. The excess in Bengal (70) was chiefly due to additional expenditure in connection with the new steamer *Fraser*, and an excess of 13 under Refunds. The excess of 2,05 (Imperial) in India requires to be sanctioned, while the excesses of 5 (Provincial) in Burma, 15 (Provincial) in Assam, 1,05 (Provincial) in Bengal and 5 (Provincial) in Bombay have been sanctioned.

155. The excess in England (£12,3) was due to allowances to Marine Officers whilst under instruction (£1,5), to large purchase of marine stores (£11,9) and to the construction of R. I. M. S. *Dufferin* (£3,9), counterbalanced by a decrease (£5,0) under coal.

156. The Indian expenditure fell short of the Budget Estimate by 12,76, but exceeded the actuals of the previous year by 16,62. The saving as compared with the Budget occurred chiefly under *Government Schools* (7,10), and *Grants-in-aid and Payments by Results* (4,53), and was mainly due to the entire or partial lapses of provisions chiefly in India, the Central Provinces, the United Provinces, Madras and Bombay. As compared with the actuals of the previous year, the increase was contributed to by all the provinces, and was due mainly to additional appointments, increases of salary, and large grants for buildings and furniture. The increase in Burma was enhanced by the transfer to Government of the Rangoon College and Law Classes, and the opening of new Schools; in Bengal by a special payment to the Calcutta University.

157. Under *Direction* the excess in India (6) was due to increased expenditure on purchase and repair of furniture, and temporary establishment; in Assam (7) mainly to the Director having received promotion with retrospective effect; and in Burma (5) and the United Provinces (3) to privilege leave arrangements. These excesses were partly counterbalanced by savings in the Central Provinces (4) due to the Director drawing a lower pay than that provided for, and in Bombay (7) to the appointment of Personal Assistant to the Director having been held by an officer in addition to his other duties.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*22.—Education—*continued.*

Under *Inspection* the saving in the Central Provinces (10) was due to two appointments not having been filled up from the beginning of the year; in Burma (18) and Bengal (40) to absence of officers on leave and to vacancies, partly also to additional establishment provided for in the former not having been entertained, and to low expenditure under allowances in the latter; in the United Provinces (10) to petty savings in District Boards' expenditure; in the Punjab (22) to the proposed measures for the advance of education not having been fully carried out; in Madras (49) to the provision for the revision in the scale of Sub-Assistant having been only partially utilised; and in Bombay (19) to a delay in the transfer of the Bombay City Inspection charges to Government and to the diversion of the provision for new appointments to other purposes. Under *University* the charge in Bengal (2,00) represents a special payment to the Calcutta University, sanctioned after the Budget was framed, and that in Madras (5) represents expenditure on travelling allowances of fellows of the University to attend the meetings of the Senate, and expenses in connection with the inspection of colleges by the University Commission, not provided for. Those charges also account for the excess over the actuals of the previous year. Under *Government Colleges* the saving in the Central Provinces (14) was due to the proposal for a Law College at Nagpur not having been sanctioned; in Burma (25) to the transfer to Government of the Rangoon College and Law Classes attached to it from the 16th November 1904 instead of from the beginning of the year; in Bengal (35) to the transfer to the Public Works Department of 16 out of the provision of 40 for extension of the Ravenshaw College, and the non-utilisation of the balance, as also of 6 for furniture and apparatus for professional colleges, and to a saving of 20 in the Civil Engineering College, Howrah, partly counterbalanced by high expenditure on furniture and apparatus for Government Colleges, General (40), and on contingencies in Art Colleges; in the United Provinces (29) to certain new appointments for the Civil Engineering College, Roorkee, having remained vacant (12), to machinery ordered from England not having been received (12), and to savings under establishment (6); and in Madras (7) to vacancies and furlough. The excess in India (38) was due to the charges on account of the Mayo College Staff having been adjusted under this head instead of under *Grants-in-aid* where the provision was made, and that in the Punjab (21) to the absence of provision for the new Principal, Aitchison College, and his assistants (12) and high expenditure on furniture for Government Colleges. Under *Government Schools* the saving in India (8) was due to the sanctioned strength of teachers for the primary schools in Coorg not having been fully entertained; in the Central Provinces (55) to low expenditure on buildings (12), Stipends in Normal Schools (23) and in Reformatory Schools (4) and to the provision for an Agricultural Professor not having been used; in Assam (14) to the transfer to the next head of 11 for Local Upper Primary Schools; in Bengal (1,18) to the provisions for a Training College for teachers, for raising the Dacca Survey Schools to the status of the Behar School of Engineering, for starting Training Institutes for Primary School Teachers, and several small provisions not having been fully utilised, and to low expenditure under construction and repairs, partly counterbalanced by high expenditure on account of salaries and contingencies of the Normal Schools, supplies and services of Engineering and surveying schools, and for furniture and apparatus; in the United Provinces (52) to the partial utilisation of the provision for Local Training and Model Schools, and to low expenditure in schools managed by the District Boards; in the Punjab (1,70) to the scheme for the advancement of education not having been fully carried out; in the North-West Frontier Province (8) to small payments in support of Local Schools; in Madras (29) to the partial utilisation of the provisions for improving existing Government Girls' Schools and for stipends to student-teachers in Training Schools, and to the absence on leave of the officer on special duty for the development of Technical Education, partly counterbalanced by large payments to teachers in Local Primary Schools on account of the result portion of their pay; and in Bombay (2,58), where the largest saving occurred, it was due mainly to the provisions for additional establishments for Local Board Schools and for Training Colleges having been utilised to a very limited extent. The only excess under this head occurred in Burma (3) and was due to the transfer to it of the pay and allowances of itinerant teachers provided for under the next head, to additional expenditure on District, Secondary and Training Schools, and to large payments of contributions in support of Municipal or Local Schools. The excess, as compared with the previous year, is mainly due to the causes stated in the preceding paragraph. Under *Grants-in-aid and Payments by Results* the largest saving, which occurred in India (5,38), was due to the provision of 5,00 for aid to other provinces not having been used, and to the charges for the Mayo College staff having been adjusted under *Government Colleges* as stated above. The saving in the Central Provinces (27) was due to the lapse of certain provision for increased salaries and for building purposes (46), partly counterbalanced by increased expenditure for furniture and buildings for Private Schools (18); in Berar (42) to smaller grants than were anticipated; in Burma (57) to the provision for additional grants not having been fully utilised; in the United Provinces (45) to the special grants (1,40) for European Schools provided for not having been sanctioned, largely counterbalanced by special building, furniture and apparatus grants; in Madras (73) to a decrease in payments by results (50) and building advances (32) in the Provincial Section, partly counterbalanced by an increase in payments by result in the Local Section; and in Bombay (7) to transfer of a portion of the provision to Local Funds. Against these savings

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*22.—Education—*concluded.*

there was an excess of 1,16 in Assam due to the grant of 11 to Local Upper Primary Schools as stated above, and to special grants for buildings (79) and furniture (26), chiefly to Middle and Primary Schools, given through Local Boards; of 1,09 in Bengal due to increased expenditure in grants to Local Colleges and Schools (59), in grants for buildings (30), furniture and apparatus (8), in payments by results (7), and grants to Primary Schools (34), partly counterbalanced by savings in the grants to Schools for European boys and girls (38), and of 1,14 in the Punjab due to additional grants for buildings, etc., sanctioned by the Local Government. Under *Scholarships* the saving of 1,29 was contributed by all the provinces except India, where the charges agreed with the Budget. Under *Other Charges* the saving in Berar (5) was due to low expenditure on publication and purchase of books; in the United Provinces (21) mainly to the gradual abolition of the Book Depot in the Province of Agra. In Burma the excess (5) was the result of an additional contribution to the Educational Syndicate in support of the Rangoon College up to the 15th November 1904; and the increase in Bombay (26) to the appointment of a committee for the revision of the Vernacular Text-Books (33), partly counterbalanced by low expenditure on the School Final Examination (7) owing to the small number of candidates. The excesses of 57 (Provincial) in Berar, 36 (Provincial) in Assam, 83 (Provincial) in Bengal, and 1 (Provincial) in the Punjab have been sanctioned.

158. The increase in England £2,3 was spread over all the heads.

159. The Indian expenditure fell short of the Budget by 36, but exceeded the actuals of the preceding year by 1,18. The fluctuations are small and call for no special remarks. The variations are due mainly to the number of Senior or Junior Chaplains on duty or on leave and to vacancies. The excess of 14 (Imperial) in the Central Provinces has been sanctioned, while the excesses of 21 (Imperial) in India and 29 (Imperial) in the Punjab require to be sanctioned.

160. The expenditure in India fell short of the Budget, Estimate by 8,14, but exceeded the actuals of the previous year by 7,24. As compared with the Budget, the saving occurred chiefly under *Grants for Medical Purposes* (4,11), *Medical Establishment* (2,67), and *Vaccine Establishments and Sanitary Commissioners* (2,24). The excess as compared with the actuals of the previous year occurred mainly under the two last-named heads and *Government Hospitals and Dispensaries*, and was due chiefly to the increased emoluments of the Indian Medical Service officers, to increased expenditure on plague preventive measures in Burma and Madras, and to larger grants to Hospitals and Dispensaries in Burma and Bengal. The saving as compared with Budget under *Grants for Medical Purposes* was due to reduced expenditure on plague measures in all the provinces except Burma and Madras, where increased expenditure on this account resulted in excesses of 39 and 1,56, respectively. The saving in the United Provinces on account of plague was enhanced by the transfer of 1,00 to 45.—Civil Works for cleansing towns and villages through District Boards, while in Bombay the saving was reduced by 21 owing to increase in the staff of the Research Laboratory. Under *Medical Establishments* the saving was mainly due to the provision for an increase to the emoluments of Indian Medical Officers not having been fully utilised. In the Central Provinces the saving on this account was enhanced by the non-utilisation of the provision (6) for the Drug District and by the absence of officers. In Burma there were also savings due to the provisions for additional Civil Surgeoncies and for local allowances to Uncovenanted Medical Officers and Assistant Surgeons not having been required, partly counterbalanced by payment of local allowances to Indian Medical Officers for which no provision was made. The excess in India (28) was chiefly due to the employment of an officer on special duty in the Pasteur Institute (4), the appointment of a Secretary to the Director-General (7), the grant of privilege leave to the Director-General (8), and to the higher rate of pay drawn

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*24.—Medical—*concluded.*

by the Civil Surgeon, Coorg (4); and the increase in Assam (8) and Madras (36) to the increased salaries of Indian Medical Officers, while in the latter there was also an increase due to an over-estimate of probable savings. Under *Vaccine Establishments and Sanitary Commissioner* the saving in Burma (11) was due to the full strength of additional Vaccinators provided for not having been entertained and to the proposed reorganisation of the Vaccine Depot Establishment at Meiktila not having been carried out; in the United Provinces (15) to the partial utilisation of the grant for the Bovine Lymph Depot (3), small grants for village sanitary improvements (7), and savings under vaccination establishment (4); in Madras (2,16) the large saving was due to an over-estimate in the local section, partly counterbalanced by high expenditure incurred by the King Institute of Preventive Medicine on the purchase and feed of calves for the manufacture of vaccine lymph (17), and by increased expenditure on travelling allowances and contingencies of the Deputy Inspectors of Vaccination (18); while in Bombay (22) it was due to the increase in the salaries of the Indian Medical Service and of the staff under the Health Officer of the Port Bombay. Under *Medical Schools and Colleges* the saving in Bengal (13) occurred under establishment (5), supplies and services (6), and contingencies (2) of Medical Schools; while that in Bombay (8) was in the contingent charges of the Grant Medical College. The charge in India represents the expenditure on account of Col. Bomford's deputation in connection with an enquiry into the teaching in Medical Colleges and Schools. Under *Lunatic Asylums* the saving in Burma (6) was due to the provision for a whole-time commissioned officer having been only partially used, and that for the reorganisation of the Asylum establishment not having been required; and that in the United Provinces (13) to small outlay on diet (5) and to the non-utilisation of the provision for the part cost of a Central Lunatic Asylum at Agra. The variations in the other provinces occurred mainly in diet and contingent charges. Under *Other Charges* in Burma the provision made for a whole-time Chemical Examiner and for the reorganisation of his establishment was not utilised, while in the United Provinces the absence of the Chemical Examiner on leave resulted in a saving. In Bombay payments to officers of other provinces led to an excess. Under *Government Hospitals and Dispensaries* the excess in the Central Provinces (39) was mainly due to grants to Dispensary Funds for building and improvement (54), counterbalanced by savings in pay of Hospital Assistant (6), low expenditure in Leper Asylums (6) and the non-utilisation of the provision for Drug District (2). In Assam the grant to Dispensaries (9) and for Medical Stores (4) were larger than was expected, and the cost of maintenance (3) of the Sylhet Leper Asylum was transferred to this head. In Bengal there was an increase of 1,62 in the grants to Hospitals and Dispensaries, partly counterbalanced by savings under supplies and services and contingencies of the General Hospital (25) and Campbell Hospital (4), under salaries in the latter (3), under salaries and allowances of Mofussil Hospitals and Dispensaries (16), and under establishment of District Board Hospitals and Dispensaries (19). In the Punjab there was a special grant to Hospitals and Dispensaries resulting in an excess of (57). These excesses were partly counterbalanced by savings in Burma (55) arising from the number of Assistant Surgeons and Hospital Assistants having been below the sanctioned strength and from the non-utilisation of the provision for new hospitals; and in Madras (18) resulting from low expenditure in the Local section chiefly under contingencies (39), diet of patients (12) and grants to private and Mission Dispensaries (10), partly counterbalanced by increased expenditure on account of electric installation for lighting and punkah-pulling in the General Hospital (21), and an over-estimate of probable savings (18). The increase of expenditure in England (£2,2) was mainly due to the payment of £1,2 to the Committee of Plague Investigation in India, of a grant of £5 towards the Tropical Disease Research Fund, and to payments to medical officers on study leave. Out of the excess of 29 (Imperial) in India 8 have been sanctioned and 21 await sanction, while the excess of 21 (Provincial) in Assam has been sanctioned.

161. The Indian expenditure fell short of the Budget Estimate by 31,49, but exceeded the actuals of the previous year by 13,32. The decrease as compared with the Budget occurred chiefly in India, and was due to a saving of 31,14 under *Political Subsidies* owing to the low drawings of His Highness the Amir of Afghanistan. There was a decrease of 4,93 under *Other Charges* chiefly in the North-West Frontier Province and Bombay, due in the former to savings (1,95) in the grant for the Indo-Afghan Boundary Commission and (1,65) in the Waziristan Militia charges, and in the latter to the small expenditure from the provision for the Aden Boundary Commission, which had nearly completed its work in the previous year; this saving was, however, more than covered by an excess in India of 4,59 under *Entertainment of Envoys and Chiefs* due to Sardar Inayat Ullah Khan's visit to India. As compared with the previous year, the excess occurred mainly in India under *Political Subsidies* in the subsidy to His Highness the Amir of Afghanistan (5,07), under *Entertainment of Envoys and Chiefs* (4,43) due to the cause stated above, and under *Other Charges* (2,55) chiefly in special political expenditure.

162. Under *Political Agents* the excess in India (86) was due mainly to high charges for travelling, purchase and repair of furniture, and for telegrams; that in Bengal (12) to the temporary appointment of an officer on higher pay than was provided for. These excesses were partly counterbalanced by savings in Burma (23) due to vacancies and absence of officers, and to the provision for a new hospital not having been used; in the United Provinces (18) and the Punjab (15) to vacancies; and in Bombay (24) to the recovery of arrear contributions towards establishments in Kathiawar, and savings in salaries, partly counterbalanced by high telegram charges at Aden. Under *Charges on the North-West Frontier* the excess in India (1,07) due mainly to the revision of the establishment of the Levies and the Zhob Levy Corps, and the establishment of the Mekran Levy Corps during the year, was partially covered by the saving in the North-West Frontier Province (42) in the charges of the Khyber Rifles and in allowances to Khyber tribes. The saving under *Political Subsidies* as compared with the Budget and the excess over the actuals of the previous year have been explained above. Under *Entertainment of Envoys and Chiefs* the excess in India has been explained above. The excess in Bengal (5) was due to the supply of rations to the envoy of the Bhutan Government who came to Buxa to receive the annual subsidy; and that in Bombay (4) to the entertainment of certain chiefs who came to visit the Resident at Aden. Under *Durbar Presents and Allowances to Vakeels* the saving in India (22) occurred chiefly in the grants at the disposal of the Foreign Department (18), and the Agent to the Governor General, Baluchistan (4); in Bengal (9) the estimate proved too high; while in Bombay (10) it was attributed to the absence of any large Durbars. Deaths and desertions mainly account for the decrease in Punjab under *Refugees and State Prisoners*. Under *Other Charges* the savings in the North-West Frontier Province and Bombay have been explained above. The saving in Madras (9) was due to the lapse of the provision

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*25.—Political—*concluded.*

for the demarcation of the boundary between Mysore and South Canara. The excess in India (81) occurred under special Political expenditure in the charges of the Gartok Expedition (15), the Kabul Mission (1,79), Mr. Dobb's deputation to the Herat Border (57), the Commercial Mission to Persia (21), and the payment of compensation for enhanced duties levied under the new Persian Tariff (28), partly counterbalanced by a saving in the provision for the Seistan Arbitration Commission (2,20) and in the Secret Service grant of the Viceroy (24). The excess in Burma (11) was due to increased expenditure in connection with the erection of boundary pillars on the demarcated portion of the Burma-China boundary; and in Bengal (22) it was due to the deputation of an officer to Kabul and another on special duty for boundary work in Bhutan, and to the payment of a reward to Rai Sarat Chandra Das Bahadur for completing the publication of two Thibetan works. Out of the excess of 27 (Imperial) in Bengal 20 have been sanctioned and 7 await sanction, while the excess of 1 (Provincial) in Madras has been sanctioned.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

26.—Scientific and other Minor Departments—*continued.*

163. The Indian expenditure fell short of the Budget Estimate and the actuals of the previous year by 1,87 and 1,98 respectively. As compared with the Budget the saving occurred mainly in India under *Geological and Other Surveys* owing to the lapse of the provision for diamond drilling (1,00) and to absence of officers on leave and vacancies (24), and under *Veterinary and Stallion Charges* (46) owing to vacancies. As compared with the actuals of the previous year the decrease also occurred in India chiefly under *Other Scientific Departments* owing to the large grant in 1903-04 for structural improvement and re-arrangement of exhibits in the Indian Museum.

164. Under *Survey of India* there was a saving of 8,13 in the charges of Survey Parties, and of 39 under Controlling and Administrative Staff and Head Quarters' Offices: but these savings were more than covered by an excess of 8,67 due to smaller recoveries than were anticipated from other Governments. Under *Geological and other Surveys* the saving in India has been explained in the preceding paragraph; that in Burma (5) occurred in the charges of the Archæological Department. Under *Meteorological Department* the saving (42) occurred mainly in Salaries (18) due to vacancies, and in telegram charges. Under *Other Scientific Departments* the excess in the United Provinces (6) was due to the purchase of specimens and coins for the Museum; that in the Punjab (14) was the result of a special grant to the Lahore Central Museum; while that in Madras (22) was chiefly due to the purchase of certain coins and pre-historic collections (34), and to the return of the Superintendent of the Museum from leave out of India, partly counterbalanced by a saving in salaries under Bacteriology (10) due to the appointment of Provincial Health Officer and Superintendent, King Institute, having been held by an officer of the Indian Medical Service on a charge allowance. These excesses were partly counterbalanced by savings in India (5) and Burma (18), the latter being chiefly due to the lapse of the provisions for exploration of the Lashio coal fields (5) and for Bacteriology (11). In India there was a saving of 6 under Inspector of Mines, and of 4 under Reporter on Economic Products due to absence of officers on leave, and of 20 under Bacteriology due to small charges for purchase and keep of cattle (11), and to the absence on leave of the Bacteriologist, and deputation of the Assistant Bacteriologist (8), partly counterbalanced by special grants to the Asiatic Society of Bengal for Arabian, Persian and Jain Manuscripts (13) and an excess in the grant for maintenance to the Central Museum (13). The high charges of the previous year were due to the special grant to the Indian Museum. Under *Veterinary and Stallion Charges* the saving in India (46) was due mainly to certain appointments having remained vacant throughout the year (45), and to low expenditure on travelling (6), and on the keep of cattle (5), partly counterbalanced by increased outlay on the purchase of horses and cattle (12). The non-entertainment of a third Veterinary Officer, and the employment of a smaller number of Veterinary Assistants than expected, coupled with lapse of the provision (10) for the purchase of colts for stud purposes explains the saving of (34) in Burma. In Assam the provision for a provincial Veterinary establishment was not used. In Bengal the decrease (22) was mainly due to the provision (9) for the introduction of the Glanders and Farey Act into Calcutta and suburbs not having been utilized, and to savings under establishment (3), and supplies and services and contingencies (8), while in the Punjab (30) it was due to the abolition of an appointment and to grant of leave (15), and various small savings in the provincial section. Under *Other Charges* the excess in India (54) was due to increased grants-in-aid for agricultural experiments to Provincial Governments (37), to charges in connection with irrigation at the Agricultural farm at Pusa (15), for which there was no provision, to increased expenditure on agricultural farm experiments (14), and to charges in connection with the Indian Art Exhibition, Delhi (7), partly counterbalanced by a saving (17) due to the non-entertainment of any Agricultural Bacteriologist establishment during the year; in Bengal (61) it was due to heavy expenditure under supplies and services (38) and contingencies (5) of the Botanical Gardens and under agricultural experiments (22) partly counterbalanced by reduced expenditure on other experiments; in the United Provinces (38) to large expenditure on laying out parks and gardens and in Bombay (7) to increased expenditure in connection with the improvement of the Botanical Garden at Ganesh Khind, partly counterbalanced by saving in the grant for experimental cultivation. These excesses were partly counterbalanced by savings in Burma (9) due to low expenditure on experimental cultivation; and in Madras (12) due to lapses of provisions for Experimental Farms, and for an Agricultural Chemist and his establishment (34), partly counterbalanced by increased expenditure on manufacture and distribution of Cinchona and propagation of Cinchona plantations (14), and by a grant of 10 for improvement of the Zoological collection in the Madras Peoples' Park. Under *Labour and Emigration* the Excess in the Central Provinces (15) was due to the contribution (22) from the balance of the Central Provinces Fund, to meet the deficit in the combined fund of Assam and Bengal, reduced by low travelling charges of the Superintendent of Emigration for the Central Provinces and Bengal; and in Assam (9) it was due to the unfavourable result of the transactions of the Inland Labour Transport Fund. Under *Statistics* the saving in India (22) was mainly due to an overestimate (18), but partly also to a retirement, in the establishment of the Bureau of Commercial Intelligence; in Burma (17) to an absence on deputation and a vacancy; in Bengal (28) and the Punjab (28) to overestimate; and in Bombay (15) to an overestimate. Under *Miscellaneous* the excess in India

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—concluded.**26.—Scientific and other Minor Departments—concluded.**

(17) was due to increased expenditure in the purchase of books, and in contingencies of the Imperial Library (7), to the absence of the Inspector of explosives on combined leave (4), and to expenditure connected with the preparation of Dr. Wilson's work on old Fort William, and of the Indian Record Series; in the United Provinces (21) the Punjab (10) and Bombay (9) to the creation of the appointment of Registrar of Co-operative Credit Societies (13), and in the first also partly to the grant of 8 for the Allahabad Public Library. The excesses of 1 (Imperial) and 12 (Provincial) in the Central Provinces, 2 (Provincial) in Berar, 8 (Provincial) in Assam, 12 (Provincial) in Bengal, 65 (Provincial) in the United Provinces, and 5 (Provincial) in the Punjab have been sanctioned, while the excess of 1 (Imperial) in the North-West Frontier Province requires to be sanctioned.

165. The saving in England (£5,4) was due to the cost of stallions provided for under this head having been charged to Army Effective (£6,5) and to low payment for objects of a literary and scientific character (£1,2) partly counterbalanced by increased charges for stores.

Section E.—MISCELLANEOUS.

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
R	RECEIPTS:—	R	R	R
90,41	India (Rupee figures)	86,69	91,00	92,17
£		£	£	£
602,7	Equivalent in Sterling	577,9	606,7	614,5
91,3	England	78,2	77,9	75,6
694,0	TOTAL	656,1	684,6	690,1

166. The total receipts in this section showed an improvement of £34,0 or R5,10 over the Budget Estimate, but fell short of the actuals of the previous year by £3,9 or R59. As compared with the Budget £7,1 or R1,06 of the increase occurred under Stationery and Printing chiefly in receipts from sale of Gazettes and other Publications, and in Other Press Receipts; £24,2 or R3,63 under Exchange, and £8,5 or R1,28 under Miscellaneous, chiefly in Premium on Bills in India, Madras and Bombay, in Unclaimed Deposits in the United Provinces and Madras, in Government Audit Fees in the United Provinces and in the Punjab, and in Rents in Burma and Madras. These excesses were partly counterbalanced by a decrease of £5,8 or R87 under Receipts in aid of Superannuation, Retiree and Compassionate Allowances, in Contributions for Pensions and Gratuities, caused chiefly by the return of officers from Foreign Service, by a change in the classification in Madras, and by falling off in the receipts in England on account of the Military Funds.

167. The falling off as compared with the previous year was composed of a decrease of £8,3 or R1,24 under Receipts in aid of Superannuation Allowances due to the causes mentioned above, and of £31,7 or R4,76 under Miscellaneous due to low receipts under Unclaimed Deposits in Bengal, and under Contributions in Bombay, owing to certain special receipts in 1903-04, partly counterbalanced by an increase of £35,7 or R5,35 under Exchange.

Section E.—MISCELLANEOUS—continued.

XXIII.—Stationery and Printing—concluded.

170. The total receipts exceeded the Budget Estimate and the actuals of the previous year by 1,06 and 7, respectively. The improvement was spread over all the heads, but most noticeably under *Other Press Receipts* (77). The increase under *Receipts from Sale of Stationery* occurred chiefly in India (68) and Madras (11) counterbalanced by a falling off in Bengal (49), the United Provinces (10) and the Punjab (14). The transfer of the receipts of the Office of the Controller of Stationery from the Bengal to the India Books, from 1st July 1904, accounts for the increase in India and the decrease in Bengal. The increase in Madras was due to the supply of stationery to the Engineer-in-Chief, Coonoor-Ootacamund Railway, and to certain estates. The decrease in the United Provinces was the result of small receipts from the sale of stationery supplied to State railways, while that in the Punjab was due to certain payments due in 1904-1905 from the North-Western Railway having been adjusted in 1903-1904. Under *Sale of Gazettees and Other Publications*, the excess in India (7) was due to sale-proceeds of special publications. In the other provinces the variations are small and call for no remarks. Under *Other Press Receipts*, the increase in India (27) occurred in the receipts of the Central Press; that in the Central Provinces (6) was due to a greater amount of printing work done at Jail Presses; and that in the United Provinces (14) to improved receipts from the Civil Engineering College Press. In Madras the excess (7) was due to more printing work done for municipalities and estates; and that in Bombay (12) to the recovery of a larger sum than usual from the University for work done for it.

171. The actuals under this head vary with the average rate of exchange, and variations in the sterling transactions of the Railways.

172. The Budget as usual was calculated at an average rate of 16d. the rupee, but the actual average rate proved to be somewhat better, viz., 16.045d. This accounted for the net credit of 7.91 under *Net Expenditure in England*. Under *Guaranteed Companies*, the Budget provided for a total credit of 8.34, under Exchange composed of 59 on account of withdrawals in India (£14.4) on capital account of the Madras Railway, and of 7.75 for recoveries on account of stores used on Revenue Account. The capital

Section E.—MISCELLANEOUS—continued.

XXIV.—Exchange—concluded.

transaction in India of that Railway, however, resulted in a receipt of £117,6, due partly to the capital receipts having been larger than were anticipated, and partly to the postponement of certain works. As a consequence, the net debit under Exchange amounted to 4,72. On the other hand, the credit under Revenue stores was greater by 1,31, due to larger issue of stores from Capital to Revenue Account. Under *Subsidised Companies*, the decrease under Southern Mahratta Railway was due to less payment in England for stores, and to smaller issue of stores to Revenue in India than provided for in Budget. The variations from Budget under other Railways do not require any special notice. The credits or debits to exchange on the items under the head *Remittance Accounts* represent chiefly exchange at the average rate of the year on sterling transactions.

173. The receipts in India exceeded the Budget Estimate by 1,25, but fell short of the actuals of the previous year by 3,20. As compared with the Budget the increases under *Premium on Bills* (1,08), *Unclaimed Deposits* (43), *Government Audit Fees* (61), *Rents* (1,44) and *Miscellaneous Fees, Fines and Forfeitures*

Section E.—MISCELLANEOUS—continued.

XXV.—Miscellaneous—concluded.

(25), were partly counterbalanced by short receipts under *Contributions* (54), *Extraordinary Items* (53) and *Other Items* (1,49). The large increase under *Premium on Bills* was due to the demands in India, Madras and Bombay having exceeded the budget anticipations. Receipts under *Unclaimed Deposits* are of a fluctuating character and vary with the amount of lapses under Deposits. Under *Government Audit Fees*, the excess in the United Provinces (18) was due to the Audit of a large number of Court of Wards' and Municipal Accounts. The actuals in Punjab represent recoveries which were provided for under *Contributions*. The decrease under *Contributions* in Berar (13) was caused by the adjustment of contributions towards cost of Controlling and Treasury Account Officers, Hyderabad, in the books of the Comptroller, India Treasuries; that in Madras (18) to the non-realisation of the balance of an endowment. The increase under *Rents* was chiefly due to the opening of markets in the Central Provinces (11) and Burma (30), and recovery of rents from nazul lands in the United Provinces (8) and from *Choultries* in Madras (92). The increase under *Miscellaneous Fees, Fines and Forfeitures* was due in India chiefly to fees from patents, and in Madras to an under-estimate. The actuals in the United Provinces under *Extraordinary Items* represent conscience money credited to Government through the Venerable the Archdeacon of Lucknow, and an adjustment of the commutation value of *Wasika* pensions. In the North-West Frontier Province the transfer of certain receipts of the Kurram and Tochi Valleys, which were formerly credited to this head, to the ordinary Revenue heads, explains the absence of receipts. Under *Other Items* the actual receipts fell short of the Budget Estimates by 1,49. The decrease in Burma was due to an over-estimate, and that in Bombay to the postponement of a recovery from the Barsi Light Railway of 3,12 on account of earth-work, partly counterbalanced by recoveries on account of the supply of broken stone ballast out of famine stock to the Great Indian Peninsula Railway, and sale proceeds of cloth from Weaver's Fund. As compared with the actuals of the previous year, the decrease was caused by short receipts of 2,63 under *Unclaimed Deposits* in Bengal and of 2,21 under *Contributions* in Bombay, partly counterbalanced by an increase of 1,25 under *Other Items* in Burma owing to large sale of elephants.

Section E.—MISCELLANEOUS.

1903-4. Accounts. R		Budget. R	1904-5. Revised. R	Accounts. R

4,349,6	TOTAL	4,179,5	4,272,7	4,264,8

174. The total expenditure in this section exceeded the Budget Estimate by £85,3 or R12,80, but fell short of the actuals of the previous year by £84,8 or R12,72. As compared with the Budget there was an excess of £16,3 or R2,45 under Superannuation Allowances and Pensions chiefly due to the normal growth of pension charges, partly counterbalanced by a decrease in England in the payments of Indian Civil Service Family Pensions and of Military Funds; of £57,6 or R8,64 under Stationery and Printing, due to large purchases of stationery in India and England; of £58,5 or R8,78 under Miscellaneous, mainly in the charges in England on account of stores lost in transit to India. These increases were partly counterbalanced by a decrease of £7,9 or R1,19 under Territorial and Political Pensions, chiefly due to lapses by deaths, and to grants remaining undrawn; and of £39,2 or R5,88 under Civil Furlough and Absentee Allowances due to over-estimate of absentee allowances of Civil Officers payable in England.

175. As compared with the actuals of the previous year there were decreases of £9,0 or R1,35 under Territorial and Political Pensions due to the causes explained above; of £19,8 or R2,97 under Civil Furlough and Absentee Allowances in England; and of £135,4 or R20,31 under Miscellaneous due to the large remissions in 1903-04 of irrecoverable loans in the Central Provinces, Bengal, the Punjab and Bombay; partly counterbalanced by large payments in England due to the cause stated above. There were on the other hand increases of £54,2 or R81,3 under Superannuation Allowances and Pensions due to the growth of expenditure in pension charges; and of £25,2 or R3,78 under Stationery and Printing chiefly in England owing to large demands.

176. The Indian expenditure under this head showed savings of 1,17 and 1,33 as compared with the Budget and the actuals of the previous year, respectively. The variations in India and Berar were chiefly due to the transfer from Berar to India books of the pensions paid from Hyderabad Civil Treasury. In the Central Provinces, the saving was due to the death of a pensioner of the Bhonsla Family; and to the arrears due to the heirs of another pensioner, who died last year, not having been drawn. Non-payment of an instalment to the Maharaja of Benares chiefly accounts for the decrease in the United Provinces. In Madras the saving was due to the absence of any charge for marriage and funeral allowances under Tanjore pensions, to the non-drawal of a Tanjore pension and several Carnatic stipends, to the transfer for six months of a Kurnool pension to the Hyderabad Treasury, and to low charges on account of commutations of Carnatic pensions. The excesses of 24 (Imperial) in India, and 4 (Imperial) in the North-West Frontier Province require to be sanctioned.

179. The Indian expenditure under this head exceeded the Budget by 3,51, and the actuals of the previous year by 6,96. The major portion of the excess occurred under *Superannuation and Retired Allowances*, and was due, for the most part, to sufficient allowance not having been made in the Estimate for the usual growth of expenditure in pension charges. The variations in India and Berar are also partly due to the transfer of the Hyderabad Civil Treasury from Berar to India.

The following statement shows the growth of pension charges during the last six years:—

	R
1899-1900	1,06,24
1900-1901	1,09,17
1901-1902	1,12,15
1902-1903	1,16,58
1903-1904	1,21,75
1904-1905	1,28,38

Section E.—MISCELLANEOUS—continued.

30.—Stationery and Printing—concluded.

182. The Indian expenditure exceeded the Budget and the actuals of the previous year by 2,62 and 185 respectively. The increases in India, and the decreases in Bengal, under the first two heads were primarily due to the transfer of charges of the Office of Controller of Stationery and Printing from the Bengal to the India books from 1st July 1904. The excess in Madras, (7) under *Stationery Office at the Presidency* was due to more charges for the carriage of stationery, and that under *Purchase of Stationery* (15) to large purchases of stationery from the Indian Mills, in partial substitution of paper formerly obtained from England. Under *Government Presses* there was a net saving of 78 contributed to by all the provinces except India, Central Provinces, and Madras. The increase in India (1,31) was chiefly due to small recoveries for cost of printing work done for the Postal and Telegraph Departments, to the establishment of the Monotype Press at Simla, and to more charges for temporary establishments, overtime allowances and contingencies. The savings (62) in Burma, and (40) in Bengal, were due to less charges for Establishment, Supplies and Services and contingencies; those in the Punjab (8) and in the North-West Frontier Province (8) to small purchases of materials for the Jail Presses. The decrease in the United Provinces (10) was mainly attributable to savings under the Establishment of the Government Press; and that in Bombay (89) under piece work charges at the Central Press, and in the grant for raw materials and Europe Stores. Under *Stationery supplied from Central Stores* the Budget was exceeded in the Central Provinces (94) and Bombay (67). The increase in the former province was on account of large supply of stationery to the Jail and Secretariat Presses, due to increase of work on the amalgamation of Berar; and that in the latter to large supplies of paper issued to meet the increased demands of the Presses. The savings in Burma (43) and Bengal (1,01) were owing to the Budget having been placed too high. Considerable reduction in the demand for half-bleached paper by the Government Press, and small demand for type-writers resulted in a saving in the United Provinces (55). Under *Other Charges* the large increase in Madras (84) was due to the increased amount of printing work done for the Secretariat Press at private presses, on account of the strike in the Government Press, and to large expenditure for printing the Police Gazette and Settlement Registers at private presses. In India, the Punjab, and the North-West Frontier Province the savings were due to over-estimates. As compared with the actuals of the previous year, the increase in India under *Stationery Office at the Presidency*, and *Purchase of Stationery*, due chiefly to the transfer of charges of the office of Controller of Stationery from the Bengal to the India books, was nearly covered by the decrease in Bengal. In Madras and Bombay the charges under *Purchase of Stationery* exceeded the actuals of 1903-4, and in the former the strike in the Government Press caused an increase under *Other Charges*.

183. The excess in England £40,2 was due chiefly to larger indents from India than was indicated in the Estimates.

184. The Indian expenditure exceeded the Budget Estimate by 1,76 but fell short of the actuals of the previous year by 27,84. The excess as compared with the Budget occurred mainly under *Irrecoverable Loans Written off* chiefly in the Central Provinces (1,15), Assam (12), Punjab (20), Madras (5) and Bombay (5). These charges are necessarily of a fluctuating nature and exceeded the Budget anticipation; and under *Extraordinary Items* in Bombay (60) owing to the re-adjustment of the shares tendered by the Ahmedabad-Dholka Railway, in payment of the cost of earthwork done on that line by famine labour. As compared with actuals of the previous year the decrease occurred almost entirely under *Irrecoverable Loans Written off* and was due to the large remissions in the Central Provinces, the Punjab, and Bombay in 1903-4.

185. Under *Remittance charges* the excess in India (51) was due to heavy remittances to and from the Reserve Treasury, and that in Bombay (36) to large remittances to other Provinces. The saving in Bengal (24) was mainly due to reduced remittances in consequence of large withdrawals by means of supply bills. The Estimate in Assam was placed too low, while that in Madras was pitched too high. Under *Charitable Donations* the excess in Bengal (19) was due to a grant of 15 to the Young Woman's Christian Association, and of 5 to the Calcutta Orphanage, and the decrease in Bombay (10) to low charges for interring paupers. Under *Petty Establishments* the excess in the Central Provinces was due to a new cotton market establishment at Katol. The variations in the other Provinces were chiefly due to over or under estimate. Under *Special Commissions of Enquiry* the excess in India (63) was mainly due to the charges of the Survey Committee (61), the Statistical Committee (7), and the Police

Section E.—MISCELLANEOUS—concluded.**32.—Miscellaneous—concluded.**

Committee (3) for which there were no provisions. In Burma the charge, which was covered by a reappropriation sanctioned by the Local Government, represents expenditure on account of the deputation of the Hon'ble Mr. Harvey Adamson in connection with the report of the Police Commission. In Bengal the provisions in connection with the Calcutta Improvement Scheme, and the examination and arrangement of Government Records were not used, while in Madras there were no public commissions. Under *Other Items* the excess in India (37) was due to the inclusion of charges incurred in the office of the Controller of Stationery and Printing hitherto adjusted in Bengal (9), to loss in conversion of the Partabgarh tribute payable to Holkar (20), and to interest (43) on loans, taken by Native States in Central India, from the Gwalior and Indore Durbars payable by Government under the Delhi Durbar concession, partly counterbalanced by a saving of 12 in the provision for a picture of the state entry at the Delhi Durbar. In Burma the unforeseen adjustment of 20 on account of laying a cable across the Kalaindaung river resulted in an excess of 6. The excess in Assam (12) was due to payment of a lapsed deposit which was not foreseen; in Bengal (68) to the special payment to the proprietor of Lochnagar Estate in Darjeeling, and of the Government pleader's fee for conducting the arbitration in connection therewith (42), to increased expenditure under local contributions (12), and under books and periodicals (8), partly counterbalanced by a saving of 5 under subscriptions to newspapers and periodicals; and in Madras (1,63) to a contribution of 1,66 made to municipalities in aid of their balances, partly counterbalanced by a saving in the maintenance of fishery vessels. The saving in Bombay (3,37) was due to claims on account of interest on guaranteed loans to Native States being either under investigation or not submitted (2,66), and to a decrease in the charges on account of destitute pilgrims, in consequence of arrangements having been made for recovery of return railway fares before they are allowed to embark.

186. The excess expenditure in England (£46,8) was mainly due to the charge for value of stores (£38,1) lost with the "Den of Seaton" in transit to India, to £9.3 paid on account of reserve stock of stores, to subscriptions to charities and expenditure for the relief of distressed Natives of India (£2) provided for under Superannuation Allowances and Pensions.

187. No provision was considered necessary for direct Famine Relief when the Budget Estimate was framed; but the partial failure of the monsoon in Bombay necessitated an expenditure of 31 in that Province. There was, on the other hand, 52,36 assigned for the construction of Protective Railways (18,53), and Irrigation Works (33,83), and 81,91 was reserved for the Reduction or Avoidance of Debt. The short expenditure on the construction of Protective Railways and Irrigation Works, and the discontinuance of the practice of charging to the Famine Insurance Grant, the excess of interest over net receipts on account of the Bengal Nagpur and Indian Midland Railways, resulted in the application of a larger amount to the Reduction or Avoidance of Debt.

188. The following statement shows the total amount chargeable to this grant, and its distribution:—

Section F.—FAMINE RELIEF AND INSURANCE—*concluded.*35.—Construction of Protective Irrigation Works—*concluded.*

191 The outlay in India fell short of the Budget Estimate by 1,58, due to smaller expenditure than was anticipated in nearly all the Provinces except Bengal, Bombay and the Central Provinces. In the last mentioned, additional expenditure was incurred on the preparation of famine relief programmes. The actuals for the year exceeded those of the previous year by 10,66, due chiefly to larger expenditure on tank works in the Central Provinces, and to increased outlay on the Tribeni and Ken Canals, in Bengal and the United Provinces, respectively.

NET GAIN OR LOSS TO GOVERNMENT—	<i>£</i>	<i>£</i>	<i>£</i>	<i>£</i>	<i>£</i>
1904-1905	+2,265,6	—108,9	—2,9	—48,3	+2,105,5
1903-1904	+1,114,4	—208,6	+9,3	—54,4	+860,7
1902-1903	+451,6	—171,6	+7,9	—58,9	+229,0
1901-1902	+1,154,6	—249,2	+20,3	—79,1	+846,6
1900-1901	+819,4	—451,7	+5,5	—48,1	+325,1

194. These figures show that the net result of the working of all Railways was a gain of £2,105,5 after meeting all charges for interest, annuities, etc., which, compared with the gain in the previous year, shows an increase of £1,244,8 or ₹1,86,72. Under Receipts there was an increase of £2,492,1 or ₹3,73,81, due mainly to additional mileage opened, to general development of traffic on the larger railway systems and to a heavy wheat and grain traffic, especially on the North Western, East Indian, Great Indian Peninsula and Rajputana-Malwa Railways. The total charges were larger by £1,247,3 or ₹1,87,09, of which ₹1,37,85 consist of an increase in working expenses, due partly to heavy repairs and renewals of stock and permanent-way and partly to the heavier traffic worked, and £270,8 or ₹40,62 represent higher charges for Interest and Annuity, due to the increased Capital employed on construction of railways.

21,557,9	GRAND TOTAL	21,615,8	23,997,3	24,022,5

196. *State Railways.*—The gross receipts under India for the year 1904-05 show an increase compared with the actuals of the previous year, of 3,48,57. The variations on the more important railways were as under :—

Increases (+)	Decreases (—)
East Indian 52,76	
Eastern Bengal 5,51	
Rajputana-Malwa 34,94	Other State Railways—Provincial 13
North Western 1,12,61	
Oudh and Rohilkhand 14,57	
Bengal-Nagpur 32,39	
Bengal and North-Western and Tirhoot 7,20	
Indian Midland 5,50	
Southern Mahratta 6,29	
South Indian 5,73	
Burma Railways 10,42	
Great Indian Peninsula 41,43	
Other State Railways—Imperial 17,99	
" " " Local 1,36	
3,48,70	13
	Net increase 3,48,57

There was thus an improvement in the earnings of all the more important railway systems.

Section H.—RAILWAYS—RECEIPTS—continued.

197. The principal increases were due; on the East Indian Railway (52,76) to improvement in grain seed, coal, and pilgrim traffic, on the Eastern Bengal State Railway (5,51) to general expansion of coaching traffic and the amalgamation of the Brahmaputra Sultanpur Branch and Ranaghat Krishnagar Light Railways with the main line, on the Rajputana-Malwa Railway (34,94) to increased traffic in grain and pulse, oil-seeds, salt and sugar, on the North Western Railway (1,12,61) to the prosperous state of the country and a heavy export traffic in wheat to Europe, on the Oudh and Rohilkhand Railway (14,57) to a heavy wheat traffic and the movement of troops and Commissariat Stores in connection with the Tibet Mission, on the Bengal-Nagpur Railway (32,39) to the general development of goods traffic, especially grain and coal, and the opening of new sections on the Satpura line, on the Bengal and North-Western Railway (7,20) to additional mileage opened, the development of traffic on the new extensions and special trains run for the Tibet Mission, on the Indian Midland Railway (5,50) to increased export traffic in wheat, on the Southern Mahratta Railway (6,29) to general development of passenger traffic, large movements of merchandise, and the gradual expansion of import traffic; on the South Indian Railway (5,73) to general development of traffic throughout the line, on the Burma Railways (10,42) to a large increase in paddy traffic, and on the Great Indian Peninsula Railway (41,42) to increases in 3rd class traffic, bumper crops, favourable markets for export and a large local demand by mills for cotton.

198. Compared with the Budget Estimate there was a net gain of 3,47,92 made up as follows :—

GAINS (+)		LOSSES (—)	
East Indian	51,21		
Eastern Bengal	11,40		
Rajputana-Malwa	14,30		
North Western	1,58,48		
Oudh and Rohilkhand	9,69		
Bengal-Nagpur	18,35	Other State Railways—Provincial .	9
Bengal and North-Western and Tirhoot	9,88		
Indian Midland	3,36		
Southern Mahratta	7,10		
South Indian	5,62		
Burma Railways	11,49		
Great Indian Peninsula	34,95		
Other Railways—Imperial	11,71		
„ Local	47		
	<hr/> 3,48,01 <hr/>		<hr/> 9 <hr/>
		NET GAIN .	3,47,92

199. The above results were due generally to the same causes as account for the variations compared with the actuals of the previous year.

200. *Guaranteed Railways.*—The total net receipts were 20,00 better than those of the previous year; and exceeded the Budget Estimate by 12,97. These increases were due on the Bombay, Baroda and Central India Railway to improvement in passenger traffic and heavy bookings of raw-cotton, European piece-goods, food-grains and oil-seeds, and on the Madras Railway to larger movements of coal and improved traffic in grain and pulse.

STATE RAILWAYS—IMPERIAL.

East Indian Railway.

1903-4. Accounts. R		Budget. R	1904-5. Revised. R	Accounts. R
	EARNINGS—			
2,07,91	Coaching	2,10,00	2,16,00	2,15,02
4,85,44	Goods	4,87,00	5,30,43	5,40,35
15,13	Miscellaneous and Suspense	13,03	12,60	5,87
<u>7,08,48</u>	TOTAL	<u>7,10,03</u>	<u>7,68,03</u>	<u>7,61,24</u>

201. Compared with the actuals of the previous year there was an increase of 52,76 due chiefly to an improvement in grain, seed, coal, and pilgrim traffic. The increase of 51,21 on the Budget Estimate was due to the same causes.

Eastern Bengal Railway.

1903-4. Accounts. R		Budget. R	1904-5. Revised. R	Accounts. R
	EARNINGS—			
66,77	Coaching	66,00	71,00	70,50
1,07,08	Goods	1,02,93	1,06,68	1,04,63
13,29	Miscellaneous and Suspense	12,32	14,32	17,52
<u>1,87,14</u>	TOTAL	<u>1,81,25</u>	<u>1,92,00</u>	<u>1,92,65</u>

202. Compared with the actuals of the previous year there was an improvement in earnings of 5,51, mainly under *Coaching* traffic, due to the amalgamation of the Brahmaputra-Sultanpore Branch and Ranaghat-Krishnagar Light Railways with the main line and to continued development of traffic with the Bengal and North-Western Railway *via* Katihar; there was also an increase under "Miscellaneous" due to hire of stock lent to the Oudh and Rohilkhand Railway and to larger receipts under "Running powers." The increase of 11,40 on the Budget Estimate is attributable partly to the above causes and partly to the jute traffic having proved more favourable than was anticipated.

Rajputana-Malwa Railway.

1903-4. Accounts. R		Budget. R	1904-5. Revised. R	Accounts. R
	EARNINGS—			
72,08	Coaching	73,00	76,00	76,35
1,41,92	Goods	1,62,00	1,69,10	1,73,63
5,36	Miscellaneous and Suspense	5,00	4,90	4,32
<u>2,19,36</u>	TOTAL	<u>2,40,00</u>	<u>2,50,00</u>	<u>2,54,30</u>

203. Compared with the actuals of the previous year the receipts show an increase of 34,94 due mainly to increased traffic in grain and pulse, oil-seeds, salt and sugar, attributable in the case of grain and pulse to larger demands in Guzerat, Kathiawar and Central India following on a scanty rainfall, in the case of oil-seeds to a better crop and a larger demand for export, in the case of salt, to increased consumption as a result of the reduction in the salt tax, and in the case of sugar to increased requirements owing to the celebration of a larger number of Hindu marriages and the more prosperous condition of the people. The increase of 14,30 on the Budget Estimate was due to the improvement in Goods traffic having exceeded anticipations.

Section H.—RAILWAYS—RECEIPTS—*continued.*STATE RAILWAYS—IMPERIAL—*continued.*

North Western Railway.

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
R	EARNINGS—	R	R	R
1,59,65	Coaching	1,60,00	1,62,00	1,67,36
3,55,32	Goods	3,09,00	4,64,88	4,58,74
5,90	Miscellaneous and Suspense	6,00	8,12	7,38
<u>5,20,87</u>	TOTAL	<u>4,75,00</u>	<u>6,35,00</u>	<u>6,33,48</u>

204. Compared with the actuals of the previous year there was a large increase of 1,12,61. The increase of 7,71 in *Coaching* traffic was due to the prosperous state of the country and to facilities afforded to pilgrims and holiday passengers, and the increase of 1,03,42 under *Goods* to a heavy export wheat traffic to Europe; there were also increases in the export of gram, pulse, cotton raw, and oil seeds. The increase of 1,58,48 on the Budget Estimate is attributable to the same causes.

Oudh and Rohilkhand Railway.

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
R	EARNINGS—	R	R	R
61,52	Coaching	60,70	65,30	65,23
64,91	Goods	71,00	77,00	76,36
13,69	Miscellaneous and Suspense	13,30	13,70	13,10
<u>1,40,12</u>	TOTAL	<u>1,45,00</u>	<u>1,56,00</u>	<u>1,54,69</u>

205. The receipts exceeded those of the previous year by 14,57. The increase which fell mainly under *Goods* traffic was due to increased export of wheat. The increase under *Coaching* traffic was due partly to general expansion and partly to the *magh melas* at Allahabad and Ajodhya and the movement of troops and commissariat stores to Siliguri in connection with the Tibet Mission. The increase of 9,69 on the Budget Estimate was due generally to the same causes.

Bengal-Nagpur Railway.

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
R	EARNINGS—	R	R	R
60,96	Coaching	70,00	69,20	69,71

<u>1,65,96</u>	TOTAL	<u>1,80,00</u>	<u>1,98,00</u>	<u>1,98,35</u>

206. Compared with the actuals of the previous year the receipts show an improvement of 32,39 due to general development of *Goods* traffic, especially in grain and coal, and to the opening of new sections on the Satpura Railway. The increase of 18,35 on the Budget Estimate is chiefly due to the improvement in grain and coal traffic having exceeded anticipations.

Section H.—RAILWAYS—RECEIPTS—*continued.*STATE RAILWAYS—IMPERIAL—*continued.*

Bengal and North-Western and Tirhoot Railways.

1903-4. Accounts. R		Budget. R	1904-5. Revised. R	Accounts. R
	EARNINGS—			
52,29	Coaching	51,40	56,40	56,17
58,48	Goods	56,20	61,95	61,66
10,91	Miscellaneous and Suspense	11,40	11,65	11,05
<u>1,21,68</u>	TOTAL	<u>1,19,00</u>	<u>1,30,00</u>	<u>1,28,88</u>

207. The receipts were better than those of the previous year by 7,20 due to the additional mileage opened during the year, to development of traffic on the new extensions, and to special trains run for the Tibet Mission. The same causes generally account for the excess of 9,88 on the Budget Estimate.

Indian Midland Railway.

1903-4. Accounts. R		Budget. R	1904-5. Revised. R	Accounts. R
	EARNINGS—			
29,67	Coaching	29,17	29,63	30,50
55,82	Goods	58,90	61,74	61,30
2,46	Miscellaneous and Suspense	1,73	1,43	1,95
<u>87,95</u>	TOTAL	<u>89,80</u>	<u>92,80</u>	<u>93,75</u>
10,09	Deduct—Bhopal Railway earnings	9,80	10,30	10,39
<u>77,86</u>	Net Indian Midland Railway proper	<u>80,00</u>	<u>82,50</u>	<u>83,36</u>

208. Compared with the actuals of the previous year there was an increase of 5,50 mainly under *Goods* traffic due to increased export of wheat. The increase of 3,36 on the Budget Estimate is attributable to the same cause.

Southern Mahratta Railway.

1903-4. Accounts. R		Budget. R	1904-5. Revised. R	Accounts. R
	EARNINGS—			
24,05	Coaching	23,84	25,81	25,76
43,95	Goods	42,02	46,56	46,34
—19	Miscellaneous and Suspense	1,14	1,13	2,00
<u>67,81</u>	TOTAL	<u>67,00</u>	<u>73,50</u>	<u>74,10</u>

209. Compared with the actuals of the previous year there was an increase in receipts of 6,29. The increase under *Coaching* was due to general development of 3rd class passenger traffic owing to improved train services and to traffic to and from the Indian National Congress and Exhibition held in Bombay; while that under *Goods* is attributable to large movements of grain and pulse and raw cotton and also to the gradual expansion of import traffic in kerosine oil and coal. The carriage of the large supplies of railway material for the famine feeder lines formed an additional source of revenue. The same causes generally accounted for the increase of 7,10 compared with the Budget Estimate.

South Indian Railway.

1903-4. Accounts. R		Budget. R	1904-5. Revised. R	Accounts. R
	EARNINGS—			
64,56	Coaching	65,50	68,50	68,62
53,97	Goods	54,50	56,70	56,42
3,36	Miscellaneous and Suspense	2,00	2,30	2,58
<u>1,21,89</u>	TOTAL	<u>1,22,00</u>	<u>1,27,50</u>	<u>1,27,62</u>

210. Compared with the actuals of the previous year the receipts were better by 5,73 due to general development of traffic throughout the line. This development of traffic in excess of anticipations accounts also for the increase of 5,62 over the Budget Estimate.

Section H.—RAILWAYS—RECEIPTS—continued.

STATE RAILWAYS—IMPERIAL—concluded.

Burma Railways.

1903-4. Accounts. R		Budget. R	1904-5. Revised. R	Accounts. R
EARNINGS—				
69,37	Coaching	67,50	69,70	70,03
69,12	Goods	70,00	79,00	79,58
2,58	Miscellaneous and Suspense	2,50	1,30	1,88
<u>1,41,07</u>	TOTAL	<u>1,40,00</u>	<u>1,50,00</u>	<u>1,51,49</u>

211. Compared with the actuals of the previous year, the receipts for 1904-5 show an improvement of 10,42 mainly under *Goods* due to a large increase in paddy traffic. The increase of 11,49 on the Budget Estimate was due to traffic having improved during the year beyond expectation.

Great Indian Peninsula Railway.

1903-4. Accounts. R		Budget. R	1904-5. Revised. R	Accounts. R
EARNINGS—				
1,15,80	Coaching	1,10,90	1,23,40	1,28,45
3,37,08	Goods	3,50,30	3,64,00	3,68,27
5,64	Miscellaneous and Suspense	3,80	4,60	3,23
<u>4,58,52</u>	TOTAL	<u>4,65,00</u>	<u>4,92,00</u>	<u>4,99,95</u>

212. Compared with the actuals of the previous year the receipts show an improvement of 41,43. Under *Coaching* traffic there was an increase of 12,65 mainly in 3rd class traffic, while *Goods* traffic was better by 31,19 owing to bumper crops, favourable markets for Exports and a large local demand by mills for cotton. The increase of 34,95 on the Budget Estimate was due generally to the same causes.

Other State Railways—Imperial.

1903-4. Accounts. R	Budget. R	1904-5. Revised. R	Accounts. R
1,50,72	1,57,00	1,67,65	1,68,71

213. Compared with the actuals of the previous year there was a net increase in receipts of 17,99 made up of increases aggregating 20,68 and decreases 2,69. The principal increases were 1,55 on the Tinnevely Quilon Railway consequent on additional mileage opened and development of traffic; 4,00 on the Assam Bengal Railway owing chiefly to expansion of traffic due to the opening of the Hill Section; 3,01 on the Guntakal-Mysore Frontier Railway due to adjustments on account of arrears of freight charges; and 9,87 on the North-East line mainly due to a large increase in grain traffic. The decrease of 2,68 in connection with the Brahmaputra-Sultanpur Railway was merely nominal being due to the amalgamation of the line with the E. B. S. Ry. from 1st April 1905. The actuals exceeded the Budget Estimate by 11,71, made up of increases to the extent of 16,62, of which the principal were 1,68 on the Bengal Central Ry. due to an underestimate of *Goods* traffic, 3,68 on the Guntakal-Mysore Frontier Ry. due to adjustments of arrears of freight charges and 9,41 on the North-East line due to a large increase in grain traffic; and of decreases to the extent of 4,91, of which the principal were 1,62 on the Assam-Bengal Ry. owing to an interruption of the regular service through the Hill Section from April to October 1904 and 2,58 on the Brahmaputra-Sultanpore Ry. owing to the purchase of this line by Government and its amalgamation with the Eastern Bengal State Railway not having been anticipated at the time the Budget Estimate was framed.

Gross Receipts.

216. The receipts of the B. B. and C. I. Ry. were better than those of the previous year by 16,99, due in the case of *Coaching* traffic to the celebration of a larger number of Hindu marriages, larger attendance at religious fairs and the travelling of visitors to the Industrial Exhibition at Bombay and in the case of *Goods* traffic to increased bookings of raw cotton, European piece goods, food grains and oil seeds. On the Madras Railway the increase of 6,54 was chiefly under *Goods* traffic and was due to larger movements of coal to meet increased demands for the Kolar Gold Fields and for the Cordite Factory at Coonoor and also to improved traffic in grain and pulse following on the failure of the North-East monsoon and the consequent rise in the price of grain. The same causes generally account for the increases on the Budget Estimate.

Working Expenses.

217. The working expenses of the B. B. and C. I. Railway were 2,52, less than those for the previous year due chiefly to the large increase in the earnings of the R. M. Railway which resulted in a smaller share of the combined expenses falling on the Company's line. The increase of 2,08 on the Budget Estimate was due to the heavier traffic worked and to an underestimate of the provision for locomotive and traffic expenses.—The increase of 6,10, on the Madras Railway compared with the actuals of the previous year was due to heavier renewals of permanent way and locomotive stock and to increased running expenses consequent on the heavier traffic worked. The increase of 8,05 on the Budget Estimate is attributable generally to the same causes.

Section H.—RAILWAYS—RECEIPTS—*concluded.***XXVIII.—Subsidized Companies (Government Share of Surplus Profits and Repayment of Advances of Interest).**

<u>39,8</u>	TOTAL	<u>46,6</u>	<u>48,8</u>	<u>47,3</u>

218. The credits under India represent the amounts recoverable from the Mysore and Travancore Durbars and from the Ahmedabad-Dholka Railway Company. The recovery from the Mysore Durbar is in settlement of the net charge for interest paid to the Southern Mahratta Railway Company in connection with the Mysore Railway. The details of the amounts are as follow:—

	MYSOORE RAILWAY—			
7,18	Interest on Capital	7,20	7,20	7,18
8	Less—Charge for interest borne by Government for the unexpended balance of the Capital retained in its hands	7	4	4
<u>7,10</u>		<u>7,19</u>	<u>7,16</u>	<u>7,14</u>
4,63	Net receipts	3,50	4,00	4,25
<u>2,47</u>	Net charge for interest recoverable from the Mysore Durbar	<u>3,69</u>	<u>3,16</u>	<u>2,89</u>

The recovery from the Travancore Durbar is on account of:—

- (i) interest on so much of the South Indian Railway debentures as has been raised for the Native State Section of the Tinnevely-Quilon Railway, and
- (ii) interest on Government advances, *i.e.*, on outlay in excess of the amount of debenture capital raised in respect of the section.

The recovery due from the Ahmedabad-Dholka Railway Company, represents interest and dividends on the shares aggregating Rs 59,900 allotted to Government in respect of survey expenditure and the value of famine earthwork at normal rates, which is treated as a Government share in the undertaking. No recovery was made during the year under review.

219. The credits under England represent the amounts received from the Rohilkhand-Kumaon and Southern Punjab Railway Companies, in settlement of the Government share of the surplus profits of those Railways.

15,56,72	EXPENDITURE . . .	15,84,59	16,62,97	16,94,32

220. The details of these amounts by individual railways are given on page 102. An explanation of the variations compared with the actuals of the previous year and the figures of the Budget Estimate is given below. Of the excess of 1,09,60 under *Imperial*, 80,86 has been sanctioned and 28,74 requires to be sanctioned. Under *Provincial* the excess of 7 in Assam has been sanctioned by the Local Government and under *Local* the excess of 6 has been sanctioned by the Madras Government.

STATE RAILWAYS—IMPERIAL.

East Indian Railway.

1903-4. Accounts. R		Budget. R	1904-5. Revised. R	Accounts. R
WORKING EXPENSES—				
56,25	Maintenance	60,04	58,84	63,88
78,10	Locomotive	77,97	75,76	74,77
16,88	Carriage and Wagon	17,83	19,89	20,20
51,61	Traffic	51,29	52,23	55,96
35,94	General, Miscellaneous and Suspense	34,75	38,78	39,06
2,38,78	TOTAL WORKING EXPENSES	2,41,88	2,45,50	2,53,87
23,49	Share of Surplus profits paid to the Company, and contribution to Provident Fund	23,12	26,50	27,31
2,62,27	TOTAL	2,65,00	2,72,00	2,81,18

221. Compared with the actuals of the previous year there was a net increase in working expenses of 15,09 due to increased expenditure on relaying of permanent way and on repairs and renewals of vehicles, the opening of new stations and block huts and the re-organization of the Traffic Department. There were also heavier payments for law charges and hire and demurrage. The increase of 11,99 on the Budget Estimate is attributable to the same causes.

Eastern Bengal Railway.

1903-4. Accounts. R		Budget. R	1904-5. Revised. R	Accounts. R
WORKING EXPENSES—				
23,62	Maintenance	25,60	24,00	24,00
28,94	Locomotive	23,91	22,10	21,61
9,00	Carriage and Wagon	10,36	13,58	12,78
20,92	Traffic	18,60	21,83	21,25
17,50	General, Miscellaneous and Suspense	18,78	20,41	19,41
99,98	TOTAL	97,25	1,01,92	99,05

222. Compared with the actuals of the previous year there was a decrease in working expenses of 93 made up chiefly of a decrease under Locomotive expenses of 7,33 due to smaller renewals of Locomotive engines, counterbalanced by increases,—under carriage and wagon expenses 3,78 due to larger repairs and renewals of vehicles, and under general, miscellaneous and suspense 1,91 due to the transfer to the line of two senior accounts officers, to increased rates of allowances granted to the Travelling Audit Staff and to large credits obtained in 1903-04 from the sale of refused consignments of jute and tea. The increase compared with the Budget Estimate followed on increased earnings.

Rajputana-Malwa Railway.

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
R		R	R	R
	WORKING EXPENSES—			
24,53	Maintenance	24,50	21,20	21,72
40,27	Locomotive	43,50	45,00	46,14
15,65	Carriage and Wagon	14,50	14,00	15,07
17,31	Traffic	16,75	17,00	17,45
13,46	General, Miscellaneous and Suspense	15,75	15,80	16,29
<u>1,11,22</u>	TOTAL	<u>1,15,00</u>	<u>1,13,00</u>	<u>1,16,67</u>

223. The increase of 5,45 in working expenses, as compared with the actuals of the previous year is attributable directly to the increase in earnings and indirectly to the larger share of the combined expenses of the system falling on the Rajputana-Malwa Railway on account of increased receipts. The increase of 1,67 on the Budget Estimate is due to the same causes.

North-Western Railway.

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
R		R	R	R
	WORKING EXPENSES—			
74,01	Maintenance	80,09	72,85	78,17
1,08,54	Locomotive	1,02,51	1,26,93	1,29,31
23,79	Carriage and Wagon	19,09	19,30	19,23
38,12	Traffic	34,95	42,48	41,91
20,53	General, Miscellaneous and Suspense	23,36	23,44	22,48
<u>2,64,99</u>	TOTAL	<u>2,60,00</u>	<u>2,85,00</u>	<u>2,91,10</u>

224. Compared with the actuals of the previous year there was an increase of 26,11 due to increased train mileage and heavier maintenance charges. The increase of 31,10 on the Budget Estimate was chiefly due to heavy running charges, etc., consequent on increased earnings.

Oudh and Rohilkhand Railway.

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
R		R	R	R
	WORKING EXPENSES—			
19,46	Maintenance	19,03	19,45	22,28
21,45	Locomotive	21,61	25,06	25,38

<u>70,31</u>	TOTAL	<u>70,00</u>	<u>78,00</u>	<u>81,74</u>

225. The working expenses shew an increase of 11,43 on the actuals of the previous year due mainly to heavier expenditure on ballasting the line between Lucknow and Shahjahanpore, to rearrangement of the Locomotive and Carriage and Stores yards at Lucknow, to the remodelling of Fyzabad Station and to more extensive renewals of engines and vehicles. The excess of 11,74 on the Budget Estimate was due to the same causes.

Section H.—RAILWAYS—EXPENSES—*continued.*STATE RAILWAYS—IMPERIAL—*concluded.*

Bengal-Nagpur Railway.

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
R		R	R	R
	WORKING EXPENSES—			
20,99	Maintenance	20,25	21,50	22,17
25,27	Locomotive	26,00	29,20	29,29
6,04	Carriage and Wagon	6,75	8,00	8,09
15,19	Traffic	16,00	17,45	17,55
18,68	General, Miscellaneous and Suspense	21,00	18,85	20,00
86,17	TOTAL WORKING EXPENSES .	90,00	95,00	97,10
4	Share of surplus profits paid to the Company and contribution to Provident Fund
86,21	TOTAL .	90,00	95,00	97,10

226. The working expenses exceeded the actuals of the previous year by 10,93, due to increased traffic and the additional mileage worked over the Satpura Railway. The increase of 7,10 on the Budget Estimate is due generally to the same causes.

Bengal and North-Western and Tirhoot Railways.

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
R		R	R	R
	WORKING EXPENSES—			
12,09	Maintenance	12,30	14,22	14,30

40,84	Share of net earnings paid to the Company and contribution to Provident Fund	40,00	44,25	49,56
87,89	TOTAL .	86,50	95,00	1,01,28

227. Compared with the actuals of the previous year there was an increase of 13,39 partly under working expenses and partly in the Company's share of net earnings. The increase in the former was due to additional mileage worked, heavy repairs of damages caused by floods, rebuilding pin girder bridges and larger expenditure on maintenance and renewals of engines and vehicles, while the increase in the latter was due to the large improvement in net earnings during the year. The increase of 14,78 on the Budget Estimate is attributable to the same causes.

Indian Midland Railway.

7,36	General, Miscellaneous and Suspense	7,66	6,79	6,87
41,72	TOTAL WORKING EXPENSES	46,00	45,75	45,54
6,37	Share of net earnings paid to the Company, and contribution to Provident Fund	5,00	6,75	6,75
48,09	TOTAL	51,00	52,50	52,29

229. Compared with the actuals of the previous year there was an increase of 3,82 in working expenses due partly to increased traffic and partly to heavier renewals of Permanent Way and Rolling Stock. The increase of 38 in the Company's share of net earnings was due to the more satisfactory results obtained. The decrease of 46 in working expenses as compared with the Budget Estimate is due principally to Traffic Expenses and General charges having fallen short of the estimate.

South Indian Railway.

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
R	WORKING EXPENSES—	R	R	R
10,06	Maintenance	14,93	13,18	13,69
21,93	Locomotive	22,20	23,14	22,77
4,45	Carriage and Wagon	6,41	5,09	4,93
7,95	Traffic	9,19	9,31	9,26
7,85	General, Miscellaneous and Suspense	8,43	8,78	8,71
52,24	TOTAL WORKING EXPENSES	61,25	59,50	59,36
8,30	Share of surplus profits paid to the Company, and contribution to Provident Fund	6,25	7,50	7,64
60,54	TOTAL	67,50	67,00	67,00

230. Compared with the actuals of the previous year there was an increase in working expenses of 7,12. The increase occurred chiefly under Maintenance and Traffic Expenses and was due to the employment of additional staff consequent on the opening of new lines, and to the renewal of 22 miles of permanent way against 13 in the previous year. The decrease of 1,89 on the Budget Estimate was due mainly to the provision for renewals of wooden covered goods wagons not having been fully utilised.

Burma Railways.

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
R	WORKING EXPENSES—	R	R	R
22,40	Maintenance	22,05	19,00	20,37

<u>99,70</u>	TOTAL	<u>1,06,49</u>	<u>1,18,18</u>	<u>1,20,53</u>

233. Compared with the actuals of the previous year there was a net increase in working expenses of 21,70, made up of increases aggregating 23,36 and decreases 1,66. The principal increases were, 1,06 on the Tinnevely-Quilon Railway following on increased earnings, 9,65 on the Assam-Bengal Railway due to the high cost of working the newly opened Hill Section, 2,07 on the Guntakal Mysore Frontier Railway due to heavier renewals of Permanent Way and Rolling Stock, and 8,32 on the North-East Line due partly to the heavier traffic worked and partly to expenditure on completing the repairs to engines provided for in the working contract. Compared with the Budget Estimate there was an increase of 14,62 made up of increases aggregating 16,99 and decreases 2,37. The principal increases were 3,46 on the Assam-Bengal Railway due mainly to no Budget provision having been made for damages done to earthwork and for renewal of sleepers on the Hill Section, 2,12 on the Guntakal-Mysore Frontier Railway due to heavier renewals of Permanent Way and Rolling Stock than anticipated and 9,54 on the North-East Line due mainly to the same causes as accounted for the increase on the actuals of the previous year.

238. There are no important variations in the amounts under England, which represent the interest chargeable against the Companies on the advances made by the Secretary of State from funds raised under the provisions of the Oudh and Rohilkhand Railway Purchase Act. The figures under India represent interest on the expenditure incurred in India on the extensions of the Bengal-Nagpur and Indian Midland Railways, which is met from rupee advances; and interest on advances made to the Bengal Central and Rohilkhand-Kumaon Railway Companies, in excess of Capital raised. The amount shown against the Mayavaram-Mutupet Railway represents interest at 4% on the Government loan to the Tanjore District Board. The excess of 12 under Local has been sanctioned by the Madras Govern-

239. The amounts shown against the Mayavaram-Mutupet Railway for interest on subscribed capital, represent interest on debentures, raised by the Tanjore District Board, for the construction of the Arantangi Extension, and payments to the sinking fund for the redemption of the debenture loan.

240. The excess of 1 under Local has been sanctioned by the Madras Government. The increases in England were due to additional capital raised.

39.—Guaranteed Companies—Surplus Profits, Land and Supervision.

Section H.—RAILWAYS—EXPENSES—*continued.*39.—Guaranteed Companies—Surplus Profits, Land and Supervision—*concluded.*

Surplus Profits.

241. The increase of 3,80 in payments on account of the Company's share of surplus profits of the Bombay, Baroda and Central India Railway, compared with the actuals of the previous year, was due to the better results of working during the year 1904, compared with those of 1903.

Land and Supervision.

242. Compared with the actuals of the previous year there was a net decrease in the charges for land and supervision of 1,09. The principal decreases were 53 in the Madras Presidency, due to exceptionally large expenditure in the previous year, on the acquisition of land for the enlargement of the Madras Railway goods shed at Royapuram, and 34 in the Bombay Presidency, due partly to less land having been acquired than in the previous year, and partly to some awards not being paid by the revenue authorities before the close of the year. The lapse of 2,99 on the Budget Estimate was due mainly to decreases of 48 in the Madras Presidency, and 2,44 in the Bombay Presidency owing to land not having been acquired to the extent anticipated.

39.—Guaranteed Companies—Interest.

1903-4. Accounts. R	INTEREST—	Budget. R	1904-5. Revised. R	Accounts. R
2,39	India	1,22	2,78	2,77
£		£	£	£
15,2		8,1	18,5	18,5
1,032,8	England	1,056,1	1,045,1	1,045,1
1,048,0	TOTAL	1,064,2	1,063,6	1,063,6

243. The increase, compared with the actuals of the previous year, follows on the steady growth of capital. The decrease, compared with the Budget Estimate, is attributable to the Companies not having raised the further capital as early as anticipated. The excess of 1,55 under India requires the formal sanction of Government.

40.—Subsidized Companies—Land, Subsidy, and Interest.

Section H.—RAILWAYS—EXPENSES—*continued.*40.—Subsidized Companies—Land, Subsidy, and Interest—*concluded.*

244. Compared with the actuals of the previous year there was a net increase of 2,96 in the payments for land and subsidy, made up of increases aggregating 4,88 and decreases 1,92. The principal increases were, 80 on the Bengal and North-Western Railway, and 2,56 on the Southern Punjab Railway Extensions, due to larger acquisition of land, and 1,48 on the Rohilkhand and Kumaon Extensions, due to the acquisition of land for these extensions in accordance with the terms of the contract; the principal decreases were, 1,09 on the Mayavaram Mutupet, and 56 on the Laksam-Noakhali Branch Railways, due to land acquisition for these lines having been completed. Compared with the Budget Estimate, the lapse of 2,51 under Imperial was due chiefly to the amounts provided for the Amritsar-Patti, Guntur Repalli, Dhone-Kurnool, Rawalpindi-Murree, Bezwada-Masulipatam and Phiringipuram-Gurzala Railways not having been utilised, and to smaller acquisition of land for the Bengal and North-Western and Rohilkhand and Kumaon Extensions Railways than provided for. The lapse of 1,51 under Provincial was due mainly to the provision for land for the Shahdara Saharanpur Tramway not having been utilised.

£ 54,4	EQUIVALENT IN STERLING	£ 58,0	£ 50,9	£ 48,3

245. The total outlay under Imperial is less than that of the previous year by 84. No useful comparison can be made between the outlay of the two years by individual projects, as surveys are being completed and new surveys are being started every year. The excesses of 38 on the Burma Surveys and 4 on the Cuddalore Vriddhachalam Survey, as compared with the Budget Estimate, have been sanctioned by the respective Local Governments.

Section J.—IRRIGATION.

246. The following is a general summary of the results under the head Irrigation :—

Section J.—IRRIGATION—RECEIPTS.

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
₹	RECEIPTS.	₹	₹	₹
4,36,76	India (Rupee figures) . . .	4,44,45	4,54,68	4,60,66
£		£	£	£
2,911,8	Equivalent in Sterling . . .	2,963,0	3,031,2	3,071,1

248. The increase, as compared with the actuals of the previous year, and the Budget Estimate, was due to the development of irrigation from the Canals in the Punjab, the Sone canals in Bengal, and the Lower Ganges canal in the United Provinces; also to the introduction, in Madras, of re-settlement rates on the Kistna project, and, in the Punjab, of water rates on the Sutlej and Muzaffargarh Inundation canal systems.

Section J.—IRRIGATION—RECEIPTS—concluded.

Direct Receipts—Imperial Works.

249. As compared with the Budget Estimate, the actuals for the year were better by 5,00, the increase being due to the development of irrigation from the canals in the Punjab. As compared with the previous year, there was a falling off of 18,90, which was chiefly due to the provincialisation of the receipts in the United Provinces from 1st April 1904.

Direct Receipts—Provincial Works.

250. The actuals for 1904-05 were better than the Budget Estimate and the receipts of the previous year by 6,90 and 30,05, respectively, the increase being due to better receipts from the Sone Canal in Bengal, and the Lower Ganges Canal in the United Provinces, and to the provincialisation of the receipts in the United Provinces from 1st April 1904.

Imperial Works.

255. The expenditure in 1904-05 was more than that in the previous year by R8,93. The increase was due to heavier charges for maintenance of canals in the Punjab, Madras, and Bombay. The actuals also exceeded the Budget Estimate by 8.73, the increase being due to the same causes. Additional grants to the extent of R8,11 were sanctioned by the Government of India.

Provincial Works.

256. The increase of 75 as compared with the actuals of the previous year occurred chiefly in the United Provinces, due to maintenance charges on the Mat Branch of the Ganges Canal, which was opened for irrigation during the year. Compared with the Budget Estimate there was a decrease of 62.

A.—Public Works in charge of Departmental Officers. B.—Public Works in charge of Civil Officers.

Imperial Works.

261. The revenue realised by Departmental Officers exceeded that of the previous year and the Budget Estimate, the increase being due to the credit to this head, under the terms of the new Provincial Settlement with Bengal, of the revenue of certain buildings which was originally classed as Provincial.

Provincial Works.

262. As compared with that of the previous year there was a falling off of revenue (5,42) realised by Departmental Officers, the decrease being mainly due to exceptional credits in the previous year from sales of buildings in Bengal, Burma, and Bombay. The actuals were in excess of the Budget Estimate by 2,74, the increase being due to better realisations in Bengal.

Local Works.

263. The revenue realised by Civil Officers exceeded that of the previous year and the Budget Estimate by 2,17 and 3,65, respectively. The increase was due to better receipts from ferry tolls, sales of land and buildings, and miscellaneous receipts in Bengal, the Punjab, and Madras.

Imperial Works.

267. The expenditure incurred by Departmental Officers in 1904-05 exceeded that of the previous year and the Budget Estimate by 16,46 and 8,27, respectively. The increase in Bengal and the United Provinces was on account of certain large works constructed, and also to the acquisition of premises No. 1, Council House Street, and No. 10, Hare Street, Calcutta. Of this excess 7,35 have been sanctioned and 92 require to be sanctioned.

268. The expenditure incurred by Civil Officers during 1904-05 exceeded that of the previous year by 1,48 and was less than the Budget Estimate by 1,21, the latter decrease being principally due to the non-utilisation of a special grant of 2,60.

Provincial Works.

269. The expenditure incurred by Departmental Officers during 1904-05 was less than that of the previous year by 5,00, and is made up principally of a decrease in Bengal (16,01), and an increase in the United Provinces (10,97). The decrease in Bengal was due to the expenditure in the previous year having included exceptional charges due to purchase of land and buildings, and the increase in the United Provinces, to large expenditure on original works. As compared with the Budget Estimate there was a decrease of 40,98. The principal decreases occurred in the Punjab (19,71) and Madras (11,92), and were due, in the Punjab, to the transfer to the Civil Department, during the year of the grant set aside for the Simla Extension Project, and in Madras, to the surrender of special grants amounting to 9 lakhs, and to the credit afforded on account of the readjustment of expenditure on Coast Lights.

270. The expenditure incurred by Civil Officers during 1904-05 exceeded that of the previous year by 9,27, the increase occurring mainly in Madras, and being due to the payment of a grant of 6,21 to the Madras Harbour Trust Board, and to other grants made to municipalities. As compared with the Budget Estimate there was an increase of 4,30 which was made up of increases in the United Provinces (3,83) and Madras (8,15), and a decrease in Bengal (8,31). The increases were due, in the United Provinces, mainly to grants given to municipalities for sanitary measures, and in Madras to the causes above explained. The decrease in Bengal was due to the non-utilisation of special grants.

Local Works.

271. The expenditure incurred by Departmental Officers during 1904-05 exceeded that of the previous year by 3,80, the increase being chiefly in the United Provinces, the Punjab, and Berar. As compared with the Budget Estimate there was a small excess of 30.

272. The expenditure incurred by Civil Officers during 1904-05 exceeded that of the previous year by 3,11. This increase was due to the continued improved financial position permitting of a larger programme of Public Works. As compared with the Budget Estimate there was a lapse of 11,29 due to progress of work being slower than anticipated.

<u>3,98</u>	GRAND TOTAL	<u>3,18</u>	<u>1,01</u>	<u>94</u>

274. The lapse of 2,26 on the Mayavaram-Mutupet Railway under Local, as compared with the Budget Estimate, was due to the postponement of the construction of certain bridges, and a permanent station at Punthottam, to the outlay on account of sinkage of formation and of gravel ballasting not having been as heavy as was anticipated and to larger sales of stores than provided for.

275. The excess of 2 over the Budget Estimate of the Jorhat State Railway has been sanctioned by the Assam Administration.

277. The receipts in India exceeded the Budget Estimate by R10,43 or £69,5, but fell short of the actuals of the previous year by R4,84 or £32,2. Compared with the Budget, the improvement was chiefly due to large sales of malt liquor, transport animals, fodder and farm animals; to recoveries on account of medical stores supplied to municipal, local fund and Government civil hospitals in connection with plague; to large issues of medical stores to the civil departments; to extensive sales of unserviceable ordnance stores from arsenals and factories; to realisations on account of Ordnance stores issued on payment to the Nepal Durbar and other Native States and the British East African Protectorate; to large sale proceeds of surplus stores and condemned animals on account of the Tibet Mission; to recoveries from the African Protectorates of the capitalized value of pensions to families of soldiers, and of pension contributions of men for service in those Protectorates; and to large contributions towards the Indian Military Service Family Pensions. The improvement would have been greater but for the adjustment by credit to the Imperial Government of the net value of Europe stores issued to and returned from China and Somaliland, and of the value of 110 horses returned from China. Compared with the actuals of the previous year the decrease was mainly due to large adjustments in 1903-04 by debit to the Imperial Government of the value of Europe stores issued from stock to South Africa, China and Somaliland, of peace equipment sent to China and Somaliland and of mounted infantry ponies sent to Somaliland; and to large recoveries in 1903-04 of contributions towards pensions of Indian Native soldiers lent for service in the African Protectorates.

278. The receipts in England fell short of the Budget Estimate by £8,3 owing chiefly to a decrease in receipts on account of the Indian Troop Service, and to reduced realisations of subscriptions towards Indian Military Service Family Pensions,

Section L.—ARMY SERVICES—*continued.*

279. The following statement shows separately the ordinary and special charges included under expenditure in India :—

1903-4. Accounts. R		Budget. R	1904-5. Revised. R	Accounts. R
...	RE-ORGANISATION	73,73	61,67
92,68	SPECIAL CHARGES . . .	58,05	1,20,97	1,14,32
18,35,39	Other Charges . . .	19,70,10	19,42,87	19,39,89
<u>19,28,07</u>	TOTAL . . .	<u>20,28,15</u>	<u>21,37,57</u>	<u>21,15,88</u>

280. No Budget provision was made under Re-organisation, but to meet expenditure in India in connection with the scheme, an extra grant of ₹83,07 was sanctioned in 1904-05, which was subsequently reduced to ₹81,46. The Revised Estimate anticipated expenditure to the extent of 73,73; but the actual expenditure amounted to only ₹61,67. The decrease was due chiefly to large lapses.

281. The total Budget provision and the actual expenditure for Special Charges are shown in detail below :—

Charges for—	Budget.	1904-5. Accounts.
Occupation of Chitral and its Communications . . .	7,87	7,99
Gilgit Agency	1,28	1,94
Tibet Mission	36,00	86,45
Aden Delimitation Commission	11,29	15,10
Seistan Boundary Commission	1,61	2,84
	<u>58,05</u>	<u>1,14,32</u>

282. The increase under Special Charges was mainly due to increased expenditure in connection with the Tibet Mission, the Aden Delimitation Commission, and the Seistan Boundary Commission. The increase under Tibet Mission was due to the augmentation of troops, and their maintenance for a longer period than provided for; that under Aden Delimitation Commission to charges having been incurred for the whole year instead of for six months only as provided in the Budget; and that under Seistan Boundary Commission to two-fifths of the expenditure on account of the 58th Silladar Camel Corps having been borne by Military, and to increased charges for the hire of camels. The excess under Gilgit Agency was due to arrear charges, and to certain supplies for the ensuing year having been laid in. Extra grants amounting to ₹66,50 were sanctioned for the Tibet Mission; from which a re-appropriation of ₹1,14 and an extra grant of ₹41 by transfer from the Budget grant under 25.—Political were sanctioned for the Seistan Boundary Commission, while the excesses under the Aden Delimitation Commission and Gilgit Agency were covered by re-appropriations only.

283. The details of the saving of 30,21 in the ordinary expenditure, as compared with the Budget, are shown by the following figures :—

	Budget.	1904-5. Accounts.	Excess + Savings —
Army and Garrison Staff	60,85	59,48	—1,37
Regimental Pay	9,83,41	9,80,98	—2,43
Supply and Transport	4,10,55	4,14,78	—1,77
Remount	57,88	49,61	—8,27
Clothing	31,36	28,76	—2,60
Medical	91,76	89,24	—2,52
Ordnance	1,25,60	1,17,85	—7,75
Miscellaneous	16,17	17,63	+1,46
Other heads	1,86,52	1,81,56	—4,96
TOTAL	<u>19,70,10</u>	<u>19,39,89</u>	<u>—30,21</u>

Section L.—ARMY SERVICES—*continued.*

284. The main causes of the above savings are given below:—

	R	R
(1) Savings in pay and maintenance charges of troops, etc., on service in China and Somaliland		15,13
(2) Lapse of the whole or a portion of the special provision made in the Budget on account of—		
Additional Officers for the Supply and Transport Corps	27	
Mobilization equipment for two British and eight Native infantry battalions required for the Northern line of communications	4,64	
Increase of the strength of the Native Army reserves by 2,500 men	3,00	
Raising of certain regiments of Native infantry to a strength of 912 men	4,12	
Additional horses in connection with (1) Re-organisation of Artillery—raising of certain batteries to the higher establishment, (2) re-introduction of signalling into batteries of Horse, Field, Heavy and Mountain Artillery, and (3) addition of 36 horses to each British Cavalry Regiment	1,00	
Formation of a Corps of Indian Coast Artillery	27	
Initial expenditure in connection with the formation of the 106th Hazara Pioneers	83	
Acquisition of land for rifle ranges for regular troops	94	
Re-organisation of transport in Burma	31	
Revision of the rates of pay of certain Military Medical appointments	39	
Organisation of Silladar Camel Corps	31	
Additional establishments for the Cordite and Rifle Factories	38	
	—	16,46
(3) Less charges under "Army and Garrison Staff" owing to the remodelling of the Musketry Staff in India, and to the abolition of the Madras Command Head-Quarter's Office		1,38
(4) Less charges for service pay and good conduct pay to British soldiers		7,00
(5) Less charges for food supplies for men and animals		13,00
(6) Small purchases of remounts; also of young stock (horses) and Ordnance mules		5,59
(7) Small purchases of clothing stores locally and less charges for making clothing, etc., regimentally		1,56
(8) Less charges for purchase and repair of barrack bedding		1,53
(9) Savings in the pay of Ordnance Officers and subordinates		1,25
(10) Less charges for extra temporary artificers in arsenals and factories		1,00
(11) Small purchases of local stores for arsenals and factories		2,00
(12) Small purchases of Camp equipage		1,60
(13) Saving in the India Estimate due to payment having been made in England for the value of coal supplied at Bombay to the Indian Troop Service Transports		1,15
		<hr/> 68,65

Section L.—ARMY SERVICES—*continued.*

	R	R
285. The more important excesses were:—		
(1) Increased charges for pay of British troops, owing to excess strength, and to the deduction in the Budget for probable savings not having been realised in full	6,00	
(2) Increased charges for pay of Regimental Officers, the deduction for probable savings having been only partially realised	11,00	
(3) More Supernumerary Officers as candidates for the Indian Army, and more Unattached List Officers, than provided for	1,60	
(4) Formation of the 2/6th and 2/9th Gurkha Rifles	1,40	
(5) Increased charges for conveyance of troops and stores	6,00	
(6) Large purchases of warm clothing for troops and followers	1,13	
(7) Large purchases of transport animals	1,40	
(8) Cost of mules taken over from the Imperial Government in Somaliland and charges for their conveyance to India	3,58	
(9) More charges for compensation in lieu of clothing	1,07	
(10) More charges on account of the Indian Troop Service owing to the conveyance of surplus troops and details to England	2,91	
(11) More non-effective charges	2,15	
		38,24

286. The grant heads under which the expenditure exceeded the Budget were:—

Ecclesiastical	10
Sea Transport Charges	2,15
Miscellaneous Services	56,99
Military Pensions to Europeans	39
Military Pensions to Natives	1,54
Departmental Pensions and Gratuities	62

287. Of the excesses, 9 under Ecclesiastical, 95 under Sea Transport Charges, 51 under Military Pensions to Natives and 32 under Departmental Pensions and Gratuities still require the sanction of the Government of India. The balance under these heads, and the whole of the excesses under Miscellaneous Services and Military Pensions to Europeans have been covered by re-appropriations and additional grants.

288. As compared with the actuals of the past year, there was an increase of 61,67 under Re-organisation, on which account there were no charges in 1903-04; of 21,64 under Special Charges, and of 1,04,50 under Other Charges. The increase under Special Charges was principally due to excess charges on account of the Gilgit Agency (66), Tibet Mission (41,33), and Seistan Boundary Commission (9) partly counterbalanced by reduced expenditure on account of the Occupation of Chitral and its Communications (56) and Aden Delimitation Commission (14,26). Under Other Charges, the excess of 1,27, under Army and Garrison Staff, was chiefly due to heavy expenditure connected with the re-organisation of the Mobilization and Intelligence Branches at Army Head Quarters, and to additional officers and establishment having been sanctioned for Military Districts on the abolition of the Musketry Staff from 1st September 1904. The excess of 96,41 under Regimental Pay, etc., was due to the grant of service pay to British soldiers; to the actual strength of British troops having been in excess of that in 1903-04; to large savings in 1903-04 on account of troops absent on service in Somaliland; to more Supernumerary and Unattached List Officers; to more officers having been present for duty; to officers having generally taken combined leave instead of furlough; and to the actual strength of reservists having been greater in 1904-05 than in 1903-04. The excess of 8,76 under Supply and Transport was mainly due to more officers and warrant and non-commissioned officers having been present for duty; to additional officers having been sanctioned; to large payments of

Section L.—ARMY SERVICES—continued.

allowance for charge of stores and animals ; to absence of savings on account of troops, etc., in Somaliland ; to large purchases of tinned meat, and malt liquor, and of animals for the Mule Corps ; to large charges for conveyance of British and Native troops and of Supply and Transport stores ; to extensive grass cultivation operations, and to large purchases of warm clothing for troops and followers. The increase of 2,81 under Remount and Veterinary was due to charges of breeding operations having been incurred for a part of the year only in 1903-04 ; to large purchases of remounts and to the acquisition of land at Ahmednagar ; of 65 under Barrack Establishments, etc., due to charges in connection with mechanical punkha pulling and electric lighting in barracks and hospitals at certain stations, and to more purchases of oil for stock. Under Medical the excess of 1,07 was due to the enhanced rates of pay of certain medical appointments ; to the increase in the strength of bearers of the Army Bearer Corps ; and to larger grants for construction of huts. The increase of 8,64 under Ordnance was chiefly due to additional establishments sanctioned for the Rifle and Cordite Factories, Central Gun Carriage Factory, and the Rolling Mills at Ishapore, and to purchases of local stores for these factories and for the Ammunition Factories and Harness and Saddlery Factories ; and of 3,72 under Sea Transport Charges due to the conveyance of surplus troops and details to England by the *Malta* and *Peninsular*. The excess of 90 under Military Pensions to Europeans was due to large payments of gratuities and of pensions and capitalized pensions to Commissioned Officers ; that of 42 under Departmental Pensions to more admissions to the Pension Establishment and large payments of gratuities.

289. The expenditure in England showed an increase of £472,9 under Effective Charges including £686,4 for Re-organisation stores, and £3,2 under Non-Effective Charges. Apart from the charge for Re-organisation for which there was no provision, there was a saving of £213,5 under Effective Charges, which was chiefly due to a decrease under Ordnance Stores of £392,2, as the payments in respect of batteries of artillery, for which the Budget provided £500,0 under this head, have been charged under "Re-organisation ;" and to the number of officers provided with passages, otherwise than in transports, having been smaller than was provided for ; partly counterbalanced by increased payments to the War Office in respect of British Forces serving in India, due to a refund expected in 1904-05 having been received on the 31st March 1904 ; to increased charges under Furlough pay, owing to a large number of officers of the Indian Service being on furlough, and in furlough pay of British forces serving in India ; to large payments for conveyance of drafts from South Africa to India ; to the pay and expenses of Representatives with the Field Forces in Manchuria ; and to the purchase of stallions provided for under Scientific and other Minor Departments. Under Non-Effective Charges the excess was in the payments to the War Office for retired pay, etc., of British Forces for service in India, and partial refunds of contributions towards pension of Indian Native soldiers lent for Imperial Service ; partly counterbalanced by decreases in the pay of non-effective Colonels of Royal Artillery, pay and pensions of non-effective and retired officers of the Indian Service, and Indian Military Service Family Pensions.

290. The receipts in India showed an improvement of 10,43 over the Budget Estimate. The increase was mainly due to extensive sales of transport animals, and unserviceable ordnance stores; to large recoveries on account of medical stores issued in connection with plague and of ordnance stores issued to Native States on payment; to unexpected receipts on account of the Tibet Mission; and to large contributions towards the Indian Military Service Family Pensions; partly counterbalanced by the adjustment, by credit to the Imperial Government, of the value of Europe stores returned from China and Somaliland. The excess was spread over almost all the heads, and the principal variations are given below.

291. There was a net increase of 1,65 under *Supply and Transport* chiefly due to large sales of malt liquor, fodder, and farm animals, and of transport animals; and to more miscellaneous transport receipts for hire of cattle, sale of old equipment, etc., partly counterbalanced by small sales of provisions stores and rum, and by small recoveries on account of supplies made to the Chitral Garrison on payment. The increase of 10 under *Regimental Pay, etc.*, was due to a large number of soldiers having purchased their discharge at the enhanced rate, and to sale-proceeds of materials of the native lines at Trichinopoly. Under *Medical Establishments, etc.*, the increase of 1,60 was mainly due to large recoveries on account of stores supplied to Municipal, Local Fund and Government Civil Hospitals in connection with plague, and to large issues to the Civil Department; partly counterbalanced by debits for the value of Europe stores returned from China and Somaliland. The large increase of 3,29 under *Ordnance Establishments, etc.*, was attributable to extensive sales of unserviceable ordnance stores from arsenals and factories; to recoveries on account of ordnance stores issued to certain Native States on payment; to the realisation of the value of ammunition destroyed by fire from the Eastern Bengal State Railway; and to issues to other departments; partly counterbalanced by the adjustment, by credit to the Imperial Government of the net value of Europe stores returned from China and Somaliland. More receipts on account of Tibet Mission, counterbalanced to a certain extent by short recoveries of fines and forfeitures from contractors and others, account for the increase of 2,70 under *Miscellaneous Services*. The actuals (29) under

Section L.—ARMY SERVICES—RECEIPTS—concluded.**XXXIII.—Army—concluded.**

Military Pensions to Natives represents recoveries from the African Protectorates of the capitalized value of pensions granted to the families of soldiers, and of pension contributions of men, for service in those Protectorates. The increase of 1,02 under *Family Pensions, etc., to Europeans* represents mainly contributions towards Indian Military Service Family Pensions. Against all these increases there is a decrease of 12 under *Remount, etc.*, due to a small number of chargers having been sold to officers, and to debits for the value of 110 horses returned from China; and of 20 under *Clothing Establishments, etc.*, due to small sales of regimental necessaries, partly counterbalanced by credits for the value of clothing supplied to the South African constabulary, and of the ordinary peace equipment taken by the 11th Rajputs to Mauritius, and for value of Europe stores issued from stock to China.

292. The receipts in England under *Effective* and *Non-Effective Services* were less than the Budget by £8,3. The decrease under *Effective Services* was mainly due to a decrease in receipts on account of the Indian Troop Service; and that under *Non-Effective Services* to an over-estimate of the subscriptions towards Indian Military Service Family Pensions.

293. As compared with the Budget there was a net saving of 1,38 under this head. The saving under *Lieutenant-Generals Commanding the Forces* (37) occurred chiefly under salaries, due mainly to the absence of certain officers on leave; to the abolition of the appointments of Assistant Military Secretary and Native Aid-de-Camp to the Lieutenant-General Commanding late Madras Command under the reorganisation scheme; and to less tour charges. There were also savings under *Musketry Inspection* (1,05), *Hill Sanitaria* (36), *Miscellaneous depôts* (16) and *Mounted Infantry Schools* (10) mainly under salaries. Under the first head, the decrease was due to the abolition of the Musketry Staff of Commands, as a separate body, from 1st September 1904; under the second, to certain appointments being vacant, to lower rates of pay having been drawn for certain officers, and to savings in the pay of establishments; under the third, to less charges for salaries due to the abolition of the Pallaveram Depôt, and under the last, to the absence of officers on leave, and variations in army rank. Against these savings there were excesses under *Commander-in-Chief* (23) owing mainly to more tour expenses and under *District Commands* (51) due to more charges for salaries of additional Officers and Establishments for the Military Districts consequent on the abolition of the musketry staff. The decrease under *Artillery Branch* (21), and the increase under *Adjutant General* (13), were mainly attributable to the transfer of the charges of the establishment of the Head Quarters Offices, Bengal and Punjab Commands, from the former to the latter head. As compared with the actuals of the previous year the increase was mainly due to large expenditure connected with the reorganisation of the Mobilization and Intelligence Branches at Army Head Quarters, and to additional officers and establishments sanctioned for Districts on the abolition of the Musketry Staff.

Administrative Staff—concluded.

294. The principal decreases in this head occurred under *Accountant General, Military Department* (10), *Pay Branch* (14), *Supply and Transport Branch* (18), and *Inspections, Special Duties and Probationers* (27), and were due to the deduction made in the Budget for probable savings having proved insufficient; to the pay of the Accountant General, Assistant Controller and Deputy Examiners for March 1904 having been drawn in advance in that month and compiled in the accounts of 1903-04; to less charges for salaries, due chiefly to the absence of senior and presence of junior officers on duty; and to the absence of certain establishments in Somaliland. These savings were partly counterbalanced by small increases under *Ordnance and Clothing Branches* (7) and *Circle, Field and Pension Pay Offices* (5) due chiefly to the higher rate of pay of one of the Examiners; to the entertainment of temporary establishments; to the higher departmental grade of the Presidency Paymaster, Bombay; and to the deduction for probable savings not having been realised. The excess over the previous year was due to more charges for salaries and establishments chiefly under *Pay Branch* and *Circle, Field and Pension Pay Offices*.

Regimental Pay.

1903-4 Accounts.						Budget.	1904-5. Revised.	Accounts.
4,26,78	European Army	5,01,98	5,02,10	5,02,58
4,57,79	Native Army	4,81,43	4,73,65	4,78,40
88	Special Services	63	62	50
<u>8,85,45</u>						<u>9,84,04</u>	<u>9,76,37</u>	<u>9,81,48</u>
	TOTAL	.						

295. As compared with the Budget, the decrease in this grant occurred chiefly under *Native Army* and was due to the absence of troops in China and Somaliland; to less charges for good service and good conduct pay; to the lapse of the special provision for an increase to the strength of certain native infantry regiments and of the native army reserve; to the mustering out of the 65th Carnatic Light Infantry and 71st Coorg Rifles; and to less charges for batta owing to the abolition of marching batta to Native Soldiers enlisted from 1st April 1904; partly counterbalanced by the formation of the 2-6th and 2-9th Gurkha Rifles, and by a special grant having been sanctioned for the construction of lines at Bolarum. The decrease under *Special Services* was on account of less charges of batta, etc., than anticipated. These decreases were to some extent counterbalanced by an increase under *European Army*, owing chiefly to more charges for pay of officers, warrant and non-commissioned officers, rank and file, owing to the deduction for probable savings not having been fully realised; and to more supernumerary and unattached list officers having been present on duty. As compared with the actuals of the past year, the increase was mainly due to the grant of service pay to British soldiers; to the actual strength of British troops having been in excess of that in the previous year; to officers having generally taken combined leave instead of furlough; to more officers, and of higher rank, having been present on duty; to the formation of the 106th, Hazara Pioneers; and to less savings than in 1903-04, due to the reconstitution of native infantry regiments in the late Madras Command, and to the absence of certain troops in that year in Somaliland.

296. The details of the principal sub-heads of the European Army are given below:—

1903-4. Accounts.						Budget.	1904-5. Revised.	Accounts.
1,13,37	Artillery	1,28,39	1,28,94	1,29,77
42,59	Cavalry	46,23	48,01	48,14
20	Engineers	13	22	29
2,58,19	Infantry	3,12,54	3,11,71	3,10,57
20	Invalid and Veteran Establishment	23	18	17
8,98	Officers of the Indian Army, General List of Officers, Unattached and Unemployed Officers	11,50	9,58	9,79
5	Colonel's Allowances
3,20	Other Charges	2,96	3,46	3,85
<u>4,26,78</u>						<u>5,01,98</u>	<u>5,02,10</u>	<u>5,02,58</u>
	TOTAL	.						

297. The increases under *Artillery* (1,38) and *Cavalry* (1,91) were chiefly due to more charges for pay of officers, warrant and non-commissioned officers, rank, and file, owing to the deduction for probable savings not having been realised; to increased payments of good conduct pay; to excess strength; to payment of extra 2d. a day to British soldiers for upkeep of kit, etc., and to more expenditure for shoeing allowance consequent on the increase in the number of horses for Royal Horse and Field batteries, and for British cavalry regiments; partly counterbalanced by decrease in charges for service pay to British soldiers, the reduction of the drivers establishment of ammunition columns of Royal Horse and Field Artillery, and for command staff and horse allowances due to the re-organisation of the artillery brigade staff. The excess under *Engineers* (16) was chiefly due to the pay of an officer being charged to this head while undergoing training in railway locomotive work; to half-pay of an

Section L.—ARMY SERVICES—EXPENDITURE—continued.

Regimental Pay—concluded.

officer of the Eastern Szuchuen Exploration Party; and to more unemployed officers. Under *Other Charges* (89), the increase was mainly due to arrear charges for annual grant-in-aid of half-mounting having been paid; to special grants for hutting money having been sanctioned; and to an increase in the number of soldiers in receipt of family allowances. Against all these increases, there were savings under *Infantry* (1,97), *Invalid and Veteran Establishment* (6), and *Officers of the Indian Army, etc.* (1,71). Under the first head the saving is attributable to less charges for good conduct pay, and for service pay to British soldiers, due to fewer men than anticipated having elected the service pay rules, partly counterbalanced by increased charges for pay of officers, warrant and non-commissioned officers, rank and file, owing to the deduction for probable savings not having been realised; that under the second head, to a casualty; and that under the third, to the compilation of charges on account of additional officers, provided for under this head, under *Native Cavalry and Infantry*. The large excess over the actuals of the previous year under European Army was chiefly due to the grant of service pay to British soldiers; to more charges for pay of officers; to the actual strength of British troops having been in excess of that in the past year, and to the absence in 1903-04 of certain troops in Somaliland, partly counterbalanced by less charges for good conduct pay.

298. The details of the principal sub-heads under the Native Army are as follow:—

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
8,77	Artillery	8,56	8,50	8,55
1,17	Body-Guard	1,15	1,09	1,11
1,40,94	Cavalry	1,41,22	1,42,06	1,42,10
13,45	Sappers and Miners	15,36	15,43	15,22
2,61,28	Infantry	2,80,59	2,72,00	2,77,01
5,76	Annual grant-in-aid of half-mounting	5,56	5,40	5,77
4,25	Kit-money for Recruits	4,33	4,46	4,17
5,59	Hutting Money	3,10	4,41	3,95
8,75	Reserve Forces	12,87	12,30	11,69
7,83	Other Charges	8,69	8,00	7,83
4,57,79	TOTAL	4,81,43	4,73,65	4,78,40

299. Under Native Army the saving under *Infantry* (3,58) was chiefly due to reduced charges for pay of native commissioned, non-commissioned officers, rank and file, and good service and good conduct pay owing to the absence of troops in China and Somaliland; to the lapse of the provision for an increase to the strength of certain native infantry regiments; and to the mustering out of the 65th Carnatic Light Infantry and 71st Coorg Rifles; partly counterbalanced by the deduction made in the Budget for probable savings not having been fully realised; by charges on account of 106th Hazara Pioneers; the formation of the 2-6th and 2-9th Gurkha Rifles, and command, staff and horse allowance of additional officers sanctioned. The decrease under *Reserve Forces* (1,18) was mainly due to the lapse of the special provision (1,50) for an increase to the strength of the reserves, partly counterbalanced by arrear charges; and that under *Other Charges* (86) to less charges for pay of officers, and command and staff allowances of the Indian Sub-Marine Mining Corps and Recruiting Depôts; and to the abolition of marching batta to Native soldiers enlisted after 1st April 1904. There were also small savings under *Sappers and Miners* (14) and *Kit-money for Recruits* (16). Under the first head, the decrease was chiefly due to short strength and the absence of troops on service in Somaliland; that under the second, to the lapse of the provision in connection with the raising of the strength of certain Native Infantry Regiments, and to few enlistments, partly counterbalanced by the formation of the 106th Hazara Pioneers and the 2-6th and 2-9th Gurkha Rifles. These savings were, to some extent counterbalanced by excess expenditure under *Cavalry* (1,88) *Annual grants-in-aid of Half Mounting* (21), and *Hutting Money* (85). The increase under *Cavalry* was due to charges for pay of officers provided under European Army, increased command, staff, and horse allowances, and exchange compensation allowance owing to additional officers having been sanctioned, partly counterbalanced by less charges for good service and good conduct pay. The excess under *Annual grants-in-aid, etc.*, was due to larger payments than were anticipated; and that under *Hutting Money* to a special grant having been sanctioned for the construction of lines at Bolaram, partly counterbalanced by a saving in the Punjab Command. The excess under Native Army over the actuals of the previous year (20,61) was chiefly due to additional officers having been sanctioned; to more officers having been present for duty; to officers having generally taken combined leave instead of furlough; to the formation of the 106th Hazara Pioneers; to less savings than in 1903-04, owing to the reconstitution of Native Infantry regiments in the late Madras Command and to the actual strength of reservists having been greater than in the previous year; partly counterbalanced by smaller charges under *Hutting Money* than in 1903-04, owing to the construction of lines for the Hyderabad contingent in that year.

Section L.—ARMY SERVICES—EXPENDITURE—continued.

Supply and Transport Charges.

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
69,23	Establishment	73,41	70,63	70,97
1,67,93	Supplies	1,88,10	1,75,34	1,77,07
1,26,03	Services	1,20,35	1,27,64	1,26,06
42,83	Transport Branch	34,69	37,08	40,68
13,00	Special Services	7,79	8,14	8,62
<u>4,19,02</u>		<u>4,24,34</u>	<u>4,18,83</u>	<u>4,23,40</u>

300. The decrease in this head occurred under *Establishment* (2,44) and *Supplies* (11,03), and was chiefly due to the absence of officers in China and Somaliland and on leave; to the partial lapse of the provision for additional officers; to the employment of small cattle establishments owing to short complement of animals; to cheaper rates of articles of food for men and animals; to small purchases of ration articles other than bread and meat; to the lapse of the special grant for mobilization stores; to no charges for supplies to troops and followers at Guntok; and to less transport charges for provisions consequent on the evacuation of the Southern Shan States. These savings were partly counterbalanced by increases under *Services* (5,71) *Transport Branch* (5,99) and *Special Services* (83). The excess under *Services* was mainly due to more conveyance charges of European and Native troops owing to a large number of men of the reconstituted regiments of the late Madras Command having proceeded on furlough; to the mustering out of the 65th Carnatic Light Infantry and 71st Coorg Rifles; to heavy consignments of supply and transport, clothing and ordnance stores by rail and water; and to replacements of warm clothing issued from stock to China and Somaliland. The increase under *Transport Branch* was chiefly due to heavy advances made for purchase of animals, especially mules; to large purchases and repairs of gear carts and equipments owing to more condemnations; and to replacements of uniform clothing and other stores issued from stock to China and Somaliland; partly counterbalanced by small charges for feed of animals owing to short strength of animals and cheap rates for articles of feed. Under *Special Services*, the small excess was due to increased charges on account of the Gilgit Agency, and to the purchase of supplies for the next year. The increase, compared with the actuals of the past year, was chiefly due to more officers, and warrant and non-commissioned officers, having been present for duty; to additional officers having been sanctioned; to large payments of allowances for charge of stores and animals; to the entire charge of the 58th Silladar Camel Corps with the Seistan Boundary Commission having been borne by the civil department in 1903-04; to large purchases of tinned meat, malt liquor, and transport animals; and to more conveyance charges of European and Native troops.

301. The details of the expenditure under *Establishment* are given below:—

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
6,71	Supervising Staff	6,77	6,48	6,50
24,42	Executive Establishment	28,68	28,00	27,73
30,85	Transport	34,54	32,86	33,58
7,13	Subordinate Establishment	3,26	3,20	3,18
13	Other Heads	16	9	—2
<u>69,23</u>	TOTAL	<u>73,41</u>	<u>70,63</u>	<u>70,97</u>

302. The decrease under *Supervising Staff* (27) was chiefly due to the absence of officers in Somaliland (8); to officers on leave (20); to the non-appointment of one of the assistants to the Inspector-General, Supply and Transport (9); and to the payment of the privilege leave allowance of an officer in England (5); partly counterbalanced by more travelling charges (10), and by increased charges for pay owing to fixed rate having been sanctioned for the office of the Inspector-General, Supply and Transport (4). Under *Executive Establishment* (95) the saving was mainly due to the partial lapse of the provision for additional officers (26); to the absence of officers and establishments in Somaliland (11); to less charges for travelling, contingencies, and stores (40); and to the deduction for probable savings having proved insufficient. The decrease under *Transport* (96) was caused by the employment of small cattle establishments owing to short complement of animals (45); by short strength of European and Native Establishments of the Mule Corps (34); by the debit to the civil department of three-fifths of the expenditure of the 58th Silladar Camel Corps employed with the Seistan Boundary Commission (66); and by the short strength of the reserve of mule drivers and artificers (32); partly counterbalanced by more travelling charges (47); by increased charges of the Transport Enumeration Department; and by the insufficient provision for the working of the mechanical transport at Quetta. The compilation of the water-supply charges under a different head resulted in a saving under *Subordinate Establishment*. The minus figure under *Other Heads* was mainly due to the large recoveries of the Agent for Government Consignments for stores landed for other departments.

Section L.—ARMY SERVICES—EXPENDITURE—continued.

Supply and Transport Charges—continued.

Under *Supplies* the details are as follows:—

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.

1,04	Purchase of Reserve Stock	2,42	2,45	2,12
29,26	Malt Liquor purchased locally	29,50	30,00	30,44
29	Rum	62	47	43
2,49	Dairy Farms	83	89
2	Contingent Expenses	1	1	...
1,81,04		1,88,27	1,76,30	1,78,99
13,11	Deduct—Value of Supplies to other Departments .	17	96	1,92
1,67,93	TOTAL .	1,88,10	1,75,34	1,77,07

303. The saving of 1,55 under *Provisions for Europeans* was chiefly due to the supply of bread at cheaper rates (2,16); and to small purchases of ration articles other than bread and meat (1,01); partly counterbalanced by increased charges for messing allowance (79) and compensation in lieu of rations (36) owing to the large number of men in receipt of these allowances, and high rates for slaughter cattle; that of 1,69 under *Provisions for Natives* to the lapse of the provision for Mobilization stores (57); to the withdrawal of regular troops from certain posts on the North-West Frontier (20); to no charges for supplies for troops and followers at Guntok (38); to reduced money allowance in lieu of free rations to troops at Quetta, Aden and the Persian Gulf, owing to cheap rates (31); and to decrease in transport charges for provisions owing to the small quantity of stores despatched to Keng Tung, Jask and Charbar (26). The decreases under *Compensation to Natives for dearness of provisions* (4,10), and *Compensation to Natives for dearness of forage* (3,27) are mainly attributable to cheaper rates of articles of food both for men and animals. Small purchases during the year resulted in savings under *Purchase of Reserve Stock* (30) and *Rum* (19). The increase of 94 under *Malt liquor purchased locally* was mainly due to large purchases; and that under *Dairy Farms*, to the establishment of new, and extension of existing dairies for which reappropriations were sanctioned. The deduction for *Value of Supplies, etc.*, includes credits for the value of stores issued from stock to China and Somaliland.

304. Under *Services* the following are the details:—

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
4,69	Hire of Transport	4,92	5,70	5,72
5,02	Sea and Inland Water Charges	3,89	4,67	4,53
54,20	Railway Charges	48,99	53,36	53,70
16,35	Grass Cultivation	17,54	17,15	16,60
29,99	Feed of Horses, Battery Mules, Yabooks, Bullocks and Elephants	30,34	30,05	30,39
76	Regimental Equipment and Camp Contingencies .	1,68	1,67	97
5,76	Implements, Godown Furniture, etc.	3,89	4,44	3,79
9,26	Other Heads	9,10	10,60	10,36
1,26,03	TOTAL .	1,20,35	1,27,64	1,26,06

305. Under *Hire of Transport* the increase of expenditure (80) was chiefly due to more conveyance charges of European and Native troops, and of supply and transport and ordnance stores. The excesses under *Sea and Inland Water Charges* (64) and *Railway Charges* (4,71) were mainly due to more movements of European and Native troops by rail (2,63) owing to a large number of men, of the reconstituted regiments of the late Madras Command having proceeded on furlough, and to the mustering out of the 65th Carnatic Light Infantry and 71st Coorg Rifles; and to heavy consignments of supply and transport, clothing and ordnance stores (3,04) both by rail and water; partly counterbalanced by less charges of conveyance of native troops by water (28), and of medical stores by rail (12). The increase under *Other Heads* (1,26) was chiefly attributable to large replacements of warm clothing for troops and followers issued from stock to China and Somaliland; to increased charges for water-supply in cantonments and certain stations; and to toll on troops at Bombay and Karachi; partly counterbalanced by small purchases of mules for corps, battery bullocks, and of reserves of fodder. Against these increases there were decreases under *Grass Cultivation* (94), *Regimental Equipment, etc.*, (71), and *Implements, Godown Furniture, etc.*, (10). The saving under the first head was due to low charges for green grass, hay and dry-bedding making operations, and training of officers in farm duties, partly counterbalanced by increased charges for head quarters management, owing to the appointment of an additional Assistant Director of Farms, and to higher rates of pay, for general improvements and additions to stock and repairs to building and machinery: that under the second and third heads, to the lapse of the provision for mobilization equipment.

Section L.—ARMY SERVICES—EXPENDITURE—continued.

Supply and Transport Charges—concluded.

306. The details of the charges in the *Transport Branch* are as follows :—

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
25,14	Unorganised Transport	15,31	15,33	19,09
13,15	Mule Corps	14,57	16,66	16,34
2,57	Mule Cadres	2,22	2,31	2,35
1,34	Silladar Camel Corps	1,40	1,46	1,75
25	Pony Cart Train Cadres	31	31	34
1	Service Grantee Camel Corps	2	2	3
...	Ghilzai Camel Corps	27	7
...	Mechanical Transport	30	24	13
37	Transport charges connected with Army Bearer Corps	56	48	58
<u>42,83</u>	TOTAL .	<u>34,69</u>	<u>37,08</u>	<u>40,68</u>

307. The excess of expenditure under *Unorganised Transport* (3,78) was chiefly due to charges for purchase of mules, purchase and repair of gear, carts and equipment, and for uniform clothing owing mainly to replacements of stores issued from stock to China and Somaliland, and to larger condemnations than were expected; partly counterbalanced by reduced charges for feed of animals owing to short strength and cheaper rates, and by low miscellaneous charges. Under *Mule Corps* the excess of 1,77 was mainly due to increased charges for purchase of animals, owing chiefly to a credit afforded to the War Office on account of cost of mules returned from Somaliland, partly counterbalanced by cheaper rates of forage, low charges for purchase and repair of carts, gear and equipment, and the lapse of the provision for organizing the corps, and the reorganisation of transport in Burma. The excesses of 13 under *Mule Cadres*, and 35 under *Silladar Camel Corps* were due to more charges for feed of animals, partly counterbalanced by the partial lapse of the provision for organising Silladar Camel Corps. The expenditure under *Ghilzai Camel Corps* (7) represents the initial expenditure, provided for by reappropriation for organizing the corps. Small purchases of stores account for the saving of 17 under *Mechanical Transport*.

Remount and Veterinary.

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
80	Supervising Staff	73	75	79
3,48	Depôt Establishments	4,10	3,50	3,60
1,10	Veterinary Inspection	1,17	1,16	1,17
2,84	Station Veterinary Hospitals	3,14	3,05	3,19
5	Veterinary Schools	6	6	6
12	Remount Depôt, Garden Reach	13	13	10
11	Mule Purchasing Agency
22,21	Purchase of Remounts	29,57	25,08	23,68
4,73	Feed of Cattle and Remounts	5,75	4,23	4,45
4,54	Horse, Mule and Donkey Breeding Operations	7,24	7,14	6,27
6,82	Miscellaneous	5,99	5,98	6,30
<u>46,80</u>	TOTAL .	<u>57,88</u>	<u>51,08</u>	<u>49,61</u>

308. The saving of 5,89 under *Purchase of Remounts* was chiefly due to the partial lapse of the provision for additional horses in connection with the reorganisation of artillery, reintroduction of signalling into the various artillery regiments, and addition of 36 horses to each British Cavalry Regiment; and to small purchases of young stock and ordnance mules: that of 1,30 under *Feed of Cattle and Remounts* to cheaper rates of grain and fodder, and to the small number of ordnance mules maintained at depôts, partly counterbalanced by purchase of stock (34). The decrease of 50 under *Depôt Establishments* was mainly attributable to a saving in the provision for the subordinate staff for the young stock run and depôt at Mona. Under *Horse Mule and Donkey Breeding operations*, the saving of 97 was due to the short strength of Native establishment; to the purchase in England of four Arab stallions provided for under this head; and to low feeding charges due to the small number of animals maintained, and to small purchases of articles of feed; partly counterbalanced by increased miscellaneous charges. There were on the other hand excesses under *Supervising Staff* (6), *Station Veterinary Hospitals* (5) and *Miscellaneous* (31). The increase under *Supervising Staff* was chiefly due to an advance of pay taken by the Director General and his Office establishment; that under *Station Veterinary Hospitals* to high charges for travelling, and that under *Miscellaneous* to increased road expenses of cattle and remounts and to high charges for contingencies, cattle gear and rolling stock, partly counterbalanced by less cultivation operations.

Section L.—ARMY SERVICES—EXPENDITURE—continued.

Clothing Establishments.

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
1,11	Superintending Establishments	1,11	1,17	1,20
66	Manufacturing and Store Establishments	78	72	67
	Supplies and Services—			
18,76	Factories	16,85	14,38	15,15
4,03	Regimental	4,35	4,34	3,89
8,62	Compensation in lieu of clothing	8,39	9,48	9,44
23	Special Services	12	13	22
33,41		31,60	30,22	30,57
1,56	Deduct—Value of stores supplied to other Departments	12	72	1,59
31,85	TOTAL	31,48	29,50	28,98

309. The increase under *Superintending Establishments* (9) was chiefly due to the appointment of two Assistant Superintendents of Factories; and that under *Supplies and Services—Compensation in lieu of Clothing* (1,05) to more claims for compensation having been preferred than were anticipated. The excess under *Special Services* (10) was partly due to the adjustment, under Occupation of Chitral and its Communications, of the value of warm coats returned from South Africa, and partly to replacements of clothing required for that service. Under *Manufacturing and Store Establishments* the saving (11) was mainly due to the absence of certain employes on leave out of India, and to temporary establishments not having been employed to the extent anticipated. The decrease under *Supplies and Services—Factories* (1,70) was chiefly due to the lapse of the special provision for mobilisation equipment, and to small purchases of local stores; partly counterbalanced by the adjustment, by credit to the Imperial Government, of the value of warm coats returned from South Africa. Under *Supplies and Services—Regimental* (46) the saving was due to low making-charges of clothing at head quarters of regiments, owing to more compensation in lieu of clothing having been drawn by units, and to the new system of supplying clothing; partly counterbalanced by increased charges for clothing for reservists owing to large condemnations. The credit under *Value of Stores supplied to other Departments* was enhanced by debit to His Majesty's Imperial Government for value of stores issued from stock to South Africa, China, and to the South African Constabulary, and to large issues to other departments; partly counterbalanced by the adjustments of the value of local stores returned from Somaliland.

Barrack Establishments.

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
5,69	Subordinate Establishments	5,49	5,61	5,33
...	Mechanical Punkha pulling and Electric Lighting	83	87
3,76	Barrack Bedding	4,76	4,37	3,44
3,79	Lighting Charges other than by Electricity	3,77	3,60	4,02
7,56	Miscellaneous	7,51	7,58	7,73
31	Special Services	17	19	20
21,11		21,70	22,18	21,59
17	Deduct—Value of Supplies to other Departments	5	—5	...
20,94	TOTAL	21,65	22,23	21,59

310. The saving under *Subordinate Establishments* (16) was chiefly due to the lapse of the provision for the trolley removal system of conservancy at Bangalore, and to small conservancy and tattie watering establishment employed. The actuals under *Mechanical Punkha, etc.*, (87), represent working expenses debited by the Military Works Department, to meet which funds were provided by reappropriation. The saving under *Barrack Bedding* (1,32) was mainly due to small purchases owing to the extension of the period of duration of blankets and satranjees, and to low charges for repair and washing of bedding. The increase under *Lighting Charges, etc.* (25) was due chiefly to purchase of oil for stock; partly counterbalanced by the replacement of Kerosine oil and gas at certain stations by electricity. The excess under *Miscellaneous* (22) was due to high prices of firewood, and to large issues of fuel; partly counterbalanced by small condemnations of miscellaneous articles in barrack and hospital.

Section L.—ARMY SERVICES—EXPENDITURE—continued.
Administration of Martial Law.

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
Judge Advocate General's Department—				
56	Head Quarters	62	52	53
1,45	Commands	1,04	1,12	1,12
1,55	Miscellaneous	1,77	1,68	1,64
<u>3,56</u>	TOTAL .	<u>3,43</u>	<u>3,32</u>	<u>3,29</u>

311. The saving under *Head Quarters* (9) was chiefly due to no expenditure having been incurred for training of Cantonment Magistrates attached to the Judge Advocate General's Department; to the abolition of the appointment of Assistant Judge Advocate General at Army Head Quarters, and to savings in pay of office establishment. The excess under *Commands* (8) was mainly due to the scheme for the redistribution of Staff Officers, for which a deduction was made in the Budget, having taken effect from 1st June instead of 1st April 1904; partly counterbalanced by savings under Exchange Compensation Allowance. Low charges for regimental, garrison and station prisons, owing to a reduction in the number of prisoners, and the abolition of military prisons at certain stations account for the saving under *Miscellaneous*.

Medical Establishments.

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
Medical Establishment—				
3,37	Head-Quarters and Commands	3,42	3,24	3,38
45,12	Districts	47,61	45,95	45,59
1,59	Nursing Service	2,02	1,97	1,96
5,27	Sanitation of Cantonments and Cantonment Hospitals	4,43	4,02	4,14
6,50	Army Bearer Corps	7,39	7,87	7,33
4,03	Army Hospital Corps	4,12	4,50	4,50
2,00	Medical Store Depôts	2,04	2,02	2,06
10	Followers' Hospitals	9	9	10
1,75	Miscellaneous	1,82	1,70	1,61
22,55	Medical Supplies	21,90	22,35	22,82
<i>Deduct—</i>				
4,11	Issues to other Departments	3,08	3,54	4,25
18,44		18,82	18,81	18,57
15	Special Services	6	6	8
<u>88,32</u>	TOTAL .	<u>91,82</u>	<u>90,23</u>	<u>89,32</u>

312. The saving of 2,02 under *Medical Establishment—Districts* was chiefly due to the absence of certain Medical Officers and subordinates in China and Somaliland; to the partial lapse of the provision for revision of rates of pay of certain Military Medical appointments; to the insufficiency of the deduction in the Budget for probable savings; and to pay of hospital dhobies having been compiled under *Army Hospital Corps* which caused an excess of 38 under that head. The decrease of 29 under *Sanitation of Cantonments, etc.* (29) was mainly due to a credit afforded by the Public Works Department, Burma, in connection with the Rangoon Sudder Bazar Expropriation Scheme; partly counterbalanced by increased charges for salaries owing to variation in army ranks of certain Sanitary officers. Under *Miscellaneous* the saving of 21 was due to the small number of military pupils at Medical Colleges and Schools. The saving of 6 under *Nursing Service* is attributable to short strength of Nursing Sisters; and that of 6 under *Army Bearer Corps* to short strength of and less clothing charges for bearers, counterbalanced by increased travelling charges, and by a special grant for construction of huts. The excess of 92 under *Medical Supplies* was due to large purchases of Medical and Surgical stores for depôts to meet increased demands by civil institutions, owing to the prevalence of plague; to the revision of surgical and medical equipment of field hospitals, and, to increased charges for hospital supplies; partly counterbalanced by small purchases for hospital equipment, and low charges for dieting the sick. The credit under *Issues to other Departments* was mainly due to large demands by Civil institutions, partly counterbalanced by debits for the value of local stores returned from China and Somaliland.

	TOTAL			

313. Under *Establishments—Arsenals and Depôts*, the saving of 69 was chiefly due to the small number of officers present on duty, to the deputation of European subordinates to England, and to savings in office establishments; partly counterbalanced by increased expenditure for extra temporary artificers and others, and for construction of ordnance lascar lines. The decrease of 1,82 under *Establishments—Factories* was mainly due to savings in the provision for additional Establishments for the Rifle and Cordite Factories; to an insufficient deduction in the Budget for probable savings; and to short strength of extra temporary artificers and others, owing to reduced outturn of ordinary work in consequence of the manufacture of articles the cost of which was debitable to the Reorganisation grant. The saving of 3,91 under *Stores—for Arsenals and Depôts* was mainly attributable to the lapses of the special provisions for increases to the strength of the native army reserves (1,38), and of certain native infantry regiments (1,72), for the formation of the 106th Hazara Pioneers (83), and for the Corps of Indian Coast Artillery (14); and to small purchases of local stores; partly counterbalanced by the value of stores returned from South Africa, China and Somaliland (31) adjusted by credit to His Majesty's Imperial Government. Under *Stores for Factories*, the decrease of 1,73 was chiefly due to the small purchases of local stores for the Foundry and Shell Factory, and for the Cordite Factory, to small purchase of, rosewood timber for the Central Gun Carriage Factory; and low freight charges on timber, and to lapses of provisions for increase of the native army reserve, and for purchase of brown leather for bandolier equipment, partly counterbalanced by increased purchases of local stores for the Rifle Factory, and the Gun Carriage Factories. Under *Camp Equipage* the saving of 27 arose from the lapse of the special provision for mobilization equipment, and from less purchases for ordinary requirements than was anticipated. Less expenditure on tents for the Chitral Garrison led to a fall of 9 under *Special Services*. Against these savings there were small increases of 16 under *Freight* and of 27 under *Other Charges*. Under the former head the increase was due to large consignments, and that under the latter to replacements of stores issued to Somaliland, and to excess expenditure of a miscellaneous nature. The short deduction under *Supplies to other Departments* (26) was chiefly due to the adjustment by credit to His Majesty's Imperial Government of the net value of stores issued to and returned from China and Somaliland, also of peace equipment; partly counterbalanced by the adjustment of the value of stores issued from stock to Mauritius, Ceylon, and to His Majesty's Imperial Government, London, and by large issues to other departments.

Other Effective Charges.

314. There was an increase of 10 under *Ecclesiastical* due chiefly to more charges for capitation and travelling allowances to Wesleyan Ministers than were anticipated. Under *Education* the decrease of 26 was mainly due to the abolition of the appointments of Deputy Assistant Adjutants—General for Instruction; to the absence of an officer on furlough; to less charges for books, materials, etc., for Army Schools; and to small payments of donations, etc., to educational institutions. The excess of 2,15 under *Sea Transport Charges* was attributable to the cost of the conveyance of surplus troops and details to England by the troop freight ship *Malta*, and P. and O. Steamer *Peninsular*; partly counterbalanced by the payment for coal for Indian troop service transports having been made in England; and by small charges for passage money for the conveyance of officers and others to and from Europe. Under *Volunteer Corps* the saving of 22 was chiefly due to the insufficient deduction for probable savings under establishments; to the lapse

Section L.—ARMY SERVICES—EXPENDITURE—*concluded.*Other Effective Charges—*concluded.*

of the special grant for contingencies for Volunteer Corps in all India and Burma; and to capitation grants having been drawn for few reservists; partly counterbalanced by the appointment of certain additional Sergeant Instructors.

315. The figures under *Miscellaneous Services* may be sub-divided as follows:—

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.
77,72	Special Charges	48,93	1,11,48	1,04,46
17,82	Other Items	16,17	16,40	17,63
<u>95,54</u>	TOTAL .	<u>65,10</u>	<u>1,27,88</u>	<u>1,22,09</u>

316. The variations under *Special Charges* have been explained in paragraph 282. Under *Other Items* the increase of 1,46 was chiefly due to reconstitution of certain Native Infantry Regiments of the late Madras Command; to the mustering out of the 65th Carnatic Light Infantry and 71st Coorg Rifles; to larger claims for compensation than anticipated; to additional grants for purchase of land; to charges for the conveyance to Thal of the 40 miles of permanent way material of the Light Military Railway reserve; to travelling charges and allowances to officers and men, to deputation allowance to officers on special duty in Japan, to Moonshee allowance to officers on passing in native languages and to increased charges for camps of exercise, manœuvres and instruction; partly counterbalanced by less charges for telegrams issued on the debit-note system.

Non-Effective Charges.

317. There was an excess of 39 over the Budget under *Military Pensions to Europeans* due chiefly to increased charges for pensions to Commissioned Officers (79), and to large payments of gratuities (4); partly counterbalanced by a decrease in charges for pensions to departmental officers with honorary rank, and departmental warrant officers owing mainly to the re-employment of certain pensioners (53). Under *Military Pensions to Natives* the excess of 1,54 was due to increase in pension charges of native commissioned, non-commissioned officers and soldiers, and of subordinate medical department (54); to more charges for gratuities to native soldiers and regimental followers, owing to the mustering out of the 65th Carnatic Light Infantry and 71st Coorg Rifles (87); and to men of the active reserve (68); partly counterbalanced by reduced grain compensation allowance to Madras pensioners (44) in consequence of cheap rates for rice, and by small charges for family pensions owing to casualties and to certain pensioners not having claimed their pensions when due (13). The saving of 7 under *Family Pensions and Compassionate Allowances, etc.*, was in the charges for Compassionate allowances (10), partly counterbalanced by increased charges for Indian Military Service Family Pensions (5). The large number of admissions to the pension establishment (30) and large payments of gratuities (29) led to an increase of 62 under *Departmental Pensions and Gratuities*.

Expenditure in England.

318. As compared with the Budget, the English expenditure showed a saving of £213,5 under *Effective Charges* and an increase of £3,2 under *Non-Effective Charges*. The saving under *Effective Charges* occurred mainly in Ordnance Stores (£392,2), as the payments in respect of batteries of artillery, provided for under this head, have been charged under "Reorganisation." There was also a small saving of £7,4 under passage of officers owing to the small number of officers provided with passages otherwise than in transports. These savings were, to some extent, counterbalanced by a refund (£90,2) from the War Office in respect of British Forces serving in India; by increased expenditure on furlough pay (£29,6) owing to a large number of officers of the Indian service being on furlough; by furlough pay of British Forces serving in India (£11,5); by large payments for conveyance of Drafts from South Africa to India (£37,1); by the pay and expenses of Representatives with the Field Forces in Manchuria (£10,9); and by the purchase of stallions provided for under *Scientific* (£8,5). Under *Non-Effective Charges* the excess due to payments to the War Office for retired pay, etc., of British forces for service in India (£12,8), and to refund of a portion of the contributions towards pension of Indian Native soldiers lent for Imperial Service received in previous years (£9,9), partly counterbalanced by decreases under pay of non-effective Colonels of Royal Artillery (£1,7), pay and pensions of non-effective and retired officers of the Indian Service (£16,8), and Indian Military Service Family Pensions (£1,0). The actuals under *Reorganisation* £686,4 represent cost of Ordnance (£544,2), Medical (£9,8), Clothing (£5), and Supply and Transport (£131,9) Stores for India.

Section LL.—SPECIAL DEFENCE WORKS.—EXPENDITURE.
47.—Special Defences.

1903-4. Accounts.		Budget.	1904-5. Revised.	Accounts.

320. The figures shown under this head represent the surplus or deficit of each Provincial Government in respect of the revenues and charges assigned to it, including Incorporated Local Funds. The Revenue and Expenditure under the various major heads have been shown, in detail, in the foregoing pages, and the share of these, pertaining to the Provincial and Local sections of the accounts for the several groups, is given below separately for each Province.

Section M.—PROVINCIAL ADJUSTMENT—continued.

321. The Budget provided for an expenditure from Provincial Balances of ₹1,53,83 or £1,025,5, and from Local Balances of ₹43,69 or £291,3, but the accounts show a net addition to the Provincial Balances of ₹31,04 or £206,7, and a net decrease in the Local Balances of ₹6,62 or £44,1. Compared with the Budget, therefore, there was an increase of ₹2,21,94 or £1,479,6 in the Provincial and Local Balances taken together. These figures do not, however, give a true idea of the actual transactions of the year, for, in order that the Punjab and Bombay Local Governments might start the new Provincial settlements in 1905-06, under favourable conditions, the Imperial Government allotted to each an initial lump grant of ₹50,00.

322. Of the total increase (2,21,94) 77,39 occurred in the Punjab, 54,87 in Bombay, 24,33 in Bengal, 23,49 in Burma, and 20,31 in the United Provinces. The improvements in the Punjab and Bombay were mainly due to the allotments referred to above. Apart from this there were in the Punjab improvements in the receipts under Revenue and Other Public Works, and large decreases in the charges under the latter head and in Civil Departments. In Bombay the accounts showed increased receipts under Revenue and Civil Departments and a considerable decrease in the expenditure under both these heads, as well as under Other Public Works. In Bengal the improvement occurred in the receipts under the group heads Revenue, Civil Departments, and Irrigation, enhanced by savings in the expenditure under Revenue and Other Public Works. In Burma the increase was due to large receipts under the group head Revenue, and less expenditure under Revenue, Civil Departments and Other Public Works. In the United Provinces the largest improvement occurred under Irrigation receipts. The group heads Miscellaneous and Revenue also contributed to the increase; and there were large savings in expenditure under Civil Departments, while the lapse of the grant under Railways adds to the improvement.

5,043,0	TOTAL INDIA AND ENGLAND . . .	7,143,6	6,523,3	6,258,2

324. The following table compares the whole of the Capital Expenditure with the Estimates of the year and the actuals of the previous year:—

1903-4. Accounts. ₤		Budget. ₤	1904-5. Revised. ₤	Accounts. ₤
96,6	34.—Construction of Protective Railways	147,0	130,2	115,8
144,4	35.—Construction of Protective Irrigation Works	233,3	217,9	215,0
4,535,1	48.—State Railways	6,310,3	6,120,8	5,897,0
507,9	49.—Irrigation Works	833,3	402,5	361,2
5,284,0		7,523,9	6,871,4	6,589,0

325. Under head 48—State Railways, there was a lapse of £413,3 or Rs. 62,00 compared with the Budget Estimate. The principal lapses were—Tirhoot Extensions 16,27, Azhikal-Mangalore 5,97, Coonoor-Ootacamund 7,65, Moorshidabad Branch 9,44, Lower Sindh Extension 7,07, Rajputana-Malwa 12,81, Oudh and Rohilkhand 8,41, North-Western 6,81, North East Line 10,58, Stores and Reserve 39,23, while the more important Excesses were, Burma Extensions 31,07, Jech-Doab (Southern Section) 10,87, East Indian 11,43, Eastern Bengal 16,71. The causes of these variations are explained further on.

* Includes Capital raised by Companies towards outlay on State lines and an advance of £400,000 made to the B. B. & C. I. Railway Company by the Secretary of State.

**Section N.—RAILWAY AND IRRIGATION EXPENDITURE NOT CHARGED TO
REVENUE—continued.**

48.—State Railways—continued.

326. Comparing the outlay for 1904-5 with the Budget Estimate as regards lines under construction, an outlay of 31,07 was incurred on the Burma Railway Extensions provision for which was made under "Capital Account of Indian Railway Companies;" subsequently the outlay was classified under head 48; the excess of 6,84 in the case of the Dhubri-Gauhati Extensions was due to requirements of the line having been under-estimated; on the Tinnevely-Quilon Railway, Native State Section, the excess of 7,00 was due to heavy expenditure on land slips and to the cost of permanent-way in the Ghats being higher than was estimated for; on the Jech-Doab Railway, Southern Section, the excess of 10,87 was due to the pushing on of work under Ballast and Permanent-way; the excess of 5,08 on the Quetta-Nushki Railway was due to progress of work under Formation and Ballast and Permanent-way having been accelerated; outlay of 7,29 on the Nagda-Mutra Railway, of 6,35 on the Katihar-Godagiri Railway, and of 6,10 on the Allahabad-Jaunpur Railway was met from the Reserve and from lapses that occurred during the course of the year on other lines. The lapse of 16,27 on the Tirhoot Extensions was due to the provision made for bridge-work and rolling stock material not having been utilised. The lapse of 5,97 on the Azikhal-Mangalore Railway occurred chiefly under the heads Formation and Ballast and Permanent-way; the lapse of 7,65 on the Coonoor-Ootacamund Railway was due to authority to commence work having been given very much later in the year than was anticipated; the lapse of 9,44 on the Moorshedabad Railway was due to the provision made for the purchase of steamers, flats, and rolling stock not having been fully utilised; and the lapse of 7,07 on the Lower Sindh Extension was due to smaller purchases of stores and larger credits for transfers and sales than originally anticipated.

327. As regards *Open Lines*, the more important increases were 11,43 on the East Indian Railway due mainly to larger progress on works than was anticipated; 16,71 on the Eastern Bengal State Railway due mainly to the purchase of the Brahmaputra-Sultanpur Branch Railway and the Ranaghat-Krishnagar Light Railway, provision for which was made separately and not included in the Budget Estimate of the Eastern Bengal State Railway; 8,19 on the Tirhoot Railway due mainly to the purchase of the Segowlie-Raksaul Branch Railway for which provision was also separately made; and an expenditure of 6,56 was incurred on the Samasata-Rohri Doubling, no provision for which was made in the Budget Estimate, the construction of the line having been decided upon during the year. The principal lapses were: 12,81 on the Rajputana-Malwa Railway mainly under Stores, due to short payments for English stores and freight and landing charges; 8,41 on the Oudh and Rohilkhand Railway chiefly attributable to the non-receipt during the year of English machinery for the new carriage and wagon shops at Lucknow and to the construction of certain rolling stock, for which provision was originally made, not having been put in hand; 6,81 on the North-Western Railway due mainly to short outlay under the heads Stations and Buildings and Rolling Stock; 10,58 on the North East Line (Madras Railway) due to short outlay under the heads Bridge-work, Ballast and Permanent-way, Stations and Buildings, and Rolling Stock. A provision of 60,00 was made for the purchase of the Cooch Behar, Ranaghat-Krishnagar, Segowlie-Raksaul and Brahmaputra-Sultanpur lines; the purchase of the last three was concluded and their cost included with the outlay of the main lines with which they were amalgamated. The lapse to the extent of the cost of these three lines is therefore nominal; as also that of 39,23 under Stores and Reserve, the amount having been distributed during the year where it was most likely to be required.

	„ England	<u>6,8</u>	<u>8,0</u>	<u>73</u>

328. The expenditure in 1904-05 fell short of that of the previous year by Rs22,00 and of the Budget Estimate by Rs70,82, this large lapse being due to it not having been practicable to work up to the programme; the principal works on which the grants were not fully utilised were the Lower Chenab and the Lower Jhelum Canals in the Punjab.

329. As explained in former reports, these are all net sums representing excess of receipts over payments. The Indian figures represent the difference between the advances taken by the Companies and the credits received chiefly on account of stores used on Revenue account. The English figures represent the difference between the Capital deposited by the Companies with the Secretary of State and the withdrawals for expenditure on Stores, Establishment charges, etc. These figures are necessarily liable to great fluctuations, but the following general explanations are furnished :—

330. *Guaranteed Companies, Madras Railway.*—The increase of 132,0 under India was due partly to the receipts having been larger than was anticipated and partly to the postponement of certain works which were to have been carried out by the Carriage and Wagon and Engineering Departments.

331. Under England there was a lapse of 103,8 in payments on account of Establishments and purchases of stores, being made up of lapses to the extent 65,7 and 39,6 on the Madras and Bombay, Baroda and Central India Railways and an excess of 1,5 on the Madras Railway extensions, while receipts on account of subscribed Capital and advances were less by 798,2, resulting in a net decrease of 694,4.

332. In India under *Assisted Companies* the lapse of 17,7 on the Burma Railways was due to insufficient progress having been made against the estimate for the proposed Goods Yard at Malagon and to failure on the part of the Forest Department to supply the full number of sleepers and quantity of timber contracted for; the provision to the extent of 100,0 made in the Budget Estimate for the Burma Railway Extensions under this section, was subsequently transferred to head 48; the lapse of 62,0 on the Indian Midland Railway was due to the provision for interlocking, and re-erecting signals at roadside stations not having been utilized, and to the provision for unforeseen works being utilised only in part; the excess of 106,0 on the Bengal-Nagpur Railway was due to the construction of the Pench Valley Coal Branch having been undertaken during the course of the year, as also other works for which provision was not made in the Budget Estimate.

333. The *Branch Line Companies* deposit capital in Government Treasuries, and draw against these deposits for expenditure on construction according to requirements. During the year 8,7 was deposited and 10,2 withdrawn as against 17,2 and 14,2 provided in the Budget Estimate.

TOTAL	+1,03,22	+688,1	+1,33,53	+890,2	+1,31,94	+879,6

335. The debit under *Special Loans* represents adjustment of the commutation value of lapsed *Wasika Pensions*. The increase of 60 in the net receipts under *Deposits of Service Funds* was due to the high receipts of the Bengal Uncovenanted Service Family Pension Fund, and the growth of the Bengal and Madras Service Family Pension Fund, partly counterbalanced by decrease due chiefly to sufficient allowance not having been made for increase in the pensions of the Bombay Uncovenanted Service Family Pension Fund. The transactions of the Military Assistant Surgeons' Fund in Madras, closely followed the Budget. The details of *Savings Bank* transactions are as follows :—

	Budget. R	1904-5. Revised. R	Accounts. R
Post Office Savings Banks	+77,60	+1,09,31	+1,07,33

	£ .	£	£
Equivalent in Sterling	+675,1	+877,3	+863,0

336. Absence of famine generally resulted in a large increase in the transactions of the *Post Office Savings Bank*. Under *State Railway Provident Institutions* the decline was mainly attributable to a large number of retirements which resulted in heavy withdrawals. The provision for the increase of the *Civil Engineers' Provident Fund* was insufficient. Under *Forest Officers' Provident Fund* the fall occurred chiefly in India, and was due to heavy withdrawals caused by retirements which were not sufficiently provided for. *Police Financial, Opium, Salt and Civil Veterinary Departments Provident Funds* closely followed the Budget. The decrease in the *Cemetery Endowment Fund* (25) occurred chiefly in the United Provinces and was due to over-estimate. Under *Special Accounts* the decline (13) was mainly due to heavy withdrawals by the General Family, and Hindu Family Annuity Funds for investment in the Government Securities, partly counterbalanced by increased receipts from the Postal Life Insurance and Guarantee Funds owing to the continued growth of the Funds.

337. The net credits under *Provincial Balances* and *Appropriation for Reduction or Avoidance of Debt* have been explained in paragraphs 320 and 187 respectively.

338. The principal variations under *Excluded Local Funds* occurred in India, Central Provinces, Bengal, Madras and Bombay. The increased net receipts in India was caused by the formation of several new funds in 1904-5, and the non-payment of the Secunderabad waterworks loan. The grant of 24 from provincial revenues to the Dispensary Fund for the construction of buildings, and large receipts of the Cotton Market Funds, caused by a good cotton crop, were responsible for the improvement in the Central Provinces, while increased expenditure reduced the expected improvement in Bengal. The increased receipts and expenditure in Madras were caused by the inclusion of a credit of 6,62, being the amount of repayment from Imperial Funds to Port Funds for expenditure incurred by the latter on the construction of coast lights, and by a debit due to the investment of a part of the above special receipts in Government Security, and by the adjustment of 1,87 to the credit of the Harbour Trust Board from the Madras Port Funds. The actuals also include for the first time the transactions of the Bellary Cantonment and Madras Coast Light Funds. The transactions resulted in net outgoings of 99, against net receipts of 25 anticipated in the Budget. In Bombay there was an increase in the receipts of Cantonment Funds, mainly in Octroi duties in the Poona and Deolali Cantonment Funds, while the expenditure in all Cantonments was increased, owing to the introduction of the Punjab-Bengal system of conservancy in the Bombay Command Cantonments. Increased revenue and reduced expenditure of the Aden Port Fund produced favourable results under Port and Marine Funds. Under Mahikantha General and Kathiawar Agency Funds the Budget overestimated both receipts and outgoings. The transactions resulted in a net credit of 51 against an estimated outgoing of 52. The net increase in the *Railway Funds* was principally due to fluctuations in the transactions of the Provident Funds. The credit of £1,790,4 under *Gold Reserve Fund* represents net profits on coinage during the year under report, and the debit of £1,805,6 represents amount actually paid over to the Fund. The amount due to the Fund from the Treasury balances at the end of the year is £152,0. The character and magnitude of the transactions under *Departmental and Judicial Deposits* render an accurate forecast impossible. The increased net receipts occurred in all the provinces except Madras where there was a decline.

339. The net figures entered against the head *Advances* may be divided as follows:—

	Budget.		1904-5. Revised.		Accounts.	
	₹	£	₹	£	₹	£
Coinage Accounts . . .	-1,19	-7,9	+20,02	+133,4	-17,17	-114,5
Other Advances . . .	+1,83	+12,2	+22,66	+151,1	+18,28	+121,9
	+64	+4,3	+42,68	+284,5	+1,11	+7,4

340. Under *Coinage Account* the net debit of 17,17 is made up of net debits of 1,00,03 under Mint certificates, 1,57,62 under Bullion Advances, 9,37 under Small Coin Depôt balances, and 12,21 under Currency Silver in process of coinage, and net credits of 2,89 under Copper Coinage account, 1,62,27, under Ingot Reserve of Currency Silver, and 96,90 under Gain on Conversion of Currency Ingot Silver.

Section Q.—DEPOSITS AND ADVANCES—concluded.

The credit balance under Ingot Reserve of Currency Silver, represents the purchase price of the Silver held in the ingot stage, at the Mints on behalf of the Currency Department, while 96,90 under Gain on Conversion of Currency Ingot Silver, represents the profit on the above, which also is held in deposit pending coinage of the ingots into rupees.

341. The net debit under *Other Advances* is the final outcome of a number of transactions; the cause of the net credit of R18,28 or £121,9 is, however, brought out by the following figures :—

	R	£
Civil Advances	+3,49	+23,3
Special Advances	+3,26	+21,8
Permanent Advances	— 31	—2,1
Account with Foreign States	+5,62	+37,5
Other Advances	+6,22	+41,4
	<hr/>	<hr/>
TOTAL	+18,28	+121,9
	<hr/>	<hr/>

342. Under *Civil Advances* the net credit occurred chiefly in India under Mint Advances, and in the Central Provinces under Famine Advances. Under *Special Advances* the net credit occurred in Bengal, where the receipts and charges both fell below the estimate, but the receipts exceeded the outgoings on account of large recoveries of Survey and Settlement Charges of Private and Ward's Estates.

343. Under *Account with Foreign States*, the actuals include net recoveries of 3,66 in India, and 1,83 in the Punjab under Account Current with Native States. There were also net recoveries of 67 in India under Account Current with Foreign States—His Majesty's Colonial Government, Ceylon, and of 58 in Bombay under Somali Coast Protectorate. *Other Advances* include a net credit of 10,49 under Advances Recoverable, Military, and net debits of 1,21 and 2,09 under Forest Advances and Stock Account—Opium, respectively. The variations under *Suspense Account* were chiefly due to fluctuations in the balances in the hands of departmental officers.

344. The difference under *Miscellaneous* was due chiefly to a net credit of 2 on account of adjustment of exchange on the Secretary of State's Bills, and a debit of 5 on account of deposit account of the Exhibitions of Indian Art Manufacture at Delhi.

345. In England the receipts and payments include £2,000,1 being the amount remitted to the Gold Reserve Fund from India, which was invested there. The net debit in England occurred almost entirely under Advances.

£	£			
238,5	289,3	EQUIVALENT IN STERLING £ AS ABOVE	210,8	323,4

347. The transactions in connection with Imperial Loans and Advances resulted in a net receipt of 16,89 against an estimate of 7,63. Under *Loans to Native States* the Budget in India made a provision of 15,00 for loans in case of emergency which was not required; nor was the provision of 4,00 in the Punjab for expected loans to the Patiala State, utilised. No provision was made in the Budget in Bombay, but advances amounting to 7,60 were subsequently sanctioned by the Government of India, of which only 1,09 were utilised in advances to Kathiawar Agency (84) and to Palanpur Agency (25). There was an increase of 6,34 in the recoveries in India due to a repayment by the Bikaner State, and of 1,01 in the Central Provinces owing chiefly to the repayment in advance by the Nandgaon State. On the other hand there was a decline in the recoveries in Bombay chiefly from the Kathiawar and Palanpur Agencies. Under *Loans to Presidency Corporations and Port Trust* the debit of 9,38 in Madras represents payment to the Port Funds to meet expenditure in connection with the Coast Light Houses. The provision for *Loans to Railway Companies* proved insufficient to meet the requirements of the Kalka Simla Railway Company. The difference under *Loans to Landholders and Notabilities* in India was chiefly due to an advance of 1,00 to the Sheik of Koweit in June 1904, under orders of the Government of India, which was repaid in March 1905. Under *Loans to District, etc., Committees* the credit fell short of the estimate in consequence of no repayments having been made during the year by the Secunderabad Cantonment Committee, and the Bhopawar Bazar Fund. Under *Regimental and other Loans* large amounts were recovered which was not foreseen in the estimate. The variations under *advances to cultivators* are unimportant and do not call for any explanation.

Section RR.—PROVINCIAL LOANS AND ADVANCES.

	1904-5. Budget.		1904-5. Accounts.	
	£	£	£	£
PROVINCIAL LOANS AND ADVANCES . . .	578,5	—616,2	520,0	—411,3

348. The following are the details :—

£	£	EQUIVALENT IN STERLING £ AS ABOVE	411,3	520,0
616,2	578,5			

349. Considerable variations occurred under almost all the heads. Under *Loans to Mofussil Municipalities*, the following are the details, by provinces, of advances and repayments during the year :—

	Budget, 1904-5.		Accounts, 1904-5.		Excess (+), Deficiency (—)	
	Advanced.	Repaid.	Advanced.	Repaid.	Advanced.	Repaid.
Central Provinces	30	51	1,18	1,44	+82	+93
Burma	2,19	27	19	27	—2,00	...
Assam	1	...	3	...	+2
Bengal	11,40	1,32	2,37	1,24	—9,03	—8
United Provinces of Agra and Oudh	5,60	2,09	3,67	2,04	—1,93	—5
Punjab	3,94	1,57	2,92	1,48	—1,02	—9
Madras	5,61	78	3,25	1,01	—2,36	+23
Bombay	1,22	60	7	1,13	—1,15	+53
TOTAL	30,26	7,15	13,59	8,64	—16,67	+1,49

350. Large savings in advances occurred in all the provinces except Central Provinces and Assam. In the former, there was an excess of 82 which represents the loan to the Jubbulpore Municipality, for which an additional grant was sanctioned by the Government of India. In the other provinces the loans provided for in the Budget were not fully taken up, while in Madras additional loans amounting to 1,44, were sanctioned during the year for water-supply projects, sanitary purposes, plague expenditure and for construction of a market. The excess in repayments occurred in the Central Provinces, Madras, and Bombay. The excess in the Central Provinces (93) was due to the refund of loan granted to the Jubbulpore Municipality (68) for a water main to the Gun Carriage Factory, owing to the work having been undertaken by the Military Works Department, to the payment of annual instalment by that Municipality, towards repayment of the loan for water works for which there was no provision (6), and to an advance payment by the Khandwa Municipality (19); that in Madras was due to a special repayment by the Vizagapatam Municipality; and that in Bombay (53) to an advance payment by the Dhulia Municipality (30), and to the payment on account of overdue instalment by the Hubli Municipality (15). Under *Loans to Port Funds* there was a provision of 60 for a loan to the Southern group of Port Funds in Bombay. But the scheme for which it was intended, was not sanctioned before the close of the year, and consequently the loan was not taken up. The large difference under *Loans to District Committees* occurred in Madras, and was caused by the non-utilization of the provision for a loan of 2,00 to the Tinnevely District Board, for the construction of a railway from Tinnevely Bridge to Tiruchendur, owing to the report and estimates for the construction of the railway not having been received in time. The increase in the receipts was due to the recovery of an instalment from the Satara District Local Board in Bombay. The provision of 25 in the Central Provinces under *Loans to Landholders, etc.*, for a loan to the Bishop of Nagpur for the construction of a residence was not utilized. While in Bengal a loan was granted to the Bagnia encumbered estate (8) for which no provision was made. In the United Provinces the adjustment of 11 on account of interest, and of 31 on account of transfer of a loan of one debtor of the Sardhana Estate, to another, owing to a redistribution ordered by the Local Government, was not foreseen in the

Section RR.—PROVINCIAL LOANS AND ADVANCES—concluded.

estimate. The excess in the repayments occurred in the United Provinces and was due to the Sardhana Estate having paid a larger amount than was anticipated. The recovery anticipated in Madras was not realized. Under *Advances under Special Laws* the transactions are of a fluctuating nature. The variations were chiefly in Bengal.

351. Under *Advances to Cultivators*, the following are the details :—

	Budget, 1904-5.		Accounts, 1904-5.		Excess (+), Deficiency (—)	
	Advanced.	Repaid.	Advanced.	Repaid.	Advanced.	Repaid.
Central Provinces	3,91	5,53	4,90	10,41	+99	+4,88
Burma	6,26	3,96	5,62	4,82	—64	+86
Assam	50	24	30	23	—20	—1
Bengal	5,50	2,69	3,32	2,56	—2,18	—13
United Provinces of Agra and Oudh . .	3,50	2,34	2,45	2,22	—1,05	—12
Punjab	11,00	10,72	3,21	6,27	—7,79	—4,45
Madras	4,00	3,68	3,37	4,21	—63	+53
Bombay	21,00	45,00	20,45	32,44	—55	—12,56
TOTAL	55,67	74,16	43,62	63,16	—12,05	—11,00

352. The large decline in repayments in Bombay which forms the most prominent variation in the above table, was due to the failure of rainfall in some parts of the Presidency, which caused distress amongst the cultivators, and prevented the expected realization of the amounts advanced in the previous year. There was, on the other hand, an increase in the receipts in the Central Provinces, due partly to the recoveries from special advances granted in the previous year for sowing rice, and partly to the adjustment of 2,15 written off as irrecoverable. The deficiency in the Punjab occurred chiefly under advances in cases of distress. Smaller advances in the other provinces and larger recoveries were due mainly to the improved condition of the agricultural classes.

354. The figures entered in this group are the net result of very large transactions, and there is nothing special to record in respect of them. The Money Order transactions continue to show a rapid growth, as will be seen from the following figures :—

	Issued.		Paid.	
	R	Equivalent in Sterling. ₹	R	Equivalent in Sterling. ₹
Money Order transactions	1894-95	20,45,28	13,635,2	20,43,08
	1895-96	21,75,78	14,505,2	21,73,96
	1896-97	23,29,50	15,530,0	23,24,27
	1897-98	25,71,44	17,142,9	25,71,45
	1898-99	26,15,52	17,436,8	26,17,76
	1899-1900	27,45,70	18,304,7	27,41,84
	1900-1901	28,54,20	19,028,0	28,53,19
	1901-1902	29,50,12	19,667,4	29,49,68
	1902-1903	30,39,99	20,266,6	30,35,89
	1903-1904	32,12,39	21,415,9	32,12,95
	1904-1905	33,92,38	22,615,8	33,88,87

Section U.—SECRETARY OF STATE'S BILLS.

		Budget.	1904-5. Revised.	Accounts.
		£	£	£
Drawings	16,500,0	23,500,0	23,725,2
Payments	16,769,7	23,211,4	23,449,7

355. The following are the amounts of bills and transfers drawn during the year by the Secretary of State:—

			£	Rs	Rate in pence.
April	1904	1,607,0	2,40,30	16'05
May	"	1,449,6	2,16,88	16'04
June	"	1,506,4	2,26,00	16'00
July	"	1,404,7	2,10,80	15'99
August	"	1,535,1	2,30,20	16'00
September	"	1,490,5	2,23,55	16'00
October	"	1,635,0	2,44,57	16'04
November	"	2,900,5	4,32,76	16'08
December	"	2,530,1	3,77,89	16'07
January	1905	2,791,9	4,16,92	16'07
February	"	2,098,9	3,13,50	16'07
March	"	2,775,5	4,15,14	16'04
			23,725,2	35,48,51	16'04

356. The payment account of the year is as follows:—

		£	Rs
Bills of 1903-4 outstanding on 1st April 1904	915,1	1,36,99
Bills drawn in 1904-5 as entered above	23,725,2	35,48,51
TOTAL BILLS FOR PAYMENT	24,640,3	36,85,50
Bills paid in 1904-5	23,449,7	35,07,16
Bills outstanding on 1st April 1905	1,190,6	1,78,34

Section V.—CASH BALANCE.

	Budget. £	1904-5. Revised. £	Accounts. £
BALANCE ON 1ST APRIL 1904—			
India	11,500,0	11,869,5	11,869,5
England	7,003,4	7,294,8	7,294,8
TOTAL .	18,503,4	19,164,3	19,164,3
BALANCE ON 31ST MARCH 1905—			
India	11,060,6	10,333,3	10,749,7
England	4,695,3	10,338,3	10,262,6
TOTAL .	15,756,9	20,671,6	21,012,3
Increase (+) or decrease (—) of balance on 31st March 1905	—2,746,5	+1,507,3	+1,848,0

357. The above difference is distributed between India and England in the following proportions :—

	Budget. £	1904-5. Revised. £	Accounts. £
India	—439,4	—1,536,2	—1,119,8
England	—2,307,1	+3,043,5	+2,967,8
TOTAL .	—2,746,5	+1,507,3	+1,848,0

358. Taking India and England together, the net transactions of the year were better than expected in the Budget by the sum of £4,594.5. The variations which brought about this result are as follows :—

	Better. £	Worse. £
Improvement in Imperial Surplus	2,537.4	...
Improvement in Provincial Surplus	1,479.6	...
Decrease in the Expenditure of Railway and Irrigation Capital not charged to Revenue	840.1	...
Improvement in the receipts under Appropriation for reduction, etc.	121.0	...
Decrease under Temporary Debt	1,500.0
Increase in the deposits of Savings Bank	187.9	...
Decrease under Gold Reserve Fund	15.2
Decrease under Advances	99.3
Increase under Suspense	63.6	...
Increase under Departmental and Judicial Deposits	256.5	...
Net increased repayments under Loans and Advances by Imperial Government	61.8	...
Do. repayments Do. Do. Provincial Government	146.4	...
Increase in the balance of Secretary of State's Bills remaining unpaid at the end of the year	542.3	...
Decrease in the receipts under Remittances	51.2
Minor variations	23.6	...
	6,260.2	1,665.7
NET BETTER .	4,594.5

FREDERICK NOEL-PATON
Director-General of Commercial Intelligence

W. S. MEYER
Secretary to the Government of India

Calcutta, March 8, 1906

GOVERNMENT OF INDIA.
DEPARTMENT OF REVENUE AND AGRICULTURE.

AGRICULTURE.

PAPERS ON THE EXTENSION AND IMPROVEMENT OF COTTON CULTIVATION IN INDIA.

No. 28, dated, Calcutta, the 31st August 1905.

FROM—The Government of India.

TO—The Right Hon'ble St. John Brodrick, His Majesty's Secretary of State for India.

During the visit of Lord Curzon to England, a memorial was presented to him by the British Cotton Growing Association, which on his return was taken into consideration by our Government. In view of the important proposals made by the Association for the extension and improvement of cotton cultivation in India, the memorial was referred by us to the Board of Agriculture, so that we might obtain the benefit of the united advice and assistance of the representatives of all the Provincial Departments of Agriculture; and we now have the honour to forward a copy of the enclosed correspondence, upon a consideration of which we desire to make the following recommendations for your approval.

2. You have been kept informed from time to time of the action taken in this country with the object of improving the cultivation of cotton and the appendix to the Board's letter gives a clear account of the measures now in progress in each province of India. We have carefully considered how these measures may be extended in the directions recommended by the British Cotton Growing Association. We agree with the Board of Agriculture that whilst it is inexpedient to create a separate Cotton Department distinct from the Department of Agriculture, the number of experts in all provincial departments should be strengthened, so that a competent scientific staff may be employed, not only for the improvement of cotton but for the investigation of the many other agricultural problems of India. More specific recommendations for the appointment of additional experts will be made after consideration of the detailed proposals of Local Governments upon the schemes for the expansion of the Provincial Departments of Agriculture, which have been framed in consequence of the sanction given in your telegram, dated the 10th February 1905 to an increased annual expenditure of twenty lakhs upon agricultural development. The problem of the improvement of cotton has not been neglected by the small staff available in the past, and it will receive still greater attention from the increased staff that we propose to employ in the future.

3. It is important that there should be a Cotton Specialist, whose services will be wholly devoted to cotton questions and who will continually visit each province, co-ordinate the cotton experiments in progress under the control of the Provincial staff, and assist them with his advice and guidance based upon his larger experience and knowledge of the results of similar experiments in other parts. We do not consider that this duty, in addition to the many other duties of the appointment, can be performed by the Assistant Inspector-General of Agriculture recently selected by you, who we understand has no special knowledge of cotton cultivation. We, therefore, ask for your sanction to the creation of an appointment of Cotton Expert on the staff of the Imperial Department of Agriculture. The qualifications required for the post include a sound education in scientific agriculture combined with a knowledge of the methods of cotton cultivation practised in America or Egypt (preferably both), together with an acquaintance with the recent work of the Agricultural Departments of those countries. Special importance is attached to a knowledge of scientific agriculture, so that the officer may not only have an empirical knowledge of the different systems of cultivating cotton, but may be able to adapt the principles underlying them to the local conditions of India. If it is found impossible to secure a candidate with these qualifications, we suggest that an expert agriculturist should be selected, and should be required before coming to India to visit America and Egypt in order to acquire the special knowledge mentioned above. We leave it to you to fix a salary sufficient to secure the services of a thoroughly competent expert. His appointment should be on three years' probation in the first instance.

4. With regard to the important matter of seed selection and distribution, you will observe that the Board of Agriculture suggested, with considerable hesitation, the possibility of establishing three large Cotton Seed Farms. The Local Governments, who were consulted by us upon the suggestion, unanimously recommend that this proposal should be deferred, because the stage has not yet arrived when any improved variety can confidently be recommended for general cultivation, and that the growing of selected varieties for seed should first be conducted on a smaller scale, until more experience is gained of cotton experimental work so as to avoid the risk of failure. They propose to provide Government Experimental Farms in all the important cotton tracts and to add to each a substantial area which will be devoted to the production of selected seed. We have approved of these proposals, which will do much to secure a supply of good seed for distribution to cultivators in

conjunction with the scheme for the selection of seed on a larger scale from cultivators' fields (which was explained in the Circular, a copy of which was forwarded with our Under-Secretary's letter No. 136, dated the 22nd September 1904), and other measures now in progress, such as the co-operation of some ginning factories in the separate treatment of the best pickings of the best varieties, the encouragement of private seed farms and the like.

5. In other directions much is being done to meet the wishes of the British Cotton Growing Association. A botanical survey of the varieties of India cottons has been completed by Professor G. A. Gammie, F.L.S., of the Poona College [of Science, and the practical testing of varieties is in progress at all Government cotton farms in order to decide the most suitable variety for growth in each tract. Some successful preliminary trials of Egyptian and American exotics have been made by Sindh and the Punjab, and a careful investigation of the tree-cottons is being made by the Indian Long-stapled Cotton Growing Syndicate in Bengal, and at Government farms in some other provinces. We have recently issued instructions for the improvement of the forecasts of the cotton crop, a copy of which was forwarded with our Despatch No. 11, dated the 27th April 1905. The Board of Agriculture points out that improvement in the method of cultivation is largely an economic operation dependent upon the resources and character of the cultivator, and our Inspector-General of Agriculture has initiated in all provinces a scheme of experiments for testing the results of the manuring of cotton not only with the natural supplies available in the country, but with artificial fertilizers. Our existing system of loans to agriculturists, which is at present under careful investigation with a view to its improvement, gives facilities for affording financial assistance to cultivators.

6. Whilst we do not doubt that these measures will lead in time to the improvement of Indian cotton, we desire to emphasize the views expressed by Sir Denzil Ibbetson in his speech at the meeting of the Legislative Council on the 29th March last, that the problem is largely a commercial one, and that the cultivators will not abandon the coarse, hardy, prolific varieties for the fine, delicate varieties, until they are satisfied that the latter yield the greater and surer profit. Our object must be to make cotton of any kind, without regard to the length of staple, a more certainly paying crop to the Indian cultivator, whilst we understand that one main object of the British Cotton Growing Association is to increase the production of the long-stapled varieties suited to the needs of Lancashire. These objects are by no means antagonistic, as the Association themselves remark, and as will be seen from the above account of our action. We are inclined to think that the Association can best assist in their attainment, so far as India is concerned, by aiding in arrangements adopted with the view of securing that the Indian cultivator who grows a good sample of high quality cotton may reckon on getting a price for his produce, however small in quantity, better than the market price for the larger supplies of poor quality cotton. If the Association desire to give financial assistance for the improvement of Indian cotton, the most practicable method would seem to be for it to make an annual grant, which could be utilized under our orders, either in giving a subsidy to the cultivator for every acre of fine-staple cotton grown by him on the recommendation of the local Department of Agriculture, which would make special arrangements to help him in securing a fair price for his superior cotton, or in compensating him for any loss incurred in the initial stage of such cultivation. If this suggestion meets with the approval of the British Cotton Growing Association, we shall be prepared to give all possible assistance in its execution.

7. In conclusion we beg that our acknowledgments may be conveyed to the Association, not only for their offer of financial aid but for the valuable advice they have placed at our disposal. We trust that the steps which we have already taken and those which we now propose to take will ultimately result in a marked improvement, both in the quantity and quality of the cotton produced in India, and will thus not only add to the prosperity of the Indian cultivator, but benefit the manufacturers and consumers of cotton throughout the world.

Dated Manchester, the 26th September 1904.

From—J. ARTHUR HUTTON, Esq., Vice-Chairman, the British Cotton Growing Association,

To—The RIGHT HON'BLE LORD CURZON OF KEDLESTON, G.M.S.I., G.M.I.E., India Office, Whitehall, London, S. W.

At a recent meeting of the Indian Committee of this Association it was decided to try and make arrangements for a deputation to wait upon Your Lordship, to lay before you the views of this Association as to the best means of increasing the quantity and improving the quality of the cotton grown in the Indian Empire. We very much regret that owing to the limited time which remained at your disposal it was impossible to arrange such a meeting, and we have therefore decided to place our views before you in writing, and we trust that you will give the same your most careful consideration.

2. We do not think it necessary to dwell at any great length on the serious importance of the shortage which has occurred in recent years in the supply of raw cotton. The very

fact that it was thought necessary to draw attention in His Majesty's speech from the Throne to the efforts to this Association to relieve that shortage, must convince everyone that this is a question of the very highest national importance, affecting the welfare not only of those directly engaged in the Cotton Trade, but of a very large proportion of the population of the country. Nor is it necessary for us to do more than draw Your Lordship's attention to the fact that the serious losses which this country has incurred during the last two years, owing to the bulk of the Cotton Mills having to run short time, must seriously react on the prosperity of India and of the rest of the British Empire, which are so largely dependent on this country for the disposal of their products.

3. We would respectfully draw Your Lordship's attention to the fact that the quality of cotton produced in India during recent years has undoubtedly deteriorated in quality, with the result that the cultivator receives a lower price. Very careful enquiries have been made into the question by this Association and from every source of information this fact is confirmed. As far as we can judge from the information at our disposal, the principal cause of this deterioration is the use of mixed seed and poor methods of cultivation.

4. We cannot impress too strongly on Your Lordship's attention the very great importance of a proper supply of carefully selected seed, for this is *the most vital factor* on which successful cultivation depends. In our opinion this question of the supply of seed is of such immense importance to the prosperity of the native cultivator that we are convinced that the Government of India should not delay one moment in taking the matter into its own hands. According to reports we have received the natives are dependent for their supplies of seed for sowing on public ginneries, where apparently all sorts and varieties of cotton are mixed together and no attempt is made for keeping the better seed on one side for sowing.

5. We would therefore suggest that steps should be taken to establish Government Seed Farms throughout all districts where cotton is grown. On such farms continual selection of the best seed can be made year by year and so ensure a supply of the best possible seed to the native cultivators, which must result in a steady improvement in the quality of cotton produced and an increase in the amount produced per acre. The consequently higher price and larger return must naturally result in greater prosperity to the farmer.

6. We wish to make it perfectly clear that we do not necessarily advocate that further larger attempts should be made to introduce exotic varieties. Much good will be done if careful selection is carried on with native varieties only. At the same time we would strongly recommend that further experiments should be made with American, Egyptian, Brazilian, and other varieties, as it is quite possible that in some parts of India foreign varieties may prove more successful than the native ones.

7. This Association is informed that the methods of cultivation in India are extremely primitive and that if it were possible to induce the natives to adopt more modern methods they would reap the benefit in a larger production of higher grade cotton. There is no doubt that cotton is a plant which readily responds to high cultivation, a fact which is fully recognised by the Governments of the United States and Egypt, who spend large sums on their Agricultural Departments, with the object of helping and instructing the native cultivator.

8. We fully recognize the great difficulty there must be in persuading the Indian cultivator to make any change in his method of cultivation, and we are convinced that the one and only body who can do anything in this matter is the Government of India. We would therefore respectfully suggest that Your Lordship would cause enquiries to be made as to the methods pursued by the Governments of those countries, and as to how far they are adaptable to the conditions prevalent in India. We ourselves have a high opinion of the industry and capability of the agricultural population of India, and we believe that it is possible for them to attain as good result from their farms as is obtained by the inhabitants of Egypt and the Southern States of America for land which is in no way superior to that in India.

9. We are further convinced that the establishment of seed farms as suggested above would afford from an educational point of view most valuable object lessons to the natives in those districts where such farms were established. Further than that, they would afford valuable training grounds for native experts, who could afterwards act as advisers in other districts.

10. No doubt at the commencement these farms might be a considerable expense, but ultimately they would be more or less self-supporting, as the cotton produced on them should cover the cost of cultivation and supervision.

11. We would also recommend for Your Lordship's careful consideration the establishment of a special Agricultural Department devoted solely to cotton, and skilled experts should be engaged who are thoroughly acquainted with all the details of cultivation and the best modern systems pursued in the United States and Egypt, where cotton is cultivated on the most scientific methods. We would suggest that in addition to the Central Institution, there should be an efficient staff in each province whose whole time should be given

to cotton growing. Their duties should be to supervise and assist as far as possible in regard to the following matters:—

- (1) Selection of seed.
- (2) The methods of cultivation, including the use of manures and fertilisers.
- (3) The ginning and grading of cotton, taking special care that different varieties of cotton are ginned and baled separately and not mixed together as at present.

There is no doubt that success in cotton growing in the above-mentioned countries is not due to superiority of soil and climate, but to the superior supervision given by the Agricultural Departments.

12. We would also suggest for Your Lordship's consideration the possibility of some form of financial assistance to the native cultivators on the security of their crops, as in Egypt and the United States, and as in the case with Indigo and Tea Planters in India, so as to ensure that a reasonable interest is charged and that better profits accrue to the farmers than hitherto. Were the same facilities provided in India as are in Egypt and the United States, we are convinced that greater quantities and better cotton can be produced in India than is the case at present. Variable as the climatic conditions are in India they are at any rate no worse than those prevailing in the United States, where an early frost may cut down the crop by half a million or a million bales.

13. We would also recommend that a proper survey should be made of the varieties now existent in India with a view to the selection of that most suited to each particular district. It would also be advisable to collect and supply full statistics as to the area planted more completely and correctly than is done at present. Further, it would be of great advantage if reports, embracing all provinces, were issued monthly as to the condition of the crop, as is done by the United States Agricultural Department.

14. No doubt the adoption of these suggestions must entail considerable outlay, but we have no hesitation in recommending them for Your Lordship's consideration, as the result attained will fully justify the expense. We would point out that should the adoption of these suggestions result in an improvement of quality of only 10 per cent. (apart from the probability of an increased quantity being produced from the same acreage as is now under cultivation), the native cultivators will be to that extent more prosperous, and their part of the British Empire which is commercially interested in our Eastern Possessions.

15. We must also draw Your Lordship's attention to the fact that the conditions are entirely different from those prevalent during the cotton famine of forty years ago, and that the present shortage is a permanent one as apparently the limit of production in the United States has been reached and we cannot hope for any large immediate increase in supplies from North America. Further, that country with its rapidly increasing population will each year require more and more cotton for its own needs. Other countries are also requiring more cotton and there is little doubt that the demand has already overtaken the supply of raw material. It is therefore absolutely necessary that further sources of supply should be opened up with as little delay as possible, and we believe that relief from the present scarcity can be more immediately obtained in India than in any other part of the world. We are quite convinced that India with its one hundred and ninety million agriculturists and its vast variety of soil and climate, has a great opportunity of reaping an enormous advantage in cultivating cotton, and disposing of the same at the high prices which will probably be maintained for many years to come, in fact until supply has once more overtaken demand. The labour, land, transit, and other facilities seem to be all present, and it only requires a good strong guiding hand initiated and maintained by Government.

16. As an instance of what can be done we beg to inform Your Lordship that in the first eight months of this year, Lancashire spinners have used 102,000 bales of East India cotton as compared with 8,000 bales during the corresponding period in the year 1900. Nor was this due to the fact that Lancashire was unable to find any other cotton suitable for her needs, but it was because the Surtee Broach produced this year has been the best cotton of that class grown for many years, and has proved most suitable for mixing with American cotton.

17. As a good deal of misunderstanding is prevalent as to the use Lancashire can make of India cotton, we must impress on Your Lordship the fact that if the quality of cotton produced in India is brought back to the old standard, it would find a ready market in this country. It is quite a mistake to imagine that the machinery in this country is not adapted to spinning Indian cotton. The bulk of cotton used in Lancashire does not exceed 1 inch to 12 inch in length of staple, and there is little doubt that, provided proper methods are adopted, India could produce large quantities of such cotton, so that her farmers would have the markets of the world open to them, instead of being largely confined as they are now to those countries which use only a very short staple cotton.

18. We are aware that some misunderstanding has arisen in certain quarters as to our motive in endeavouring to improve the quality of cotton grown in India. We must state quite clearly that we have no wish to deprive the Indian, German, or Japanese spinner of his cotton. If there were a large increase in India's production and if of that large increase not one bale was of suitable quality for use in this country, we should still benefit by it, as

it would relieve the demand on other and better cottons to our advantage. Our object is to encourage the growth of cotton wherever possible; the ultimate destination of the cotton grown will depend on the price that the buyer can afford to pay for it. If the German or Indian spinner can afford to pay more than the Lancashire spinner, the cotton will go to them. If the Lancashire spinner can afford to pay the higher price the cotton will come to him. The German, Japanese, or Indian spinner is just as much interested in the question of larger supplies, as the Lancashire and American spinner. If there is any shortage in supply all must suffer alike, nor does proximity to the cotton fields give any permanent advantage, as is proved by the fact that the mills in the Southern State of America have suffered most severely during the last twelve months. The one fact that would impress on Your Lordship is that if the native cultivator by improving the quality of his cotton can thereby render the same of usable quality for the Lancashire spinner, he will certainly command a larger market than he does at present and obtain higher price. This question of cotton supply is an international one and must be looked at from a broad point of view, and as a matter of fact the Lancashire spinner is indifferent where the increased supply comes from or goes to, so long as there is enough cotton grown to enable the mills of the world to be fully employed. At the same time we would prefer that the British Colonies and dependencies should participate in the profits which are ensured to cotton cultivators for many years to come.

19. We can assure Your Lordship that the objects of this Association are absolutely unselfish and broad-minded, which is proved by the fact that we are laying out vast sums and are prepared to do so without taking any profits to ourselves for seven years; as is stipulated in the Royal Charter, which His Majesty the King has graciously granted us. If the Government of India will meet us in the matter, and are prepared to take up the question actively and to co-operate with us, then the same help we are extending to East and West Africa, to the West Indies and elsewhere, will be willingly given by us to India with far more prospects of immediate success than we can possibly hope for from any other part of the British Empire.

20. We therefore most respectfully submit the above for Your Lordship's most careful consideration, and we are convinced that should Your Lordship see your way to adopt our suggestions it will result in a large increase in the prosperity not only of India and Lancashire, but of every part of the British Empire, and will also benefit the cotton trade of the whole world.

Dated Pusa, the 10th January 1905.

From—F. G. SLV, Esq., President of the Board of Agriculture, Pusa.

To—The Secretary to the Government of India.

WITH reference to letter No. 1726, dated 30th December 1905, from the Government of India, I have the honour to state that the memorial from the British Cotton Growing Association was placed before the Board of Agriculture, and I am requested by the Board to forward to the Government of India the accompanying memoranda on the points which have been referred for report.

2. The Board desire at the outset to place on record their cordial sympathy with the aims of the Association and their appreciation of the disinterested efforts which have been made by the Association towards the most important object of the promotion of cotton growing in the British Empire. The Board recognise that these aims and efforts deserve all the assistance and encouragement that it is in the power of Government to give.

3. Before proceeding, however, to a detailed review of the points put forward and the recommendations made by the Association, they consider that it will be useful to summarise briefly the existing position of the Agricultural Departments in India with a special reference to the cotton question.

4. At various periods in the last century agricultural experiments have been conducted, in some cases by staffs of experts specially introduced from America and elsewhere. Such experiments, which were mostly confined to the introduction of exotic varieties, have resulted, with a single exception, in failures. Some thirty years ago cotton experiments were accordingly abandoned, and it is only within the last twenty years that any agricultural staff has been again entertained by Government. This staff was until five years ago limited to three or four special officers. Since then the number of such officers has been increased until there are now seven officers on the Imperial staff and seven employed by Provincial Governments.

5. The cultivation of cotton began to receive special attention in 1900, in which year also it is understood that similar attention was for the first time given by the State Department to this crop in Egypt and the work in the United States was expanded. Since 1900 constant and increasing attention has been given to this subject in almost every Province and in particular in the Presidency of Bombay, which contains the most important cotton growing tracts of India. Careful investigation of the cultivation of cotton has disclosed the great complexity of the conditions which affect the crop and the difficulty of attaining

any immediate success in the improvement of its staple. The Board do not doubt that the systematic action now being taken by the Agricultural Departments will have an important effect in the improvement of cotton, but consider that such improvement must be slow, and they cannot endorse the view of the Association that the superiority of the cotton of Egypt and the United States is due to the work of the Agricultural Departments there and not to conditions of soil and climate.

6. There are very numerous varieties of cotton in the Indian Empire, spinning yarns varying from under 10's to over 40's, and as the Association point out, it is necessary in the first place to ascertain definitely which cottons are suited for cultivation in the several tracts. It is possible that in some tracts the substitution of varieties of cotton may be successfully effected. In others the improvement of the indigenous varieties can only result from hybridization and selection of seed. The Board are of opinion that the improvement of Indian cotton has not yet reached the stage at which any improved variety can confidently be recommended for general cultivation, and until such varieties have been tested with success on Government Experimental Farms, it appears to the Board premature to proceed further than to collect and distribute to cultivators superior seed of the existing indigenous varieties.

7. The measures, which have been and are being taken, are set forth in detail in the reports which have been furnished from each Province in the appendix to this letter. The Board consider that these reports show the urgent need of strengthening the Provincial Departments of Agriculture by the appointment of specialists and subordinates on a scale adequate to deal fully with this important question. In view of the intimate connection of the cultivation of cotton with the whole agricultural economy of the country, it is undesirable in the opinion of the Board that the expert staff so entertained should be disassociated from general agricultural work. A separation of the cotton staff from the Agricultural Departments would, in the opinion of the Board, be prejudicial to the success of their work. For these reasons the Board are unable to agree in the proposal of the Association for the creation of a separate Cotton Department, but in order to co-ordinate the cotton work throughout India they recommend that there should be appointed to the staff of the Inspector-General of Agriculture an officer who has had ample experience of cotton cultivation either in the United States or Egypt. These measures will, if approved, have the most far-reaching influence, not only on the improvement of cotton, but also on the solution of the numerous other important agricultural problems.

8. On a detailed review of the memorial the Board desire to offer the following remarks. There is little evidence to show that the quality of any specific variety of cotton has actually deteriorated. In regard to the special case of the Surat and Broach varieties, the assertion is denied by some of the most experienced native merchants of Bombay, and the fact noted by the Association, that the Surati Broach cotton of the last year was the best cotton of that class that has been grown for many years, confirms the opinion of the Board that such variations are due to seasonal differences. What is often regarded as deterioration of staple in fact the substitution of hardier varieties with inferior lint, which are on the average more profitable to the cultivator. It is possible also that the deterioration apparent in some cottons exported to England is due to intentional admixture by the trade. It is also reported to the Board that in parts of Madras the mixture of early and late varieties is deliberately grown by the cultivator as a safeguard against the fluctuations of seasons.

9. In regard to the distribution of selected seed, the Board are of opinion that the most satisfactory course would be to await the result of the experiments which have recently been undertaken on the experimental farms. At present no Provincial Department is in a position to recommend confidently any improved seed to the cultivators for adoption on a commercial scale. The method of the operations in progress is described in detail in the note of the Deputy Director for the Bombay Presidency. In many tracts, however, advantage will result from the collection of seed grown by native cultivators, which can be purchased from their fields and distributed by Government agency, and measures to this effect are in progress. It may be noted, however, that the evils resulting from the public ginneries should not be overstated. Cultivators of the best varieties of cotton frequently reserve for their own sowing a portion of the crop which they hand-gin at home, and even in the ginneries of some parts of India the admixture takes place in the lint after the seed has been removed. The Board consider, however, that good will result from the co-operation of the owners of ginneries in preventing the mixing of seed.

10. No improvement can yet be recommended in the best cultivation of the best cotton tracts, but it will be observed in the appendix that some provinces are endeavouring to improve practice where they are defective. The improvement of methods of cultivation is largely an economic question, dependent on the resources and character of the cultivator, which are not susceptible of drastic remedy.

11. As regards financial assistance to cultivators, the Board note that there is already in existence an extensive system of State agricultural loans. It is understood that no such assistance is given in the United States, and the Board are unable to suggest any improvement in existing Indian system, which has recently received the most careful attention.

12. No efforts are spared to render the collection of statistics and estimates of area and outturn as complete as possible. Information of the agricultural prospects throughout India is published periodically by the several Governments; and it is suggested that existing periodical reports should deal more fully with the cotton crop, and that a monthly abstract, showing the general condition of it should be published.

13. The Board would beg to point out that the question of the extension of the area under cotton is chiefly a question of profits and prices, and the view set forth by the Association in September, that the present shortage of cotton is a permanent one and that the existing high prices will probably be maintained for many years to come, requires qualification in consideration of the recent reports of the large outturn in the United States and the consequent fall of prices.

14. There remains the important recommendation of the Association that Government seed farms should be established throughout all districts where cotton is grown, on which continual selection could be made year by year to ensure a supply of the best possible seed to native cultivators. The Board are in accord with this policy. As to the steps which should be taken to give effect to it, they would first remark that having regard to the experience of the past in the selection of indigenous cottons, they consider that improvement will be slow and will probably not be very marked at the start. At the present time in some tracts where the better varieties are grown, the cultivators continuously practise selection of seed. Turning to the short-stapled varieties, attention is given to these likewise by good cultivators. The Board consider that efforts for the improvement of cotton by selection and hybridization should certainly be preserved with and extended. There should be a selection farm of an adequate size in each representative cotton tract, if such is not already in existence, and this farm, in view of the interests at stake, should be under the most efficient management and control. The Board do not consider that a large area is required for the effectual selection of suitable types of any particular variety. The great need is at present for men. In places where existing farms do not provide sufficient land for these selection experiments, the necessary arrangements should be made.

15. At the present moment there is no improved variety which the Board can recommend for distribution. A great deal of preliminary work must be done, and this should be undertaken without delay. When an improvement has resulted from selection or hybridization, the Board agree that every endeavour should be made to distribute it and to maintain or enhance its excellence. The means which have been approved for this purpose include (a) the establishments of demonstration plots; (b) utilisation of the agency of large landowners, District Board Associations and Courts of Wards Estates; and (c) publication of information. In short, the value of the variety can be demonstrated practically, seed can be issued in an appreciable quantity, and the cultivator can properly be left to judge for himself whether the improved or new variety is one which it will pay him to take up. This method has proved satisfactory with other crops in the past, but for cotton in particular it is essential that the seed of any improved variety should be put out on a large scale, so that the cultivator may get the benefit of the real value of the improved staple.

16. A proposal was made to the Board that seed farms of 5,000 acres should be established in each Province for the selection and distribution of good seed. From the point of view of selection, the Board consider that it can be carried on as effectually on a smaller area, indeed more effectually as regards supervision. From the point of view of quantity of seed for distribution, the Board cannot express any opinion as to the exact size of the farm which should be established in each particular case. In considering this important question, the Board desire to point out that the memorial was submitted to them after their deliberations had commenced, and that they had no carefully matured scheme preliminary to the discussion. They would, therefore, prefer not to put forward any such scheme, but as the Government of India desire to ascertain their definite views, the Board, with some hesitation suggest that the following proposal should be submitted to the Provincial Governments concerned for their consideration. Substantial farms (say 1,000 acres, of which half would be available annually in rotation for cotton) should be established for the following purposes:—

- (a) One farm in the Surat-Broach cotton tract of Bombay for the improvement of the indigenous variety by selection of seed and its distribution.
- (b) One farm in a suitable irrigated tract of the Punjab for the trial of exotics and for seed distribution.
- (c) One farm in the Central Provinces for the dual purpose of (1) the improvement of the coarse *jari* variety by continuous seed selection and distribution, and (2) the improvement of the fine *bani* variety by seed selection mainly to improve the yield, and seed distribution.

17. Great importance is attached by the Board to the co-operation of the Irrigation Department both in furnishing water for the cultivation of irrigated cotton at the most suitable season, and at regular intervals; and also in the settlement of favourable rates thereon. There is some hope of the increased production of superior varieties of cotton under irrigation, especially in the United Provinces, the Punjab and Sind. If this hope is

fulfilled, the extension of perennial irrigation in Sind would deserve the most careful consideration. The improvement of railway communication would also seem to be of importance to the extension of the cultivation of cotton in tracts in which such cultivation is now limited owing to the difficulties of transport.

18. Finally, the Board have carefully considered the Association's generous offer of financial assistance, but since the Board are not possessed of administrative functions, they do not feel that they are entitled to comment on the subject.

No. C.—211, dated Camp Calcutta, the 1st March 1905.

From—F. G. SLY, Esq., I.C.S., Officiating Inspector-General of Agriculture in India,

To—The Secretary to the Government of India, Revenue and Agricultural Department.

With reference to paragraph 3 of your letter No. 2—12-3, dated the 28th January 1905, I have the honour to submit the following remarks upon the reply sent by the Board of Agriculture to the memorial of the British Cotton Growing Association. I propose to notice the practical recommendations of the Association and the opinions of the Board thereon.

2. I take first the recommendation of the British Cotton Growing Association for the establishment of a special Agricultural Department, devoted solely to cotton, consisting of a Central Institution with a staff of skilled experts and in addition an efficient staff in each province, whose whole time should be devoted to cotton growing. I entirely agree with the opinion of the Board that a divorce of cotton experiments from other agricultural work would be most prejudicial to the very interests which it is desired to encourage. The appendix to the Board's letter gives a full account of the measures in progress for the improvement of Indian cotton, which include (1) seed selection, (2) hybridization, and (3) the testing of varieties, both indigenous and exotic. All provincial departments are working upon the right principles, which have yielded such good results in America, but it is evident that the expert staff is quite inadequate. The Board rightly point out that the most urgent need is for the appointment to each province of specialists and subordinates on a scale adequate to deal with this important question. In all provinces where cotton experiments are in progress, it is essential that the expert staff should include an Agriculturist to manage the experimental cultivation, an Economic Botanist to conduct the experiments in hybridization and seed selection, and Entomologist to study the insect pests of cotton, and an Agricultural Chemist to study the soil fertility and manurial experiments. And in some provinces where it is proposed to expand largely the experiments, some portion of this staff will require duplication. The results obtained in one cotton tract will not ordinarily be applicable to another tract, so that each requires its separate set of experiments. A good provincial staff is, therefore, the most important requirement. The proposal of the Board for the appointment of a cotton specialist to the Imperial Department seems all that is necessary to secure the co-ordination of the cotton work throughout India.

3. The next recommendation of the Association is for a proper survey of the varieties now existent in India. A botanical examination and classification of all the varieties of Indian cotton has just been completed by Professor Gamble, the results of which will, I hope, shortly be ready for publication. The appendix to the Board's letter will also show that provincial departments are now doing what the Association recommend in testing the variety most suited to each cotton tract. I have nothing to add to the recommendation of the Board for the improvement of the existing reports by the publication of a monthly abstract showing the condition of the crop. Each provincial department should be required to report fully the condition of the cotton crop, including the estimated area and outturn, in the weather and crop report of the first week of each month. In order to make it useful to the commercial public, the Director should deal with the recognized commercial varieties of cotton. An abstract of these reports could then be published monthly by the Government of India.

4. The Association recommend that the Agricultural Departments should pay special attention to improving the methods of cultivation. The Board point out that this is largely an economic question, dependent on the resources and character of the cultivator, but I am of opinion that much more might be done than at present to improve the standard of cultivation in the more backward tracts. An examination of the records of past trials of exotics and indigenous varieties transferred from one part to another shows that the failures have at least in part been due to incorrect methods of cultivation. This again points to the imperative need of a trained staff to supervise such experiments. I may instance Sindh. Several trials of Egyptian cotton have been made in past years in that province, all of which resulted in failure. The Deputy Director of Agriculture of the Bombay Presidency, who has experience of Egyptian methods, has now achieved promising preliminary trials with correct methods of cultivation. Each experimental farm should institute a series of experiments in the different methods of cultivation of cotton. Then there is the important question of manures. The soil of several cotton tracts is naturally extremely fertile, but there can be no doubt that its fertility can be improved by a proper system of manuring. In the accounts of the experimental work of the American Department of

Agriculture, nothing is more striking than the great attention that has been given to this aspect of cotton cultivation. An immense number of experiments has been made with different kinds of fertilizers and—a matter of equal importance—the best method of applying them, with the results that it is known what is the best fertilizer for each soil tract and that they are in general use. There is no reason why similar experiments should not be started in Government farms for testing the value of all the fertilizers available in this country. When definite results in improved methods of cultivation and manuring have been attained on the Government farms, the next stage is to get them adopted by the cultivators of the tract. For this purpose the most likely method is the establishment of a number of demonstration plots in the villages, where the ryots can see the improvements in actual working.

5. In considering the important question of the establishment of cotton seed farms, the Board of Agriculture was not only hampered by the short time allowed to them for deliberation, but in my opinion they were also influenced by the difficulty that has always been experienced in the past in obtaining funds for expenditure upon agricultural investigation. I believe that their decision was unconsciously biased not by what they considered would be the best solution of the problem, but by what they thought it likely that Government would be prepared to sanction. They contemplate the establishment of a farm in each representative cotton tract devoted to experiments in hybridization and selection of seed, but they do not recommend a large area for this purpose. If substantial improvement is to be made in Indian cotton, I regard large seed farms as essential. There are no seed merchants in India, so that this work must be undertaken by Government. It is particularly necessary for cotton, because the appearance of the seed is no guide to its merits. A cultivator can largely safeguard himself in the purchase of cereals for seed, but he is entirely at the mercy of the seller in purchasing cotton seed. Again, it is essential to put out a large quantity of improved seed, if the cultivator is to obtain the value of the improvement. First class cotton is of no value unless it is in quantity sufficiently large for commercial purposes. The need for large seed farms has not been felt acutely at present, because the experiments in seed selection and hybridization have not yet reached the stage at which any improved variety can be confidently recommended for distribution, but when the stage is reached—and it should be reached in a very few years—large seed farms will be essential. Moreover, progress will be quicker in the early years on a special cotton farm with a special staff. All my reading of the voluminous literature upon Indian cotton and my small experience convince me that the quality has deteriorated, not only as stated by the Board by the substitution of coarse for fine varieties, but by the degeneration of the individual varieties. The continuous growth of the same strain of seed would naturally be expected to lead to this result. The imperfect method of seed selection sometimes practised by ryots in the best tracts is not sufficient to counteract the tendency to degeneration, whilst even this imperfect method is not common in most cotton-growing tracts. The same difficulty is experienced in America, where it is necessary to adopt rigid selection of seed and the raising of new strains by hybridization. The work of the seed farms must be continuous, or the improved seed will again degenerate. This task must be undertaken by Government until cotton cultivation has developed to the stage when the task can be left to the seed merchant or to the grower. For these reasons I strongly support the tentative suggestion of the Board for the establishment of three 1,000 acre farms. Each of these farms will require an expert agriculturist, primarily a botanist, as Superintendent, with a strong staff of trained subordinates to conduct plant-to-plant selection over this area. I estimate roughly that the cost for each will be about Rs. 1,65,000 initial and Rs. 75,000 recurring. If the Government of India desire to accept the offer of financial assistance by the British Cotton Growing Association, I can suggest no more suitable method than an annual grant for the maintenance of these farms. In the event of these farms being successful, one should be established in each important cotton tract.

6. With these additions, I believe that the recommendations of the Board will admit of a full and adequate investigation of the problem of the improvement of Indian cotton. Continuous effort upon scientific lines with adequate expert supervision is certain, in my opinion, to lead to substantial improvement. I do not think that the change in the world's cotton market produced by the recent enormous American crop should influence the action of the Government of India. In the first place, it seems extremely unlikely that the large extension of cultivation in America can be sustained except by a very high level of prices. It is believed that the margin of profit in ordinary years is small and that the tendency is towards more diversified farming rather than towards more cotton. Improved irrigation may tend to increase production, but scarcity of labour in the cotton belt is severely felt. The consumption in the United States seems likely to increase more rapidly than its production, and there is ample room in the world's market for high grade Indian cotton if it can be produced. A very considerable quantity would be consumed in India itself; even at the present time there is a small import of Egyptian and American cotton. The improvement of yield of the coarse indigenous varieties is equally important to the ryot. Indeed, the first essential to success in growing a fine staple cotton is to obtain a variety which will give greater profit than the hardy, prolific indigenous variety of coarse staple.

No. 168 (Revenue), dated India Office, London, the 27th October 1905.

From—His Majesty's Secretary of State for India.

To—The Government of India.

I have considered in Council the letter of Your Excellency's Government, No. 28 (Agriculture), dated the 31st August 1905, submitting your recommendations on the memorial of the British Cotton Growing Association on the subject of the extension and improvement of cotton cultivation in India.

2. I sanction your proposal that a cotton specialist, whose services will be entirely devoted to cotton questions, should be added to the staff of the Imperial Department of Agriculture. I shall take steps to select an expert having the qualifications which you enumerate.

3. The other measures which you are taking or intend to take to improve the quality of Indian cottons have my general concurrence.

4. I shall cause the suggestion made in paragraph 6 of your letter to be communicated to the British Cotton Growing Association for consideration and expression of their views.

No. 2 (Revenue), dated India Office, London, the 5th January 1906.

From—His Majesty's Secretary of State for India,

To—The Government of India.

In continuation of Mr. Brodrick's Despatch No. 168 (Revenue), of the 27th October 1905, I forward copy of correspondence* with the British Cotton Growing Association respecting their grant of 2,500l. per annum for the next four years for the improvement and extension of cotton growing in India, and I invite the attention of Your Excellency's Government to the request made by the Association that full particulars should be supplied to them from time to time of the manner in which the money is being spent.

Cotton growing in India. British Cotton Growing Association's contribution to experiments.

*To British Cotton Growing Association, No. R. & S. 2414, dated 27th October 1905.

From British Cotton Growing Association, dated 6th December 1905.

To British Cotton Growing Association, No. R. & S. 3125, dated 2nd January 1906.

No. R. & S. 2414, dated India Office, London, the 27th October 1905.

From—SIR A. GODFREY, Under-Secretary of State for India,

To—The Secretary, British Cotton Growing Association.

I am directed by the Secretary of State for India in Council to state, for the information of the British Cotton Growing Association, that the Government of India have carefully considered the letter (dated the 26th September 1904) addressed by the Association to Lord Curzon on the eve of his return to India, on the subject of the improvement of Indian cotton.

The measures which have been taken, or are proposed to be taken, for extending and improving the cultivation of cotton in India are set out in the accompanying copy of a letter from the Government of India. It will be observed that the Government of India proposed to add a thoroughly competent cotton expert to the staff of the Inspector General of Agriculture. The Secretary of State for India in Council has sanctioned this proposal, and I am to ask whether the Association can suggest the names of any candidates having the necessary qualifications.

I am to invite the attention of the Association to the suggestion that the most practicable method in which the Association could give financial assistance for the improvement of Indian cotton would be for it to make an annual grant, which would be utilised under the orders of the Government of India, either in giving a subsidy to the cultivator for every acre of fine staple cotton grown by him on the recommendation of the local Department of Agriculture, or in compensating him for any loss incurred in the initial stage of such cultivation. Mr. Brodrick will be glad to learn whether the Association is prepared to co-operate in this way with the Government of India.

Dated Manchester, the 6th December 1905.

From—J. ARTHUR HUTTON, Esq., British Cotton Growing Association,

To—The Under-Secretary of State for India.

Reverting to your letter of 27th October, No. R. & S. 2414, I have much pleasure in informing you that the Council have decided to adopt your suggestion in the last paragraph of the above letter, to the effect that the Association should make an annual grant which would be utilised under the orders of the Government of India.

2. It has been decided to place at your disposal the sum of 10,000/., to be spread over a period of four years, at the rate of about 2,500/ per annum, to be devoted to the improvement and extension of cotton growing in India.

3. As to the exact method in which these funds should be spent, the Council are prepared to leave the direction entirely in your hands, as they feel quite sure that the Government of India will take sufficient care to see that money is not wasted. I would, however, request that, as far as possible, where advances are made, that it should be stipulated that the cotton grown should either be sent to this Association for sale, and that the latter, after repayment of the advances, hand over the surplus proceeds to the planter, or that arrangements should be made, as far as possible, for the money to be advanced on a business basis, so that there would be some possibility of, at any rate, some portion of it coming back again. If this can be done, I have no doubt the Council would be prepared to re-advance the money thus lent, for a further period, and I would suggest that a reasonable rate of interest should be charged.

4. I shall be very glad to hear of any suggestions that the Indian Government may make as to the best method of utilising the above grant, but I wish to make it perfectly clear that the Council have decided to leave you an absolutely free hand in the matter, so that no time should be lost by referring matters back to this Association for consultation. All that is desired is that the Association should receive from time to time full particulars as to the manner in which the money is being spent.

No. R. & S. 3125, dated India Office, London, the 2nd January 1906.

From—SIR A. GODLEY, Under-Secretary of State for India,

To—The Vice-Chairman, British Cotton Growing Association.

I am directed by the Secretary of State for India in Council to inform you that he has received with pleasure and satisfaction your letter of the 6th ultimo, stating that your Association has decided to grant the sum of 2,500/ a year for four years, to be devoted, under the direction of the Government of India, to the improvement and extension of cotton growing in India, and I am to say that copy of your letter has been forwarded to the Government of India, whose attention has been drawn to your request that full particulars should be supplied to you from time to time as to the manner in which the money is being spent.

I am also to suggest that the amount of the first annual grant should be placed to the credit of the Secretary of State in Council of India at the Bank of England, under the enclosed receivable order, for transmission to India.

J. WILSON,

Secretary to the Government of India.

GOVERNMENT OF INDIA.
DEPARTMENT OF REVENUE AND AGRICULTURE.

AGRICULTURE.

CONTRIBUTION BY THE BRITISH COTTON GROWING ASSOCIATION TOWARDS
THE IMPROVEMENT AND EXTENSION OF COTTON CULTIVATION IN INDIA.

No. 3, dated Calcutta, the 8th March 1906.

From—The Government of India,
To—The Secretary of State for India.

We have the honour to acknowledge the receipt of your despatch No. 2 (Revenue), dated the 5th January 1906, and of the papers received with your Revenue Secretary's letter No. 38 of the same date on the subject of the contribution of £10,000 promised by the British Cotton Growing Association towards the expenditure now being incurred on experiments for the improvement of cotton in India.

2. In reply, we would ask that an expression of our cordial thanks may be conveyed to the Association for their liberal contribution. We have noted their suggestions regarding the manner in which they would wish the money to be utilized, and they will be kept informed from time to time of its distribution. When the detailed scheme for the purpose which we have instructed our Inspector General of Agriculture to elaborate has been received, we shall be in a position to state when the money will be required, and a further communication will then be addressed to you for the information of the Association.

J. WILSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.
DEPARTMENT OF REVENUE AND AGRICULTURE.

**Rainfall summary for the seven days ending at 8 hrs., on Thursday,
the 8th March 1906, based on the India Daily Weather
Reports of the period.**

Over the greater part of the Indian area weather has been settled and dry during the past week, the principal deviations from these conditions occurring in Baluchistan, the North-west Frontier Province, Kashmir and north-east India. Snow has fallen at Sonemarg throughout the week lightly on all days, except the 4th, when 0·93" was received during the 24 hours. Of other observing stations in Kashmir, Astor only has reported an appreciable fall, *viz.*, 0·80", on the 5th. In Baluchistan and the North-west Frontier Province the wet weather was confined to the earlier part of the week, the following amounts being reported:—on the 2nd Quetta 0·27", Chaman 0·10", and on the 3rd Quetta 0·31", Peshawar 0·22" and Cherat 0·48". Continuously dry weather in Burma was broken by a single fall of 0·76" at Mergui on the 2nd.

A brisk fall of the barometer in north-east India on the 6th was accompanied by light, scattered showers on that day, and with a further pressure decrease on the 7th the rainfall became more marked in Deltaic Bengal, the east Himalayas and in the Assam Valley. The chief falls occurring on the 7th were:—Silchar 1·12", Cherra Poonjee 0·91", Shillong 1·00", Bogra 0·76" and Dinajpur 0·60".

The accompanying table shows that rainfall has been in defect generally during the week, but since the average normal amounts for the seven days is, in any case, small, the figures given last week showing the widespread excess rainfall since first December 1905 remain sensibly unaltered.

RAINFALL DIVISION WITH REPRESENTATIVE STATION.	Rainfall sub-division named after representative station.	RAINFALL DATA FOR WEEK ENDING ON 8TH MARCH 1906.			RAINFALL DATA FROM 1ST DECEMBER 1905 TO 8TH MARCH 1906.			SEASONAL PERCENTAGE DEPARTURE FROM NORMAL.	
		Average actual rainfall.	Average normal rainfall.	Excess or defect in inches.	Average actual rainfall of season to date.	Average normal rainfall.	Excess or defect in inches.	This week.	Last week.

J. H. FIELD,

for Meteorological Reporter to the Government of India
and Director General of Indian Observatories.

J. WILSON,

Secretary to the Government of India.

SIMLA,

The 8th March 1906.

GOVERNMENT OF INDIA.
DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 3rd March 1906.

Burma.—Sandoway received about 10 and a quarter inches of rain, Mergui 76 cents, and six districts of Upper Burma including the Northern Shan States amounts varying from 5 cents to 15 cents. Threshing and winnowing are very nearly completed in all districts of Lower Burma. Reaping of wet weather paddy is completed in Myingyan. Sowing of dry weather paddy is completed in parts of Lower Chindwin and Myingyan. Transplanting of onions and tobacco is completed in Mandalay and gathering of onions has commenced in parts of Myingyan. Gathering of peas is completed in the Yinmabin sub-division of Lower Chindwin. Reaping of sessamum in Myingyan and of jowar in Myingyan and Pakokku is completed. Reaping of early dry weather miscellaneous crops has commenced in Meiktila. The state of the standing crops is generally good. The price of paddy has risen considerably in Tharrawaddy and slightly in Mergui, Thayetmyo, Kyaukse, and Upper Chindwin; and has fallen considerably in Henzada, and slightly at Rangoon and Prome.

Eastern Bengal and Assam.—The weather is warmer. There was slight rain at Dibrugarh during the week but elsewhere there was none. Pruning of tea and harvesting of mustard and pulses are in progress. The prospects of the crops are generally fair. Lands are being prepared for early rice and jute. Fodder is insufficient in parts of Bogra, Sylhet, and the Khasi and Jaintia Hills. Prices of common rice:—Sibsagar 12; Silchar, Gauhati, and Tezpur 10; Chittagong 9 to 10; Rumpur Boalia 9½; Dinajpur 9½; Malda and Rangamati 9½; Barisal 9½; Jalpaiguri, Rangpur, Pabna, Bogra, Mymensingh, Dacca, Dhubri, Nowgong, Dibrugarh, and Tura 9; Faridpur 8 to 9; Comilla 8½; Sylhet 7½; and Noakhali 7½ seers per rupee.

Bengal.—In the week under report the Province was almost free from rain; light showers are reported from Monghyr and Bhagalpur only. Sugarcane pressing and harvesting of oilseeds are approaching completion. The condition of the spring crops is generally good in Behar, though they have suffered in places from the recent rain. Fodder and water are generally sufficient. The price of common rice has risen in seven and has fallen in four districts. It continues high in most of the districts of the Presidency Division and also in Hooghly, Howrah, Muzaffarpur, Monghyr and Purnea.

United Provinces.—With the exception of very light showers in Dehra Dun and Garhwal the week has been rainless. The spring crops are ripening and are being gathered in fifteen districts. Considerable damage by hail in previous week to unirrigated crops is reported from parts of Jalaun, Fatehpur, and Partabgarh. The condition of the standing crops in Banda is said to be unsatisfactory and prospects are bad, while most of the crops sown on the bed of the Jumna in the Muttra district have been flooded. Generally the recent rain has improved prospects except in the famine districts where dry crops were past recovery. Extra crops and sugarcane are being sown and land ploughed for autumn sowings. Gathering of opium has commenced. Prices have risen in eight districts, continue high in fifteen, and show a falling tendency in fifteen districts. The total number of persons on relief at the end of the week was 151,521.

The weekly report on the famine and scarcity is as follows:—There was no rain during the week in distressed districts. With the commencement of harvesting operations the increase in workers has slackened. The recent rain has improved the prospects of the irrigated crops but came too late for the dry crops, it will however give rest to the well bullocks. Village relief is being extended. The physical condition of the people is fair and cases of emaciation are rare. The numbers on relief were as follows:—workers Jalaun 40,645, Jhansi 18,353, Muttra 10,059, Cawnpore 11,604, Hamirpur 14,634; on gratuitous relief Jalaun 27,067, Jhansi 14,915, Muttra 6,402, Cawnpore 733, Hamirpur 7,049; total workers 95,295; on gratuitous relief 56,226; grand total 151,521.

Punjab.—There was a slight fall of rain in Rawalpindi and Mianwali during the week. Prices of food grains show a slight downward tendency. Sowings of extra spring and ploughing for autumn crops continue. The standing crops have improved greatly and are now in good condition; though unirrigated crops are below average in Gurgaon and Delhi. The opium crop is average in Lahore. Cattle are still weak in the Delhi Division and in Sialkot owing to insufficiency of fodder. Fodder is still scarce in many districts; the supply of green fodder is improving. There are no complaints regarding the water-supply. The daily average numbers on relief were as follows:—on works 4,223, on

gratuitous relief 3,582, total 7,805 against 4,169 last week. Prices:—Rohtak 14 seers per rupee.

North-West Frontier Province.—Slight showers have fallen all over the Province and have been beneficial to the standing spring crops. Extra spring sowings are in progress. The weather is getting warmer and the prospects of the standing crops are excellent. The water-supply is ample. Condition of cattle is poor in the Indus Valley of Dera Ismail Khan and fair elsewhere. Stocks of food grains and fodder are sufficient except in the Indus Valley of Dera Ismail Khan. Prices are nearly stationary.

Jammu.—There was no rain during the week. Prices are stationary. Prices:—wheat 13 to 22 and maize 16 to 34 seers per rupee. The condition of the standing crops is good. Fodder is sufficient.

Kashmir.—The weather is bright and pleasant. Prices are stationary.

Rajputana.—There was no rain during the week except slight showers in Jaipur. The standing crops are being watered or weeded; they have generally benefited by the recent rain but the cultivated area is restricted. Pasturage and fodder are insufficient in North Mewar, Jaipur, Kishangarh, Alwar, Karauli, Bharatpur, Dholpur, and parts of Marwar, Tonk and Kotah; in these tracts the condition of cattle is generally poor. Prices have fallen in Tonk and slightly in Alwar and Jaipur, and are practically steady elsewhere. The numbers on famine relief are:—Ajmer Merwara 56,796; Native States 30,200; on test works—North Mewar 2,853, Shahpura 33, Tonk 1,202, Jaipur 4,060; on gratuitous relief—North Mewar 406, Shahpura 71, Tonk 120; grand total 1,04,900, or an increase of 5,762. Three test works in Alwar were converted into relief works on 1st March. The decrease in Shahpura is due to the extension of ordinary public works to which labourers except weakly ones have been transferred.

The weekly report on the famine and scarcity is as follows:—Ajmer Merwara—on works Ajmer 19,105, Merwara 20,945; on gratuitous relief—Ajmer 7,723, Merwara 8,965 total 56,796, or an increase of 2,743. Prices:—Ajmer 10½ seers and Merwara 11 seers per rupee. Native States—Merwar on works 4,113; on gratuitous relief 1,801, total 5,914; Kishangarh on works 2,816; on gratuitous relief 2,742, total 5,558; Alwar total 2,899; Eastern States—on works 19,423; on gratuitous relief 5,406, total 24,829. Prices—Marwar 11½, Kishangarh 12½, Alwar 12½, Karauli 9½, Bharatpur 11½, Dholpur affected area 16½ seers per rupee. The public health is good and relief measures are adequate.

Central India.—There was partial rainfall in parts of Gwalior, Indore, and Malwa during the week. Reaping of spring crops has been started in parts of Indore, Bhopal, Baghelkhand, and Bundelkhand. The standing crops are normal in Gwalior; fair in Indore, Bhopal, Mawa, and Bhopawar; average in Bundelkhand; and indifferent in Baghelkhand. The probable outturn is normal in Gwalior; fair in Indore, Bhopal and Bhopawar; and below average in Baghelkhand, Bundelkhand and Malwa. Crops have been slightly damaged in parts of Gwalior, Indore, and Malwa. Agricultural stock are in bad condition in parts of Gwalior; good in parts of Indore and Malwa; fair in Bhopal; and average in Bundelkhand. Pasturage is bad in parts of Gwalior; and scarce in north of Bundelkhand. Prices are high in Gwalior, Indore, and Baghelkhand; and are rising in Bhopal. Oil must have been slightly damaged in parts of Gwalior, Indore, and Malwa.

The weekly report on the famine and scarcity is as follows:—The general position in Gwalior and Bundelkhand is unaltered. The numbers on works are:—in Gwalior 38,000, on gratuitous relief 5,000, total 43,000; in Orcha, Datia, Sambhar, Baoni, Panna, Charkhari, Bilawar, Chhatapur, Sarila, and Jagirs:—on works, 29,000, on gratuitous relief 3,000, total 32,000, grand total 75,000. The prices of staple food grains in Bundelkhand vary from 12 to 13½ seers per rupee.

Central Provinces.—The weather has been clear and the days hot. The harvesting of spring crops has much advanced and threshing is in progress. Wheat and linseed promise an almost normal outturn in the provinces as a whole. Red rust is reported to have attacked the standing wheat and linseed crops in parts of the Sihora Tahsil of Jabulpore. Some damage to gram and tur has been caused by caterpillars in the Garchioli tahsil of Chanda. Land is being prepared for autumn sowings in Nimar, Chhattisgarh, and Berar. In tracts of Bilaspur where there has been some apprehension of distress the spring harvesting is providing sufficient employment for labourers and the condition of the people is good. Unusually large numbers of people have come into Damoh from neighbouring States to reap the harvest. The price of wheat has fallen in Seoni, Narsinghpur, Betul, and Nagpur. Rice has risen in price by 2 seers per rupee in Mandla and gram by 2 seers in Chanda; wheat and rice are selling at 11½ seers each at Bilaspur against 13 and 13½ seers respectively in the previous week; elsewhere prices are steady or fluctuate slightly. Prices of staple food grains are high and considerably higher than those ruling at this time last year.

Baroda.—For week ending 24th February. The numbers on relief were as follows :—on works 3,320 ; on gratuitous relief 157 ; total 3,477.

Bombay.—There has been slight damage to the oilseeds and wheat crops in Karachi by frost and the recent rain which however was beneficial to the standing spring crops : to wheat crops in Hyderabad by insects and in Mahi Kantha by rain ; in parts of Dharwar cotton has been slightly injured by blight ; elsewhere crops are in good condition except in the affected districts. The irrigated crops are still generally fair but water is running short in irrigation canals, tanks and wells. Cotton picking continues in Gujarat, the Karnatak, Baroda, Cutch, Rewa Kantha, and Palanpur. Supply of drinking water is scarce in the affected districts and is being supplemented with the aid of Government grants and takavi advances. Cattle in affected districts are losing condition and are being sold at low prices especially in Ahmednagar and Bijapur. Prices of local fodder are two to three times above the normal but the deficiency is made good by Government importation into affected districts. The food grain supply is generally sufficient. Prices are 40 to 120 per cent. over the normal in the Deccan ; 65 to 95 per cent. in the Karnatak ; 15 to 95 per cent. in Gujarat ; and 10 to 30 per cent. in Konkan. Test works have been opened in Dharwar, Relief works are in progress in Belgaum, Ahmednagar, Bijapur, and the Southern Maratha Country States. The numbers of test works are increasing in Poona, Sholapur and Belgaum, the figures on the last day of the week ending 24th February were :—Poona 483, Sholapur 555, Satara 400, Bijapur 269, Belgaum 181, Jath 24, Aurdh 123, total 2,101. The test work in Phaltan is still open but has not as yet attracted labourers. Distress is gradually increasing in the affected districts and States but is still not acute. Small cultivators have begun to come on relief works in Ahmednagar, elsewhere they still get work locally. The condition of relief workers is fair to good. Emigration from affected tracts is decreasing and emigrants are returning in small numbers. There is no aimless wandering and no emaciation is noticed ; the report made week before last about emaciation in the Sangola taluka of Sholapur is now stated to be incorrect and the aspect of the taluka is very reassuring. Food is being supplied to paupers from private charitable funds in Bijapur. The numbers on relief in British districts are :—Deccan—on works 3,104 ; on gratuitous relief 8,799, total 11,903 ; Karnatak—on works 6,320 ; on gratuitous relief 10,911 ; total 17,231. Native States—on works 2,168 ; on gratuitous relief 1,462, total 3,630.

Hyderabad.—There was no rain during the week. The spring harvest has been completed in three taluqs and is progressing elsewhere. The late rice crop is in good condition and is being weeded. Lands are being prepared for autumn sowings. Fodder and water scarcity exists in forty-two and thirty-one taluqs, respectively. The attendance on road works in the affected taluqs amounted to 3,001 persons and in the poor-house at Ashui to 42 persons. The price of jowar has risen from half to three seers in twenty-two taluqs and fallen from half to two seers in nine taluqs. Prices :—wheat 8½ ; coarse rice 7¼ ; jowar 14 seers per rupee.

Mysore.—There was slight rain during the week in Bangalore and in parts of Kolar, Hassan, Mysore, and Shimoga. Prices are steady. The crops are in fair condition except in parts of Chittaldroog. Prospects in Tumkur are not encouraging but are fair in other districts. Cattle are unhealthy in parts of Tumkur, Hassan, and Chittaldroog. Water and fodder are scanty in parts of Tumkur, Hassan, Mysore, Shimoga, and Chittaldroog.

Coorg.—Threshing of rice continues. Prices of food grains are normal. Water and fodder are sufficient.

Madras.—The rainfall of the week was good in the Nilgiris and South Arcot ; fair in Madras, Salem, Tinnevely, North Arcot, Trichinopoly, Tanjore, Chingleput, Madura, and Nellore ; light in the Vizagapatam littoral, Coimbatore, Malabar and Cuddapah ; there was none elsewhere. Irrigation supplies are insufficient except in parts of the Deccan, the Carnatic, North Arcot, South Canara, and the Nilgiris. Ploughing, sowing, weeding and transplanting are in progress in parts. The standing crops are generally fair but some in parts of Bellary, Coimbatore, Tanjore, and Tinnevely require more rain and some in parts of Madura are withering. Harvests continue with outturn poor to normal and bumper. Pasture is sufficient except in parts of the Circars, the Deccan, the Central Districts, Madura, Tinnevely, and South Canara. Fodder is scanty in parts of South Arcot, Salem, Coimbatore, Tanjore, and Madura. The condition of cattle is generally good. The price of rice is stationary in ten districts ; has fallen in nine ; and has slightly risen in four. The prices of millets have fluctuated as follows :—ragi is stationary in seven districts, has fallen in seven ; and has slightly risen in seven. Cholam is stationary in five districts ; has fallen in five ; and has slightly risen in four. Cumbu is stationary in four districts ; has fallen in seven ; and has slightly risen in four.

J. WILSON,

Secretary to the Government of India.

GOVERNMENT OF INDIA.
HOME DEPARTMENT.

MEDICAL.

ESTABLISHMENT OF AN X-RAY INSTITUTE.

No. 209—228—Calcutta, the 9th March 1906.

RESOLUTION.

READ—

Despatch to the Secretary of State, No. 110 (Financial), dated the 30th March 1905.

Extract paragraph 2 of a Military despatch from the Secretary of State, No. 69, dated the 16th June 1905.

The Government of India have decided, with the approval of the Secretary of State, to establish an institute in India as a centre for the practical instruction of medical officers and subordinates in the use and management of X-ray apparatus and as a depôt for the storage and repair of such apparatus.

2. The institute will be located at Dehra Dun and will be under the superintendence of an officer of the Indian Medical Service, who will receive the pay of his rank and the staff pay sanctioned for a medical store-keeper and will be provided with the necessary subordinate establishment to assist him in his duties.

3. Classes will be held for the instruction of medical officers and subordinates in civil and military employment, the course of instruction in each case extending over a period of about three months. Officers in military employ attending the classes will receive the pay and allowances of their substantive appointments and travelling allowance under the rules which govern their case. Officers in civil employ permitted to attend will draw the pay of their substantive appointments and travelling allowance at the rates permissible under the Civil Service Regulations.

4. The Government of India trust that local Governments will afford all reasonable facilities to medical officers and subordinates serving under their jurisdiction, who may be desirous of acquiring a practical knowledge of the X-ray apparatus and in whose case the possession of such knowledge would be of advantage, to enable them to proceed to Dehra Dun for instruction at one of the classes. Applications for permission to attend the institute should be made to the local administrative medical officer in each province, who should submit his recommendations, after obtaining the approval of the local Government in each case, to the Director-General, Indian Medical Service.

Order.—Ordered that a copy of this resolution be communicated to all local Governments and Administrations, to all Departments of the Government of India, to the Director-General, Indian Medical Service, and to the Sanitary Commissioner with the Government of India for information.

Ordered also, that a copy be published in the *Supplement to the Gazette of India* for general information.

H. H. RISLEY,

Secretary to the Government of India.

H. H. RISLEY,
Secretary to the Government of India.

RAILWAY BOARD.

No. R. Stat. $\frac{11-1}{30}$, Calcutta, the 13th February 1906.

PROGRESS IN THE INTRODUCTION OF, AND RESULTS OF WORKING, THE AUTOMATIC VACUUM BRAKE ON RAILWAYS IN INDIA, DURING THE SIX MONTHS ENDED THE 30TH JUNE 1905, TABLES NOS. I AND II.

Read again—

Government of India letter No. 62 P. Stat., dated the 19th October 1891.

Government of India letter No. 424 R. Stat., dated the 21st October 1896.

Government of India letter No. 225 R. Stat., dated the 19th June 1903.

ORDER— Ordered, that tables Nos. I and II be forwarded, for information, to the Local

The Governments of Madras, Bombay, Bengal, the United Provinces of Agra and Oudh, the Punjab, Burma, and Eastern Bengal and Assam.	Governments
The Honourable the Chief Commissioner of the Central Provinces.	
The Honourable the Resident at Hyderabad.	and Administra-
The Honourable the Resident in Mysore.	
The Honourable the Agents to the Governor General for Rajputana, Central India and Baluchistan.	tions and to the
The Honourable the Agent to the Governor General and Chief Commissioner of the North-West Frontier Province.	
The Consulting Engineers to the Government of India for Railway, Calcutta and Lucknow.	officers noted
The Managers, North-Western, Oudh and Rohilkhand and Eastern Bengal State Railways.	

in the margin.

Ordered, also, that copies be forwarded for the information of His Majesty's Government.

Further that this order, with the tables, be published in the Supplement to the *Gazette of India*.

C. A. R. BROWNE,
Secretary, Railway Board.

Documents accompanying.

Tables Nos. I and II, showing the railways on which the automatic vacuum brake was in use, the number and proportion of rolling-stock fitted with the brake, the progress made in fitting stock since the previous half-year, and the results of working the brake during the six months ended the 30th June 1905.

TABLE No. I.

Statement showing, for the six months ended the 30th June 1906, the railways on which the automatic vacuum brake was in use, the mileage run by trains fitted with the brake, the number and proportion of rolling-stock fitted, and the progress made in fitting stock since the previous half year.

Railway (including lines worked)	Period.	LOCOMOTIVES.		COACHING VEHICLES (including all brake-vans).				GOODS VEHICLES (excluding all brake-vans and cranes).				Percentage of mileage run by trains fitted on total train mileage.	Total number of instances in which the brake failed to act or caused delay in the working of trains.	Number of miles run by trains fitted to each case of failure.		
		Percentage of fitted on total.		Percentage of braked and piped on total.		Percentage of braked and piped on total.		Percentage of braked and piped on total.								
		Fitted.	Not fitted.	Braked.	Piped.	Not fitted.	Percentage of braked and piped on total.	Braked.	Piped.	Not fitted.	Percentage of braked and piped on total.

(a) Includes one hundred 3' 6" gauge coal wagons home on the Raiputana-Malwa railway rolling-stock list.

(b) Excludes locomotives and vehicles in use on lines under construction.

(c) The detailed figures in columns 4, 8 and 12 do not work up to the totals, as the latter include stock of rail ways not detailed in the table.

(d) Excluding the Baraset-Basirhat and 1 haton-Duyanzak Light railway, for which no information is available.

(e) Calculated on the train-mileage excluding that run on the railways named in note (d) and Powayan Light railway for which train-mileage statistics are not available.

(f) Calculated on the train-mileage excluding that run on the railways referred to in note (e) and Dandot Light railway for which train-mileage statistics are not available.

(g) Fitted with the Westinghouse brake.

(h) Includes 7 engines fitted with the Westinghouse brake.

(i) Includes 47 coaching vehicles fitted with the Westinghouse brake.

(j) Mileage run by trains fitted with the Westinghouse brake.

TABLE No. II.

Statement showing for the six months ended the 30th June 1905, all cases in which the automatic vacuum brake failed to act, when required to be brought into action, or caused delay in the working of trains.

1	2	3	4	5
Railway.	Name or description of brakes which failed or caused delay in the instances specified in column 4.	Date of failure.	Instances under the three following heads, separately, of :— (i) Failure or partial failure to act when required in case of an accident to a train, or a collision between trains being imminent; (ii) Failure on partial failure to act under ordinary circumstances to stop a train when required; (iii) Delay in the working of trains in consequence of defects in, or improper action of, the brake; distinguishing whether they arose from neglect or inexperience of servants, or failure of machinery or material.	Number of mil run by trains fitted with the automatic vacuum brake.
5' 6" GAUGE. Bengal-Nagpur	Vacuum, automatic	18th February 1905	(ii) and (iii)— <i>Nil</i> . (iii) Neglect of servants.—No. 11 down passenger train lost 14 minutes at Gidni and worked non-vacuum to Khargpur, due to a torn hose pipe on the train.	804,700
		26th March 1905	(iii) Failure of machinery.—No. 1 down mail train started 24 minutes late from Nagpur, due to the vacuum brake piston of a reserved carriage being jammed.	
Bombay, Baroda and Central India.	Vacuum, automatic	(i) and (ii)— <i>Nil</i> .	1,001,565
		10th January 1905	(iii) Failure of material.—No. 15 down passenger train started 15 minutes late from Baroda, owing a defect in the train pipe.	
		14th January 1905	(iii) Failure of material.—No. 15 down passenger train started 25 minutes late from Baroda owing to a defect in the train pipe.	
		28th February 1905	(iii) Neglect of servants.—No. 186 up local train lost 6 minutes at Mahalakshmi as vacuum could not be created, due to there being no washer in the coupling pipe of a bogie third class carriage. The train worked non-vacuum to Colaba.	
		27th March 1905	(iii) Failure of machinery.—No. 5 down passenger train delayed 6 minutes at Brouch to release the brake blocks of a horse box, due to the cross bar giving way from the middle bar, which allowed the pull rod to join on the yoke and between the two suspension links.	
		27th April 1905	(iii) Failure of material.—No. 3 down passenger train lost 13 minutes between Miyagam and Itola and worked non-vacuum to Baroda, owing to the tender rear vacuum rubber pipe being broken.	
		19th May 1905	(ii) Failure of material.—No. 307 down local passenger train started 10 minutes late from Baroda, due to the washer in rear brake-van being defective.	
		18th June 1905	(iii) Failure of machinery.—No. 234 up local train lost 5 minutes at Borivli, owing to the brake blocks of a bogie brake-van having become jammed due to the brake piston or gear sticking.	
		19th June 1905	(iii) Failure of machinery.—No. 7 down ordinary train lost 12 minutes at Parel, due to the vacuum release valve in the front brake-van having stuck.	
		22nd June 1905	(iii) Failure of machinery.—No. 5 down passenger train lost 7 minutes between Anand and Nadiad, owing to the brake blocks of a carriage having become jammed due to both pistons being stuck.	
		28th June 1905	(iii) Failure of machinery.—No. 6 up passenger train lost 10 minutes between Barejadi and Mehmabad, due to the train pipe-washer between engine and tender being bad and the steam disc valve on ejector being rough.	

TABLE No. II (contd.).

Statements showing, for the six months ended the 30th June 1905, all cases in which the automatic vacuum brake failed to act, when required to be brought into action, or caused delay in the working of trains—(contd.)

1	2	3	4	5
Railway.	Name or description of brakes which failed or caused delay in the instances specified in column 4.	Date of failure.	Instances under the three following heads, separately, of— (i) Failure or partial failure to act when required in case of an accident to a train, or a collision between trains being imminent; (ii) Failure or partial failure to act under ordinary circumstances to stop a train when required; (iii) Delay in the working of trains in consequence of defects in, or improper action of, the brake; distinguishing whether they arose from neglect or inexperience of servants, or failure of machinery or material.	Number of miles run by trains, fitted with the automatic vacuum brake.
5'6" GAUGE—contd. Eastern Bengal State.	Vacuum, automatic.	i and (ii)—Nil.	
		6th January 1905	(iii) Failure of material.—No. 34 down passenger train detained one hour at Poradaha junction, due to defective vacuum.	
		11th January 1905	(iii) Neglect of servants.—No. 34 down passenger train started 19 minutes late from Rajbari, due to a defect in the hose pipe washer of the engine.	
		17th May 1905	(iii) Failure of material.—No. 5 up passenger train detained 10 minutes at Dum Dum junction, due to the vacuum combination ejector inner disc of the engine being defective.	
		10th June 1905	(iii) Failure of material.—No. 31 up passenger train started 19 minutes late from Calcutta, due to the vacuum pipe of a 2nd class carriage leaking.	434, 808.
		24th June 1905	(iii) Failure of material.—No. 44 down passenger train started 10 minutes late from Kanchrapara, due to defective vacuum on a mail van.	
		20th June 1905	(iii) Failure of material.—No. 115 up passenger train lost 7 minutes between Basuldanga and Barnipur and worked non-vacuum to Beliaghata, owing to the R. V. diaphragm in an intermediate and 3rd class composite carriage leaking.	
East Indian		(i) and (ii) Nil.	
		14th January 1905	(iii) Failure of material.—No. 12 down train lost 5 minutes at Buxar and worked non-vacuum to Dinapore, due to the tender pipe breaking.	
		7th February 1905	(iii) Neglect of servants. No. 19 up train lost 20 minutes at Howrah and worked non-vacuum to Burdwan, due to a defect in a 3rd class carriage.	
		16th February 1905	(iii) Failure of material.—No. 20 down train lost 22 minutes between Tinpahar and Rampore Haut stations, owing to a defective rubber washer in a 3rd class carriage.	
		19th March 1905	(iii) Neglect of servants.—No. 1 up train lost 10 minutes and worked non-vacuum from Ghaggar to Kalka due to the automatic valve in the brake-van being tampered with.	See page 667.
		22nd April 1905	(iii) Neglect of servants.—No. 18 down train lost 20 minutes at Daud Khan, and worked non-vacuum to Tundla, due to the vacuum being destroyed in a 1st class carriage and the guard not having a key to re-adjust the alarm.	
		24th April 1905	(iii) Neglect of servants.—No. 6 down train lost 11 minutes at Baidyanath Junction, owing to the guard not being in possession of a key to rectify the patent vacuum emergency apparatus.	
		2nd May 1905	(iii) Failure of machinery.—No. 18 down train worked non-vacuum from Rampore Haut to Burdwan, owing to the engine internal vacuum exhaust pipe leaking badly.	

TABLE No. II—(contd.)

Statement showing, for the six months ended the 30th June 1905, all cases in which the automatic vacuum brake failed to act, when required to be brought into action or caused delay in the working of trains—(contd.)

1	2	3	4	5
Railway.	Name or description of brakes which failed or caused delay in the instances specified in column 4.	Date of failure.	Instances under the three following heads, separately, of:— (i) Failure or partial failure to act when required in case of an accident to a train, or a collision between trains being imminent. (ii) Failure or partial failure to act under ordinary circumstances to stop a train when required; (iii) Delay in the working of trains in consequence of defects in, or improper action of, the brake; distinguishing whether they arose from neglect or inexperience of servants, or failure of machinery or material.	Number of miles run by trains, fitted with the automatic vacuum brake.
5' 6" GAUGE—contd. East Indian—contd.	Vacuum, automatic	4th May 1905	(iii) Neglect of servants.—No. 28 down train worked non-vacuum from Bandel junction to Howrah, due to there being a defective carriage on the train.	See page 667.
		7th May 1905	(iii) Failure of material.—No. 20 down train lost 8 minutes between Mollápur and Rampore Haut, and worked non-vacuum to Howrah, due to the vacuum train pipe breaking at the collar.	
		11th May 1905	(iii) Neglect of servants.—No. 11 up train lost 31 minutes, and worked non-vacuum from Khána junction to Asansol, due to the engine priming.	
		16th May 1905	(iii) Failure of material.—No. 18 down train lost 5 minutes at Patpore, and worked non-vacuum to Ghaziabad, owing to a defective intermediate vacuum hose pipe between engine and tender.	
		19th May 1905	(iii) Neglect of servants.—No. 12 down train lost 5 minutes at Mokameh Ghát, and worked non-vacuum to Asansol, owing to some defect in the brake-van and releasing wire of carriages.	
		20th May 1905	(iii) Failure of material.—No. 26 down train lost 6 minutes between Balut (Block hut) and Saktighar and worked non-vacuum to Howrah, due to the vacuum train pipe entirely breaking off from the union nut combination.	
		6th June 1905	(iii) Neglect of servants.—No. 1 up train lost 15 minutes at Manauri, and worked non-vacuum to Cawnpore, due to the alarm apparatus fitted to the postal van having been tampered with and the vacuum being considerably reduced.	
		8th June 1905	(iii) Failure of machinery.—No. 14 down train lost 25 minutes at Ghaziabad and 14 minutes at Aligarh, and worked non-vacuum to Tundla, due to the pistons of several of the carriages leaking badly.	
		14th June 1905	(iii) Failure of machinery.—No. 18 down train lost 11 minutes between Ahmadpur and Bolpur, and worked non-vacuum to Burdwan owing to leakages in two vehicles due to defective pistons.	
		17th June 1905	(iii) Neglect of servants.—No. 17 up train worked non-vacuum from Burdwan to Rampore Haut, due to the defective train pipe of a 3rd class carriage.	
		19th June 1905	(iii) Failure of machinery.—No. 13 up train lost 22 minutes at Bambrali, and worked non-vacuum to Cawnpore, due to a leak in the train pipe	
		21st June 1905	(iii) Failure of machinery.—No. 14 down train lost 8 minutes at Fatehpur, and worked non-vacuum from Chakeri to Allahabad, due to defective train brake.	

TABLE No. II—contd.

Statement showing for the six months ended the 30th June 1905, all cases in which the automatic vacuum brake failed to act, when required to be brought into action, or caused delay in the working of trains—*contd.*

1	2	3	4	5
Railway.	Name or description of brakes which failed or caused delay in the instances specified in column 4.	Date of failure.	Instances under the three following heads, separately, of :— (i) Failure or partial failure to act when required in case of an accident to a train, or a collision between trains being imminent; (ii) Failure or partial failure to act under ordinary circumstances to stop a train when required; (iii) Delay in the working of trains in consequence of defects in, or improper action of the brake; distinguishing whether they arose from neglect or inexperience of servants, or failure of machinery or material.	Number of miles run by trains fitted with the automatic vacuum brake.
5' 6" GAUGE— (<i>contd.</i>)				
East Indian— (<i>concl.</i>)	Vacuum, automatic.	22nd June 1905	(iii) Neglect of servants.—No. 12 down train lost 8 minutes at Futwah, and worked non-vacuum from Buxar to Dinapore, due to the alarm handle in a 1st class carriage being open.	2,585,702
		24th June 1905	(iii) Failure of machinery.—No. 8 down train worked non-vacuum from Allahabad to Cawnpore, due to leaks in two pistons.	
Great Indian Pen- insula.	Vacuum, automatic.	(i) and (ii)— <i>Nil</i> .	See page 668.
		9th January 1905	(iii) Neglect of servants.—No. 14 up passenger train worked non-vacuum from Harda to Bhusaval, owing to the driver being unable to create sufficient vacuum due to the ejector being defective.	
		19th January 1905	(iii) Failure of material.—No. 8 up mail train worked non-vacuum from Duldria to Harda, owing to the disc valve being badly cut.	
		19th February 1905	(iii) Neglect of servants.—No. 17 down passenger train delayed 45 minutes at Victoria Terminus, due to a leak in the universal coupling pipe of a horse-box.	
		22nd February 1905	(iii) Neglect of servants.—No. 19 down passenger train delayed 15 minutes at Victoria Terminus, due to the universal hose pipe of a bogie carriage leaking.	
		1st March 1905	(iii) Failure of machinery.—No. 16 up passenger train delayed 7 minutes at Palasdhari, owing to the right hand automatic piston being stuck and jammed.	
		3rd March 1905	(iii) Neglect of servant.—No. 93 down local train lost 10 minutes between Victoria Terminus and Masjid, due to the driver not creating an even vacuum before leaving the former station.	
		5th March 1905	(iii) Neglect of servants.—No. 353 down passenger train delayed 4 minutes at Sindi, having to replace a rubber washer on the flexible pipe of a horse-box.	
		13th March 1905	(iii) Neglect of servants.—No. 6 up mail train worked non-vacuum from Agra Fort to Jhansi, owing to mismanagement on the part of the driver.	
		18th March 1905	(iii) Failure of machinery.—No. 11 down passenger train delayed 36 minutes at Jhansi, having to disconnect the intercommunication valve, which was leaking and plugging the pipe of a 1st class carriage.	
		20th March 1905	(iii) Failure of material.—No. 11 down passenger train lost 12 minutes between Bina and Karonda, due to the diaphragm of a 3rd class carriage leaking.	
		26th March 1905	(iii) Failure of material.—No. 2 up mail train delayed 5 minutes at Nagpur, owing to the piston of a 3rd class carriage having become jammed.	

TABLE No. II—contd.

Statement showing for the six months ended the 30th June 1905, all cases in which the automatic vacuum brake failed to act, when required to be brought into action, or caused delay in the working of trains—*contd.*

1	2	3	4	5
Railway.	Name or description of brakes which failed or caused delay in the instances specified in column 4.	Date of failure.	Instances under the three following heads, separately, of:— (i) Failure or partial failure to act when required in case of an accident to a train or a collision between trains being imminent; (ii) Failure or partial failure to act under ordinary circumstances to stop a train when required; (iii) Delay in the working of trains in consequence of defects in, or improper action of, the brake; distinguishing whether they arose from neglect or inexperience of servants, or failure of machinery or material.	Number of miles run by trains fitted with the automatic vacuum brake.
5' 6" GAUGE— (<i>contd.</i>)				
Great Indian Peninsula—(<i>concl'd.</i>)	Vacuum, automatic	1st April 1905	(iii) Failure of material.—No. 10 up mail train was delayed 25 minutes at Sháhábád, owing to the release valve stud of a composite carriage breaking.	2,877,334.
		2nd May 1905	(iii) Failure of material.—No. 18 up passenger train was delayed 35 minutes at Lonávla, owing to the vacuum indicator pipe of the brake-van leaking.	
		7th May 1905	(iii) Failure of material.—No. 14 up passenger train was detained 27 minutes at Agra Road, owing to a leak in the universal coupling pipe, due to the rubber washers of two 3rd class carriages having perished.	
		21st May 1905	(ii) Failure of machinery.—No. 5 down Punjab mail train lost 13 minutes between Burhampur and Chúlkhán owing to the intercommunication valve of a bogie carriage leaking, due to some foreign matter having got below its seat.	
		4th June 1905	(iii) Neglect of servants. No. 14 up passenger train worked non-vacuum and lost 48 minutes between Basá and Lalitpur and Jiron and Bina, owing to mismanagement on the part of the driver.	
		9th June 1905	(iii) Failure of material.—No. 14 up passenger train started 17 minutes late from Agra Road, owing to a leak in the release valve of a 3rd class carriage, due to the rubber diaphragm having perished.	668,155.
Madras	Vacuum, automatic	(i) and (ii)— <i>Nil</i> .	
		24th January 1905	(ii) Failure of machinery.—No. 102 down passenger train was detained 6 minutes at Erode, owing to the hose coupling of D. No. 67 having burst. The train was worked forward non-vacuum.	
		3rd February 1905	(ii) Inexperience of servants.—No. 2 up mail train was brought to a stand at mile 332-2, North-East line, for 6 minutes, owing to the needles registering zero; no defect being observed the train worked vacuum brake to destination.	
		16th May 1905	(ii) Failure of machinery.—No. 87 down mail train was detained 10 minutes at Walajah Road, owing to the application valve of the brake-van leaking.	See page 669.
North-Western State.	Vacuum, automatic	(i) and (ii)— <i>Nil</i> .	
		11th February 1905	(ii) Neglect of servants.—No. 3 up passenger train detained 5 minutes at Delhi, owing to the universal hose-pipe of the rear brake-van not having been placed on the dummy.	
		14th February 1905	(iii) Failure of material.—No. 3 up passenger train detained 5 minutes at Delhi, owing to a leak in the van valve diaphragm of the brake-van.	

TABLE No. II—(contd.)

Statement showing, for the six months ended the 30th June 1905, all cases in which the automatic vacuum brake failed to act, when required to be brought into action, or caused delay in the working of trains—(contd.)

1	2	3	4	5
Railway.	Name or description of brakes which failed or caused delay in the instances specified in column 4.	Date of failure.	Instances under the three following heads, separately, of :— (i) Failure or partial failure to act when required in case of an accident to a train, or a collision between trains being imminent; (ii) Failure or partial failure to act under ordinary circumstances to stop a train when required; (iii) Delay in the working of trains in consequence of defects in, or improper action of, the brake; distinguishing whether they arose from neglect or inexperience of servants, or failure of machinery or material.	Number of miles run by trains fitted with the automatic vacuum brake.
5' 6" GAUGE— (concl'd.) North Western State—(concl'd.)	Vacuum, automatic.	27th February 1905.	(iii) Neglect of servants.—No. 4 down passenger train detained 5 minutes at Barāra, owing to the universal hose pipe coupling washers being missing from a composite carriage.	2,748,225
		14th March 1905	(iii) Neglect of servants.—No. 27 up passenger train detained 5 minutes at Rohri, owing to the universal hose pipe coupling washer being missing from a horse-box.	
		18th March 1905	(iii) Neglect of servants.—No. 30 down passenger train detained 8 minutes at Samāsata, owing to a leak in the universal hose pipe coupling washer of a brake-van.	
		10th May 1905	(iii) Neglect of servants.—No. 3 up Bombay mail train detained 30 minutes at Ghaziabad, owing to the hose pipe and hose pipe coupling of an intermediate class carriage being damaged.	
Oudh and Rohilkhand.	Vacuum, automatic.	(i) and (ii)—Nil.	1,088,177
		2nd January 1905	(iii) Failure of material.—No. 47 up mail train lost 10 minutes between Moradabad and Garhmukhtesar, owing to the rolling ring of the piston of a 1st class carriage leaking badly.	
		8th January 1905	(iii) Neglect of servants.—No. 47 up mail train detained 37 minutes at Chandnagar, owing to the hose pipe rubber washers of some carriages having perished and drawing air.	
		20th January 1905	(iii) Neglect of servants.—No. 7 up passenger train detained 14 minutes at Najibabad, owing to the hose-pipe of a 1st class carriage drawing air on account of the rubber washers at both ends being deficient.	
		25th January 1905	(iii) Failure of material.—No. 44 down passenger train detained 7 minutes at Karengi, owing to the rolling ring of the piston of a 3rd class carriage leaking badly.	
		27th January 1905	(iii) Neglect of servants.—No. 41 up mail train lost 13 minutes between Aonla and Karengi, owing to the coupling hose pipe of a brakevan having perished.	
3' 3½" GAUGE. Bengal and North Western.	Vacuum, automatic.	(i) and (ii) Nil.	See page 670.
		17th January 1905	(iii) Failure of machinery.—No. 2 down passenger train started 5 minutes late from Sonapore and lost 8 minutes between Hajipur and Barauni junction, due to a perished diaphragm on a 2nd class carriage.	
		5th February 1905	(iii) Neglect of servants.—No. 3 up passenger train detained 15 minutes at Begu Sarai, due to the small ejector cone being dirty.	
		12th February 1905	(iii) Inexperience of servants.—No. 1 up passenger train worked non-vacuum from Bachhwara, due to a leak in the train-pipe, which the guard and driver failed to locate.	

TABLE No. II—(contd.)

Statement showing, for the six months ended the 30th June 1905, all cases in which the automatic vacuum brake failed to act, when required to be brought into action, or caused delay in the working of trains—(contd.)

1	2	3	4	5
Railway.	Name or description of brakes which failed or caused delay in the instances specified in column 4.	Date of failure.	Instances under the three following heads, separately, of :— (i) Failure or partial failure to act when required in case of an accident to a train, or a collision between trains being imminent ; (ii) Failure or partial failure to act under ordinary circumstances to stop a train when required ; (iii) Delay in the working of trains in consequence of defects in, or improper action of, the brake ; distinguishing whether they arose from neglect or inexperience of servants, or failure of machinery or material.	Number of miles run by trains fitted with the automatic vacuum brake.
3' 3½" GAUGE— (contd.) Bengal and North-Western— (concl'd.)	Vacuum, automatic .	25th February 1905 .	(iii) Failure of machinery.—No. 3 up passenger train started 10 minutes late from Katikár, due to a leaking diaphragm on the brakevan to a loose indicator syphon pipe nut.	313,645
		4th March 1905 .	(iii) Failure of material.—No. 3 up passenger train detained 19 minutes at Daronda, due to the tram pipe leaking, and 29 minutes at Bhatni, due to vacuum failure.	
		5th May 1905 .	(iii) Inexperience of servants.—No. 1 up passenger train detained 7 minutes at Shahpur Patoree, due to defective vacuum and leak in a horse-box.	
		13th May 1905 .	(iii) Failure of material.—No. 2 down passenger train detained 30 minutes at Savan, due to the tender vacuum hose pipe clamp becoming disconnected. The train worked non-vacuum to destination.	
		24th May 1905 .	(iii) Inexperience of servants.—No. 4 down passenger train detained 8 minutes at Bhatpar, due to defective vacuum and a heavy leak in a 3rd class carriage.	
		6th June 1905 .	(iii) Failure of material.—No. 3 up passenger train detained 3 minutes at Shahpur Patoree, due to the hose pipe coupling washer having perished in a 3rd class carriage.	
		23rd June 1905 .	(iii) Failure of machinery.—No. 2 down passenger train detained 15 minutes at Baranni, owing to the diaphragm of ball valve of a 3rd class carriage having to be changed.	
Burma .	Vacuum, automatic	(i) and (ii)—Nil.	See page 67.
		10th January 1905 .	(iii) Neglect of servants.—No. 2 down express train lost 13 minutes between Shwemyo and Pyinmana, owing to a leak through the threads of the union joint of the train pipe of the engine. The threads were in good condition but the ferrule coupling had slackened back through vibration.	
		2nd February 1905 .	(iii) Failure of material.—No. 103 up mixed train was detained 25 minutes between Fourth Reversing and Zibingyi, owing to the hose pipe of a coaching vehicle developing a hole through faulty manufacture.	
		21st February 1905 .	(iii) Failure of machinery.—No. 3 up mail train was detained 18 minutes between Shwemyo and Yaméthin, due to the rolling ring of the vacuum cylinder on the engine getting twisted and preventing the brakes from releasing properly.	
		14th March 1905 .	(iii) Failure of machinery.—No. 4 down mail train was detained 55 minutes at Toungoo, owing to the connecting link set screw of the expansion spring in the vacuum gauge slackening back and the needle falling and not recording the vacuum created.	

TABLE No. II—(contd.)

LIGHTING OF COASTS.

The 12th March 1906.

No. 1987-I.—The following statements showing the receipts and charges for the year 1904-05 on account of the Madras Coast Lights, and of the sinking fund established in condition therewith, are published for general information.

2. The amount due to the Imperial Government on account of the repayment from Imperial funds of advances made by the Port Funds and Provincial Revenues to cover the expenditure incurred on coast lights in the Madras Presidency from the 1st August 1898 to the 31st March 1904 is repayable in sixty years by equated payments (including interest) of Rs 41,483 per annum. The first payment did not fall due until after the close of the year 1904-05, and will therefore appear for the first time in the accounts of the year 1905-06.

Statement showing the receipts and charges on account of the Madras Coast Lights for the year 1904-1905.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 17th November 1905.

From the 25th November next till further notice, the complete *Gazette of India* will be published at Calcutta. After the 18th November all Notifications and other matter intended for publication in the Gazette should be addressed to the Publisher, 8 Hastings Street, Calcutta.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's Gazette, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's Gazette. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next Gazette."

J. P. HEWETT,
Secretary to the Government of India.

- No. 251 of 1900.—George John Hoskins. *Improved appliances to be used in closing the locking bars on the longitudinal joints of certain types of rivetless metal pipes.* (Specification filed 5 December 1900.)

Fee in respect of the continuance of an exclusive privilege—

- 4 (b) After the expiration of the fourth year and before the expiration of the fifth year from the date of the filing of the specification—

The sum of Rs 50 for each of the above inventions.

No. 176 of 1899.—John Miller (senior) and John Miller (junior). *Improvements in the method of and apparatus for rendering textile fabrics water-proof by one treatment or process.* (Specification filed 9 December 1899.)

No. 390 of 1899.—Alfred Savill Tomkins. *Improvements in cooking stoves.* (Specification filed 7 December 1899.)

Fee in respect of the continuance of an exclusive privilege—

- 4 (c) After the expiration of the fifth year and before the expiration of the sixth year from the date of the filing of the specification—

The sum of Rs 50 for each of the above inventions.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not “designs” within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or, if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo. volumes, paper cover, 13 annas or 1s. 1d. Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,

Secretary under the Inventions
and Designs Act, V of 1888.

This declaration is made under the provision of section 6, Act I of 1894, and under section 7 of the said Act, the Deputy Commissioner, Hazara, is hereby directed to take order for the acquisition of the land specified above.

J. E. DICKIE, Colonel, R.E.,
Secretary to the Hon'ble the Agent to the Governor-General and
Chief Commissioner, N.-W. Frontier Province,
P. W. Department.

NORTH-WEST FRONTIER PROVINCE - MEDICAL DEPARTMENT.

MORTUARY RETURN FOR THE MONTH OF JANUARY 1906.

Deaths registered from different causes in each district of the North-West Frontier Province during the month of January 1906.

[illegible]

Remarks by the Administrative Medical Officer, North-West Frontier Province.

Remarks by the Administrative Medical Officer, North-West Frontier Province.

Seven thousand and fifty-nine births were registered in the Province during the month of January 1900, giving a birth-rate of 43 *per mille* of population. Of the total number of deaths registered from all causes in the Province during the month of January 1900 was 499; against 535 in the previous month and 454 in the corresponding month of the past year, giving an annual death-rate of 30, 35 and 30 *per mille* of population per annum, respectively.

There was not a single death registered under the head of cholera. From small-pox 100 deaths were registered against 104 in the previous month and 131 in the corresponding month of the past year.

There was not a single death registered from plague.

From leprosy 3,765 deaths were registered against 4,504 in the previous month and 3,570 in the corresponding month of the last year; dysentery and diarrhoea 47 against 51; respiratory disease 135 against 164; suicide 1 against nil; wounding 6 against 15; accidents 23 against 35; snake-bite and killed by wild beasts 1 against 1; and from all other causes 944 against 934 in the past month and 700 in the corresponding month of the last year.

F. B. LONGE, Colonel R. E.,
Surveyor General of India.

The 16th March 1906.

No. 149.—An examination for admission to the Provincial Service of the Survey of India will commence on the 27th August next at the following centres.

Calcutta, Dehra Dún, Simla, Bangalore, Mussooree, Poona and Maymyo:—

The number of vacancies offered for this year's examination will probably be 12, of which 3 will probably be for native candidates.

Applications for rules (a copy of which is printed below) should be addressed to the Assistant Surveyor General in charge Surveyor General's Office, 13, Wood Street, Calcutta.

No application to appear as a candidate for the examination will be entertained after the 30th June 1906.

S. P. B. RANNY TAILYUM, Bt. Lieut.-Col., R. E.,
For Surveyor General of India.

SURVEY OF INDIA.

(Vide R. & A. Department No. 157-3, dated the 4th January 1901.)

MEMO. OF INSTRUCTIONS FOR APPLICANTS FOR THE PROVINCIAL SERVICE OF THE SURVEY OF INDIA.

1st.—Every candidate for the Survey of India must forward his application in writing to the Surveyor-General, accompanied by such certificates as to age (Baptismal Certificate required in case of European and Eurasian candidates) *moral character, education, soundness of health, and good eye sight* as will clearly establish his suitability for employment. The application must further be accompanied by *specimens of Plan and Free-hand drawing*. The candidate's name having been registered, he will be informed of the time and place of examination, when decided on. The examination papers will be issued from the Trigonometrical Branch Office in Dehra Dun.

2nd.—No application can be entertained from any individual whose age at the date of the completion of the examination will be under 18 or above 22 years except in the case of Natives whose maximum age is fixed at 24 years. The Surveyor General, however, has the power to extend the age limits to 30 years in the case of those candidates who are at the time in pensionable service in the subordinate grades of the Survey of India. No person who is married or is likely to be soon married will be admitted unless of pure Asiatic origin. Candidates, if of European parentage, must be Statutory Natives of India and have at least passed the High School Pass examination or First Arts examination at an Indian University having qualified in Algebra as one of the subjects, and if Natives the F. A. Pass examination.

3rd.—Candidates must be prepared to undergo the examination detailed below, which will give them entrance to the Training School at Dehra; no candidate will be considered to have qualified unless he gets 50 per cent. of the marks in Mathematics and 30 per cent. of the total marks in drawing.

4th.—Examinations will be held in August as a rule. The most suitable of the candidates who qualify will be selected.

5th.—When under examination for the Department, as Probationary Sub-Assistant Superintendents, 3rd grade, on a salary of *Rs 120 per mensem*, and they must pass out of the Training School within a maximum limit of two years. They will not be confirmed in their appointments until they have served at least one year in a field party and have been well reported on.

6th.—The selected candidates will enter the Department, as Probationary Sub-Assistant Superintendents, 3rd grade, on a salary of *Rs 120 per mensem*, and they must pass out of the Training School within a maximum limit of two years. They will not be confirmed in their appointments until they have served at least one year in a field party and have been well reported on.

7th.—As Surveyors are liable to much exposure and to work in trying climates, the medical certificate should particularly specify that the candidate is of good physique and is likely to stand hard work, such as riding and walking long distances. The medical certificate should be in the form as given overleaf, signed by a Medical officer in Government employ not lower in rank than Lieutenant. During his course at the Training School should he prove to be, in the opinion of the Superintendent, Trigonometrical Surveys, physically unfitted for the Department, that officer may demand a further certificate of fitness.

* Agents for sale of the Legislative Department publications.

NOTICE.—Books and Acts required for private use only can be purchased. Applications should be accompanied by a remittance, unless it is wished that the books should be sent by value-payable post, in which case, besides the ordinary postage, an additional charge is made for registration and commission.

Books and Acts required for the public service should be obtained through Local Governments to whom the applicant is subordinate.

Application for Government publications which are no longer in print should be made to the Agents of the particular Government under whose orders they were originally issued.

The amounts within parentheses are for packing and postage.

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, MARCH 17, 1906.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART III.

Advertisements and Notices by Private Individuals and Corporations.

Estate W. C. S. Hawthorne, deceased.

PURSUANT TO SECTION 42, ACT 28 OF 1866.

Notice is hereby given that all persons having claims against the late William Charles Stewart Hawthorne, who died at Plenty House, Whitechurch, Charmouth, Dorset, on 28th August 1905. Letters of Administration to whose Estate have been granted to George Roberts Johnston, Esq., of Messrs. Grindlay & Co., Calcutta, are required to send in the same on or before 2nd April next to the said Messrs. Grindlay & Co., Calcutta, after which date the said Administrator will proceed to administer the assets having regard only to the claims of which he shall then have received notice, and no claims sent in subsequently will be recognized, and all persons indebted to or holding any securities or property belonging to the said Estate are also hereby requested to pay without delay the amount owing by them, or deliver the said securities or property to the said Administrator whose receipt alone is valid for the same.

G. R. JOHNSTON,

Administrator to Estate W. C. S. Hawthorne, deceased.

CALCUTTA,

The 19th February 1906.

THE HINDU FAMILY ANNUITY FUND.

Copy of the Resolution adopted by the Subscribers to the Hindu Family Annuity Fund at their Annual General Meeting held on the 27th January 1906.

"That the Directors be authorised to draw in the manner laid down in Rule 66, Rs 42,919 (forty-two thousand nine hundred and nineteen) only from the Deposit Account with the Government of India to meet the expenditure provided in the Budget Estimate for the year 1906-07.

FRANKISSEN BOSE,
Secretary.

RAI CHARAN GHOSH,
Chairman.

PROMISSORY NOTE.**Lost.**

The Government Promissory Notes Nos. (1) 013383, (2) 013384, (3) 010322 of the three per cent. of 1896-97 for R 1,000, R 1,000 and R 300, respectively, originally standing in the name of the Bank of Bengal and the first two last endorsed to Balika Sundari Dassi and the third one to Nikunja Bala Das-i which has been inherited by my minor son Krishna Chandra Kuar, of whom I have been appointed guardian the proprietors by whom they were never endorsed to any other person, having been lost, notice is hereby given that payment of the above Notes and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, Calcutta, and that application is about to be made for the issue of Duplicates in favour of the proprietors. The public are cautioned against purchasing or otherwise dealing with the abovementioned securities.

Name of the Advertiser—BALIKA SUNDARI DASSI.

Residence—Balindar, Dabipur Post Office, District Burdwan.

SUPPLEMENT TO

The Gazette of India.

No. 11.}

CALCUTTA, SATURDAY, MARCH 17, 1906.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 hrs., on Thursday, the 15th March 1906, based on the India Daily Weather Reports of the period.

During the earlier part of the week wet weather was confined to Kashmir where light falls of snow, seldom exceeding a depth equivalent to a quarter of an inch, occurred at several stations on the 9th, 10th and 11th. The largest amount reported was 0·82" at Sonemarg for the 10th.

A low pressure condition had entered India over the Baluchistan border near the end of last week without having more effect than to cause cloudy skies; this became active during the 11th, and gave scattered rain on that day over the North-West Dry Area and more nearly general but light rain in the West Sub-Himalayas. The latter rainfall continued during the 12th, but with a readjustment of the pressure distribution which occurred in that region on the 12th rain became purely local and was due only to thunderstorms. The low pressure area had passed eastward into Bihar by the morning of the 12th, and wet weather which has been fairly general in Deltaic Bengal and the Assam Valley for the last three days began on that day. The principal amounts that have been reported may be mentioned with dates of their occurrence. On the 11th Sirsa 0·47", Montgomery 0·32", Dera Ismail Khan 0·60", Cherat 0·21", Murree 0·25", Simla 0·56", Chakrata 0·46", and Ambala 0·25"; on the 12th Dera Ismail Khan 0·60", Lahore 0·80", Murree 0·39", Simla 0·59", Chakrata 0·72", Rawalpindi 0·17", Ludhiana 0·32", Gaya 0·14", and Sibsagar 0·32"; on the 13th Simla 0·48", Burdwan 0·38", Gauhati 0·72", Silchar 0·22"; on the 14th Simla 0·48", Balasore 2·74", Gauhati 0·69", Sibsagar 0·45", Bogra 0·30", Berhampore 0·95", Mymensingh 0·51"; and on the 15th Burdwan 0·29", Dibrugarh 1·29", Bogra 0·42", Jessore 0·65", Calcutta 1·36", Balasore 0·84", and Narayanganj 0·67".

In other parts of India and in Burma weather has been uniformly dry.

The last two columns in the accompanying table shew that there has been little change since last week in the departures from normal rainfall for the period December 1st, 1905, up to the present date.

RAINFALL DIVISION WITH REPRESENTATIVE STATION.	Rainfall sub-division named after representative station.	RAINFALL DATA FOR WEEK ENDING ON 15TH MARCH 1906.			RAINFALL DATA FROM 1ST DECEMBER 1905 TO 15TH MARCH 1906			SEASONAL PERCENTAGE DEPARTURE FROM NORMAL.

SIMLA,

The 15th March 1906.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,
10th March 1906.

Burma.—Myitkyina received about half an inch of rain and in Myaungmya and the Upper Chindwin district including the Northern Shan States there were amounts varying from 2 cents to 9 cents. Reaping of wet weather paddy is completed in Pakokku and sowing of early wet weather paddy has commenced in the Southern Shan States. Transplanting of dry weather paddy is completed and clearing for hillside paddy has commenced in Katha. Gathering of peas, beans, and onions has commenced in parts of Shwebo, Myingyan and Thayetmyo, respectively. Reaping of wheat has commenced in Kyaukse, also of gram in Kyaukse and Myingyan. The condition of the standing crops is on the whole good. The price of paddy has risen in Pyapon and Mergui and fallen in Rangoon and Prome.

Eastern Bengal and Assam.—The weather is seasonable. There was slight rain in most districts during the week. Pruning of tea, pressing of sugarcane, and harvesting of mustard and pulses are in progress. The prospects of the crops are generally fair. Lands are being prepared for early rice and jute. Fodder is insufficient in parts of Bogra and the Khasi and Jaintia hills. Prices of common rice:—Sibsagar 12; Chittagong 10½; Gaubati and Tezpur 10; Dinajpur 9½; Jalpaiguri, Rangpur, Malda Rampur Boalia, Pabna, Dacca, Barisal, Rangamati, Silchar, Dhubri, Nowgong, and Dibrugarh 9; Faridpur 8 to 9; Comilla 8½; Mymensingh 8½; Noakhali 8½; Bogra 8½; Tura 8; and Sylhet 7½ seers per rupee.

Bengal.—There was general but very light rain in Bihar and scattered showers in the Burdwan, Presidency and Chota Nagpur Divisions; while Orissa was free from rain. Lands are being prepared for jute and paddy. The prospect of the spring crops are reported to be on the whole good. Fodder and water are generally sufficient. The price of common rice has risen in four and has fallen in three districts. It continues high in most of the districts of the Presidency Division and also in Hooghly, Howrah, Muzaffarpur, Monghyr, Purnea and Darjeeling.

United Provinces.—Rain fell during the week in twenty-three districts but the fall generally was inappreciable. The standing crops are ripening and harvesting operations have commenced and are in progress in eighteen districts. Opium is being gathered in thirteen districts. Sowing of extra crops and pressing of sugarcane continue all over the Provinces and in a few districts fields are being prepared for the autumn crops. Losses of cattle continue in Jalaun but the condition of agricultural stock generally is fair. Fodder is still scarce in nine districts. Prices are falling slightly and as a result of the rain received during the latter half of February prospects have improved. The total number of persons on relief at the end of the week was 161,000.

The weekly report on the famine and scarcity is as follows:—There were slight showers of rain during the week in Jalaun, Hamirpur, and Cawnpore. The harvesting of unirrigated crops in Hamirpur and in portions of Jalaun has been completed and the outturn is normal in many villages. Losses of cattle continue in Jalaun where grass is being imported by road. Fodder is still scarce in the other districts also, but the prices of food grains have fallen slightly. Physically the condition of the people is satisfactory. The numbers on relief are:—workers Jalaun 42,000, Jhansi 22,000, Muttra 10,000, Cawnpore 8,000, and Hamirpur 17,000; on gratuitous relief Jalaun 28,000, Jhansi 18,000, Muttra 6,000, Cawnpore 1,000, Hamirpur 9,000, total workers 99,000; on gratuitous relief 62,000, grand total 161,000. The whole of Etawah and three tahsils of Agra have been added to the affected area since the close of the week.

Punjab.—All districts except Rohtak, Gurgaon, Delhi, and Ferozepore received rain during the week. The prices of food grains are falling in most districts. Sowings of extra spring crops and ploughings and sowings of autumn crops continue. The standing crops are generally in good condition; unirrigated crops are still below average in Delhi. Hail fell in Hissar without causing damage; small flights of locusts appeared in parts of Mianwali depositing eggs. Condition of cattle has improved. Fodder is still scarce in many districts. There are no complaints regarding the water-supply.

The weekly report on the famine and scarcity is as follows:—The numbers on famine relief in the Rohtak district in the week ending 10th March were:—on works 5,472;

on gratuitous relief 4,491, total 9,963. Prices:—jowar 14 seers per rupee. The distress is moderate but will probably increase. Smaller cultivators and village menials are employed on works, the increase in number is chiefly due to the opening of a tank work at Madauttu on which there is a large number of workers. People are generally resorting to works. There is no wandering or emaciation and the physical condition of the people is generally good. Relief measures are sufficient and the public health is good except for a few cases of plague.

North-West Frontier Province.—Good rain ranging from one inch and twenty cents to eleven cents has fallen all over the Province except in Peshawar. It has been very beneficial to the standing crops, the prospects of which are excellent. Extra spring sowings are in progress. Sowing of sugarcane has commenced in Bannu. The condition of cattle is good in Bannu and fair elsewhere. Stocks of food grains are sufficient and fodder is procurable. Prices are stationary in Dera Ismail Khan and falling elsewhere. Prices:—wheat 13 to 16, gram 15 to 19, maize 17 to 20, and bajra 14 to 15 seers per rupee.

Jammu.—There was good rain during the week. Prices are rising. Prices:—wheat 12 to 20, maize 15 to 30 seers per rupee. The condition of the standing crops is good. Fodder is sufficient.

Kashmir.—The weather is bright and pleasant. Prices are stationary.

Rajputana.—The cultivated area is generally restricted. Crops are withering in Northern and Central Kotah and have been damaged by frost in parts of Mewar. Pasturage and fodder are insufficient in North Mewar, Jaipur, Kishengarh, Alwar, Karauli, Bharatpur, Dholpur, Ajmer-Merwara, and parts of Marwar, Tonk, Partabgarh, and Kotah; in these tracts the condition of cattle is generally poor. Prices have fallen in Bikaner, Partabgarh, Bharatpur, and Ajmer, and slightly, in Jaisalmer and Alwar; they have risen slightly in Tonk. The numbers on famine relief were:—Ajmer-Merwara 54,374. In Native States 37,978. On Test works:—North Mewar 3,020, Shabpura 42, Tonk 1,366 Jaipur 4,066; on gratuitous relief North Mewar 531, Shabpura 95, Tonk 252, grand total 101,724 or a decrease of 3,171. In Alwar the general conversion of test works into famine works has been sanctioned.

The weekly report on the famine and scarcity is as follows:—Ajmer-Merwara:—on works Ajmer 17,843; Merwara 3,297; on gratuitous relief Ajmer 7,432, Merwara 8,802, total 54,371 or a decrease of 2,422 due to the Moharram and Holi festivals. Prices:—Ajmer 11½, Merwara 11½ seers per rupee. Native States:—Marwar on works 4,021; on gratuitous relief 1,775, total 5,796; Kishengarh on works 2,740; on gratuitous relief 2,618, total 5,358; Alwar on works 2,800; on gratuitous relief 788, total 3,588; Eastern States on works 17,591; on gratuitous relief 5,645, total 23,236; total decrease in Native States 1,222 chiefly in Karauli. Prices:—Marwar 11½, Kishengarh 12½, Alwar 13½; Karauli 9½, Bharatpur 12½, Dholpur affected area 10½ seers per rupee. The physical condition of relief workers is fair to good and relief measures are adequate. There is no epidemic prevalent but a few cases of plague are reported from Ajmer district.

Central India.—There was no rain during the week. Harvesting of spring crops is in progress. The standing crops are fair in parts of Gwalior, Indore, Bhopal, Malwa, and Bhopawar; average in Bundelkhand; and indifferent in Baghelkhand. The probable outturn is normal in parts of Gwalior; fair in Indore, Bhopal and Bhopawar; and below average in Baghelkhand, Bundelkhand, and Malwa. The crops have been slightly damaged by cold in parts of Indore and Bhopal. Agricultural stock is bad in parts of Gwalior; good in Malwa; fair in Bhopal; and average in Bundelkhand. Pasturage is bad in parts of Gwalior; and scarce in north of Bundelkhand. Prices are high in Gwalior, Indore, Baghelkhand; rising in Bhopal; and steady in parts of Malwa, Bundelkhand and Bhopawar. Opium has been slightly damaged by cold in parts of Indore.

The weekly report on the famine and scarcity is as follows:—The general position is unaltered but it is feared that after the spring crops have been harvested the effects of famine in Gwalior will be more keenly felt. The numbers on works:—in Gwalior:—46,000 on gratuitous relief 7,500, total 53,500. It is anticipated that there will be a rapid increase in the numbers on relief which have double during the past four weeks. In Orchha, Datia, Samhar, Baoni, Panna, Charkhari, Bijawar, Chhatarpur, Sarila, and Jagirs the numbers are:—on works 29,000; on gratuitous relief 2,500 total 31,500 grand total 85,000

Central Provinces.—No rain fell during the week. The harvesting and threshing of spring crops are in progress and a normal outturn is anticipated for the Provinces as a whole. In Jubbulpore the outturn of all important crops is reported to be excellent and the average yield is above 120. Slight damage from frost is reported in parts of the Dindori tahsil of Mandla. Preparation of land for autumn sowings continues. There is a marked downward movement of prices in Bhandara, the Plateau, Northern and Nerbudda districts; the price of wheat has fallen in six districts and that of gram in ten districts.

Baroda.—No report received.

Bombay.—The standing crops are generally in good condition in Sind, Gujarat and the Konkan, elsewhere they are poor to bad except where irrigated, but water in irrigation canals, tanks, and wells is getting low in affected districts. The cotton crop has been slightly damaged by blight in parts of Dharwar and by frost in Thar and Parkar. Cotton picking is not yet over in parts of Gujarat, the Karnatak, Baroda, Cutch and Palanpur. Drinking water is giving out but improvements are in progress with the aid of Government grants and takavi advances. The condition of cattle continues to deteriorate in the affected districts owing to want of fodder which is being met by importation through Government agency; sale of cattle continues at low prices; generally local fodder is two to three times dearer than usual. The stocks of food grains are generally sufficient and trade is active. Prices in the Deccan are 40 to 120 per cent; in the Karnatak 75 to 95 per cent; in Gujarat 15 to 95 per cent; and in Konkan 10 to 30 per cent; over the normal. Relief works are in progress in Belgaum, Ahmednagar, Bijapur, and the Southern Maratha Country States and have been opened during the last week in Satara. The numbers on test works are increasing in Poona and Bijapur; figures on the last day of the week ending 3rd instant were:—Poona 641, Sholapur 497, Satara 307, Bijapur 340, Belgaum 94, Dharwar 89, total 1,968; the test work in Phaltan is now beginning to attract labourers. Distress is gradually increasing in the affected districts and States but is still not acute. Small cultivators have begun to come on relief works in Ahmednagar, elsewhere they still get employment in fields, on Local Boards and Government irrigation works and private works organised by help of takavi grants. The condition of labourers on relief works is fair to good and the measures are adequate. Emigration from affected tracts is decreasing and return of emigrants continues. No aimless wandering is observed and the condition of people in general is good. The numbers on relief in British districts are:—Deccan on works 4,226, on gratuitous relief 9,513, total 13,739; Karnatak on works 7,413, on gratuitous relief 12,117, total 19,530; in Native States:—on works 2,026; on gratuitous relief 1,679, total, 3,705.

Hyderabad.—There was no rain during the week. The spring harvest continues. The late rice crop is in good condition and is being weeded; in one taluka of Warangal district it is reported to be withering. Lands are being prepared in parts of Mahratwara for autumn sowings. Fodder scarcity exists in forty-four talukas and water scarcity in thirty-one. The attendance on road works in the affected talukas was 3,484 persons and at Ashti poor-house 45 persons. The price of jowar has risen from $4\frac{1}{2}$ to 3 seers per rupee in nineteen talukas and fallen from $\frac{1}{2}$ to 2 seers in five. Prices:—wheat $8\frac{1}{2}$, coarse rice 7, and jowar 14 seers per rupee.

Mysore.—Prices are steady. The standing crops are in fair condition. Prospects are not encouraging in Tumkur but are fair in other districts. Cattle are unhealthy in parts of Tumkur, Hassan, Kadur, and Chitaldroog. Water and fodder are scanty in parts of Tumkur, Mysore, Hassan, Shimoga, and Chitaldroog.

Coorg.—Threshing of rice continues. Prices of food grains are normal. Water and fodder are sufficient.

Madras.—There was no rain during the week. Irrigation supplies are insufficient except in Kurnool, Cuddapah, the Carnatic, North Arcot, South Canara, and Nilgiris. Ploughing, sowing, weeding, and transplanting are in progress in parts. The standing crops are generally fair but some in parts of Bellary, Coimbatore, and Tinnevely require more rain and some in parts of Tanjore and Madura are withering. Harvests continue with outturn poor to normal and bumper. Pasture is insufficient except in Vizagapatam, the Carnatic, North Arcot, Tanjore, Malabar, and Nilgiris. Fodder is scanty in parts of South Arcot, Salem, Coimbatore, and Tanjore. The condition of cattle is generally good. The price of rice is stationary in twelve districts; has fallen in five; and has very slightly risen in six. The prices of millets have fluctuated as follows:—ragi is stationary in eight districts; has fallen in eight; and has slightly risen in five. Cholam is stationary in five districts; has fallen in three; and has slightly risen in six. Cumbu is stationary in eight districts; has fallen in three; and has slightly risen in four.

J. WILSON,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

COMMERCIAL INTELLIGENCE DEPARTMENT.

Calcutta, March 7, 1906.

SECOND GENERAL MEMORANDUM ON THE INDIAN WHEAT CROP OF
THE SEASON 1905-06.

The United Provinces of Agra and Oudh do not at this season attempt an arithmetical estimate of area under wheat ; but the computation made is that it is this year 15 per cent. short of the normal. On the basis of the five years ending 1903-04 this would give an area of some 5,806,000 acres. If this figure be accepted for the moment, the total area under wheat in British India amounts to 21,675,500 acres, and that for all reported areas in India to 23,074,000 acres.

The area for all India, excluding the United Provinces, shows a very small increase on that reported at the same date last year ; for, while there is an expansion of some 2.6 per cent. in British India (still excluding the United Provinces) the net contraction in the Native States is one of 16.4 per cent. The figures actually reported are 15,869,500 acres in British India and 1,398,300 in Native States. The recent rains have greatly improved the prospects in most quarters ; and the condition of the crop is reported to be good on the whole.

The timely rainfall in February (calculated on the average of the total number of reporting stations in each Province) was as follows :—

Bengal	3.29 inches	Bombay and Sind	0.7 inches.
United Provinces	2.9 "	Central Provinces	1.06 "
Panjab and Frontier	4.64 "	Berar	0.05 "

The following is a summary of the provincial reports. The figures in brackets following the name of each province indicate what percentage of the total area under wheat in British India is ordinarily cultivated in that province :

Panjab (34.7 %) now reports the area sown to be 8,604,100 acres, which is about 16½ per cent. larger than the area at this date last year, and about 11 per cent. above the area finally ascertained that year. The increase is due to satisfactory water-supply at sowing time. The winter rains, however, proved a failure. The outlook became very serious, and prices had risen to scarcity rates, when heavy and general rain fell in the third week of February, with the result that the crop now promises well everywhere.

North-West Frontier Province (4.2 %) reported 738,700 acres in the December forecast, but timely rains in the third week of that month made further sowings possible ; and the total area sown up to the end of January is now reported to be 932,700 acres as compared with 877,000 acres reported at this date last year. Prospects of the crop are unusually promising ; and good rain has fallen last month throughout the province, which will assure a full average outturn on an exceptionally large area.

United Provinces (33.4 %).—Figures of acreage are not yet available : in the December forecast it was estimated that this year's area might fall 15 per cent. below normal (which is about 7,000,000 acres). The drought, which interfered with sowing operations, practically continued till the middle of February when good general rain was received throughout the province. The prospects of the irrigated crop were at that time already good or excellent : those of the unirrigated crop, which was suffering badly from the drought and also from attacks of white ants in places, have now greatly improved. For the province, as a whole, the crop on the reduced area that has been sown is estimated at 70 per cent. of the normal. This estimate is, however, based on information up to 20th February. The cloudy weather in the middle of that month has caused a little rust, but at the time of report no serious apprehension was felt on this score.

Bengal (6.2 %) reports 1,256,000 acres as compared with 1,324,800 acres last year—a decrease of some 5 per cent. The season, on the whole, has been favourable ; and the outturn is at present estimated to be 83 per cent. of normal.

Eastern Bengal (1 %) reports 170,800 acres as compared with 180,700 acres for last year. Prospects are on the whole fair, and an outturn, 80 per cent. of normal, may be expected.

Central Provinces and Berar (12.5 %).—The total area sown is reported to be 3,542,900 acres (3,117,200 in the Central Provinces and 425,700 in Berar), as compared with 3,496,400 acres (3,063,100 in the Central Provinces and 427,300 in Berar). An increased area was sown in the Central Provinces, although conditions at sowing time were not very satisfactory. The decrease in Berar is mainly due to extension of cotton cultivation. The crop suffered from drought and also from an absence of dew ; but it was greatly benefited by the rain received at the end of January. For the Central Provinces, as a

whole, the outturn is estimated to be 95 per cent. of normal. For Berar, where the damage caused by drought is reported to have been greater than in the Central Provinces, the outturn is estimated at 60 per cent. The outturn for the two provinces together works out to 90 per cent. of normal.

The British districts of Bombay (5.6%) report the area sown (as estimated up to 20th February) to be 810,000 acres, which is only about half the area reported at this date last year. The Native States (including Baroda) return a total area of 373,000 acres, which is 27 per cent. below the area at the corresponding date of last year. The decrease is generally attributed to insufficiency of sowing rains. The condition of the crop is fair in Gujarat and Khandesh; elsewhere in the Deccan and the Karnatak the irrigated crop is suffering through deficiency of water supply and is expected to yield only a moderate outturn, while the dry crop will be exceedingly poor.

Sind (2.1%) reports the area sown to be 594,000 acres (41,000 in Native States), which is about 14 per cent. over last year's area. The increase is attributed to good water supply. About 500,000 acres were helped by irrigation. The crop suffered a little from locusts and in places from frosts; but the season on the whole is favourable, and the condition of the crop is generally good.

Hyderabad reports the area sown to be 981,900 acres as compared with 1,126,600 acres for last year—a decrease of about 13 per cent. owing to the holding off of the rains. The season has been an unfavourable one; and the outturn is estimated to be only 49 per cent. of normal.

Mysore reports 2,400 acres as compared with 5,300 last year.

FREDERICK NOËL-PATON,
Director General of Commercial Intelligence.

W. L. HARVEY,
Secretary to the Government of India.

C.—Memorandum on the construction of Railways	119

FINANCIAL STATEMENT FOR 1906-1907.

PART I.

Preliminary.

I beg to lay on the table the Financial Statement for 1906-1907, together with the usual figures relating to the accounts of 1904-1905, and the Revised Estimates of 1905-1906.

2. The year now drawing to a close has in certain important Provinces been less favourable than those which immediately preceded it. The Arabian Sea monsoon current was late in arriving, and the total autumn rainfall was much below the normal in the United Provinces, the Punjab, the Deccan districts of Bombay, and Rajputana. In parts of Madras also there was at one time a serious deficiency in the rainfall, but this was made good by favourable rains in the cold weather. The partial failure of the monsoon was unfortunately followed by great delay in the winter rains of Northern India, and though these eventually came, and greatly relieved the situation, they were too late to save a large proportion of the unirrigated crops. Famine conditions have been declared to exist in ten British districts and in several States of Rajputana, and by the end of February, over 360,000 persons in all were in receipt of relief. These untoward events necessitated liberal remissions and suspensions of revenue, and expenditure on famine relief, which will affect both the current year, and also 1906-1907.

3. In the rest of India the seasons were on the whole favourable, and the harvests generally good. Our revenue has come in well, and shows signs of continued and healthy development; and if the rainfall of next season should be normal, we may look forward to the restoration of prosperity in those tracts which are now unhappily suffering. After making adequate provision for famine relief, and for the effect of the drought on our land revenue, we estimate that on the present basis of taxation and expenditure, we should have had in 1906-1907 a revenue surplus of £1,687,500. This is in excess of our needs, and we have accordingly decided to carry into effect certain reductions of taxation and transfers to the Local taxation account which are estimated to absorb £586,700 per annum. Almost the whole of this sum will be devoted to relieving the burdens of the agricultural tax-payer. An account of the particular measures to be adopted will be found in paragraphs 41 to 45 of the Financial Statement.

4. In view of the present agricultural situation, it would not have been prudent to embark on any important new schemes of administrative reform involving large recurring expenditure. We have therefore limited our proposals in this direction to three measures, of which the most considerable is one to which we are already committed, while the other two do not involve large present outlay and are deemed to be of pressing importance. These projects are estimated to cost us £226,700 a year, and an account of them will be found in its proper place.

5. The effect of these measures taken together is to diminish our revenue or increase our expenditure in the aggregate by £813,400, thus reducing the estimated surplus of the ensuing year to £874,100.

6. I now present the figures for the three years, reduced to their simplest form, and excluding Capital, Debt, and Remittance transactions. They are as follows:—

	1904-1905 (Accounts).
	£
Revenue	84,812,971
Expenditure charged against Revenue	81,356,905
	<hr/>
Surplus	3,456,066
	<hr/>

	1905-1906 (Revised Estimate).
Revenue	£ 84,829,500
Expenditure charged against Revenue	83,073,800
Surplus	1,755,700
	1906-1907 (Budget Estimate).
Revenue	£ 86,495,100
Expenditure charged against Revenue	85,621,000
Surplus	874,100

Accounts of 1904-1905.

7. This time last year we estimated that the year 1904-1905 would close with a surplus of £3,485,500. The final accounts agree closely with this, the actual amount being £3,456,056, a shortage of £29,434. The revenue exceeded the Revised Estimate by £113,871, and the expenditure was less by £43,595, but the improvement was confined to the Provincial and Local section of the accounts, which benefited to the extent of £186,900, leaving a net worseness in the Imperial section of £29,434.

8. Under Opium, the weighments in Malwa during March were exceptionally low and resulted in a reduction of £22,501. Excise receipts exceeded the estimate by £51,424, chiefly in Bombay, where, in consequence of a change in the excise year, the fees for retail licenses in the Presidency Town for 20 months were brought to account during the year. There were increases of £40,997 under Forests mainly in Burma, and of £14,000 under Assessed Taxes fairly distributed over the Provinces. Irrigation rose by £39,836, especially in the Punjab and Madras where Land Revenue due to Irrigation improved materially. Under Interest, there was a short receipt of £20,121, the major part of which was due to the non-payment within the year of interest due by the Kalka-Simla Railway. The net Railway revenue account was reduced by £149,062, mainly in consequence of increased working expenses and renewals on the East Indian, Bengal and North-Western, Tirhoot, North-Western, Oudh and Rohilkhand, Rajputana-Malwa and Bengal Nagpur Railways, the charges for which were brought to account in the closing months of the year. Army charges were less than the estimate by £139,006, of which £93,995 was on account of Reorganization. There were also reductions of expenditure amounting to £45,356, under Public Works, Civil and Military, £24,947 under Irrigation (chiefly in Burma and Bengal), and £26,664 under Direct Demands on the Revenues, chiefly in Bombay, partially counterbalanced by small increases under other heads. Taken as a whole, the figures approximate closely to those of the Revised Estimate framed last March, and do not call for special remark.

Revised Estimate, 1905-1906.

9. Last March, we anticipated that the revenue of the year 1905-1906 would amount to £83,433,000, the expenditure chargeable against revenue to £82,529,200, and the probable surplus on the Imperial section of the accounts to £903,800. The results now anticipated are more favourable. The revenue has increased by £1,396,500, while the expenditure chargeable against revenue has also increased by £544,600, and the surplus, as now estimated, will amount to £1,755,700. These results relate, as already stated, only to the Imperial section of the accounts. If we include the Provincial and Local sections, the position is somewhat modified. The figures of revenue, both for the Budget and the Revised Estimates, are unaffected. In regard to expenditure, however, we anticipated a year ago that the total disbursements on revenue account for Imperial, Provincial, and Local taken together would amount to £83,899,500; and we expected that of this sum, the Provincial Governments and local bodies would draw on their accumulated balances to the extent of £1,370,300, the direct charge against current revenue being thereby reduced by an equivalent amount. According to our present estimates, the aggregate expenditure in all three sections will amount to £82,993,400, being less than the budget figure by £906,100.

Instead, however, of having to draw on their balances, the Provincial Governments have increased the latter by £80,400, and as this constitutes a liability against Imperial revenues, it is, in accordance with established practice, charged off at once in the accounts, increasing the expenditure chargeable against the revenue of the year to an equal extent. The causes of the increase in the Provincial balances are set forth below.

10. In the last Financial Statement I explained that an endeavour was being made to attain a higher standard of accuracy in the estimating of our revenue and expenditure. The figures now presented to the Council will show to what extent these efforts have been successful during the past year. The comparison must of course be made with the aggregate revenue and expenditure, disregarding their allocation between Imperial, Provincial, and Local. It will be seen that our total revenue has exceeded the Budget Estimate by £1,395,500, which represents 1·67 per cent on the figure taken last March. On the expenditure side, the total disbursements are now estimated to amount to £905,100 less than in the Budget. This represents a difference of only 1·08 per cent on the original estimate.

11. So far as revenue is concerned, these results are not unsatisfactory: more than half of the increment of revenue occurred in the gross receipts from Railways, in which, if anywhere, a cautious estimate is justifiable. In regard to expenditure, although the percentage of variation from the original estimate is very low, the true result is less successful, for there were large lapses of grants both for civil expenditure in India and for army charges at home, and the net reduction would have been considerably greater than it is had we not applied a portion of the funds thus set free to meeting other charges not provided for in the Budget. Even here, however, there are some grounds for a more favourable view, for the lapse in army charges in England was due to special causes which we hope are not likely to recur. On the whole, I think, it may be said that a fair amount of improvement has been effected: and for the future I can merely repeat the assurance which I gave last year that we shall continue to do our best to eliminate all avoidable sources of error.

12. The following is a statement of the principal heads of Revenue and Expenditure in which the Revised Estimate differs from the figures of the Budget by £30,000 or more. The figures of the Railway Revenue Account and of Irrigation, Post Office and Mint are taken net:—

<i>Revenue.</i>		
DECREASE—		£
Land Revenue	440,000
Customs	39,100
Irrigation	118,000
INCREASE—		
Salt	75,700
Stamps	60,400
Excise	210,400
Other principal heads	197,400
Interest	139,700
Post Office	35,700
Mint	202,400
Railway Revenue Account	461,300
Receipts by Military Department	150,300
<i>Expenditure.</i>		
INCREASE—		
Interest	52,900
DECREASE—		
Civil Departments	237,600
Other Public Works	256,000
Army Services	842,000
Special Defences	61,200

Explanations on all points of importance will be found in the annexed Memorandum by the Financial Secretary. The only matters to which reference need be made here are the following:—

Under Land Revenue, the failure of the monsoon has produced the greatest effect in Bombay and the Punjab, where the falling-off in collections is estimated at ₹22,16,000 and ₹8,70,000, respectively. In the United Provinces the shortage amounted to ₹7,95,000, and would have been larger had not the loss due to the frost of January 1905 been overestimated. In Madras the collections fell short of the Budget

Estimate by ₹23,23,000, but this was due not to the character of the harvests but to the high collections of 1904-1905 which left a comparatively small amount of arrears to be recovered in the current year. Smaller shortages are anticipated in Burma, Eastern Bengal and Assam, and Ajmer, but the estimates will be exceeded in Bengal and Berar. In the two provinces chiefly affected by drought remissions of land revenue have been made aggregating ₹80,88,000, while a further sum of ₹86,17,000 is under suspension.

13. Last March the opinion was expressed in some quarters that we had pitched our estimate of Customs revenue for the current year too low. The actual results, however, are far from bearing out this view. The receipts have fallen short of our estimate by £39,100, and the shortage would have been considerably greater but for the increase of the duty on spirits effected by the Tariff Amendment Act in January last. The increase of duty took effect one month after the date of passing the Act, and extensive clearances of stocks took place during the interval, yielding an increase of revenue of £63,300. This will of course tend to reduce the revenue from this source in the ensuing year. Apart from this exceptional item, the chief features of the year were the great and continued development of the receipts from cotton piece goods and from the corresponding excise duty on Indian mills, and the large falling-off under petroleum, and under silver and other metals. The import duty on cotton piece goods yielded £886,700, and the excise duty £183,700, both figures being the highest on record. The latter is now 250 per cent greater than in 1896-1897, the first complete year of its operation, and affords gratifying testimony to the thriving and progressive state of the industry. The falling-off in the duty on petroleum was £73,300, and is due to the stoppage of imports of Russian oil after the destruction of the works at Baku. Its place was taken by Burma oil, which pays no duty. The imports of silver have received a severe check, and the receipts from duty have fallen short of the estimate by £106,700. In the earlier months of the year, the exports of rice were somewhat behindhand, and a shortage in the export duty seemed probable. This has, however, latterly been made good, and the returns will not fall far short of the original estimate. The other variations do not call for special notice.

14. Under Salt, we had made what seemed to be a liberal allowance for the probable increase of consumption due to the reduction of the duty last March. The results have, however, surpassed our anticipations. By the end of February the issues of salt had exceeded those of the corresponding period of the previous year by 14,38,000 maunds, and we now expect that this figure will have risen to 16 lakhs of maunds by the end of the year. This advance follows on a very large increase of 17,86,000 maunds which occurred in 1904-1905, by which time the first reduction of duty made in 1903 had come into full effect. We have recently received an interesting series of reports from the Local Governments on the results of the two successive reductions of the duty in 1903 and 1905. These show that the cumulative reduction of one rupee has been proportionately of greater effect than the preceding reduction of 8 annas; that the cheapening of the retail price, and often the cause to which it is due, have become known even among the humblest classes of the people, so that "even the Bhil woman who takes her salt as a dole with her supply of grain from the bania on bazar days knows that she ought to get about a third more than she used to do;" that a purchase which formerly sufficed for 3 or 4 days now lasts the same family for 5 or 6; that more salt is being given to the cattle; that in some provinces at least the consumption per head has risen by 10 per cent in the last three years; and that the saving per head of the population may be reckoned at about one day's wages of the poorest of the working classes. It must be many years before the revenue which we have sacrificed can be made good by the development of consumption; but in the meantime the results obtained are evidence that our policy has reached the classes whom it was intended to benefit.

15. The weighments of Malwa opium have fallen very short of the estimate and are now calculated at only 16,000 chests, the lowest number for many years past. The loss of revenue on this head is estimated at £209,300. On the other hand, Bengal opium has fetched an average price of ₹1,434 per chest as compared with the estimate of ₹1,400, and the number of chests sold has been raised to 49,200 in place of 48,000, the improvement amounting to £225,400. The net result is a betterness of £12,800 as compared with the Budget.

16. Excise has exceeded the estimate in all provinces except the United Provinces, and Burma, the improvement being greatest in the Central Provinces and Berar, Bengal, Madras and Bombay.

17. The increase under Mint receipts represents seigniorage at 2 per cent on larger coinage. The coinage of the year depends on the demands of trade, and it is impossible to foresee with any certainty what amount of new coinage will be required. Last March we assumed that an outturn of 500 lakhs would be necessary, whereas

the actual demand has been exceptionally heavy, and is now estimated to amount to 16,50 lakhs.

18. The earnings of State and Guaranteed Railways continued to expand, though not so rapidly as in 1904-1905. The grain traffic on the North-Western Railway was adversely affected by the failure of the *rabi* crop in Northern India and the rise in local prices, and the net earnings of this important system fell below those of the previous year by £462,500. There was also some falling-off on the East Indian Railway due to diversion of traffic to other lines and increased expenditure on working and maintenance. Most of this, however, will have been made up before the end of the year. On the other hand, the Bengal-Nagpur Railway obtained greatly enhanced receipts chiefly from coal, and its net earnings rose by £239,000. There were also large improvements on the Great Indian Peninsula (£161,100) and Rajputana-Malwa (£142,500) systems, and to a smaller extent on most of the other lines. The net revenue account is behind the figure of 1904-1905 by £80,000, but is in excess of the Budget Estimate for the current year by £461,300. This last sum is no doubt substantial, but it represents little more than $1\frac{1}{2}$ per cent on the gross receipts of our Railways, which now approach the enormous sum of 25 millions sterling.

19. The chief factor in the increase under "Other principal heads of Revenue" was the development of the receipts from Forests which were exceptionally large in Burma, and also to a smaller degree in Bombay. Assessed Taxes also did well in all the principal provinces.

20. The saving under "Civil Departments" was due to the failure of the Local Governments to expend in full their allotments for Police (£203,200), Education (£243,700), Medical (£38,800), and Scientific and Minor Departments (£88,000). This is a matter for regret, but it is chiefly attributable to the fact that specially liberal grants had been made for the initiation of important schemes of administrative reform, and it is a common experience that delay unavoidably occurs in getting these under weigh at the outset. On the other hand, there was an increase of £272,300 under "Political," mainly due to payments aggregating £241,200 on account of the subsidy of the Amir of Afghanistan with arrears. At the time the Budget was under preparation the negotiations with the Amir were still proceeding, and it was considered expedient to make no reference to the matter in the estimates. The lapse under Public Works occurred chiefly in the Punjab, where the Local Government has so far failed to utilise in full the grant made for the improvement of Simla. Expenditure on Military Works also fell short of the estimate by £71,200 chiefly on works connected with Army reorganization.

21. The reduction of expenditure on the Army was mainly due to the inability of the India Office to supply within the year the full amount of stores, and munitions of war required chiefly in connection with the scheme of reorganization. There were also lapses of grants under other heads.

22. Instead of a Provincial and Local deficit of £1,370,300 as estimated, there will be a surplus of £80,400. As already explained, this item does not affect the actual revenue and expenditure, but only its allocation as between Imperial on the one hand, and Provincial *cum* Local on the other. The causes of the alteration were broadly these: in the first place, over and above the allotments made to Provincial in the Budget, we have during the year made two grants of 30 lakhs each to the Central Provinces and Eastern Bengal and Assam with reference to the new Provincial settlements. We have also transferred from the Imperial to the Provincial section three more grants of 7 lakhs, ₹17,20,000 and ₹5,00,000 which were provided in the Budget for expenditure on minor irrigation works, agricultural improvements, and University education respectively. The effect of these transfers was to increase the Provincial resources, at the cost of Imperial, to the extent of ₹89,20,000, or £594,600. Apart from these transfers, the Provincial and Local share of total revenue increased by £50,400 as compared with that which was estimated in the Budget. Their expenditure, on the other hand, as already explained, fell short of what was anticipated by £805,700.

Budget Estimate for 1906-1907.

23. For next year, we estimate that the revenue will amount to £86,495,100, and the expenditure (after allowing for a sum of £1,077,600 which is chargeable against Provincial and Local balances) to £85,621,000, thus leaving a surplus of £874,100.

24. We anticipate that the receipts from Land Revenue will be considerably better than during the current year, in which they have been adversely affected both by the frost of January 1905 and also by the irregularity and delay in the rainfall in some provinces. In the United Provinces it is satisfactory to know that in the opinion of the Local Government the agricultural prospects of the province as a whole are more encouraging than they were at this time last year; and after allowing for remissions and suspensions aggregating Rs 31,31,000, we anticipate an increase of Rs 36,61,000 over the collections of the current year. In Bombay also, in spite of the adverse conditions prevailing in the Deccan districts, a recovery to the extent of Rs 21,92,000 is anticipated, after allowing Rs 49,88,000 for remissions and suspensions. Considerable improvements are also expected in Burma where much new land is being brought under settlement, and also in Madras and the Punjab. It will of course be understood that, while due allowance has everywhere been made for existing conditions, these calculations are all based on the assumption that the rainfall of the ensuing year will be normal. Under Opium, we have had to take account of the heavy fall in the prices realized at the last two sales of Bengal opium. Last year, we estimated that the average price obtained would be Rs 1,400 a chest, and the actual average has been Rs 1,434. The sales in February and March, however, yielded rates of only Rs 1,343 and Rs 1,258 respectively, and for next year we cannot safely assume a higher average than Rs 1,125. This involves a decrease of 111½ lakhs of rupees as compared with the Revised Estimate of the current year. On the other hand, we expect a small recovery in Malwa, where the weighments during 1905-1906 have been the lowest on record: and the net falling-off is estimated at £659,400.

25. The consumption of salt and the receipts from the salt duty have continued to expand in a very gratifying manner, and we consider that we shall be justified in assuming that there will be a further increase to the extent of 12 lakhs of maunds during 1906-1907, the increase of revenue being £63,300. The increase of revenue will not be in proportion to the increase of consumption because the receipts of the current year were swollen by credit sales of salt effected before the reduction of the duty in March 1905. Under Stamps and Excise we have allowed for the normal growth of revenue. Under Customs we anticipate a total increase of £139,300 over the receipts of the present year. Of this only £20,000 is attributed to the increased duty on spirits, for the reason stated in paragraph 13 above. It would not be safe to reckon on any increase in the receipts from petroleum, an industry in which duty-free Burma oil is claiming a rapidly growing share. Under other items, however, we consider that a moderate all-round growth may be looked for, especially in view of the somewhat disappointing returns of the current year; and the state of the Indian textile industry warrants us in expecting a further advance in receipts from the cotton excise duty. Under "Other principal heads" we calculate on a loss of £464,300. This occurs almost wholly under the head of "Provincial Rates" where a net reduction of £513,300 is allowed for. The explanation of this will be found in paragraph 44 below: it is wholly due to the reduction of taxation, but for which the head would have yielded a moderate increase of revenue.

26. The only other head of revenue which calls for remark is Railways. Last March, we thought it prudent to assume that the net results of the current year would fall short of the unprecedented figures of 1904-1905. In this we have been justified by the result; but the returns have nevertheless proved considerably better than we anticipated, and there is nothing in existing circumstances to warrant the belief that the revenue from this source will undergo a check in the immediate future. The figures of the past two years, and those which we have decided to take for 1906-1907 are as follows:—

	Actuals, 1904-1905.	Revised Estimate, 1905-1906.	Budget Estimate, 1906-1907.
	£	£	£
Receipts	24,022,465	24,658,200	26,154,600
Charges	21,917,027	22,632,700	23,925,300
Net Revenue	2,105,438	2,025,500	2,229,300

27. On the Expenditure side of the account, the only head under which a material reduction is anticipated, as compared with the Revised Estimate of the current year, is Interest, in which we expect a decrease of the charge by £139,000. This is partly due to the progressive transfer of debt from the non-productive to the productive class, but is also due in large measure to higher special charges in the current year which will not recur in 1906-1907.

28. Under almost all other heads, we anticipate an increase of expenditure, as compared with the current year, the more important items being as follows :—

	Increase in 1906-1907, compared with Revised Estimate of 1905-1906.
	£
Direct Demands on the Revenue	287,300
Salaries and Expenses of Civil Departments	1,140,600
Other Public Works	421,500
Army Services	406,400

29. The bulk of the first item will be incurred under the head Land Revenue, and represents increased charges of district administration, spread more or less uniformly over all the principal Provinces. There are also smaller increases under Stamps (chiefly in connection with the supply of the unified stamp); Excise, in the Central Provinces and Burma; and Forests, mostly in the two latter provinces and in Madras.

30. Of the large increase under "Salaries and Expenses of Civil Departments" the greater part occurs under the heads Police (£410,100), Education (£317,400) and Scientific and Minor Departments (£151,200). In all these cases, and especially in the case of Police, the increase is due in part to the additional grants which we have decided to allot, as explained in paragraph 36 below. In large part, however, it is also due to the fact that the Local Governments failed to expend in full the considerable sums assigned to them in the Budget for the current year. Their schemes for utilizing the money have been more completely elaborated during the past twelve months, and we hope that they will make up lost ground during the ensuing year.

31. Of the increase under "Public Works" over three-fourths is on account of Civil Works, mainly in Madras, the Central Provinces, Bengal, and Eastern Bengal and Assam, and in the provinces administered by the Government of India. Under Military Works there is an increase of £91,500 mainly in connection with reorganization of the army.

32. The increase in Military expenditure is almost wholly due to the fact that a very large lapse amounting to £777,100 occurred in 1905-1906 on the grant provided for expenditure in England on new artillery and other stores for reorganization. Of this, a large part represents liabilities which have been definitely contracted, and a charge of £734,000 has accordingly been carried forward to the Home Estimates of 1906-1907, a corresponding reduction being made in the Indian Estimates of that year. To obviate to some extent the inconvenience thus occasioned in carrying out the programme of reorganization, we have regranted a portion of the lapsed grant, *viz.*, £267,000, or 40 lakhs, for expenditure in India next year. This does not imply any actual increase of expenditure, but merely a transfer of charge from one year to the next. The effect is to increase the surplus of the current year by the amount of the lapse, and to reduce that of 1906-1907 by the amount regranted, which, as stated above, is £267,000. As compared with the Budget Estimate of last year, there is a decrease of £435,600.

33. For Famine Relief, we have provided £539,100, equivalent to ₹80,86,000. Of this, 42 lakhs are expected to be required in Bombay, 20 lakhs in the United Provinces, 13½ lakhs in the provinces administered by the Government of India, mostly Rajputana, and small sums in Madras and the Punjab. The total grant shown against the head "Famine Relief and Insurance" remains constant at one million sterling, the provision for reduction or avoidance of debt being absorbed, and some reductions made in the provision for construction of Protective Railways and Irrigation Works.

34. Had we maintained taxation on the same scale as in the current year, and had not undertaken the additional expenditure on police, education, and agricultural improvement to which reference is made below, our surplus would have amounted to £1,687,500. I now proceed to give an account of the measures to which we have decided to devote a portion of this sum.

Application of the Surplus.

35. The objects to which we have decided to devote so much of the surplus as is in excess of requirements are five in number. Three of these, as stated in paragraph 4, are measures of administrative reform involving increase of expenditure; the fourth which is by far the largest and most important, provides for the reduction of local taxation on the land; while the fifth, which is a small matter closely connected with the last named, provides for the relief of certain local authorities at the expense of Imperial revenues.

36. Taking these in order, we first provide a sum of 25 lakhs per annum for the reform of the Police, in accordance with the approved recommendations of the Police Commission. It will be remembered that last year a similar grant of 50 lakhs was provided for this purpose, and the grant now given is in addition thereto. We are pledged to carry out these reforms as funds become available, and though unfortunately a considerable part of the provision made last year has not been spent, we hope that this will be made good in 1906-1907 and a further material advance obtained. The principal objects to which the additional grant of 25 lakhs will be applied are the following :—

- (1) The introduction of improved scales of pay for the superior officers.
- (2) The recruitment of the new class of officers to be known as Deputy Superintendents.
- (3) The further recruitment of Sub-Inspectors.
- (4) The formation of Provincial Departments of criminal investigation.
- (5) The introduction of some of the reforms proposed in the police force of the towns of Madras, Calcutta and Rangoon.

If funds are available, some further measures may be undertaken, but this is at present uncertain.

37. The grant will be apportioned between the various Provinces as follows :—

	Lakhs.		Lakhs.
Madras	4½	United Provinces	3½
Bombay	2½	Punjab	2½
Bengal	4	Burma	2½
Eastern Bengal and Assam	2½	Central Provinces	2½
Minor Provinces	1		

38. Next, we make a further grant of four lakhs per annum for agricultural development and research, over and above the similar grant of 20 lakhs per annum made last year. This is not a new departure, but merely another step in furtherance of the policy on which we have embarked of rendering whatever assistance it may be in the power of the State to afford to the principal industry of the country. The money will in part be reserved for expenditure by the Imperial Government, while a part will be added to the grants made to the Local Governments last year.

39. Lastly, we have decided to provide a small sum of 5 lakhs a year for education, of which approximately one-half will be applied to technical education, and the remainder to the education of Europeans and Eurasians.

The grant for technical education will be allotted as follows, *viz.* :—

	R
Bombay	1,67,000
Bengal	35,000
United Provinces	30,000
Central Provinces	22,000

40. The grant to be given to Bombay is intended primarily to develop and increase the efficiency of the three central institutions, *viz.*, the College of Science, the Victoria Jubilee Technical Institute, and the Sir Jamsetji Jijibhai School of Art, Bombay; to provide adequate inspection for ordinary technical schools and schools of weaving and the textile industry, and for elementary drawing in all kinds of institutions; for the creation and maintenance of three new special technical schools, and for the development and improvement of a certain number of approved technical schools by increased grants; and for scholarships in all classes of approved technical institutions.

In the case of Bengal the grant will provide for the establishment and maintenance of a central weaving school at Serampore at which instruction in the best and latest methods of hand-weaving will be imparted.

The grant for the United Provinces is intended to assist in the proposed expansion of the mechanical apprentice class at the Roorkee College, with the object of giving a sound practical training in the principles of mechanics, steam, and electricity.

The grant to be assigned to the Central Provinces is for the establishment at Nagpur of an elementary school for handicrafts. It includes an initial grant of Rs 10,000 for buildings.

The balance of the grant, which is to be applied to the improvement of education for Europeans and Eurasians, has not yet been distributed, and its allotment is still under consideration.

41. I now turn to the principal measure to which we propose to devote the funds at our disposal. After considering various alternatives, to which I need not further allude, we have come to the conclusion that on the present occasion it is the agricultural taxpayer who has the first claim to relief. We made a small beginning in this direction last year, by abolishing the Famine cesses in Northern India * and the Central Provinces. We now propose to take a long step further by abolishing the cesses which are levied under various names such as the patwari cess, the village service cess and the like, in Madras, the Central Provinces, the United Provinces, the Punjab and the North-West Frontier Province, and to a trifling amount also in Ajmer and Coorg. The village establishments and land records which these cesses go to maintain are, in present circumstances, an important direct Government interest, and this has been recognized by the fact that in Madras only one-half of their cost has been defrayed from the village service cess, the remainder being borne by Government. Similarly in the United Provinces an annual contribution of 10 lakhs has been made from Provincial Revenues towards the Patwari Fund, and a similar practice has prevailed in the Central Provinces. In Bombay we have gone still further, for in that Province no village service cess at all is levied, and the village establishments are wholly remunerated by service lands, which means that their entire cost devolves upon the State. The cesses are administered by Government, and not by any local authority; and we now propose to abolish them altogether, subject to the minor exceptions mentioned below, and to arrange that the Provincial Governments shall take over the entire liability for maintaining the establishments, receiving compensation from Imperial revenues for the additional charges thus thrown upon them.

42. The exceptions referred to above are (1) the cess levied in Madras on "Proprietary," i.e., permanently settled estates, under Madras Act II of 1894, and (2) the village officers' cess in Sind. The latter is not really a separate cess at all, but is merely a portion of the land revenue assessment, which is earmarked for the payment of the village officials. The former is a real cess, supplemental to the land revenue, and we should have been prepared to abolish it, but for certain practical difficulties that have arisen by reason of the establishments employed in the "Proprietary" tracts of Madras being in a transitional state. In both cases the amount involved is small.

43. We further propose to abolish the zemindari dāk cess in Bengal, and the eastern districts recently transferred to the new province. Both the district post, and the cess from which it is maintained, are an anachronism, and the cost of collecting the latter is out of proportion to the amount involved. In future, the entire postal service will be maintained by the Director General of the Post Office, at whose disposal funds will be placed, from Imperial revenues, for the work hitherto paid for from the cess.

44. The revenue sacrificed by this measure is Rs 82,19,000 per annum and its allocation among the various provinces is shown in the following statement:—

Province.	Name of cess abolished.	Amount. R
Madras . . .	Ryotwari Village Service cess . . .	28,00,000
Bengal . . .	Zemindari Dāk cess . . .	2,34,000
Do.	Patwari cess (Sambalpur) . . .	26,000
Eastern Bengal . . .	Zemindari Dāk cess . . .	1,20,000
United Provinces . . .	Patwari cess . . .	25,54,000
Punjab	Ditto	15,04,000
North-West Frontier Province . . .	Ditto	1,40,000
Central Provinces . . .	Ditto	7,25,000†
Ajmer	Ditto	21,000
Coorg	Village Officers' cess . . .	35,000

45. Lastly, we propose to discontinue the practice of making certain petty appropriations from the funds of District and Local Boards for various provincial purposes, such as the district post, normal schools, establishments employed in Government offices for local purposes, and the like. The amounts involved are in all cases small, but the practice, however defensible on logical grounds, has long been felt to be a blot on our administration of local funds. In future, the local bodies will receive their revenues intact, and the charges hitherto defrayed from the appropriations will be paid by the Local Governments, which will receive compensation from Imperial revenues. In the

* Practical difficulties have retarded the actual inception of this measure in the Punjab, but it will be carried out in that province from April 1906.

† This includes a sum of about Rs 20,000 per annum which is collected direct from tenants by the patwaris, and does not pass through the Government accounts. The intention is to discontinue the levy of the whole cess.

case of appropriations for the district post, funds will be provided in the budget of the Post Office. The amounts involved aggregate R5,82,000, distributed as follows :—

Province.	Nature of appropriation.	Amount.
		R
United Provinces .	For the district post	1,90,000
Do.	For normal schools	50,000
Do.	For local fund establishments in Commissioners' offices	11,000
Punjab	For the district post	1,41,000
North-West Frontier Province	Ditto	8,000
Burma	Ditto	1,21,000
Central Provinces	Ditto	48,000
Coorg and Ajmer	Ditto	7,000

46. These last two measures will, it is hoped, go a long way towards placing our system of local taxation on a sound basis. The arrangement at which we desire to aim is that no local cesses shall be imposed on the land, supplemental to the Land Revenue proper, except such as are levied by or on behalf of local authorities for expenditure by them on genuinely local objects; in other words, local taxation on the land shall, as far as possible, be limited to what is required for local administration by local bodies, and shall not form an asset of Imperial or Provincial revenues. We have not yet attained to that ideal. Certain exceptions still survive, and in some cases good reasons may exist for retaining them. But during the two years 1905-1906 and 1906-1907, we shall have remitted or transferred to the local account items aggregating 110½ lakhs per annum, and it may fairly be claimed that by these measures not only has substantial relief been afforded to the tax-payers, but that most of the more important excrescences which have grown up around our system of local taxation have been cleared away.

47. There is a matter to which allusion may conveniently be made in this connection, though it is not directly relevant to the Budget. We are considering whether, in those provinces where the rural tax-payer will receive substantial relief under the present proposals, the District Boards might not be empowered with their own consent to levy a small additional cess for the construction or guarantee of light local railways or tramways, such as is permitted by Madras Act VI of 1900. This system has had beneficial results in Madras, and it may be expedient to extend it to other parts of India. The power would in all cases be merely permissive. The project has not yet reached the stage of a definite proposal, and may not eventually be carried out: but as it will be facilitated by the measures which we are now undertaking, it is expedient to mention it in connection with them.

48. The cost of these five measures is £813,400 per annum, and it is distributed as follows :—

	£
Improvements in civil administration	226,700
Reduction of local taxation	547,900
Transfer to local taxation account	38,800
TOTAL	813,400

Ways and Means.

49. As stated in paragraph 23, our revenue account closes with a surplus of £874,100 which is carried forward to the second part of the statement dealing with Capital and Debt transactions, including Deposits, Remittances and Advances. Our total estimate of Capital Expenditure not chargeable to Revenue, on Railways and Irrigation Major Works is £10,864,100, of which £833,300 is for Irrigation, £7,697,900 for State Railways, £2,032,900 for expenditure by Railway Companies, and £300,000 for the purchase of the Simla-Kalka Railway. In addition to the above, we have to find £836,000 for the discharge of permanent debt (chiefly Bombay, Baroda and Central India Railway debentures). We have also to make a net payment of £1,030,600 under Deposits and Remittances, and of £456,700 on account of loans to local bodies, takavi advances to cultivators, etc. Our aggregate capital requirements thus amount to £13,187,400.

50. To meet this outlay we have (1) the revenue surplus of £874,100, (2) the net receipts of the Post Office Savings Banks which are estimated at £608,000, and (3) a sum of £2,785,500 to be raised by Railway Companies. These various resources amount to £4,267,600, leaving £8,919,800 still to be provided. We propose to meet

this by borrowing £5,000,000, of which £2,000,000 will be raised in England, and 4½ crores of rupees or £3,000,000 in India. The remainder will be obtained from our cash balances. These are expected to stand on the 31st March 1907 at £12,305,770 in India, and at £5,218,981 in England.

51. The announcement regarding the amounts to be borrowed in England and India is made subject to the usual reservation, and the Government of India retain full discretion to vary the programme, as now declared, to any extent that may be considered desirable.

52. The present intention of the Secretary of State is to draw bills on India to the amount of £17,800,000, but this also is subject to a similar reservation. This estimate of Council drawings is for the amount necessary to provide for the Secretary of State's requirements: but additional bills will, as usual, be sold, if needed to meet the demands of trade.

Army Services.

53. I append the usual statement showing the total expenditure on the Army under the various heads during the past five years:—

	Army.	Military Works.	Marine.	Special Defences.	Total.
	£	£	£	£	£
1902-1903	17,346,392	1,096,669	378,211	...	18,821,272
1903-1904	17,865,208	1,034,654	580,307	27,054	19,507,223
1904-1905	20,175,604	981,599	589,467	128,295	21,875,055
1905-1906 (Revised Estimate) .	19,440,300	1,077,900	523,600	192,000	21,233,800
1906-1907 (Budget Estimate) .	19,846,700	1,169,400	594,000	231,500	21,841,600

54. There is little new to say on this subject. As already stated in paragraph 32, the home authorities found it impossible to complete the intended arrangements for the supply of new artillery and stocks of ammunition, and of the Budget provision the large sum of £998,700 will remain unexpended at the close of the year. The greater part of this, though not the whole, represents liabilities which will have to be discharged during the ensuing year. It is the usual practice to provide for the regrant of lapses up to a limit of 50 lakhs, or £333,000 a year, but in view of the magnitude of the lapse on the present occasion we have made a further grant in 1906-1907 of 40 lakhs or £267,000. Beyond this we have not found it possible to go; and even as it is, the ultimate completion of the scheme of reorganization will be somewhat retarded. No time will, however, be lost in effecting the full provision of new guns, rifles and reserves of ammunition, and we hope also to make substantial progress with the reorganization of our batteries of horse and field artillery, the provision of additional mule corps and cadres, and the supply of improved and increased ammunition columns, besides some other measures of less but still substantial importance. It has not been necessary to resort to borrowing for the prosecution of the scheme, and as was explained last year, it is not intended to have recourse to that step if it can be avoided by reasonable means.

Railway Construction and Earnings.

55. The following statement shows in the usual form the Capital Expenditure on Railways during the past five years, and the Budget Estimate for 1906-1907, whether incurred directly by the State or through the agency of Guaranteed or Assisted Companies:—

	1901-1902.	1902-1903.	1903-1904.	1904-1905.	1905-1906 (Revised).	1906-1907 (Budget).
	£	£	£	£	£	£
Open lines, including rolling stock	2,350,510	3,211,634	3,725,134	3,351,734	4,844,200	5,940,600
Lines under construction—						
(a) Started in previous year	3,393,756	3,016,666	2,091,200	3,246,066	3,206,034	3,502,734
(b) Started in current year	170,933	476,764	564,134	590,800	282,200	400,000
TOTAL	5,915,199	6,705,064	6,380,468	7,188,600	8,333,334	10,000,000

56. On the 31st March 1905 the total length of open lines was 27,728 miles classified according to gauge as follows :—

5' 6" gauge	14,772
Metre gauge	11,778
Special gauges	1,178
									<hr/>
TOTAL									27,728
									<hr/>

During the current year we have added to these approximately the following mileage :—

5' 6" gauge	389
Metre gauge	487
Special gauges	80
									<hr/>
TOTAL									956
									<hr/>

During the ensuing year, we hope to increase this length by 973 miles more.

57. The grant for the current year was $12\frac{1}{2}$ crores of rupees, and we expect that this large sum will have been spent in full. This includes the purchase price, *viz.*, 17½ lakhs, of the Noakhali Railway, which has recently been bought by Government. We also purchased the Bengal Central Railway and the important Bombay, Baroda and Central India system during the year, but this was effected by the issue of stock, and does not affect the capital cash outlay of the year. The Madras Railway is now the only one of the old Guaranteed Railways which has not been taken over by the State. For next year, we have found ourselves able to provide the very large sum of 15 crores of rupees, or ten millions sterling, for capital outlay, of which 655 lakhs will be expended by the State, and 845 lakhs through the agency of Companies. Of the total grant, 891 lakhs have been reserved for expenditure on open lines, and 609 lakhs for new lines and lines under construction. The former very liberal allotment will enable the railway administrations to keep pace with the development of traffic on existing lines. The principal grants proposed are 210 lakhs for the North Western Railway, of which a little less than one-third is for the prosecution of the doubling of the line from Rohri to Samasata; 128 lakhs for the East Indian Railway, of which a small sum is for the new Agra City terminus, and the remainder is for the main line; 86 lakhs for the Great Indian Peninsula; and 117 for the Bengal-Nagpur Railway.

58. As regards new lines and lines in progress, we propose to allot 141 lakhs to the important Nagda-Muttra Chord, which has made good progress but which can scarcely be completed before 1907-1908; and 10 lakhs for the Baran-Kotah line, which will link up the Nagda-Muttra Railway with the Indian Midland system. Seventy-two lakhs will be spent on the Bengal-Nagpur Railway system, which will enable us to complete the short but useful Pench Valley Branch, and to effect material progress with the Purulia-Ranchi line. A beginning will also be made with the Vizianagram-Raipur line, 311 miles long, which is to link up the Central Indian plateau with the East Coast. In addition, we shall assign 57 lakhs for lines in Burma, 47 lakhs for further work on the Katihar-Godagiri Railway in Northern Bengal, a line which may eventually give the metre-gauge systems a direct entry into Calcutta; 26½ lakhs to the Great Indian Peninsula system; 35 lakhs for the Shilman branch of the North Western Railway, which was put in hand last autumn; 13½ lakhs for the Golakganj-Gauhati line; and 20½ lakhs and 24 lakhs for extensions of the South Indian and Tirhut State Railways respectively.

59. The earnings of the open lines continued to expand, and the net surplus of the current year, though falling short of that of 1904-1905, is expected to exceed £2,000,000. The following are the figures for the last seven years :—

Year.	Receipts.	Charges.	Net surplus.
	£	£	£
1899-1900	16,587,845	16,511,089	76,756
1900-1901	18,293,629	17,968,505	325,124
1901-1902	20,225,968	19,379,352	846,616
1902-1903	20,133,900	19,904,951	228,949
1903-1904	21,557,866	20,697,197	860,669
1904-1905	24,022,465	21,917,027	2,105,438
1905-1906, Revised	24,658,200	22,632,700	2,025,500
1906-1907, Budget	26,154,600	23,925,300	2,229,300

60. As has been explained on former occasions, the charges shown above include *inter alia* interest on capital of all lines whether open for traffic or not, and annuity payments in liquidation of the purchase price of certain lines which have been bought by Government. The capital at charge at the end of the present year is estimated at £250,129,517. The net receipts are estimated to amount to £13,027,900, which represents a return on the capital of 5·21 per cent. If open lines only are taken into account, the capital at charge amounts to £244,057,303 and the net return to 5·34 per cent. As the open mileage increases year by year, it may certainly be expected that both gross and net receipts will continue to expand: and as traffic develops it may be anticipated with reasonable confidence that over a series of years the net surplus after payment of interest and similar charges will also continue to grow. But experience shows that in any individual year, a set back is liable to occur. Thus the surplus of the current year is estimated to fall short of that of 1904-1905 by £80,000; and in 1902-1903 it receded by £618,000 as compared with 1901-1902. The growth may be continuous, but we cannot hope that it will be uninterrupted; and having regard to the great magnitude of the sums involved, it is manifest that in estimating the value of our Railway property as an asset of the budget, it is only common prudence to allow for a liberal margin of safety.

Irrigation.

61. The following table exhibits the principal figures of Revenue and Expenditure connected with Irrigation:—

		1902-1903.	1903-1904.	1904-1905.	1905-1906, Revised.	1906-1907, Budget.
		£	£	£	£	£
PRODUCTIVE WORKS.	Capital Outlay to end of year	23,137,270	23,718,032	24,084,700	24,636,900	25,400,100
	Direct Receipts . . .	1,760,295	1,857,460	1,940,670	1,809,600	2,058,900
	Land Revenue due to Irriga- tion	805,713	828,371	883,809	901,900	942,000
	TOTAL	2,566,008	2,685,831	2,824,479	2,711,500	3,000,900
	Working Expenses . . .	732,819	789,225	849,700	875,600	877,100
	Interest	910,285	933,105	949,928	967,700	995,000
	TOTAL	1,643,104	1,722,330	1,799,628	1,843,300	1,872,100
NET PROFIT		922,904	963,501	1,024,851	868,200	1,128,800
PROTECTIVE WORKS.	Outlay on Construction to end of year	1,500,174	1,572,594	1,720,397	1,962,100	2,340,600
	Direct Receipts	55,973	62,570	53,661	61,300	61,900
	Land Revenue due to Irriga- tion	8,680	8,768	9,441	10,100	10,100
	TOTAL	64,653	71,338	63,102	71,400	72,000
	Working Expenses . . .	21,791	21,526	25,581	23,300	24,000
	Interest	58,820	61,129	65,296	72,600	84,200
	TOTAL	80,611	82,655	90,877	95,900	108,200
NET LOSS		15,958	11,317	27,775	24,500	36,200
MINOR WORKS AND NAVIGATION.	Direct Receipts	138,329	154,594	183,455	169,600	177,000
	Expenditure	851,529	875,021	895,848	960,300	1,012,600
	NET LOSS	713,200	720,427	712,393	790,700	835,600

62. To the end of 1904-1905 we had expended 3,613 lakhs on productive works, and 258 lakhs on protective works. We had constructed 19,057 miles of main and branch canals and 31,119 miles of distributaries, which, in that year, commanded and protected $43\frac{1}{2}$ million acres of land and actually irrigated 20,167,967 acres. During the year now expiring we expect to have increased this mileage to 19,158 and 31,496 respectively, the area protected being increased by over 52,000 acres. The direct net return to Government on the capital outlay on productive works, which alone are constructed from loan funds, is estimated at 8.2 per cent, and the net profit to the State, after payment of all charges including interest, is estimated at 154 lakhs of rupees.

63. In addition to the works actually in operation, we have a lengthy programme of new projects, which are either under construction or are being examined by the professional advisers of Government, or in some cases awaiting sanction. The principal figures in regard to these are the following:—

	Productive.	Protective.	Minor works.
1. Number of projects	16	26	4
2. Culturable area commanded, in acres	5,164,704	4,309,686	45,691
3. Estimated annual irrigation, in acres	3,186,381	1,585,844	17,704
4. Do. cost	R14,26,59,018	14,95,72,874	18,37,352
5. Do. net revenue	R1,29,08,008	44,64,127	37,497
6. Do. return on capital outlay	9.05 per cent	2.98 per cent	—

64. In paragraph 44 of last year's Financial Statement I referred briefly to three of these projects which are still in course of construction in the Punjab. Only three others are of sufficient individual interest or magnitude to call for remark. One of these is the Upper Swat River Canal in the North-West Frontier Province, which will take off from the same source as the highly profitable Swat River Canal. It is designed to carry the water of the Swat River under the Malakand pass through a tunnel 5,000 feet long, and thence *via* the Dargai Nullah into the Peshawar valley. The fall from the lower end of the tunnel will probably be utilized to generate electric power for various purposes in the neighbourhood. The whole work is estimated to cost 178 lakhs, to command 449,000 acres, and to irrigate 382,000 acres, and is expected to yield the handsome return of $8\frac{1}{4}$ per cent on its capital cost. The second project is the Mahanadi Canal in the Raipur District of the Central Provinces. It is estimated to cost 95 lakhs and to irrigate 200,000 acres of culturable land. The probable return is expected to be only 3.14 per cent, and if it is eventually decided to construct the canal, it will be undertaken as a protective work. Its chief interest lies in the fact that it is the first large irrigation work to be undertaken in the Central Provinces, a tract which has suffered severely from drought during the last ten years. The last scheme of which notice may be made is of a different character. It is a modest project for irrigating 50,000 acres of land on Divi island at the mouth of the Kistna River by raising water from the river by means of centrifugal pumps driven by Diesel oil engines. The cost is estimated at R18,06,000, and it is expected to yield a return of $9\frac{3}{4}$ per cent on the outlay. It constitutes the first attempt in this country to irrigate by means of power-lifted water on a large scale—a method which has been adopted with success in Egypt. The possibility of applying this method profitably in India has been brought within the sphere of practical politics by the development of the oil engine, which it is hoped can be worked at about half the cost of an equally powerful steam engine burning coal. If the experiment proves successful, it may render feasible a number of schemes of which the cost has so far proved prohibitive.

65. This programme is, broadly speaking, the first fruits of the labours of the Irrigation Commission, whose capable and comprehensive report has been in the hands of Government for some two years. But while the list of projects so far approved is sufficient to occupy the full strength of our engineer staff for the next four or five years, and to absorb all the funds likely to be available during that period, it is very far from exhausting the tale of useful schemes which the Commission presented for the consideration of Government. The latter contemplated an aggregate expenditure of 44 crores of rupees to be spread over a period of 20 years; and it will manifestly occupy a long time to examine the details of these, to weigh their respective financial and protective prospects, to select those which present the best promise, and to prepare the requisite plans and estimates. Many of them are now being examined in this manner by the various Local Governments, but the only one to which reference may now be made is the great Tungabhadra project in Madras.

This ambitious work is designed to irrigate 970,000 acres of land and, in years of drought to afford protection to a million acres more, in the Bellary, Anantapur, Kurnool, Cuddapah, and Nellore Districts, and is estimated to cost rather more than 12 crores of rupees. At its eastern extremity, where it connects with the Pennar River, the work is likely to yield satisfactory results. To the west, however, much of the country traversed consists of black cotton soil, in which, in seasons of a favourable monsoon, irrigation is neither necessary nor particularly advantageous. Its main value will therefore consist in affording protection in time of drought, and, as a whole, it is only likely to yield a very small pecuniary return on its capital cost. Direct financial returns are not the main, or even an important, criterion of the merits of a protective irrigation work: and enormous though the cost may be, Government will not shrink from it if on full consideration it is found to be indispensable for the complete protection of a large and thickly-populated area. But it will be a matter for anxious thought whether other parts of India have not stronger relative claims, and whether the great sum of money involved might not be employed to better advantage elsewhere.

Exchange, Rupee Coinage, and the Gold Reserve Fund.

66. The question of sterling exchange no longer bulks largely in Indian Financial Statements as it used to do in former years. The average rate obtained for Council drafts during the first eleven months of the year was 1s. 4⁰/₄₇d., and the fluctuations were relatively trifling. This is the eighth year in succession in which practical stability has been secured; and it is perhaps not oversanguine to hope that public confidence in its permanent maintenance is in a fair way to be established, not merely in this country where the true facts are known and understood, but more particularly in London to which we must look for the cheap capital that India so sorely needs, and whose investors and capitalists have so long been warned off the Indian market by the uncertainties of exchange.

67. During the year we purchased silver for coinage to the value of £8,574,000. The net addition made to the rupee coinage during each year since 1899-1900 when minting operations were resumed, has been as follows:—

	Lakhs.
1899-1900	52
1900-1901	1327
1901-1902	311
1902-1903	14
1903-1904	1005
1904-1905	751
1905-1906 (Estimated)	1050

68. Formerly it was the custom to defer the purchase of silver till it was actually required for immediate coinage. Purchases were thus usually made in large individual amounts, the bulk of them being concentrated into three or four months when the trade demand for rupees was highest. During the current year, however, it has been decided to alter this practice, and to spread both purchase and coining as far as possible over the whole twelve months. At the beginning of each quarter an estimate is framed of the amount likely to be required during the next three months, and arrangements are made to purchase that amount gradually within the quarter and ship it to India, where it is at once made over to the Mints. It is true that early in the year materials for a really accurate estimate do not exist. But even if we should happen to overpurchase (which has not yet happened), little or no harm is done, for in present conditions the demand for silver for new coinage, though liable to fluctuate, is persistent and inevitable, and any temporary surplus would soon be worked off. If the purchases are paid for by taking gold from the Currency Reserve, we do not even lose anything in the form of interest. The advantage of the new arrangement is that we are less liable to be rushed by sudden pressure, or forced to buy in a rising market. Taken in conjunction with the ingot reserve, of which a full account was given in the last Financial Statement, it greatly strengthens the position of the Government and increases its capacity to meet the demands of trade.

69. The ingot reserve has proved of great service during the past year. The sales of Councils during the year were on an exceptionally heavy scale, and in November notwithstanding extensive purchases of silver it became necessary to draw upon the ingot reserve, which was completely exhausted by the middle of January.

The experience thus gained shows that the amount at which it was originally fixed, *viz.*, three crores of tolas, is not sufficiently large, and it has been decided, with the approval of the Secretary of State, to raise it to six crores of tolas. This amount is approximately sufficient to keep the Mints fully occupied for two months. Further developments of this valuable special reserve are now in contemplation, but have not yet reached a stage at which it is possible to make any announcement regarding them.

70. The Gold Reserve Fund will have been augmented during the year by the sum of £3,734,100, of which £3,488,700 represents the profit on coinage, and £245,400 is interest. The Fund now stands at £12,262,700, the whole of which has been, or will very shortly be, invested in Consols, in National War Loan stock, Transvaal Government guaranteed stock, Local Loans stock, and a portion in Treasury Bills. The amount of gold held in the Paper Currency Reserve on the 15th instant was £11,575,400, of which £7,045,000 was in the Secretary of State's Currency Chest in London, and the remainder in India. This subject is further referred to in a later section of the Financial Statement.

Note Circulation and the Paper Currency Reserve.

71. I append the usual statements illustrating the note circulation and the Government balances with the Presidency Banks. The first of the two statements shows separately (1) the gross circulation, and (2) the circulation, excluding the notes held by the Reserve Treasuries, and by the Presidency Banks at their head offices.

Circulation of Currency Notes.

[Lakhs of rupees.]

	1902-1903.	1903-1904.	1904-1905.	1905-1906 (11 months).

December	2,82,02	3,05,84	2,79,07	3,01,32	2,76,70	

72. By the Paper Currency Act of 1905, which became law in March last, two changes of considerable importance were introduced in the law relating to the Currency Reserve. The first of these empowered Government to increase the currency investment by 2 crores, and to invest that amount in sterling securities of the United Kingdom or of the Government of India. Before the passing of the Act, investment was only permitted in rupee securities of the Government of India, and not in sterling. Effect was given to these provisions by the Secretary of

State in August 1905, when the sale-proceeds of Council drafts to the amount of £1,333,333 $\frac{1}{3}$ were invested as follows, *viz.*, (1) 2 $\frac{1}{2}$ per cent consols of the nominal value of £923,646-9-11 costing £837,614-6-8 and (2) 2 $\frac{3}{4}$ per cent Exchequer bonds (1906—15) of the nominal value of half a million, costing £495,719. The interest on these investments amounts to £36,841 per annum, and this represents the gain to Indian revenues effected by the amendment of the law.

73. The other change was one rather of form than of substance, and its significance lies mainly in the greater extent and more systematic manner in which we have used powers already existing, rather than in any actual addition to those powers themselves. By the Gold Note Acts of 1898 and 1900, the Government of India had obtained authority to hold a part of the metallic portion of the currency reserve in gold coin (or temporarily in silver bullion) in London, instead of in India. The object of these enactments was merely to afford temporary relief to the Indian money market in seasons of stress when the trade demand for rupees was greater than could be supplied from the Treasury balances. A certain amount of gold had in this way been held in London during 1899 and 1900, but not to any large extent, and the occasion for doing so ceased, except in regard to gold in transit, from the middle of 1900. Experience had, however, shown not merely that it was desirable to possess the power, but also that it was advantageous to exercise it in a regular and systematic manner. Accordingly, the new Act was framed in such a way as to give full power to hold the metallic portion of the currency reserve, or any part of it, either in London or in India, or partly in both places, and also in gold coin or bullion, or in rupees or silver bullion, at the free discretion of Government, subject only to the exception that rupees should be kept only in India and not in London. Full power was also taken to vary the amounts held in London and India respectively from time to time, provided always that the aggregate holding was such as was required by law.

74. In accordance with this arrangement, the Secretary of State has established a currency chest in London, and during the year we have remitted thereto sums aggregating £7,045,000, the gold being held by the Bank of England on behalf of the Secretary of State as part of the paper currency reserve. The true nature of the transaction was not at first realized in some quarters, and a leading financial paper at Home, referring to one of the remittances, expressed the view that "to place the gold in the vaults of the Bank of England and to prevent its use in the market would be an act of waste which cannot be seriously contemplated." Subsequently, another paper observed that "this special earmarking seems a primitive and unduly costly device, if the aim of the Indian Government is, as is stated, merely to provide a fund which can be used as required for the purchase of silver; for that end would be equally well attained by an ordinary deposit with the Bank of England." These remarks indicate a misapprehension of the facts. The Government of India is required by law, for the purpose of securing the convertibility of its currency notes, to maintain a stock of gold or silver coin or bullion equal to the excess of its entire note circulation over the sum of 12 crores of rupees. This obligation exactly corresponds to that which is imposed by law on the Bank of England to maintain a stock of gold to cover its note issues in excess of the sum of £18,450,000. The gold which has been placed in the Secretary of State's currency chest in London forms a portion of this stock. It is equally withdrawn from the market, whether it is held in London or in Calcutta, and its place would not be taken nor its purpose served by an ordinary deposit with the Bank of England. On the other hand, if at any time it were found convenient to place the gold at the free disposal of the Secretary of State, we could immediately do so by transferring an equivalent sum from our treasury balances to our Currency Reserve in India, if the state of the former permitted of that course. This transaction could obviously be carried out much more promptly and easily than if the whole of the gold were locked up in this country.

75. The practical advantages of establishing a currency chest in London and keeping a substantial sum in gold therein are mainly the following:—

- (1) When held in London the gold is one stage nearer the point at which it becomes practically effective for its primary purpose of securing the encashment of currency notes. So long as gold is not in active circulation in India, what the presenter of currency notes requires is not sovereigns but rupees, and the silver bullion which must be purchased for the coinage of these can ordinarily only be procured in Europe and not in this country.

- (2) It enables the Secretary of State to effect his purchases of silver in the promptest and most convenient manner as occasion may require, and without the publicity attendant on the shipment of gold from India. It is open to him either to treat the silver so purchased from the first as a portion of the reserve, or, if preferred, to pay for it in the first instance from his Treasury balances, and then subsequently to recoup these from the currency chest, the latter being replenished by Council sales or direct remittances from India.
- (3) It also affords a method which might in certain circumstances be very useful of speedily replenishing the Secretary of State's Treasury balances. If at any time the demand for Councils should be insufficient to supply his current requirements, it would be possible for him to transfer a part of the gold in his currency chest to his Treasury account, a corresponding transfer of either rupees or gold being simultaneously made in India from Treasury to Currency.
- (4) Conversely, it affords a means of giving relief to our Treasury balances when the trade demand for Council drafts is too large for them to meet. In such a case, it would be possible for the Secretary of State to pay the sale-proceeds of the Councils into his currency chest, thereby setting free an equivalent amount in rupees in India, which would be available for meeting the drafts.
- (5) Lastly, it facilitates the prompt investment of the receipts of the Gold Reserve Fund. When profits on coinage accrue in India the Secretary of State can at any moment draw the equivalent amount from his currency chest and invest it, a corresponding transfer being made in this country from the balance of the Gold Reserve Fund to Currency.

76. The whole arrangement is the logical and legitimate corollary of the system which has long been in operation in India by which the utmost freedom of transfer is permitted between the Currency Reserve and Treasury balances, subject always to the essential condition that the aggregate amount of coin and bullion held in the various currency chests throughout India is invariably maintained at the figure prescribed by law. This system has been productive of substantial economy in obviating the unnecessary movement of coin and enabling the whole cash resources of the State to be made available wherever they are required at any moment. Analogous advantages may be expected to ensue from the present development.

Council Drawings.

77. The drawings of the Secretary of State have largely increased during the past three years, the average sales from 1903-1904 to 1905-1906 having been £26,620,200 against an average of £17,620,000 during the previous five years. This increase does not correspond to any equivalent expansion of the Secretary of State's requirements on revenue account (which constitute the Home charges proper), though there has been some growth of the latter also. It is due primarily to the great trade demand for remittance to finance the export trade of India which has developed very largely of late. Since the closing of the mints and the establishment of the gold standard, the only means of obtaining currency that was open to trade, apart from the purchase of Council drafts and transfers, was to bring out gold to India. When, as is now the case, a sufficient stock of gold has been accumulated in the Currency Reserve to make the standard effective, and so long as gold is not to any large extent in active circulation, this method is wasteful; for it involves the eventual reshipment of the imports of that metal to Europe for the purchase of silver for coinage. To avoid this result, the policy of Government has been to sell Council drafts freely so as to supply the trade demand to the fullest extent up to the limit of our capacity to meet them. A recent development of this policy has taken the form of selling telegraphic transfers against shipments of gold from Australia, which are thus diverted from India to London.

78. The surplus proceeds of these sales, in excess of the Secretary of State's requirements on revenue account, have been applied partly to the purchase of silver for coinage, partly to strengthening the cash balances of the Home Treasury, and partly to defraying capital outlay required in connection with railway construction. The following statement gives an abstract (in round figures) of the transactions of the last

eight years, from 1898-1899 to 1905-1906. Transactions on account of the Gold Reserve Fund and of the Paper Currency sterling investment are excluded :—

Amount of Council Bills, etc., drawn	£ 157,980,000
Remittance of gold on Treasury account	999,000
Receipts from His Majesty's Government against disbursements in India, mainly in connection with the war in South Africa, China, and Somaliland, <i>net</i>	8,001,000
TOTAL	166,980,000
Expenditure on Revenue account (<i>net</i>)	138,017,000
Surplus receipts	28,963,000

These have been applied as follows :—

Purchase of silver, <i>net</i> , i.e., disbursements in excess of gold shipped from India, or withdrawn from currency, for that purpose	10,308,000
Gold transferred to Currency chest in London	1,045,000
Capital expenditure, <i>net</i> , i.e., disbursements in excess of loan receipts, including transactions of Railway Companies	11,953,000
Remittance and deposit transactions, <i>net</i>	46,000
Increase of cash balances	5,611,000
TOTAL	28,963,000

79. During the current year, the sales are expected to reach the high figure of £31,576,300, or excluding £1,333,300 on account of the Paper Currency investment, to £30,243,000. This exceeds the Budget Estimate—which was as usual framed with exclusive regard to the Secretary of State's own requirements—by £13,743,000. The excess has been employed as follows :—

Purchase of silver for coinage (<i>net</i>)	£ 7,924,000
Sterling investments on account of the Gold Reserve Fund	3,543,000
Remitted to India through the Secretary of State's Currency chest	1,045,000
Transferred to the balances of the Home Treasury	1,231,000
TOTAL	13,743,000

The Secretary of State's cash balances were drawn upon during the year to the amount of £2,118,000. But for the addition made to them, as explained above, they would have been reduced by £3,349,000.

Countervailing Duties on Sugar.

80. By a notification, dated the 2nd December 1903, the countervailing duties on sugar were remitted, under certain safeguards, in the case of countries which had adhered to the Brussels Convention of 1902, and sufficient time has now elapsed to enable a fairly clear idea to be formed of the effect on the Indian sugar industry of the legislation on this subject which was inaugurated in 1899. It may therefore be of interest to take stock of the position. It must, I fear, be acknowledged that the practical results have been of the most slender description.

81. The legislation in question was embodied in four Acts of the India Council passed respectively in 1899, 1902, 1903, and 1904. The two last, however, were little more than continuing enactments, and the substance of the law was contained in the two former.

82. The idea underlying the Act of 1899 was that bounty-fed beet-sugar, the product chiefly of Germany and Austria-Hungary, was competing unfairly with the Indian article, that in consequence the area under sugar-cane was being reduced, and refineries closed down, and that to avert the ruin of the Indian industry it was necessary to countervail the export bounty. The following statement shows the approximate acreage under sugar-cane in British India in each year from 1890-1891 to 1898-1899 :—

1890-1891	2,758,000
1891-1892	3,100,000
1892-1893	2,708,000
1893-1894	2,867,000
1894-1895	2,704,000
1895-1896	2,639,000
1896-1897	2,051,000
1897-1898	2,048,000
1898-1899	2,755,000

83. In introducing the Bill, Sir J. Westland said that in recent years the area had contracted by 13 per cent. As regards refineries, Government has never possessed any statistics of the slightest value; but at that time it was reported that in the United Provinces, which is the most important sugar-producing province in India, 120 refineries had already been closed, and 60 more were about to be shut down. During the same period the imports of sugar from over-sea had been as follows (in tons):—

YEAR.	CANE.		BEET.		TOTAL.	
	Refined.	Unrefined.	Refined.	Unrefined.	Refined.	Unrefined.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
1890-1891 . .	90,944	9,870	45,781	...	136,725	9,870
1891-1892 . .	80,423	7,206	14,026	1	103,449	7,207
1892-1893 . .	77,510	5,596	14,883	...	92,393	5,596
1893-1894 . .	91,305	4,830	10,257	1	101,562	4,831
1894-1895 . .	100,490	9,708	14,311	13	114,810	9,721
1895-1896 . .	89,738	10,207	36,511	2	126,249	10,299
1896-1897 . .	89,782	8,939	44,341	8	134,123	8,947
1897-1898 . .	100,003	18,660	111,766	2	211,769	18,662
1898-1899 . .	111,931	15,629	70,314	...	188,245	15,629

84. The large imports of beet-sugar in 1890-1891 were quite exceptional, the highest figure previous to that year having been only a little over 3,000 tons. Allowing for this, the growth of the imports was undoubtedly large, and was clearly traceable to the operation of the Continental bounty system. There is no evidence to show that, in its origin, the grant of bounties on export was an essential condition of the latter system, or anything more than the complement of high duties on import and internal consumption. But from a variety of causes, among which the fixing of inaccurate equivalents of refined and unrefined sugar was prominent, it had gradually come to assume the position of a leading characteristic. In the late nineties the principal features of the system in force in the chief beet-growing countries included (1) a bounty on exports, (2) an internal tax on the indigenous industry, to provide the bounties, or recoup them, and (3) a prohibitive import duty to exclude foreign competition. So long as there was free competition within the producing country, the adventitious profit which local producers and refiners were able to exact from the home consumers was limited by the amount of the bounty on export: and it was in this view that the Indian legislature in 1899, following the lead of the United States of America, considered it sufficient to impose duties equivalent to the latter.

85. Continental manufacturers had, however, already perceived the limitation imposed on their profits by the existence of free competition, and had begun to form combinations—known as cartels—among themselves in order to restrict its effect. The primary object of these cartels was to raise the price of sugar in the home market approximately to that at which it would be possible to import and sell foreign sugar. The surplus outturn for which no market could be found at these enhanced prices had to be exported, and thus a fresh stimulus was given to the export of the bounty-fed article. The partial closing of the American market by legislation helped to divert a portion of the stream to India. The limit of the adventitious profit which this system rendered possible was the surtax, or difference between the import and local consumption duties. The first cartel, that of Austria-Hungary, was established in 1897-1898, and that of Germany followed in 1900.

86. It was in order to check the imports thus artificially stimulated that the legislation of 1902 was undertaken. The form and duration of the law were influenced by the resolutions adopted in the Brussels Convention which had been signed in March of the same year, the amount of the countervailing duties being limited to one-half the amount of the surtax and their operation to the 31st August 1903, to which date the enforcement of the Convention had been relegated. The power to levy duties was subsequently extended to 31st March 1904, and eventually continued indefinitely subject to certain conditions. As already explained, however, the duties were actually abolished in December 1903 in the case of those countries which had adhered to the Convention, and the only duties now remaining in force are those in respect of Denmark, Russia, Chili, and the Argentine Republic, from which the imports into India are practically *nil*.

87. To enable us to trace the effect, if any, of the duties, and of their withdrawal, on the Indian industry, I now give information similar to that in paragraphs 82 and 83 above, brought down to December 1905 :—

I.—Approximate acreage under sugar-cane in British India since 1899-1900.

1899-1900	2,693,000
1900-1901	2,522,000
1901-1902	2,474,000
1902-1903	2,358,000
1903-1904	2,280,000
1904-1905	2,400,000
1905-1906 (first nine months)	2,222,000

II.—Imports of sugar into British India by sea.

YEAR.	CANE.		BEET.		TOTAL.	
	Refined.	Unrefined.	Refined.	Unrefined.	Refined.	Unrefined.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
1899-1900 .	103,173	21,243	43,625	...	146,798	21,243
1900-1901 .	153,110	20,432	90,295	...	243,405	20,432
1901-1902 .	125,190	28,082	147,393	1	272,583	28,083
1902-1903 .	177,065	22,560	73,484	1	250,549	22,561
1903-1904 .	251,822	23,820	41,051	...	292,873	23,820
1904-1905 .	236,099	23,611	87,130	1	323,229	23,612
1905-1906 (first nine months) .	168,171	10,381	49,980	...	218,151	10,381

On an inspection of these figures, it is impossible to resist the conclusion that the experiment—for it was admittedly nothing more—has proved a disappointing failure. It has not so far arrested the progressive decline in the acreage under sugar-cane, which fell from $2\frac{3}{4}$ million acres in 1898-1899 to $2\frac{1}{4}$ millions in 1903-1904. There was no doubt some recovery in 1904-1905, but it would be rash to build much on this, and in any case, should it happily prove to be the beginning of a permanent revival, there are independent causes at work which, so far as present indications go, are sufficient to account for it. The figures so far available for the current year exhibit a further decline. Neither has it seriously affected imports of beet-sugar, which reached their highest figure in 1901-1902, and which during 1904-1905 were far above the level of the average before the legislation of 1899 was undertaken. During the first nine months of the current year, 1905-1906, the imports of beet were less than in the corresponding period of 1904-1905, but were much in excess of those of the previous year; and the reduction was in part at least attributable to the shortage of the crop both on the Continent, and in Mauritius. The former cause led to high prices and over-speculation and resulted eventually in extensive disorganization of trade.

88. The question of prices is complicated by a variety of factors, some of which are unconnected with Indian legislation. The following table gives the prices per cwt. of beet-sugar (refined) at Calcutta and Bombay, and of Indian raw-sugar at Cawnpore, on the 1st September of each year since 1895 inclusive, that date being taken as representing the commencement of a new beet-sugar "campaign."

Price of refined beet-sugar at Calcutta and Bombay and of Indian raw sugar at Cawnpore on or about the 1st September of each year from 1895 to 1905.

YEAR.	REFINED BEET-SUGAR (PER CWT.).			INDIAN RAW-SUGAR (PER CWT.)		
	Calcutta (German crystals).			Bombay (a) (Austrian).		
	Cawnpore (pur or jaggery)					
	R	a.	p.	R	a.	p.
1895	12	5	4	} Information not available.		
1896	12	14	11			
1897	10	14	3	...	7	8 3
1898	10	8	1	11	2	0
1899	11	13	2	13	0	0
1900	12	6	9	13	0	0
1901	10	10	10	11	3	0
1902	9	11	2	(b) 9	0	0
1903	10	11	6	(c) 10	15	0
1904	10	8	9	10	9	0
1905	10	14	3	12	4	0

(a) Exclusive of town duty at as. 8 per cwt. (b) Ordinary crystals. (c) Dutch, superior.

It is impossible to trace in these figures any clear connection between Indian prices and countervailing legislation. The heavy fall in 1898 may conceivably be associated with the large imports of the two preceding years; but the level of prices remained the same in 1899, notwithstanding the duties imposed in March of that year. In the two following years prices recovered, notwithstanding the operation of the cartels and the rapid growth of the imports; but in 1902 there was a second severe decline despite the additional duties then imposed. The abolition of the duties has been followed by a somewhat unsteady revival of prices, but the level so far attained is still markedly below that which formerly prevailed.

83. So far, therefore, as any direct effect on Indian cultivation, imports, or prices is concerned, it must be confessed that the measures of 1899 and 1902 have been without material result. They yielded a certain revenue, some 64½ lakhs in the six years, which the Government of India did not particularly require, and which would certainly not have been imposed on fiscal grounds. On the other hand, the legislation itself, the imposition of duties thereunder, and the variation of these from time to time, occasioned no little dislocation of the import trade, which gave rise to vigorous and far from unreasonable complaints by the commercial public. It would, however, be unfair to omit certain indirect results of the action taken, which may be set down to the other side of the account. The Director of Agriculture in the United Provinces is of opinion that that action was of real value in allaying panic and creating confidence among the local manufacturers, and giving them time to readjust their methods. Of more permanent importance is the fact, which seems beyond reasonable doubt, that the Indian legislation of 1899, and the knowledge that we were about to proceed to the further measures adopted in May 1902, had an appreciable effect in bringing to a successful conclusion the Brussels Conference of 1901-1902, and that but for this, the latter might have had no more result than its various predecessors. Mr. Martineau, a well-known authority, has expressed the opinion that the eventual result of the Convention will not be to make sugar dearer, and that "free competition will allow sugar to be produced in larger quantities elsewhere, and probably in some new countries, so that eventually the beet-root crop, though still remaining an important factor, will cease to be so absolutely the governing factor in the price of sugar." If this anticipation is correct, the Convention should undoubtedly make for the benefit of the Indian sugar-producer, and no one is likely to advocate endangering its permanent maintenance by the repeal of the formal enactment which still remains on the Indian Statute Book.

84. There is one more point arising out of the figures given above which is deserving of brief comment. The acreage under sugar-cane in British India may for the present be taken at 2½ million acres. The yield of Indian cane per acre is exceedingly low, compared with that of other countries; but if the average output of raw sugar be taken at 1¼ tons per acre (which is the rate estimated by the Department of Commercial Intelligence, and

substantially corroborated for the United Provinces by the independent enquiries of Mr. Saiyid Mahomed Hadi), the annual product of British India would be about 3,000,000 tons. If we add to this some half million tons for palmyra sugar, and allow something for the output of Native States, the aggregate yield of raw-sugar in India is from $4\frac{1}{2}$ to 5 million tons per annum. For reasons already stated, no attempt can be made to express the outturn of refined sugar. Now the imports of foreign sugar, both cane and beet, in 1904-1905 were only 323,000 tons of refined, and 24,000 tons of unrefined, sugar, and this represents considerably less than one-tenth of the local product. It will also be seen that approximately four-fifths of the imports are of cane-sugar, the great bulk of it coming from Mauritius and Java. In both cases the sugar is subject to the usual 5 per cent import duty, and to the cost of carriage over-sea, and in the former case, it is produced largely by the agency of labour imported at heavy expense from India. It cannot perhaps be said that the foreign article has as yet encroached very seriously upon the indigenous product; but having regard to the fact that India is well adapted by nature for the production of sugar, it is *prima facie* somewhat worthy of remark that there should be any imports at all. The explanation is probably to be sought in the fact that of late years there has arisen a growing demand for refined (in place of unrefined) sugar of good quality and moderate price, which is greater than the local refining industry can at present supply. If this view is correct, there should be a great future before Indian sugar.

The introduction of healthier and more prolific varieties of cane, the employment of greater care in cultivation, the use of more economical processes for extracting the juice, and, above all, the adoption of the most modern and effective methods of refining, should help to make India self-supporting in respect of sugar, and even possibly to enter the world's market as an exporter.

E. N. BAKER.

March 21, 1906.

PART II.

BEING A MEMORANDUM BY THE FINANCIAL SECRETARY EXAMINING THE DETAILS OF THE ACCOUNTS AND ESTIMATES.

Section I.—The Accounts of 1904-1905.

91. The Accounts of the year show a surplus of £3,456,066, being worse by £29,434 than the surplus of £3,485,500 anticipated in the Revised Estimates framed in March last. ^{1904-1905.} *General Result of Accounts.*

92. The variations between the figures finally entering into the Accounts and those taken in the Budget and Revised Estimates of the year are fully explained in the Appropriation Report published in the *Gazette of India* of the 10th instant.

93. The following is a general comparison of the Revised Estimates with the Accounts of the year :— ^{1904-1905.} *Statement of the gross figures.*

	Revised.	Accounts.	Accounts, better.	Accounts, worse.
Total Revenue, Imperial, Provincial and Local	£ 84,699,100	£ 84,812,971	£ 113,871	£ ...
Total Expenditure, Imperial, Provincial and Local	81,237,700	81,194,105	43,595	...
Adjustment of Provincial and Local Surplus or Deficit	—24,100	162,800	...	186,900
NET	81,213,600	81,356,905	...	143,305
SURPLUS	3,485,500	3,456,066	...	29,434

94. The revenue was higher, and the total expenditure smaller, than the estimate, the net improvement being £157,466. But as the improvement in the Provincial and Local section of the accounts was £186,900, the Imperial section was worse by £29,434. ^{1904-1905.} *General Remarks.*

95. The more important items which contributed to the increase of £113,871 in revenue are : Excise (£51,424), Forest (£40,997), State Railways (£45,437) and Land Revenue (including that due to Irrigation—£24,047), while there was a falling-off of £22,501 under Opium, £20,121 under Interest and £23,801 under Marine. The increase in Excise revenue was largest in Bombay (£47,779) where there was a considerable rise in the receipts from auction sales of licenses for the presidency town, while in Burma there was a falling-off of £17,889, due to the fact that the effect of a change in the date of holding auction sales of licenses from March to April, was not fully allowed for in the estimate. The improvement under Forest occurred chiefly in Burma and Bombay. Under State Railways, there was an improvement of £53,013 on the Great Indian Peninsula Railway and of £28,666 on the Rajputana-Malwa line, while there was a falling-off of £45,229 on the East Indian Railway, due to some outstandings on account of freight on coal recoverable from other Railways being under dispute. The variations on the other lines were small. The Land Revenue collections in Madras exceeded the Revised Estimate by £120,577 owing to smaller season remissions and greater promptitude in collections. On the other hand, there was a falling-off of £75,209 in Bombay in consequence of unfavourable agricultural conditions. The falling-off in Opium revenue occurred almost wholly in Bombay, the exports of Malwa opium in March last having been very small. The decrease under Interest was the result of the non-payment, during the year, of the amount due by the Simla-Kalka Railway for the half-year ending December 1904. Under Marine the recoveries from the Imperial Government on account of hire of Royal Indian Marine steamers were smaller than the estimate by £37,540, while pilotage receipts in Bengal showed an increase of £9,900. ^{1904-1905.} *Variations under Revenue.*

1904-1905.
Decrease in
Expenditure.

96. The saving in expenditure was the net result of decreases and increases under a number of heads. The more important decreases occurred under (a) Minor Irrigation Works (£26,152), chiefly in Burma and Bengal; (b) Civil Works (£38,905)—chiefly on Provincial and Local Works in Bengal, there being an increase of £40,201 in the expenditure on Imperial Works; and (c) Army (£139,006). Under this last head there was a decrease of £60,105 in the effective charges due mainly to an over-estimate of the charges for the Tibet Mission and Ordnance factories and to larger credits on account of stores returned from China and Somaliland. The charges for reorganization were also less than the Revised Estimate by £93,995, chiefly in expenditure on account of clothing, equipment for field hospitals and mobilisation equipment, and for hutting, clothing and gear in connection with the formation of additional mule corps and cadres. On the other hand, the non-effective charges exceeded the estimate by £15,094, mainly under payments to the War Office in settlement of its claims for 1903-1904.

1904-1905.
Increase in
Expenditure.

97. The chief increase in expenditure was under State Railways Working Expenses (£208,937), and accrued mainly on the East Indian Railway, £61,208; North-Western Railway £40,640; Bengal and North-Western and Tirhut Railways, £41,848; Rajputana-Malwa Railway, £24,497; Oudh and Rohilkhand Railway, £24,951; and Bengal-Nagpur Railway, £14,020. There was also an increase of £20,153 under Marine, chiefly in England, owing partly to increased expenditure on stores and partly to a payment on account of the construction of the R.I.M.S. *Dufferin*.

Section II.—The Revised Estimate of 1905-1906.

1905-1906.
Statement of the
gross figures.

98. The following is a general comparison of the Budget and Revised Estimates of 1905-1906:—

	Budget.	Revised.	Revised, better.	Revised, worse.
Total Revenue, Imperial, Provincial and Local	£ 83,433,000	£ 84,829,500	£ 1,396,500	£ ...
Total Expenditure, Imperial, Provincial and Local	83,899,500	82,993,400	906,100	...
Adjustment of Provincial and Local Surplus or Deficit	—1,370,300	80,400	...	1,450,700
NET	82,529,200	83,073,800	...	544,600
SURPLUS	903,800	1,755,700	851,900	...

1905-1906.
General Remarks

99. The surplus is £851,900 better than was expected (£1,755,700 against £903,800). This is arrived at by an excess of revenue over the Budget Estimate amounting, in the aggregate, to £1,396,500, partially counterbalanced by an excess of total expenditure charged to revenue of £544,600. The actual outlay is, however, £906,100 less than was provided in the Budget; but whereas the Budget provided for an expenditure of £1,370,300 by reduction of Provincial and Local balances, these have as a matter of fact increased by £80,400, with the result that the Imperial section of the account is worse to this extent by £1,450,700. This, of course, arises from the fact that while expenditure which is met from balances outside Imperial adjusts the total outlay of the year for the benefit of the Imperial surplus, the converse takes place when such balances are increased, since the increase is not at the disposal of the Government of India, and is, so far as it is concerned, on the same footing as additional expenditure. The change in the position in respect to the Provincial and Local balances arises mainly from initial grants to the extent of £400,000 (60 lakhs), made in accordance with usual practice to the Central Provinces and Eastern Bengal and Assam in connection with the new settlements with these provinces, having been added to their balances at the close of the year; to increase in the revenues of the Local Governments, supplemented by the distribution of the special grants for agriculture, minor irrigation works and University reform referred to in paragraph 22 of Part I; and to the fact that they, as a rule, spent less largely than had been anticipated under Police, Education and Civil Works.

100. By Act I of 1906, passed on 26th January 1906, the duty on imported spirit was raised from ₹6 to ₹7 per proof gallon, with effect from 26th February last, and the duty on perfumed spirit and liqueurs was simultaneously enhanced from ₹8 and ₹6 per imperial gallon to ₹11 and ₹10 respectively. The object of this measure was to place the scale of taxation on imported spirit in a more suitable relation to that on country spirit. Financially the chief result of this Act during the current year was a large increase of duty receipts under Customs (spirits) in February, owing to importation of stock during the month's *moratorium* which had been allowed to enable the trade to adjust itself to the new conditions. The receipts under this head for February exceeded those of February 1905 by about 11½ lakhs, while a counterbalancing drop of 4½ lakhs is expected in the receipts of March.

101. Partial failure of rains has caused a considerable falling-off in the collections of Land Revenue, and Customs and Irrigation revenue have not been as good as was expected. But the deficiencies under these heads have been considerably exceeded by improvements under most of the others, the net increase in the total revenue being ₹1,396,500 as shown above. Notable increases have occurred in the traffic receipts of Railways, Excise and Forest revenue, seigniorage on silver coined, and interest on temporary investments of cash balances in England. There is also an enhancement of Army receipts in consequence of the inclusion therein of the recovery from the Imperial Government of the cost of Indian regiments employed in the colonies. In the Budget Estimate the expenditure on these regiments was omitted: it has now been decided to bring both expenditure and the corresponding receipts to account.

102. As mentioned above, there have been considerable savings in the estimates of Provincial Expenditure, owing to the inability of the Local Governments to spend fully the large allotments made to them in the Budget for reorganization of Police, Primary Education, and in aid of the resources of District Boards, the initiation of the necessary schemes having been unavoidably delayed. Nor has it been possible to spend in full the amount allotted for reorganization of the Army, especially in England where the expenditure is now expected to fall short of the Estimate by ₹777,100 owing to delay in the supply by the War Office of guns and other stores contracted for. On the other hand, a considerable amount of extra expenditure has been involved by the payment of 36.18 lakhs (₹241,200) on account of subsidy to His Highness the Amir of Afghanistan which was not provided for in the Budget as negotiations with His Highness had not then been completed; by outlay amounting to nearly 16½ lakhs connected with the visit of Their Royal Highnesses the Prince and Princess of Wales; by the manœuvres at Rawalpindi (14 lakhs); and by an increase in the Working Expenses of State Railways consequent on improved earnings. The net result is a saving of ₹906,100 in the estimate of total expenditure.

103. The more important variations which have brought about the increase of ₹1,396,500 in the total revenue are as follows:—

Increases—	₹	₹
Salt	76,700	11,50,000
Stamps	60,400	9,07,000
Excise	210,400	31,55,000
Forest	188,200	28,23,000
Interest	139,700	20,96,000
Post Office	50,400	7,50,000
Mint	199,800	29,96,000
State Railways—Gross Receipts	794,300	1,19,14,000
Army Receipts	156,300	22,55,000
	<u>1,870,200</u>	<u>2,80,52,000</u>

Decreases—	₹	₹
Land Revenue, including that due to		
Irrigation	443,900	60,58,000
Customs	39,100	5,87,000
Irrigation—Major Works—Direct Receipts	101,400	15,20,000
	<u>584,400</u>	<u>81,65,000</u>

1905-1906.
Enhancement of
duty on imported
spirit.

1905-1906.
Increase of
Revenue.

1905-1906.
Saving in
Expenditure.

1905-1906.
Variations under
Revenue.

1905-1906.
Salt Revenue.

104. The reduction of the duty on salt made successively in March 1903 and March 1905 has stimulated consumption, and though provision was made in the Budget for a considerable increase, the actual consumption has been still larger, and the total revenue is now expected to exceed the estimate framed in March last by ₹11,50,000. All provinces show an increase except Bengal, where imports of Liverpool and German salt have fallen off and have been replaced by salt manufactured in Northern India.

1905-1906.
Stamp Revenue.

105. Stamp revenue has also grown in all provinces except the Punjab where a falling-off of ₹3,50,000 is anticipated owing partly to the reduction of transfers and mortgages caused by the Land Alienation Act, and partly to the introduction of the Punjab Loans Limitation Act. The largest increases have occurred in Madras (₹4,80,000) and Bengal (₹3,05,000).

1905-1906.
Excise Revenue.

106. The growth of Excise revenue has been higher than provided in the Budget Estimate in all provinces except the Administrations directly under the Government of India, Burma and the United Provinces. In the first-mentioned provinces there is a slight falling-off as compared with the Budget Estimate, owing mainly to scarcity in Ajmer-Merwara. In Burma the revenue is expected to fall short of the Budget Estimate by ₹2,00,000, owing to the restriction of retail sales of opium to the actual needs of consumers. In the United Provinces the result of a poor *khari*, and of the serious injury to crops caused by the frost of last winter, has affected the Excise revenue of the province much more seriously than was anticipated in March last, and there is a decrease of ₹7,50,000 on the Budget Estimate. The largest increases have occurred in Madras (₹7,50,000), Bombay (₹10,00,000), Central Provinces and Berar (₹12,05,000), and Bengal (₹7,51,000). In the first two provinces it was anticipated that the receipts of 1904-1905 would not be worked up to owing to unfavourable agricultural conditions, a forecast which has proved erroneous: the receipts of 1905-1906 will now in both provinces somewhat exceed those of the year preceding. In Bengal and the Central Provinces the increase is due to prosperous seasons and the introduction of important reforms in administration.

1905-1906.
Forest Revenue.

107. There has been a general growth of Forest revenue in almost all provinces. Of the total excess (₹28,23,000), as compared with the Budget, ₹19,00,000 accrues in Burma, and is due to increase in the amount of timber extracted by departmental agency and to exceptionally favourable conditions for the floating of timber down the rivers. In Bombay there is an increase of ₹6,00,000, chiefly from the supply of sleepers to railways and sale of grass in connection with famine operations.

1905-1906.
Interest Receipts.

108. Under Interest, an additional sum of £157,700 has been obtained in England from the temporary investment of a larger proportion of the Secretary of State's cash balances at rates of interest higher than estimated. On the other hand, the investment of an additional two crores of the Paper Currency Reserve (*vide* paragraph 221 of last Financial Statement) having been made at a later date than was estimated, the receipts on account of interest thereon have fallen short of the estimate by £9,200. The only other notable variation is a falling-off of ₹1,08,000 (£7,200) in Bombay, the unfavourable season having adversely affected the recoveries of interest on loans granted to cultivators.

1905-1906.
Post Office Receipts.

109. Under Post Office, the loss of revenue expected from the increase in letter-weight carried for half an anna and by a reduction in the rates of insurance fee has been more than made up by the increase resulting from the growth of the business of the department.

1905-1906.
Mint Receipts.

110. The mints are credited with a seigniorage of 2 per cent on fresh issues of rupees, to cover the cost of coinage. Coinage in the current year has been unusually heavy, to meet the demands of trade as expressed through the Secretary of State's council drawings: hence the increase under Mint receipts.

1905-1906.
Great Railways,
Cross Traffic
Receipts.

111. In 1904-1905 the traffic on all the larger of railway systems was exceptionally favourable. Pilgrim, grain and coal traffic on the East Indian Railway, and the export wheat traffic on the North-Western Railway were specially heavy, while the traffic on the Great Indian Peninsula, Rajputana-Malwa and Bengal-Nagpur Railways was also good in consequence of favourable crops. In the Budget for 1905-1906 allowance was made for earnings on extra mileage to be opened and for an expansion of traffic on newly opened lines, while

it was anticipated that there would be a decrease on some of the lines which had shown unusually heavy receipts in the year before. The actual results are now, however, expected to be considerably better than the estimate. There has, indeed, been a falling-off in grain and seed traffic on the North-Western Railway; but this has been much more than counterbalanced by remarkable increases on the Bengal-Nagpur, Great Indian Peninsula and the Madras Railway (North-east section) owing to development of coal, cotton and grain traffic; and on the Rajputana-Malwa and Southern Mahratta Railways in consequence of movements of grain called forth by scarcity in parts of the country served by them. The total gross traffic receipts of State Railways are expected to exceed the estimate by ₹1,19,14,000 (£794,300); but Working Expenses are also likely to show an excess of ₹59,00,000 (£393,400). Increased outlay has been required to work the increased traffic, and there has also been an increase on the East Indian and Oudh and Rohilkhand Railways, in the charges for maintenance and renewals of rails and rolling-stock, and in the Company's share of the surplus profits of the Bengal-Nagpur and Burma Railways, which is included under Working Expenses. The net earnings are thus better than the estimate of March last by ₹60,14,000 (£400,900). The more important variations from the Budget Estimate are as follows:—

	INCREASE +. DECREASE —		
	Gross Receipts.	Working Expenses.	Net Receipts.
	₹	₹	₹
Great Indian Peninsula Railway . . .	+42,50,000	+7,85,000	+34,65,000
Rajputana-Malwa . . .	+30,00,000	+7,50,000	+22,50,000
Bengal-Nagpur . . .	+37,00,000	+13,00,000	+24,00,000
Southern Mahratta . . .	+9,00,000	+3,50,000	+5,50,000
North-East line, Madras Railway . . .	+12,00,000	+6,50,000	+5,50,000
East Indian	+19,50,000	—19,50,000
North-Western . . .	—35,00,000	—18,00,000	—17,00,000

112. The increase under Army receipts is due to a recovery of ₹13,87,000 (1905-1906. £92,500) from His Majesty's Government on account of five Indian regiments serving in the colonies as stated in paragraph 101; to larger receipts on account of the Indian Troop Service and of clothing issued to the Native Army on payment; and to abnormal sales of unserviceable ordnance stores. Army Receipts.

113. The decrease anticipated under Land Revenue, including the portion due to irrigation, occurs mainly in Madras (19.6 lakhs), Bombay (23.1 lakhs), the United Provinces (7.5 lakhs) and the Punjab (12.5 lakhs). In Bombay, this is the result of deficient rain. In Madras, as observed in paragraph 95, the collections of 1904-1905 were greater than had been anticipated when the Budget for 1905-1906 was framed, leaving less for realization in the latter year. In the United Provinces, the partial failure of the *khariif* and of the winter rains has necessitated remissions and suspensions. In the Punjab, the *khariif* has failed in the Delhi Division, and the earthquake in Kangra has also necessitated some remissions. Decreases of Revenue. Land Revenue.

114. The decrease in Customs revenue occurs mainly under silver bullion, private import of which has been checked by rise in price (16 lakhs); petroleum, owing to the cessation of imports of Russian oil consequent on the troubles at Baku (11 lakhs); and metals (other than silver) and manufactures of metals, where the falling-off occurs mainly under ironware, copper and tin (7½ lakhs). On the other hand, there has been a considerable increase under cotton manufactures, due mainly to larger imports into Bombay and Bengal (16 lakhs), while there is also a gain of 2½ lakhs under the excise duty on local manufacture. There is likewise an increase of 9½ lakhs under spirits owing mainly to the effects of the tariff legislation referred to in paragraph 100. 1905-1906. Customs.

115. The falling-off under Irrigation, Major Works—Direct Receipts occurs chiefly in the United Provinces and the Punjab, and is due in the former province to decrease in the area irrigated for sugarcane owing to frost and bad seed, and in the latter to remissions necessitated by the failure of the cotton crop in certain tracts. 1905-1906. Irrigation, Major Works—Direct Receipts.

1905-1906.
Variations in
expenditure.

116. The saving of £906,100 in the total expenditure is the net result of a large number of variations, the more important of which are as follows:—

DECREASES—	£	₹
Land Revenue	56,800	8,53,000
Police	203,200	30,48,000
Education	243,700	36,56,000
Scientific, etc., Departments	88,000	13,20,000
Famine Relief	75,200	11,29,000
Construction of Protective Irrigation Works	67,400	10,11,000
Civil Works	178,500	26,77,000
Military Works	71,200	10,68,000
Army Services	842,000	1,26,30,000
Special Defences	61,200	9,18,000
INCREASES—		
Opium	59,000	8,85,000
Interest	52,900	7,93,000
Telegraph	33,800	5,07,000
General Administration	81,500	12,22,000
Political	272,300	40,84,000
Miscellaneous	56,100	8,41,000
Reduction of Debt	119,800	17,97,000
State Railways—Working Expenses	393,400	59,00,000
Irrigation, Major Works—Working Expenses	44,800	6,71,000

1905-1906.
Decreases.
Land Revenue.

117. Under Land Revenue the Budget provision has in most provinces proved larger than was necessary. In the Central Provinces the transfer of the Sambalpur district to Bengal from the 16th October 1905, and the formation of the Drug district from 1st January 1906 instead of from 1st October 1905, have caused some savings. In Burma operations connected with Land Records and Agriculture and town surveys have been curtailed. In Eastern Bengal and Assam charges for survey and settlement are expected to show a saving of ₹2,75,000 owing to the postponement of settlement operations in Faridpur. In the United Provinces the charges for the purchase of estates under the Bundelkhand Encumbered Estates Act are expected to be less by ₹52,000, and delay in the introduction of measures for improving the position of the patwari and kanungo staff is likely to yield a saving of ₹46,000. In the Punjab there is a saving of ₹2,17,000 in settlement charges.

1905-1906.
Police, Education,
Medical and
Scientific and
other Minor
Departments.

118. The savings under Police, Education, and Scientific and other Minor Departments are due mainly to the special grants provided in the Budget Estimate for police reform, improvement of primary education, and agricultural and veterinary development not having been spent in full, and, to a smaller extent, to the usual savings in most of the provinces on the allotments made for salaries and other charges. A portion of these special grants has in most provinces been transferred to the Public Works Department for construction of buildings. The only points which need special mention are the following: Cantonment Funds have been relieved of police charges with effect from 1st April 1905. Under 'India General' the creation of a Central Research and an X-ray institute will involve an expenditure of ₹44,000 in the year for which no provision was made in the Budget Estimate. In Burma, provision was made for strengthening the Rangoon and Toungoo battalions of military police, but the scheme has not yet been sanctioned. In the North-West Frontier Province a special provision of ₹76,000 for the pay of the Border Military Police has not been required. In Madras there is a saving of ₹5 lakhs under Medical chiefly on the provision made for plague charges by Local Boards. In Bombay, a special payment of ₹2,00,000 is proposed to be made to the new Prince of Wales' Museum for Western India.

1905-1906.
Famine Relief,
Construction of
Protective Irriga-
tion Works and
Reduction of Debt.

119. The charges for Famine Relief are expected to fall short of the estimates in Madras and Bombay by ₹13,93,000 and ₹11,36,000, respectively, while in Ajmer and the United Provinces, where expenditure under this head was not contemplated when the Budget was framed, outlay to the amount of ₹6,96,000* and ₹6,46,000, respectively, has been found necessary. Taking all the

* This includes some small expenditure in Baluchistan and (payable by the Government of India) in Rajputana.

provinces together, there is a net saving of **₹11,29,000** under this head. A saving of **₹10,11,000** is also expected on the grant for the construction of Irrigation Works, chiefly in Bengal, United Provinces and Bombay, while the expenditure on the construction of Protective Railways in Madras is likely to exceed the allotment by **₹3,43,000**. The net result under the three heads mentioned is a saving of **₹17,97,000**, which has been charged under Reduction of Debt, in addition to the amount provided in the Budget, to work up to the full grant of **₹1,50,00,000** (**£1,000,000**) for Famine Relief and Insurance.

120. Under Civil Works (Provincial) expenditure, there is a saving on the Budget allotment of about 15 lakhs in the Punjab, and about 5 lakhs in Madras. In the Punjab the grants for the Simla Extension scheme, residences for Government officials and construction of some special buildings and works of public utility have not been fully utilised, while in Madras the schemes for drainage and water-supply in certain towns for which provision had been made are not yet ripe for execution. In Bengal the Budget included a large reserve for police, jail and other buildings which has not been fully required, but this reduction is nearly counterbalanced by additional expenditure in Eastern Bengal and Assam consequent on the creation of that province. In other provinces there is an increase, the most notable being in the United Provinces, on account of the construction of normal schools and police buildings and repairs to archæological buildings, and in Burma for schools and a General Hospital at Rangoon. There is a saving on the estimate for local expenditure of all provinces owing to the large grants made to District Boards not having been yet fully utilized.

121. It has been decided to eliminate the special sub-head Reorganization under the main heads 46.—Army and 44.—Military Works, and on the receipt side under XXXIII.—Army, as it has been found that although the Reorganization outlay can be approximately estimated, it cannot be brought to separate account with absolute accuracy, since, in the case of some measures recurring expenditure which simply goes to strengthening existing units cannot be separately earmarked without an immense amount of trouble. The figures for Reorganization and other special measures will, however, be separately exhibited with approximate correctness in paragraph 206 (Part IV).

122. The decreases under Army and Military Works, and Special Defences are entirely due to lapses under Reorganization and other special expenditure, and are mainly caused by delay in the supply of new artillery, and stocks of ammunition and other stores contracted for through the War Office.

123. Under ordinary Army charges there is an increase of **₹6,36,000** (**£42,400**), but this is only nominal. It arises from the inclusion under this head of nearly 14 lakhs for Indian regiments stationed in the colonies, the cost of which is, as already stated, recovered from His Majesty's Government. Apart from this, there would be a decrease of nearly $7\frac{1}{2}$ lakhs, and that after allowing for an expenditure of 16.7 lakhs in connection with the Rawalpindi manœuvres and other charges connected with the Royal visit for which Budget provision was not made, and for 2.4 lakhs in connection with outlay consequent on the Kangra earthquake. But for these charges, there would be a decrease of $26\frac{1}{2}$ lakhs. This occurs chiefly by reason of smaller expenditure on stores in England and payments to the War Office on account of British forces serving in India (31.4 lakhs), the chief counterbalancing item being 5 lakhs owing to rise in food prices in India.

124. The outturn of the opium crop in the Behar Agency has been greater than was expected in March last, and has resulted in larger payments to the cultivators for the raw product.

125. Under Interest on Debt, the discount on the 3 per cent stock for **₹2,000,000** issued in England has involved an extra payment of **₹47,500**. In India also, there has been an extra payment of **₹70,000** (**£4,700**) on account of interest on a temporary loan of 70 lakhs (in rupees) procured from the Maharaja Sindhia in December, when the Secretary of State's large council drawings rendered it necessary to strengthen our stock of coined silver.

126. The increase under Telegraph is caused by the payment of **₹17,500** to the Telegraph Companies concerned for loss of receipts consequent on the operation of the reduced tariff for foreign messages between March 1902 and March 1904, and by addition to establishment to cope with increased traffic in India.

1905-1906.
General Adminis-
tration and
Miscellaneous.

127. The special expenditure connected with the visit of Their Royal Highnesses the Prince and Princess of Wales has chiefly contributed to the increases under General Administration and Miscellaneous. The division of Bengal has also caused an increase under the first head, while the relief measures necessitated by the earthquake involved considerable expenditure under Miscellaneous in the Punjab.

1905-1906.
Political.

128. The items which are mainly responsible for the increase under Political are the payment of Rs36,18,000 on account of the subsidy of the Amir of Afghanistan referred to in paragraph 102, extra charges incurred on account of the visit of the Prince and Princess of Wales, the strengthening of frontier militia corps, increase of consular escorts in Persia, and the purchase of a steam launch for the Consul at Mohamerah.

1905-1906.
State Railways—
Working
Expenses.

129. The increases in State Railways—Working Expenses and under Reduction of Debt have been explained in paragraphs 111 and 119.

1905-1906
Major Works—
Working
Expenses.

130. The increase in Working Expenses, Major Irrigation Works occurs chiefly in the Punjab, and is due to refunds of water-rates and outlay on some important works, and special repairs for which provision was not made in the Budget Estimate. A smaller expenditure under 49.—Irrigation, Capital Expenditure has also involved the debit to the former head of a larger share of the Establishment charges.

Section III.—The Budget Estimate of 1906-1907.

1906-1907.
Statement of the
Gross figures.

131. The following is a general comparison of the Budget Estimate of 1906-1907 with that of 1905-1906:—

	1905-1906.	1906-1907.	1906-1907, better than 1905-1906.	1906-1907, worse than 1905-1906.
Total Revenue—Imperial, Provincial and Local	£ 83,433,000	£ 86,495,100	£ 3,062,100	£ ...
Expenditure—				
Total outlay—Imperial, Provincial and Local	83,899,500	86,698,600	...	2,799,100
Adjustment of Provincial and Local Surplus or Deficit	—1,370,300	—1,077,600	...	292,700
Total net expenditure charged to Revenue	82,529,200	85,621,000	...	3,091,800
Imperial Surplus	903,800	874,100	...	29,700

1906-1907.
Remissions
of Taxation.

132. The above figures allow for the following remissions of local taxation mentioned in Part I of the Financial Statement:—

Repeal of the patwari cess in the United Provinces, the Punjab, the Frontier Province, Ajmer, the Central Provinces and the Sambalpur district of Bengal.

Abolition of the ryotwari village service cess in Madras, and of the village service cess in Coorg.

Abolition of the zamindari *dad* cess in Bengal and Eastern Bengal.

1906-1907.
Relief of
District Boards
in certain
provinces from
charges for
District Post, etc.

133. The cost of these measures is Rs82,19,000 (£547,900). Rs5,15,000 (£34,300) have also been allotted for the purpose of relieving District Boards in the United Provinces, the Punjab,* Burma, the Central Provinces, Frontier Province, and Coorg of the contributions they have hitherto paid towards District Post charges. These charges being now taken over by the Government of India, the District Boards concerned will be able to allot a corresponding amount of revenue for purposes of local improvement. The District Boards in the United Provinces have likewise been relieved of some small charges, amounting in all to

* In the Punjab District Post charges were taken over as Imperial in 1905-1906; but a contribution of Rs1,41,000 formerly made by the District Boards for this purpose continued to be paid to the Local Government. This will now cease, the Local Government receiving a compensatory assignment from Imperial funds.

about R67,000, which they previously paid to the Local Government for school and establishment purposes.

134. Finally, another special assignment of 25 lakhs (£166,700), which will be placed at the disposal of the Provincial Governments, has been added to the 50 lakhs (£333,300) assigned last year for purposes of police reform*; 5 lakhs are to be assigned to the Local Governments for annual expenditure on European and technical education; and the grant of 20 lakhs for agricultural and veterinary development referred to in paragraph 126 of the last Financial Statement has been increased to 24 lakhs. Of the last mentioned sum, 21½ lakhs have been distributed to the provinces, while 2½ lakhs are reserved for expenditure classed as Imperial, such as that at the Agricultural Research Institute at Pusa and the provision of additional Civil Veterinary Officers.

1906-1907.
Additional
Assignments
for Police
Reform,
European and
technical
education, and
agricultural
improvement.

135. But for these measures of fiscal relief and administrative improvement, the surplus of the year would have stood at £1,687,500 or £813,400 above the figure actually arrived at, while the revenue would have been £547,900 higher. After making the above adjustments and remissions, the year is estimated to close with a surplus of £874,100 or £29,700 less than the surplus budgeted for in 1905-1906. As compared with that year, there is an increase of revenue of a little over £3 million (£3,062,100), but an increase of about £2¼ million (£2,799,100) in actual outlay. So far the net result is £263,000 better: the diminution in the surplus of the year as compared with that of its predecessor is consequent on the anticipation that £292,700 less of the actual outlay contemplated will be met out of Provincial and Local balances.

1906-1907.
General Results.

136. The greater part of the estimated increase of revenue in 1906-1907 as compared with the Budget of the preceding year is due to Railways, which show a total increase of £2,298,200 under Receipts, counterbalanced, however, by an increase of £1,633,100 under Charges, thus affording a net additional gain of £665,100.

1906-1907.
Important
increases and
decreases of
Revenue and
Expenditure.

137. Other important variations are increases of £331,700 under Land Revenue including portion due to Irrigation, £140,000 under Salt, £163,400 under Stamps, £374,200 under Excise, £100,200 under Customs, £180,900 under Forest, £118,800 under Post Office, £96,400 under Mint, £148,500 under Major Irrigation Works—Direct Receipts, and £136,900 under Army Receipts; counterbalanced by decreases of £46,600 under Opium and £516,800 under Provincial Rates. These will all be referred to below.

138. The most important heads of Receipt in the Indian Budget are the following:—

Main heads of
Receipt.

Railways—	£	R
Total gross receipts	26,154,600	39,23,19,000
Net current earnings of State Railways, deducting working expenses	12,897,900	19,34,69,000
Total net receipts deducting interest and all other charges debitable to Railways	2,229,300	3,34,40,000
Land Revenue proper	19,764,200	29,64,62,000
Excise	5,817,300	8,72,60,000
{ Opium	4,831,100	7,24,66,000
" net	2,959,800	4,43,97,000
Customs	4,464,200	6,69,63,000
Salt	4,400,000	6,60,00,000
Stamps	3,970,700	5,95,60,000
{ Irrigation—		
Gross receipts	3,250,000	4,87,50,000
Net receipts	257,100	38,56,000
Provincial Rates	2,261,300	3,39,20,000
{ Forest	1,789,900	2,68,48,000
" net	804,400	1,20,66,000
{ Post Office	1,727,100	2,59,06,000
" net	126,200	18,93,000

139. *Railways.*—As explained in paragraph 111, there has been a continued expansion of traffic in the current year on most of the railways except the North-

1906-1907.
Railways Gross
and net earnings.

* Besides 2 lakhs further allotted to the Government of Eastern Bengal and Assam in connection with reorganization of its military police.

Western line. Next year agricultural conditions are expected to be more favourable, and provision has been made in the Budget Estimate for a further expansion of traffic, for a recovery of the ground temporarily lost by the North-Western Railway, and for opening of additional mileage. The Budget Estimate of gross Railway receipts, the bulk of which are derived from State Railways, has accordingly been placed at £2,298,200 (345 lakhs) and £1,496,400 (224½ lakhs) higher than the Budget and Revised Estimates, respectively, of the current year; and that of net current earnings of State Railways (receipts, less working expenses) at £1,227,900 (184 lakhs) and £827,000 (124 lakhs) more in each case. A part of the increase in the gross traffic receipts is, it should be explained, due to the fact that the Bombay, Baroda and Central India Railway having become a State Railway with effect from 1st January 1906, the Budget Estimate for next year includes the gross receipts of the Railway for a whole year, while the Estimates for the current year include gross receipts for three months and only net earnings for the nine months, during which it was a Guaranteed Railway.*

140. The following are the more important differences in regard to gross receipts, working expenses, and net earnings of State Railways as compared with the Revised Estimate of the current year:—

	INCREASE + DECREASE —		
	Receipts.	Working Expenses.	Net Earnings.
<i>Better than Revised—</i>	R	R	R
Bengal-Nagpur Railway	+ 25,00,000	+ 7,00,000	+ 18,00,000
East Indian Railway .	+ 25,00,000	+ 6,50,000	+ 18,50,000
Burma Railways . .	+ 7,00,000	— 78,000	+ 7,78,000
Rajputana-Malwa Railway	+ 5,00,000	...	+ 5,00,000
<i>Worse than Revised—</i>			
North-Western Railway	+ 45,00,000	+ 51,50,000	— 6,50,000

It will be observed that the increased receipts from the North-Western Railway will be more than counterbalanced by enhanced working expenses consequent on the necessity for renewal of permanent-way and rolling-stock.

Total results.

141. Taking the Railway Revenue Account as a whole, the Budget Estimate for next year compares as follows with the Budget and Revised Estimates of the current year:—

	IN HUNDREDS OF POUNDS STERLING.			IN THOUSANDS OF RUPEES.		
	1905-1906.		1906-1907.	1905-1906.		1906-1907.
	Budget.	Revised.	Budget.	Budget.	Revised.	Budget.
Gross Receipts, including net receipts of Guaranteed Railways, and repayments of advances of interest by Subsidised Companies	£ 23,856,4	£ 24,658,2	£ 26,154,6	R 35,78,46	R 36,98,73	R 39,23,19
Working Expenses	11,236,9	11,630,3	12,784,0	16,85,54	17,44,54	19,17,60
Interest, Annuities, Surplus profits payable to Companies, etc. . . .	10,917,1	10,907,6	11,018,6	16,37,56	16,36,14	16,52,79
Miscellaneous Charges	138,2	94,8	122,7	20,73	14,21	18,40
NET RECEIPTS	1,564,2	2,025,5	2,229,3	2,34,63	3,03,84	3,34,40

The net profit accruing to Government from railways is thus expected to amount to £2,229,300 next year, being in excess of the Revised Estimate of the current year by £203,800 and £665,100 better than the current year's Budget.

* Only the *net* earnings of Guaranteed Railways appear in the India Accounts.

142. *Land Revenue*, including the portion due to Irrigation, is placed at 1906-1907. £331,700 (nearly 50 lakhs) better than the Budget for 1905-1906 and £775,600 *Land Revenue.* (116 lakhs) better than in the Revised Estimate of that year, which has fallen materially short of the Budget in Madras, Bombay, the United Provinces, and the Punjab. The increase as compared with the 1905-1906 Budget occurs mainly in the United Provinces, where large remissions had to be given owing to the frosts of last year, and in Burma, and is counterbalanced by a decrease of nearly 12 lakhs in Madras, where the figure taken in 1905-1906 has proved an over-estimate.

143. *Excise* is taken at £374,200 (56 lakhs) better than in the Budget 1906-1907. of 1905-1906, the Revised Estimate of which allows for an increase of £210,400. *Excise.* The main increases as compared with the current year's Budget are, as in the Revised Estimate, in Bombay, Madras, Bengal and the Central Provinces—*vide* paragraph 106. There is also an increase of 4½ lakhs in the Punjab due to the replacement of illicit by licit consumption. In the United Provinces there is a decrease (5 lakhs), the result of unfavourable seasons in some districts.

144. *Opium* is a notoriously difficult head of receipt to estimate for, since its 1906-1907. main factor, the sale-proceeds of Bengal opium auctioned in Calcutta for export, *Opium.* is determined by circumstances in China of which we have little knowledge, and by the speculation of the market, and the prices obtained at the monthly auctions are subject to violent fluctuations. In 1904-1905 the average sale-price obtained was ₹1,587 per chest, and it was therefore thought safe to take ₹1,400 as the estimated price for 1905-1906. This figure has been slightly exceeded, the average for the whole year having been ₹1,434 per chest, but in the last months there was a heavy drop, and the March sales, which generally give a result better than that obtained as the average for the next 12 months, only produced a chest price of ₹1,258. This being so, it is not safe to estimate for more than ₹1,125 per chest for 1906-1907. The fall of revenue thus brought about is slightly counterbalanced by the fact that the number of chests sold per month has been raised, owing to accumulation of stocks, from 4,000 to 4,400 with effect from January last, so that in 1906-1907 there will be a sale of 52,800 chests against 49,200 in 1905-1906.

The export duty on Malwa opium is also an uncertain factor, and a considerable drop in exports during the current year warrants the expectation that the receipts under this head will yet be less by 21 lakhs than the amount taken in the last Budget. In all, therefore, there is a decrease of £646,600 (97 lakhs) under Opium as compared with the current year's Budget, the only material decrease of revenue anticipated save that under Provincial Rates.

The expenditure under Opium, on the other hand, shows an increase of £33,900, the amount provided in the current year's Budget having been shown by experience to be inadequate for present expenses of cultivation, and taking this into account the net falling-off under Opium receipts is thus £680,500 (102 lakhs).

145. The Revised estimate of *Customs* is placed at £39,100 less than in the 1906-1907. current year's Budget, while in the Budget for 1906-1907 it is estimated that *Customs.* this decrease will be made up and a further increase of £100,200 obtained. Increase as compared with the Budget of 1905-1906 is expected mainly under Cotton manufactures and Spirits, in the latter case owing to the recent enhancement of the duty on imported spirit from ₹6 to ₹7 per proof gallon, with proportionate increases for perfumed spirits and liqueurs. Decreases of 11 and 14 lakhs are allowed for under petroleum and silver with reference to the results of the Revised Estimate (paragraph 114).

146. The increases budgeted for under *Salt* and *Stamps* amount to 1906-1907. £140,000 and £163,400, respectively. In both instances they are justified by *Salt.* *Stamps.* excess of the Revised Estimate over the Budget forecast for the current year, and by the increasing consumption of salt consequent on the late reductions of duty. The increase under Stamps is spread over most of the provinces, the only noticeable decrease being in the Punjab which shows a falling-off, attributed, as stated in paragraph 105, to the effect of the Alienation of Land Act and the Punjab Loans Limitation Act.

147. Under *Irrigation* there is an increase of revenue of £148,500 1906-1907. in direct receipts from Major Irrigation Works, and that portion of the land *Irrigation.* *Receipts.* revenue which is due to Irrigation shows an expansion of £36,200, while Minor

Irrigation receipts are estimated to be £10,000 better than in the current year's Budget. The increase in direct Major Irrigation receipts is largest in the United Provinces and the Punjab, where, as observed in paragraph 115, the Revised Estimate shows a falling-off, but where circumstances are favourable for increased irrigation in the coming year.

148. On the expenditure side, however, there is an additional outlay of £99,500. Increased capital expenditure on Major Irrigation Works adds £10,900 to the Interest charges thereon, while the working expenses show an increase of £47,000 which occurs mainly in the Punjab and Madras. The outlay on Minor Irrigation Works is raised by £21,600, the largest increase being in Bombay (nearly 3 lakhs).

149. Comparing the total current outlay under Major Irrigation Works with the revenue produced thereby, including the portion of land revenue due to Irrigation, the results are as follows:—

	Budget of 1905-1906.		Budget of 1906-1907.	
	£	R	£	R
Direct receipts	1,972,300	2,95,84,000	2,120,800	3,18,12,000
Portion of land revenue due to Irrigation	915,900	1,37,38,000	952,100	1,42,82,000
TOTAL	2,888,200	4,33,22,000	3,072,900	4,60,94,000
Charges, including interest	1,902,400	2,85,36,000	1,980,300	2,07,05,000
Net receipts	985,800	1,47,86,000	1,092,600	1,63,89,000

showing an estimated betterment of nearly £107,000 in the coming year.

150. *Provincial Rates* (£2,261,300) show a decrease of £516,800 owing to the remission of cesses referred to in paragraph 132, and, in Bombay, to the transfer of the receipts hitherto credited as village service cess in Sind to the head Land Revenue.

151. *Forest* revenue (£1,789,900) shows an increase of £185,900, or allowing for increased expenditure a net enhancement of £127,900. £113,300 of the net increase occurs in Burma, and is justified by the excess of the Revised Estimate over the Budget forecast for the current year.

152. *Post Office* receipts (£1,727,100) show an increase of £118,800, but the expenditure is increased by nearly half this amount (£57,400).

153. There is an increase of £136,900 under *Army* receipts (£1,064,500) which is due to the causes already referred to in paragraph 112. The receipts anticipated are somewhat less (by £13,400) than in the Revised Estimate.

154. Only two other Revenue heads need special mention. Under *Telegraph* (£938,100) there is an increase of £29,000, which is more than swallowed up by increased expenditure to the amount of £120,600, mainly on construction and maintenance, and including a payment of £14,000 for guarantee to the Telegraph Companies concerned on loss of revenue consequent on the cheapening of foreign telegrams.

155. Under *Mint* (£201,900) an increase of £96,400 has been allowed for as compared with the Budget of the current year, but a decrease of £103,400 as compared with the Revised Estimate. The experience of the last few months warrants the expectation that coinage operations, on which, as stated in paragraph 110, a seigniorage of 2 per cent is credited to "Mint," will be larger than was allowed for in framing the last Budget. A concomitant but smaller increase of expenditure (£16,000) is also provided for.

156. The greater part of the increase of £2,799,100 under total Expenditure shown in the table in paragraph 131 falls under the head Railways, which shows a total advance in charges of £1,633,100 (R2,44,95,000) as compared with the Budget of 1905-1906. This is due in the main to increased working expenses necessitated by the expansion of traffic, e.g. renewals of permanent way and rolling stock, and outlay on new extensions, and to growth of interest charges consequent on continued capital outlay. As observed in paragraph 136, this increase is more than covered by enhanced receipts, the railway transactions credited and debited to Revenue showing a net surplus which is £665,100 more than that provided in the current year's Budget.

Expenditure:
Main heads of
increase.
Railways.

157. Other noticeable increases in expenditure occur under —

Other Heads.

	£	R
(1) Land Revenue	95,000	14,25,000

Due to necessary increase of revenue establishments, and to reorganization of village establishments in Madras. The Central Provinces show a decrease of nearly 2 lakhs, but this is only nominal, as the constitution of a separate Judicial Service there will necessitate the transfer of a considerable amount of expenditure from this head to Law and Justice. Taking the two heads together, there is an increase of nearly 3 lakhs in the province which would have been greater but for a reduction in the number of districts in Berar.

	£	R
(2) Stamps	83,000	12,45,000

This is due to the cost of all stamps being now included under this head, whereas formerly Postal and Telegraph stamps were charged to those heads of account.

	£	R
(3) Forest	59,000	8,85,000

This, as above remarked, is the concomitant of a much larger increase in receipts.

	£	R
(4) General Administration	54,400	8,16,000

This occurs mainly in Eastern Bengal and Assam, and is due to expenditure consequent on the creation of the new province.

	£	R
(5) Courts of Law	97,000	14,55,000

This occurs mainly in the Central Provinces as explained above, and in Burma, where also a separate Judicial service, such as already exists in other provinces, is being evolved.

	£	R
(6) Police	206,900	31,04,000

This is due to the progress of Police reforms, facilitated by the fresh assignments to the Local Governments referred to in paragraph 134.

	£	R
(7) Education	73,700	11,06,000

This is spread over most provinces, and represents in the main additional expenditure on schools.

	£	R
(8) Political	283,700	42,56,000

As indicated in paragraph 102, no provision was made in the Budget for the current year for payments to the Amir of Afghanistan, as the negotiations then on foot with His Highness had not been concluded. The coming year's Budget provides for the normal annual subsidy of 18½ lakhs *plus* about 24 lakhs in part payment of arrears hitherto undrawn.

	£	R
(9) Scientific and other Minor Departments	63,200	9,48,000

Due mainly to the development of agricultural and veterinary improvement.

	£	R
(10) Irrigation	99,500	14,92,000

Explained in paragraph 148.

	£	R
(11) Civil Works	153,000	22,95,000

Explained in paragraph 168.

	£	R
(12) Famine Relief	327,400	49,11,000

Explained in paragraph 172.

1906-1907.
Decrease under
Military charges.

158. Under Military charges there is a net *decrease* of expenditure of £391,000 made up as follows :—

	£	R
Army	—435,600	—65,34,000
Military Works	+20,300	+3,04,000
Marine (Military portion)	+40,100	+6,90,000
Special Delences	—21,700	—3,25,000
TOTAL	—390,900	—58,65,000

If we further take into account the increase of £130,200 under receipts, shown in the table in paragraph 162, the decrease of net expenditure is increased to £521,100. Further information as to Military charges is given in paragraphs 162—164.

1906-1907.
Main objects of
Expenditure.

159. The main heads of Expenditure provided for in the Indian Budget are as follows :—

	£	R
Railways—Revenue Account	23,025,300	35,88,79,000
Military Services	21,841,600	32,76,25,000
Salaries and expenses of Civil Departments (General Administration, Law and Justice, Police, Education, Ecclesiastical, Medical, Political, Scientific, etc., Departments, and Marine, deducting the portion appertaining to Military Services)	13,689,300	20,53,40,000
Charges connected with collection of revenue (Land Revenue, Opium, Salt,* Stamps, Excise, Provincial Rates, Customs, Assessed Taxes, Forest, and Registration: also Refunds and Drawbacks, and Assignments and Compensations)	9,057,200	13,58,58,000
Civil Works	5,689,900	8,53,49,000
Miscellaneous Civil charges (Pensions, Absentee Allowances, Stationery and Printing, and Miscellaneous)	4,323,500	* 6,48,52,000
Irrigation	2,992,900	4,48,94,000
Post and Telegraph	2,755,900	4,13,38,000
Interest	1,278,800	1,91,82,000

1906-1907.
Railways.

160. Railway expenditure, the growth under which is, as has been shown, more than counterbalanced by enhanced receipts, falls under the following heads :—

	£	R	Increase over the current year's Budget.	
			£	R
Working Expenses of State Railways	12,784,000	19,17,60,000	+1,547,100	+2,32,06,000
Interest and Annuity charges	10,431,200	15,64,68,000	+727,400	+1,09,11,000
Payment to Guaranteed Companies	664,100	99,61,000	—625,200	—93,78,000
Miscellaneous	46,000	6,90,000	—16,200	—2,43,000
TOTAL	23,925,300	35,88,79,000	1,633,100	2,44,96,000

161. The increase under Working Expenses and under Interest is a necessary corollary to the larger earning capacity of State Railways and to the increased capital outlay on further Railway development. The decreases are mainly due to the transfer of the Bombay, Baroda and Central India Railway from "Guaranteed" to "State."

* Including cost of production.

162. The total Military expenditure budgeted for in 1905-1906 and in 1906-1907 compares as follows :—

	1905-1906, Budget.		1906-1907, Budget.	
	£	R	£	R
Army . . .	20,282,300	30,42,35,000	19,846,700	29,77,01,000
Military Works . .	1,149,100	1,72,36,000	1,169,400	1,75,41,000
Marine* . .	547,900	82,18,000	594,000	89,10,000
Special Defences .	253,200	37,98,000	231,500	34,73,000
TOTAL . .	22,232,500	33,34,87,000	21,841,600	32,76,25,000
<i>Deduct—Receipts</i>				
Army, Military Works and Marine .	1,124,600	1,68,69,000	1,254,800	1,88,22,000
Total Net Expenditure . .	21,107,900	31,66,18,000	20,586,800	30,88,03,000

1906-1907.
Military Charges.

163. In the Budget Estimate of 1905-1906, 490 lakhs were allotted for special charges, *viz.*, Reorganization, and other special measures for the improvement of the Army, re-armament, special defences, and a new ship for the Royal Indian Marine, leaving the ordinary expenditure at nearly 28.45 lakhs. The Budget for 1906-1907 allows 415 lakhs for Reorganization and other special measures and 28.61 lakhs for ordinary expenditure, making a total of £21,841,600 (32.76 lakhs). Against this there is £1,254,800 in the shape of receipts, so that the net military outlay is £20,586,800 as against £21,107,900 in 1905-1906.

164. Ordinary Military expenditure shows an increase of about 16 lakhs, of which 14 lakhs are under Army; but this amount represents outlay on Indian regiments serving in the Colonies, the charges for which are refunded by His Majesty's Government, thus accounting largely for the increase under Military receipts. The net actual ordinary expenditure under Army is thus the same as in the current year's budget. A decrease of 16 lakhs on stores and payments in England is counterbalanced by increase of a like amount in India, mainly owing to rise in the price of food (8½ lakhs), unadjusted expenditure on account of the Rawalpindi manœuvres (1 lakh) and dairy farm charges (5½ lakhs). This latter amount, however, will, it is hoped, be covered by corresponding receipts.

165. Ordinary expenditure under Marine shows an increase of about 2 lakhs due largely to higher payments under wages. Here again the increase is likely to be covered or partially covered by receipts for work done for outside Departments.

166. Under *Salaries and Expenses of Civil Departments* the most important heads of account are Police (£3,761,700), Courts of Law (£2,508,200), Education (£1,912,800), General Administration (£1,555,100), Medical (£1,118,100), Political (£953,800), Scientific and Minor Departments (£803,000); and the Budget shows an aggregate increase of £903,000 over the estimate of the current year. This is spread over all the constituent heads except Ecclesiastical, which shows a small decrease. The principal increases have already been explained in paragraph 157.

167. Under *Charges connected with collection of Revenue, etc.* the principal heads are Land Revenue (£3,473,000), Opium (£1,871,300), Assignments and Compensations (£1,184,700), and Forest (£985,500), and there is an aggregate increase of £300,400. The principal variations have already been noticed in paragraph 157.

168. The expenditure under *Civil Works* naturally tends to expand, especially with reference to increased building provision consequent on Police reform and the development of primary education, and to the more favourable financial situation of most of the Local Governments. This was shown with marked effect

* Excluding expenditure of Local Governments on river navigation.

in the current year, the Budget provision for which was £5,536,900 against £4,778,295 actually spent in 1904-1905. The Revised estimate is, however, reduced to £5,358,400; while in the coming year's Budget the amount provided is £5,689,900. This allows for increased expenditure in Eastern Bengal and Assam consequent on the creation of the new province.

1906-1907.
Miscellaneous
Civil Charges.

169. Under *Miscellaneous Civil Charges* the most important element is Civil superannuation allowances and pensions (£2,988,200) which shows an increase of £46,600.

1906-1907.
Irrigation, and
Post and
Telegraph.

170. The expenditure under *Irrigation, Post and Telegraph* has already been noticed in connection with the receipts under these heads.

1906-1907.
Interest.

171. Of the total amount payable as *Interest* on debt (£7,824,800), the greater part is charged off against Railways and Irrigation where, as above shown, it proves a profitable investment. The balance, which relates to the ordinary non-productive debt, is gradually diminishing with the transfer of debt of this description to the Railway and Irrigation heads against capital outlay incurred from surplus current revenues. It amounts to £801,700 in the coming year's Budget against £895,800 in that of 1905-1906.

Interest on other obligations (£477,100), which are mainly Post Office Savings Bank deposits, shows a slight increase of £8,000. Including these, the total Interest charges debited as such amount to £1,278,800; but they are largely counterbalanced by a corresponding receipt item of £853,000, which represents interest on the invested portion of the Currency balances, on temporary investment from current balances held by the Secretary of State, and on loans to local bodies, cultivators, etc. The provision under the receipt head shows, it may be observed, an increase of £47,600 over the current year's estimate, which is due partly to the continued grant of new loans to local bodies, and partly to the anticipation of larger temporary investments out of the Secretary of State's cash balances and to the provision for a full year's interest on the additional currency investment of £1,333,000 (2 crores of rupees) made in the current year.

1906-1907.
Famine Insurance
Grant.

172. Finally, it has to be observed that though the total expenditure provided for against the *Famine Insurance Grant* in 1906-1907 is the same as in the current year, *viz.*, the normal figure of £1,000,000 (150 lakhs), the distribution of expenditure is very different as will be seen from the following statement:—

	1905-1906, Budget.		1906-1907, Budget.	
	£	R	£	R
Famine Relief	211,700	31,76,000	539,100	80,86,000
Protective Irrigation Works and Rail- ways	415,100	62,26,000	447,700	67,15,000
Reduction or Avoid- ance of Debt	373,200	55,98,000	13,200	1,99,000
	1,000,000	1,50,00,000	1,000,000	1,50,00,000

In 1905-1906 famine expenditure was budgeted for to the extent of 15 lakhs in Madras and nearly 17 lakhs in Bombay, while the Revised Estimate shows a total of 20½ lakhs, to be spent mainly in Ajmer-Merwara, Bombay and the United Provinces. For the coming year the agricultural situation in parts of the Bombay Presidency and the United Provinces is sufficiently unfavourable to justify an anticipated expenditure of 42 and 20 lakhs, respectively, under Famine relief, while there is also provision for 13½ lakhs in Ajmer-Merwara and 5½ lakhs in parts of Madras and the Punjab.

There is also some increase of expenditure under Protective Irrigation Works, chiefly in Madras and the Central Provinces, counterbalanced by a decrease of 4½ lakhs under Protective Railways, and there is thus only a small balance to be charged under Reduction of debt.

Section IV.—Statements comparing the estimates under the more important heads of Revenue and Expenditure with the actuals of past years.

173. The estimates have been explained already in paragraphs 113, 117, 142 and 157. The revenue in the current year is expected to fall short of

the Budget Estimate in Ajmer, Burma, Eastern Bengal, United Provinces, Punjab, Madras and Bombay, owing generally to unfavourable agricultural conditions and in some cases to over-estimating. The Budget Estimate for next year provides for an increase in all provinces, due partly to the expectation of better agricultural conditions, and partly to revision of settlements, and extension of cultivation by development of irrigation and otherwise.

OPIUM.

	Accounts, 1902-1903.	Accounts, 1903-1904.	Accounts, 1904-1905.	1905-1906.		1906-1907, Budget.

Rate of duty	₹500	₹500	₹500 & 600	₹600	₹600	₹600

174. The Estimates have been explained in paragraph 144. The quantity of Bengal opium sold monthly has been raised from 4,000 to 4,400 chests with effect from January last. The total sales for next year have been taken, accordingly, at 52,800 chests against 49,200 chests sold in the current year, but owing to the large drop in the price obtained at the sale this month, it has not been considered safe to estimate for a higher price than ₹1,125 per chest, though the average price obtained in the current year has been ₹1,434 per chest. The exports of Malwa opium are expected to amount to 14,750 chests in the current year against 20,000 chests assumed in the Budget Estimate. Those for next year have been taken at 16,500 chests.

(a) Chiefly excise on local manufacture.

(b) Chiefly duty on imported salt.

175. As explained in paragraphs 104 and 146, the successive reductions of duty made in March 1903 and March 1905 have led to a satisfactory growth of consumption. The Budget Estimate for next year assumes a further development of consumption to the extent of 12 lakhs of maunds. The largest increase has occurred in salt manufactured in Northern India and Bombay, while there is a slight drop in the importation of Liverpool and German salt into Bengal.

176. The revenue has continued to develop in every province except the Punjab, where there has been a falling off owing to the introduction of the Land Alienation Act and the Punjab Loans Limitation Act having led to a reduction of transfers and mortgages and suits for recovery of loans. The Budget Estimate provides for a further improvement upon the current year's Revised in all other provinces.

The increase in the charges in England is explained in paragraph 157.

177. The figures have been explained in paragraphs 106 and 143. The revenue continues to grow everywhere except in the United Provinces, where it has been seriously affected by unfavourable agricultural conditions.

178. The Budget Estimate for next year provides for an increase in the charges consequent on the reorganization of establishments in the Central Provinces and Burma.

PROVINCIAL RATES.

Equivalent in Sterling	41,882	39,212	36,641	39,100	38,300	40,100

179. The remission of the cesses referred to in paragraph 132 decreases the receipts of next year by Rs 78,65,000 under "Village Service and Patwaris" and Rs 3,54,000 under Other Cesses (Zemindari Dāk cess). The former figure, however, allows for about 2 lakhs of payments by tenants in the Central Provinces which were not formerly passed through the Government accounts, and for an enhancement of the ryotwari village service cess in Madras which would have been made under ordinary circumstances. On the other hand the receipts are diminished, without reduction of taxation, by the transfer from this head to Land Revenue of the proceeds of the so-called Village Service cess in Sind referred to in paragraph 150. The eight lakhs still shown as derivable next year from "Village Service and Patwaris" represents the proceeds of the Proprietary Village Service cess in Madras referred to in paragraph 42 of Part I, and of a Jaglia (village police) cess in Berar which is shown under this head and produces about 3 lakhs.

180. The entry in the second head of the table represents a payment for cost of rural police which was formerly made direct from the Local Rates fund in the United Provinces. That fund having now been abolished, the adjustment has to be made by appropriation from District Local Funds to Provincial.

181. The increase under Provincial Cesses in the Revised Estimate is due to the Punjab Government not having been able to take the steps necessary for the remission of the "Famine" portion of its general cess during the current year. This will be carried out with effect from 1st April 1906.

TOTAL	£ 161,335	168,165	179,246	188,900	182,700	191,500

182. The principal features of the current year are (1) the great and continued growth of the imports of cotton manufactures and of the corresponding receipts from the excise duty on cotton goods manufactured in this country; (2) a decline in the imports on private account of silver consequent on a rise in the price; (3) a heavy falling-off in the imports of Russian kerosine oil owing to the disturbances at Baku, its place being taken by the Burma oil which pays no duty; (4) a falling-off in the imports of metals and manufactures of metals other than silver, chiefly enamelled and other ironware and tin, the falling-off being however partially counterbalanced by increased imports of steelware, machinery and mill works. As explained in paragraph 100 the enhancement of the duty on spirits and the month's *moratorium* allowed, has led to a considerable clearance of stock in the interval. The imports of spirit are likely to be smaller next year, owing partly to the heavy stocks lately laid by and partly to the check which consumption is likely to receive from the enhancement of the duty; but the higher duty will more than counterbalance this. The Budget for 1906-1907 provides for a moderate improvement under all other tariff heads as compared with the Revised Estimate.

ASSESSED TAXES.

TOTAL	£	751,783	813,618	869,138	926,500	949,400	985,500
NET REVENUE	£	546,320	667,498	732,859	676,500	841,800	804,400

184. The revenue is increasing in every province, the largest increase in the current year being in Burma and Bombay. The Budget for next year provides for a moderate improvement as compared with the Revised Estimate in all provinces except the two just mentioned, where the current year's receipts were due in some measure to special circumstances (*vide* paragraph 107).

185. Increase in charges is naturally concomitant with development of revenue. The net receipts for 1906-1907 are estimated at about £128,000 more than in the current year's Budget, but at £37,000 less than in the Revised Estimate.

* The increase in the Revised is due to the transactions in connection with the purchase of the Bombay, Baroda and Central India Railway referred to in paragraph 234.

187. The Budget Estimate of the current year did not provide for the discount on the India 3 per cent stock of £2,000,000 raised in the current year. The transfer of a considerable amount of debt year by year from the nonproductive account to the Railway and Irrigation revenue accounts, as an equivalent for productive capital expenditure incurred from surplus revenue, is materially reducing the charge under this head.

188. The Postal Savings Bank deposits are increasing substantially year by year, but the net increase in the current year has not been as much as was anticipated, owing to larger withdrawals. These are probably due in the main to a change in the lowering of the rate of interest effected in July 1905. Formerly the uniform rate allowed was $3\frac{1}{8}$ per cent: now it is 3 per cent for deposits withdrawable at call and $3\frac{1}{4}$ per cent for those withdrawable at six months' notice.

189. The above table shows a steady development of the operations of the Department. The loss of revenue entailed by the increase in the letter weight carried for half an anna referred to in paragraph 126 of the last Financial Statement, and by a reduction in the rates of insurance fees, has been more than made good by the normal expansion of transactions.

190. The Revised Estimate of receipts shows an increase of ₹4,50,000 in the revenue of the Indian Telegraph Department and a decrease of ₹4,24,000 in that of the Indo-European Telegraph Department. The former arises partly from normal expansion of traffic, and partly from special work connected with the Royal visit and heavy speculation in the grain market. The latter is principally due to a reduction of the tariff rate between Europe and India from 1st August 1905. The Budget Estimate for 1906-1907 provides for a normal increase in traffic.

191. Compared with the Budget Estimate of expenditure for the current year, the Revised Estimate shows an increase in the Indian section, due to additional outlay on repairs to lines, and to extra signalling and clerical establishment required to cope with the increased traffic. Outlay on stores on capital account has also been larger, and the payment of the joint purse guarantee in respect of loss of receipts by the reduction in the tariff for foreign messages for the period 1st March 1902 to 31st March 1904, for which no provision was made in the Budget, has involved an additional expenditure of £17,500. These increases have, however, been partially counterbalanced by a decrease in the expenditure of the Indo-European section in cable maintenance and capital outlay, and in the net out-payments in respect of revenue.

The Budget Estimate for 1906-1907 provides for an increase in the expenditure of the Indian section both on revenue and capital accounts. Provision has also been made for a payment of £14,000 in respect of the guarantee for 1905-1906 and of £24,600 on account of net out-payments in respect of revenue

192. The Estimates have been explained in paragraphs 110 and 155. The exceptionally heavy rupee coinage of the current year has given a considerable increase of net revenue, a full recurrence of which in the current year it is not safe to anticipate.

193. The figures have been dealt with in paragraphs 118, 127, 128, and 157. The saving on the Budget Estimate of the current year is due to the inability of the Local Governments to spend the large allotments made in March last for police reform, primary education and grants to District Boards, in consequence of unavoidable delay in initiating the necessary schemes. The Budget for next year provides for the expenditure of the allotments made last March as well as for the further allotments now made, namely, 25 lakhs for additional police reforms, 5 lakhs for European and technical education and 4 lakhs for agricultural and veterinary development, and also for the normal growth of other charges.

194. The larger part of the expenditure shown under Marine is connected with Military Administration and is therefore also shown under Army Services in the table in paragraph 206.

196. The variations under the component factors of this main head have already been referred to in paragraphs 119 and 172. The first charge on the total grant of £1,000,000 is direct famine relief; then follows expenditure, to an amount not exceeding one-half the total grant, on Protective Irrigation Works and Railways; and the balance is devoted to 'reduction of debt,' by outlay on Productive Works for which money would otherwise have had to be borrowed. In the current year the amounts allotted to these various purposes are now

estimated roundly at 20, 56 and 74 lakhs respectively: in the Budget for 1906-1907 the allotments are 81, 67 and 2 lakhs. It is estimated that expenditure on famine relief will be required to the extent of 42 lakhs in Bombay; 20 lakhs in the United Provinces; and 19 lakhs in other parts, mainly in Ajmer-Merwara. The result is a very small available balance for 'reduction of debt.'

198. The estimates under this head have already been referred to in paragraphs 115, 130 and 147-149.

199. For 1906-1907, the direct receipts from Major Works and collections of Land Revenue due to Irrigation have been placed collectively at ₹43,50,000 higher than in the Revised Estimate of the current year, as circumstances are expected to be more favourable next year for increased irrigation in the United Provinces and the Punjab, which contribute the largest share of the revenue under this head. Working Expenses are expected to be about the same, but interest charges will increase with the additional capital outlay.

200. As regards "Minor Works," the net expenditure in the Revised Estimate is ₹3,61,000 less than in the Budget, owing to the special grant of 10 lakhs referred to in paragraph 161 of the last Financial Statement not having been spent in full. The Budget Estimate for 1906-1907 again provides for a special grant of 10 lakhs from Imperial revenues, and for a larger programme of works in Bombay.

201. The Military works expenditure of the current year is expected to be less than the Budget Estimate by £71,200 as it has not been possible to spend the full allotment made for works connected with the reorganization and redistribution of the army. The Budget Estimate has been fixed at R1,75,41,000 (£1,169,400) and is made up as follows:—

	R
Fixed quinquennial grant	93,53,000
Large works costing over R50,000 each and special items	28,15,000
Works required in connection with the reorganization and redistribution of the Army	53,73,000
	<u>1,75,41,000</u>

202. The Revised Estimate of Imperial Civil Works Expenditure in India is R14,55,000 more than the Budget Estimate. The principal items which have contributed to this increase are acquisition of property in Calcutta, the Agricultural Research College at Pusa, and Settlement offices at Ranchi. The Budget Estimate for next year provides, in addition to normal expenditure, for special expenditure connected with the Agricultural College at Pusa, on a new General Post Office in Bombay, and on a Currency Office at Cawnpore. The expenditure in Berar will from next year be included under Provincial, a new provincial settlement having been made with effect from that year for the combined province of Central Provinces and Berar.

203. As regards Provincial expenditure, the Revised Estimate shows an aggregate saving of R4,08,000. The principal variations leading up to this have already been explained in paragraph 120.

The Budget Estimate for 1906-1907 includes the expenditure in Berar, which, as explained above, used to be treated hitherto as Imperial. Apart from this, there is considerable increase in the Central Provinces, and in Eastern Bengal and Assam; in the latter case consequent on the creation of the province, and in the former on expenditure enabled by the favourable terms of the new settlement.

204. As regards Local expenditure, the Revised Estimate of the current year is R35,13,000 less than the Budget Estimate, as District and Local Boards have not been able to mature schemes for utilizing in full the large additional resources placed at their disposal by the grants made from Imperial Revenues as explained in paragraph 27 of the last Financial Statement. The Budget Estimate for next year provides for considerable additional outlay in most of the provinces.

207. The chief objects upon which the special expenditure for next year is to be incurred are as follows :

The artillery rearmament which has had to be postponed this year.
 Construction of buildings and acquisition of lands in connection with the scheme of army redistribution and the expansion of ordnance factories.
 Additional mule corps and cadres.
 Addition of officers to the Indian Army.
 Reorganization of Horse and Field batteries.
 Reorganization of existing ammunition columns of Horse and Field artillery and the formation of additional columns.
 Increase in reserves of rifles and small arms ammunition.
 Increase of the Native Army reserve.

Section V.—Capital Expenditure on Railways and Irrigation Works not charged to Revenue.

RAILWAY CONSTRUCTION.

208. The expenditure on Railway Construction for which the Government of India undertakes financial responsibility or gives any direct guarantee remains at Rs 12,50,00,000 in 1905-1906 as originally budgeted. There was a lapse of about a crore of rupees in England from the amounts placed at the disposal of the Secretary of State; but the effect of this short outlay has been counterbalanced by increased expenditure in England by some Railway Companies; by increases to the grants for outlay in India on the North-Western, Nagda-Muttra and East Indian Railways; and by the commencement of construction work on the Purulia-Ranchi and Bara-Kotah Railways, and on the Shilman Branch of the North Western Railway. A sum of 17½ lakhs has also been provided for the purchase by Government of the Noakhali Railway, and 4 lakhs for the construction of Local Board's lines.

For 1906-1907 the programme of capital outlay on Railway Construction has been expanded to 15 crores.

209. The distribution of the total expenditure on Railway Construction between State and Companies' agency in each of the three years from 1904-1905 to 1906-1907 is as follows :—

including
expenditure by
Branch Line
Companies and on
Protective Lines,
etc.*

210. The figures in the above table do not include the expenditure on Protective Railways met from the Famine Insurance grant, nor of Branch Line Companies not in receipt of a direct guarantee, nor that of other Companies whose transactions are outside the Government accounts. Including this expenditure, and also some small expenditure from Provincial and Local Revenues, the total outlay on Railway Construction in the three years is as follows:—

	Accounts, 1904-1905.	Revised Estimate, 1905-1906.	Budget Estimate, 1906-1907.
	₹	₹	₹
Total as in preceding table	10,78,29,369	12,50,00,000	15,00,00,000
Famine Protective lines	17,37,184	8,69,000	1,01,000
Branch lines not on firm guarantee	87,865	10,55,000	5,11,000
Railways outside the Government accounts	69,22,000	80,68,000	53,95,000
Provincial and Local State lines	93,754	97,000	73,000
GRAND TOTAL IN RUPEES	11,66,70,172	13,50,89,000	15,60,80,000
DITTO IN £ STERLING AT ₹15 TO THE £	7,778,011	9,005,900	10,405,300

211. Details of the expenditure on State and Companies' lines, whether open or under construction, for 1905-1906 and 1906-1907, will be found in Statement A of Appendix III, furnished by the Railway Board.

CONSTRUCTION OF PRODUCTIVE IRRIGATION WORKS.

212. The figures are:—

	Accounts, 1904-1905.	Budget, 1905-1906.	Revised, 1905-1906.	Budget, 1906-1907.
Total in Rupees	54,17,580	1,25,00,000	81,18,000	1,25,00,000
Equivalent in Sterling	£ 361,172	833,300	541,200	833,300

*Capital outlay on
Productive
Irrigation Works.*

The decrease of ₹43,82,000 in the Revised Estimate as compared with the Budget Estimate is due to short outlay on works, mainly in the United Provinces (₹9,66,000), Bombay (₹4,11,000), and the Punjab (₹18,70,000). The Budget grant for 1906-1907 has again been fixed at ₹1,25,00,000.

Details.

213. The following table shows the projects included in the programme of 1905-1906 as now revised and in that of 1906-1907, and the amount to be spent on each.

Name of project.	Expenditure in	
	1905-1906.	1906-1907.
Canals in operation—

Section VI.—Provincial Finance.

214. The system of *quasi*-permanent settlement described in paragraphs 211 to 213 of the Financial Statement of 1904-1905, has this year been extended to the Central Provinces and Berar, the new settlement with which will come into effect from 1st April 1906. The last temporary settlement with the Central Provinces proper was made in 1897, while in Berar revenue and expenditure have hitherto been Imperial. Financially, the whole province will now be on the ordinary Provincial footing.

215. Under the former settlement the Central Provinces received three-fourths of its Stamp revenue, one-fourth share of Excise receipts, and one-half of Land Revenue, Forest, Registration and Assessed Taxes. Under the new settlement the principal divisible heads will be evenly shared between the Imperial and Local Governments, with the exception of Registration which will be wholly Provincial. The Government of India have, moreover, guaranteed that if in any year the Provincial share of the Land Revenue collection should fall below 82½ lakhs the deficit will be made up to the Local Government. The allocation of expenditure under the corresponding heads follows that of receipts, save that, under 3.—Land Revenue, the expenditure, which represents the cost of ordinary administration, has been made wholly Provincial.

216. The Local Government further receives a fixed assignment of 27·07 lakhs; and in order that it may start the new settlement under favourable conditions and provide for non-recurring public works expenditure, it has been given an initial grant of 30 lakhs in addition to an opening cash balance of 10 lakhs.

217. The reconstitution of the present provinces of Bengal and Eastern Bengal and Assam has necessitated new settlements with the Local Governments in question in supersession of those formerly entered into with the undivided province of Bengal and with Assam. Under the previous Bengal settlement, which came into effect from 1st April 1904, the Local Government received the whole of the Registration receipts, half of Stamps, seven-sixteenths under Excise, and, speaking generally, one-fourth of the remaining heads of divisible revenue.* Under the new settlement it receives the whole proceeds of Registration and of that portion of Land Revenue which is derived from Government estates

* 12 per cent of the Land Revenue receipts derived from Government estates under direct management were wholly Provincial.

under direct management, while as regards the remaining portion of Land Revenue and the other divisible heads it obtains a uniform share of one-half. In view of this much more favourable share of growing revenue, the fixed assignment to the province now stands at 5·72 lakhs instead of 49·03 lakhs at the previous settlement.

*Eastern Bengal
and Assam
settlement.*

218. The distribution of revenue in the Eastern Bengal districts followed that of Bengal proper, while in Assam the Local Government enjoyed, under the settlement which came into force on 1st April 1904, a uniform half-share of divisible revenue. This half share has now been applied to the divisible receipts of the whole of the new province with the exception of Registration which is wholly Provincial. Here too the more liberal share of growing revenues accorded has brought about a decrease of the fixed assignment, which is now a *minus* quantity of 6·23 lakhs instead of 12·00 lakhs formerly given to Assam.

219. The new province is also to receive an initial grant of 30 lakhs in addition to the 20 lakhs formerly granted to Assam, in order to start the fresh settlement and cover building expenses consequent on new administrative arrangements. It has also been given a minimum balance of 12 lakhs and will thus start the settlement with an aggregate opening balance of 62 lakhs.

220. In view, however, of the fact that the data on which receipts and expenditure of the Eastern Bengal districts have had to be calculated are not altogether certain, and that some uncertainty also exists as to the actual scale of expenditure which will be necessary under the new arrangements, it has been decided to make the new settlement with Eastern Bengal and Assam revisable at the end of 3 years.

*General Financial
results of the new
settlements.*

221. The shares of growing revenue and fixed assignments from Imperial to Provincial now stand as follows in the provinces concerned:—

	Central Provinces and Berar.	Eastern Bengal and Assam.	Bengal.
	R	R	R
Growing Revenue	1,49,36,000	2,18,42,000	4,67,01,000
Fixed Assignment	27,07,000	—6,23,000	5,72,000
TOTAL	1,76,43,000	2,12,19,000	4,72,73,000

Under the old settlement the percentage of Provincial receipts derived from growing revenues were as follows:—

Central Provinces.	Bengal.	Assam.
94	90	83

The Central Provinces now receives 85 per cent, Bengal proper 99 per cent, while the whole resources of Eastern Bengal and Assam will be derived from growing revenues. Though the Central Provinces now gets a smaller proportion of its resources in this way than it did before, this is due merely to the fact that it is now allowed a more liberal standard of expenditure necessitating a considerable supplementary assignment. As shown in paragraph 215, it gets on the whole a better share of divisible revenues than formerly. The betterment of the two other provinces in this respect is of course at the cost of Imperial revenues, while the standard of expenditure which all three provinces will be able to work up to on the basis of the present receipts is in each case a good deal more liberal than formerly.

*Outstanding
special grants
which have
merged in the new
settlements with
the Central
Provinces,*

222. Opportunity has been taken of the new settlements to merge therein the special grants for Police, Primary Education, Agricultural development, grants-in-aid to District Boards, and compensation for remission of famine cess referred to in paragraph 208 of the last Financial Statement, in so far as these appertain to the Central Provinces, Bengal or Eastern Bengal and Assam. The grants for Police, Primary Education and District Boards, assigned to the undivided

province of Bengal, have, in drawing up the terms of the new settlements, been recalculated as follows :—

	Police reform.	Primary Education.	District Boards.
	R	R	R
Bengal	9,00,000	6,67,000	8,69,000
Eastern Bengal	3,00,000	3,33,000	3,81,000
TOTAL	12,00,000	10,00,000	12,50,000

Bengal, and Eastern Bengal.

The Central Provinces share of the grants for education and improvement of district administration referred to in paragraph 207 of the last Financial Statement, and the compensatory payments granted to the province for loss of Income-tax receipts, repeal of the Pandhri tax, and extra expenditure consequent on the addition of Berar referred to in paragraph 209, have also been merged in the new settlement with that province.

223. The grant of 5 lakhs for the improvement of University and Collegiate education referred to in paragraph 208 of the last Financial Statement has now been distributed as follows for 1905-1906 and for the three subsequent years, at the end of which time the grant will lapse :—

Redistribution of grant for University and Collegiate education.

	1905-1906.	1906-1907, and the following years.
	R	R
Madras	1,05,000	1,05,000
Bombay	65,000	65,000
Bengal	1,10,000	1,60,000
Eastern Bengal and Assam	45,000	20,000
United Provinces	80,000	80,000
Punjab	60,000	60,000
Central Provinces	35,000	10,000
TOTAL	5,00,000	5,00,000

224. The recurring grant of 5 lakhs for technical schools and European education referred to in paragraph 134 *ante*, has been distributed as follows so far as the technical education portion is concerned :—

Distribution of new grants made in 1906-1907.

	R
Bombay	1,67,000
Bengal	30,000
United Provinces	30,000
Central Provinces	22,000
TOTAL	2,54,000

Grant for technical education.

The balance, which is intended for European and Eurasian education, has not yet been distributed. The grant to the Central Provinces includes Rs 10,000 for buildings which will not be repeated in subsequent years.

225. The 25 lakhs additional recurring grant for Police reform referred to in paragraph 134 above, has been distributed among the provinces as follows :—

Grant for Police Reforms.

	R
Madras	4,50,000
Bombay	2,50,000
Bengal	4,00,000
Eastern Bengal and Assam	2,25,000
United Provinces	3,25,000
Punjab	2,50,000
Burma	2,50,000
Central Provinces	2,50,000
Minor Provinces	1,00,000
TOTAL	25,00,000

The Government of India have also made an additional grant of 2 lakhs to the Government of Eastern Bengal and Assam during the ensuing year for the reorganization of its Military Police.

*Grant for
Agricultural
and Veterinary
development.*

226. The grant of 20 lakhs for Agricultural and Veterinary development made this year was shown as undistributed in paragraph 208 of the last Financial Statement, but later on in the year 18·35 lakhs were distributed to the provinces.

In the coming year, as stated in paragraph 134, the grants to the Provinces have been increased to 21½ (R21,55,000) lakhs which are now distributed thus :—

	R
Madras	3,00,000
Bombay	3,50,000
Bengal	3,00,000*
Eastern Bengal and Assam	2,00,000*
United Provinces	3,00,000
Punjab	2,50,000
Burma	2,00,000
Central Provinces	2,20,000*
Frontier Province	35,000
TOTAL	21,55,000

* In these cases the grants are merged in the new settlements.

*Compensation to
Provinces
consequent on the
abolition of
the patwari and
village service
cesses.*

227. The remission of the patwari and village service cesses involves the following compensatory allotments to Provincial revenues :—

	R
(a) Madras	49,00,000

Of this, 28 lakhs represent compensation for the proceeds of the cess levied from the ryots. The Madras Government contributed an equivalent amount to village service, which was deducted from the total Land Revenue receipts and shown under Local. Hereafter this deduction will cease to be made, with the result that, as three-fourths of the land revenue receipts are Imperial, the Provincial Government would under the settlement conditions only receive 7 lakhs. Hence it is necessary to make a further compensatory assignment of 21 lakhs.

	R
(b) Bengal (for Sambalpur District)	26,000
(c) United Provinces	7,77,000

The total sum remitted in the United Provinces is R25,54,000, and the Local Government contributes R10,00,000 towards the cost of the patwari establishment which may, therefore, be taken at R35,54,000. This expenditure will now be shown under 3—Land Revenue, and under the terms of the Provincial settlement only half the cost (R17,77,000) will fall on Provincial revenues. As these revenues already bear R10,00,000 of the cost, the extra charge entailed on them by the change is R7,77,000 which is given in the shape of compensation. The cost to Imperial revenues is R17,77,000 + 7,77,000 = R25,54,000.

	R
(d) Punjab	15,64,000
(e) Central Provinces	7,25,000

The remission of these cesses will further cost nearly 2 lakhs in the Frontier Province, Ajmer and Coorg; but here the loss falls directly on Imperial.

An assignment of R2,50,000 has also been made to the Government of Bombay to cover the loss sustained by that Government by a reclassification of a portion of the land revenue receipts in Sind formerly classed as local under the head Provincial Rates, and devoted to the payment of village officers there. Hereafter this sum, amounting at present to R5,00,000, will merge in the ordinary Land Revenue head of which the Local Government obtains half. But as it will still pay the whole cost of the village service establishments, it receives a compensatory adjustment of R2,50,000.

228. The repeal of the zamindari dak cess in Bengal and Eastern Bengal mentioned in paragraph 132 will fall entirely on Imperial funds. In regard to the relief of District Boards in the United Provinces, the Punjab, Burma, the Central Provinces, the Frontier Province and Coorg of the contributions they have hitherto paid for district post charges, it is necessary to compensate the Central Provinces Administration for the sum formerly received by it in this connection, which was still considered as an item of Provincial revenue after district post charges had been Imperialised. The contribution thus necessitated is Rs 48,000. Compensation of a similar character has, as explained in the footnote to paragraph 133, to be made to the Punjab Government to the extent of Rs 1,41,000. In other cases the cost of the new arrangements falls entirely and directly on Imperial funds.

Other compensations consequent on adjustments referred to in paragraph 133.

A compensatory assignment of Rs 67,000 is also made to the Government of the United Provinces on account of the relief of District Boards there from the schools and establishment charges referred to in paragraph 133.

229. The special contribution towards the improvement of the port of Chittagong referred to in paragraph 209 of the last Financial Statement, will now fall to be paid to the Government of Eastern Bengal and Assam. In view of the necessary improvements being considerably more expensive than was at first anticipated, the Government of India have decided to raise their total contribution to 10 lakhs, of which 5.22 lakhs have been provided for in the Revised Estimate of the current year, and 4.78 lakhs in the Budget for 1906-1907. A final grant of 6.74 lakhs is also provided in the Budget for 1906-1907 as Imperial contribution towards the improvement of the Madras Harbour.

Special contributions for the Chittagong Port and the Madras Harbour.

230. The following table gives the usual information regarding revenue, expenditure, and balances of each province, compared with the standards assumed in the settlements in force in each:—

* The heads marked with an asterisk appear both on the receipt and payment sides. As the receipt and disbursements under each of them are generally equal, they do not affect the Ways and Means of the year to any material extent.

232. In the Budget Estimate of the current year, the net disbursements of 1905-1906. the Home Treasury were taken at £23,264,800, and it was proposed to meet General Remarks these by the sale of Council Bills for £16,500,000, excluding £1,333,000 to be drawn from the Currency Reserve for investment in sterling securities, by the issue of £2,000,000 of India Stock and by drawing to the extent of £4,764,800 on the opening cash balance of the year.

233. The dominant feature of the year has been an exceptionally heavy demand for Council Bills, the total sales being now expected to amount to £31,576,300 or £26,700,000, excluding £3,543,000 drawn on account of the Gold Reserve Fund and £1,333,300 mentioned above as drawn for investment of a part of the currency reserve. Of the additional funds thus obtained, amounting to £10,200,000 as compared with the Budget provision, £7,924,000 has been spent for the purchase of silver sent to this country for the coinage of rupees required to meet the additional Council Bills; £1,045,000 has been remitted to India through the Secretary of State's currency chest in England, the institution of which has been referred to in paragraph 74 of Part I; and £1,231,000 is left as an increase in the resources of the Secretary of State. In addition to the quantity mentioned above as purchased from the extra drawings, silver to the value of £400,000 has been purchased from the remittance of £400,300 in gold received during the year from India, the remittance having been made from this country in March last. £250,000 worth of silver will also be sent to this country, before the 31st March, but this does not affect the Home Treasury balances as the value is to be recovered from the Secretary of State's currency chest, the cost of the silver being added to the bullion reserve of the Currency Department. The other important variations between the Budget and Revised Estimates which affect the closing balance are

Rajputana-Malwa Railways. Advances are made to these Companies in England for the purchase of stores, and funds are sometimes raised by them and deposited with the Secretary of State: these deposits and advances, instead of being brought directly to account in England, are treated as Remittances from or to India and are brought to account in this country. The details of the transactions during the current year are as follows:—

RECEIPTS.		Budget, 1905-1906.	Revised, 1905-1906.
		£	£
<i>Debentures raised—</i>			
East Indian Railway	To replace Debentures	300	300
South Indian Railway	For additional Capital	1,999,700	1,378,000
	Ditto	111,000	110,000
		2,111,000	1,488,300
<i>Transfer fees, etc.</i>		3,000	3,400
TOTAL RECEIPTS		2,114,000	1,491,700
ISSUES.			
<i>For discharge of Debentures—</i>			
East Indian Railway		300	300
<i>Advances for Purchase of Stores—</i>		1,654,000	1,831,700
TOTAL ISSUES		1,654,300	1,832,000

The East Indian Railway issued only £1,500,000 of Debenture Stock instead of the £2,000,000 budgeted for. The proceeds amounted to £1,378,300.

*Budget Estimate
of 1906-1907.*

240. In the Budget Estimate of 1906-1907 the net disbursements, exclusive of receipts from Council Bills and Loans, are taken at £22,725,600: of this, £749,900 is for the discharge of Bombay, Baroda and Central India Railway debentures. Inclusive of £500,000 for the purchase of the Bengal Central Railway, and £250,000 for the discharge of Great Indian Peninsula Railway debentures, the net outgoings in the Budget Estimate of the current year were £23,264,800. The decrease next year is thus £539,200: this is the net result of several variations, the more important of which are:—

<i>Better.</i>	£
Net expenditure on Revenue Account (Decrease chiefly in Army Reorganization expenditure), <i>less</i>	521,500
Capital raised by Railway Companies for capital outlay (Debentures raised, <i>more</i> £943,500; Debentures discharged, <i>more</i> £443,500), <i>net better</i>	500,000
Temporary Debt discharged (India Bills), <i>less</i>	500,000
Redemption of Railway Liabilities, <i>less</i> £3,427,400, and Permanent Debt incurred therefor, <i>less</i> £2,927,400, <i>net better</i>	500,000
Gold withdrawn from the Paper Currency Reserve in London, including repayment to Secretary of State's treasury of the £1,045,000 referred to in para. 235, and £750,000 for the purchase of Silver, <i>more</i>	2,795,000
	4,826,500
<i>Worse.</i>	
Issues to Railway Companies for capital outlay, <i>more</i>	1,027,500
Issues to Railway Companies working State Railways, for capital outlay, <i>more</i>	555,500
Debenture capital raised by Railway Companies working State Railways (Debentures raised, <i>less</i> £261,000; Debentures discharged, <i>less</i> £300), <i>net worse</i>	260,700
Outlay on State Railways and Irrigation Works, <i>more</i>	1,217,500
Permanent Debt discharged (Debentures of purchased Railways), <i>more</i>	499,900
Purchase of silver	750,000
	4,311,100

Of the net disbursement of £22,725,600 next year, it is proposed to meet £17,800,000 by the sale of Council Bills and £2,000,000 by the issue of India Stock. The remainder, £2,925,600, will be met by drawing upon the cash balance of the Home Treasury, which at the close of the current year is expected to stand at £8,144,581. The cash balance on the 31st March 1907 is therefore estimated at £5,218,981. The estimate of Council drawings is for the amount required to provide for the Secretary of State's requirements: but additional bills will, as usual, be sold if needed to meet the demands of trade.

241. There is no temporary Sterling debt now outstanding. Of the 1906-1907. £2,000,000 India Stock which it is at present intended to place upon the *Loans* market, £749,900 is for the discharge of Bombay, Baroda and Central India Railway debentures which fall due next year, and the remainder for advances to Indian Railway Companies.

242. The details of the estimates of capital to be raised by Railway 1906-1907. Companies are as follows:— *Capital of Railway Companies.*

245. The programme herein announced of the probable drawings on India, and of the transactions in connection with the Government Sterling Debt and the borrowings of Railway Companies, represents the present intentions of the Secretary of State. But in view of the varying conditions of Indian finance and of the London money market, no assurance can be given that this programme will be adhered to either in amount or in form. The Secretary of State reserves to himself the right to vary the programme to any extent that may be considered necessary during the course of the year.

INDIA.

* The figures under heads 2 and 13 (b) balance each other.

† Head 11 represents expenditure defrayed by reduction of Provincial and Local balances.

‡ The figures shown under head 14 differ from those given in the Home Treasury Ways and Means statement, as Bills drawn by the Secretary of State towards the end of one year are paid in India in the next. The figures of the present statement represent payments in India.

1905-1906.

Main features of
Budget Estimate.

247. In the Budget Estimate of 1905-1906 it was assumed that the year would open with a cash balance in Indian Treasuries of 15.50 lakhs. It was calculated (1) that the net Revenue receipts would amount to 30.25 lakhs; (2) that the deposits in Savings Banks and Provident Institutions would result in a net receipt of 1.27 lakhs; (3) that the remittances of Railway Companies and on other miscellaneous accounts would yield a net sum of 2.49 lakhs on the receipt side; (4) that a sum of 56 lakhs would be available from the Famine Insurance grant for avoidance of debt, after meeting the expenditure required for Famine Relief and construction of Protective Works; and that 60½ lakhs worth of silver bullion sent from England in March last would be received in the current year. On the other hand, provision was made (1) for a net expenditure from Provincial balances of 2.05½ lakhs; (2) for Capital expenditure in India on Railways and Canals, to the extent of 8.65 lakhs; (3) for discharge of Provincial Debenture loans falling due during the year for 9 lakhs, and for the payment of the annual instalment of 12 lakhs towards liquidation of the Gwalior loan of 1887; (4) for 32 lakhs for loans to Native States, cultivators, municipalities and other local bodies; and (5) for payment of Council Bills to the extent of 25.20 lakhs. The payments mentioned aggregate 36.43½ lakhs, while the receipts amount to 35.17½ lakhs, the net disbursements being thus 1.26 lakhs. A rupee loan of 4 crores was to be raised to meet this deficiency and to strengthen the cash balances.

1905-1906.

Main features of
Revised Estimate.

248. The results according to the Revised Estimate show considerable variations from this forecast. Council Bill payments have exceeded the estimate by 14.84 lakhs; but against this silver to the value of 12.50 lakhs (13.10 lakhs against 60½ lakhs estimated) has been received from England for coinage of rupees, the net excess payment being 14.84—12.50=2.34 lakhs. The net Imperial revenue in India is now estimated at 29.74 lakhs, being 51 lakhs less than the Budget Estimate. Savings Banks deposits are now expected to fall short of the Budget by 47 lakhs, while Capital expenditure in India on Railways and Irrigation works is expected to exceed the estimate by 2.65 lakhs. On the other hand, Provincial balances will be increased by 12 lakhs, instead of being drawn upon to the extent of 2.06 lakhs. The net payments to Railway Companies on account of Capital outlay are 322 lakhs less than the Estimate. The amount available from the Famine Insurance grant for avoidance of debt, after meeting the expenditure for Famine Relief and construction of Protective Works is 18 lakhs more. Loans granted to Native States, municipalities and other local bodies are 15 lakhs less, while deposits and remittance transactions are expected to show an excess receipt of 133 lakhs. The total improvements mentioned above amount to 7.06 lakhs and the increased disbursements to 597 lakhs, the net result being an improvement of 109 lakhs. The cash balances are accordingly expected to be better than on 1st April last by 383 lakhs instead of by 274 lakhs as in the Budget Estimate; adding a betterment of 62 lakhs in the opening balance, the year is expected to close with a cash balance of 19.95 lakhs against 18.24 lakhs taken in the Budget Estimate.

1905-1906.

Council Bills.

249. As mentioned already, the demand for Council Bills in the current year has been exceptionally heavy. In addition to the 40.05 lakhs shown in the table above as paid from treasury balances, 2 crores have been paid from the currency reserve and 5.31 lakhs from the Gold Reserve Fund for investment in England in gold securities. The total payments thus amount to the record figure of 47.36 lakhs.

1905-1906.

Rupee Loan.

250. In accordance with the intention expressed in paragraph 233 of the last Financial Statement, a 3½ per cent loan of 4 crores was announced in July last. Tenders were opened on the 2nd August and the result of the loan was as follows:—

Total amount tendered.	Amount accepted.	Average rate of accepted tenders.	Minimum rate accepted.
R	R	R a. p.	R a. p.
19,26,86,200	4,00,00,000	58 13 10.45	98 12 0

1906-1907.

Main features of
Budget Estimate.

251. In 1906-1907, the net Imperial revenue in India is estimated at 29.41 lakhs. Savings Banks are expected to yield a net receipt of 91 lakhs; but only 2 lakhs are expected to be available from the Famine Insurance grant for avoidance of debt; the transactions with Railway Companies are expected to show a net receipt of 357 lakhs of which 283 lakhs represent fresh capital to be raised by them; and deposits and miscellaneous remittance transactions are expected to show a net receipt of 166 lakhs. On the other hand, provision

has been made (1) for expenditure of 162 lakhs from Provincial balances; (2) for capital expenditure in India on State Railways and Irrigation Works of 786 lakhs; (3) for 13 lakhs for discharge of permanent debt, chiefly the payment of the annual instalment towards repayment of the Gwalior loan; (4) for 68 lakhs for loans to be granted to cultivators, Native States, Municipalities, and District Boards for construction of railways; (5) for a payment of 457 lakhs to the Currency Department as the equivalent of an amount to be transferred by the Secretary of State from his Currency chest to his treasury, of which 150 lakhs is for the purchase of silver to be sent to this country for coinage; and (6) for payment of Council Bills to the extent of 26,70 lakhs. The payments mentioned aggregate 41,56 lakhs while the receipts come to 35,57 lakhs, the net disbursements being 599 lakhs.

252. It is proposed to meet $4\frac{1}{2}$ crores out of the net disbursement of 599 lakhs by raising a new rupee loan for that amount in 1906-1907, the remaining 149 lakhs being met by drawing upon the cash balances. The year is thus expected to close with a cash balance of 18,46 lakhs. The announcement now made regarding the rupee loan is in accordance with present intention; but full liberty is reserved, as usual, to vary the programme now announced to any extent that may be considered desirable.

253. The following table gives details of the transactions of Savings Banks and Provident Funds during a series of years, and the estimated transactions for 1905-1906 and 1906-1907:—

YEAR.	Net additions to deposits, cash.	Interest.	Total addition.
	R	R	R
1892-1893	54,89,000	33,94,000	88,83,000
1893-1894	17,99,000	36,80,000	54,79,000
1894-1895	—8,45,000	29,70,000	21,25,000
1895-1896	24,77,000	33,85,000	58,62,000
1896-1897	—58,11,000	34,66,000	—23,45,000
1897-1898	—65,71,000	32,70,000	—33,01,000
1898-1899	—8,84,000	32,29,000	23,45,000
1899-1900	1,40,000	33,48,000	34,88,000
1900-1901	19,44,000	34,80,000	54,24,000
1901-1902	31,04,000	36,87,000	67,91,000
1902-1903	52,40,000	39,00,000	91,40,000
1903-1904	66,99,000	42,15,000	1,09,14,000
1904-1905	78,94,000	45,87,000	1,24,81,000
1905-1906 (Budget)	70,73,000	48,97,000	1,19,70,000
1905-1906 (Revised)	23,87,000	47,82,000	71,69,000
1906-1907 (Budget)	32,77,000	49,62,000	82,39,000

A net deposit in the Post Office Savings Banks of 70½ lakhs apart from interest was assumed in the Budget Estimate of the current year. The transactions of the first ten months of the year have resulted in a net increase in the deposits of only 22 lakhs, probably owing, as stated in paragraph 188, to the immediate effect of an alteration in the rates of interest. There is, however, some indication that the withdrawals in the closing months of the year are not likely to be as heavy as in 1904-1905 and it is now expected that, apart from interest, there will be a net increase in the deposits of about 23½ lakhs during the year 1905-1906.

In the Budget Estimate for 1906-1907, a net deposit of 32½ lakhs, apart from interest is anticipated.

Section VIII.—Summary.

254. The principal features in this statement are the following :—

I.—The Accounts of 1904-1905 closed with a surplus of £3,456,066, being £29,434 less than the surplus expected in the Revised Estimate of that year.

II.—1905-1906—

(1) The Revised Estimates show a total revenue of £84,829,500, a total expenditure charged to Revenue of £83,073,800, and a surplus of £1,755,700. This surplus is higher than that estimated in March 1905 by £851,900.

(2) There has again been a large development of revenue in all branches outside Land, Customs and Irrigation Revenue, net earnings of Railways showing the largest increase.

Railway traffic receipts have expanded largely, and the net receipts have exceeded the estimate by £413,600.

Excise has yielded an increase of £210,400 and Forest of £188,200.

Interest receipts show an improvement of £139,700 and Mint of £199,800 owing to exceptionally heavy coinage of rupees.

Land Revenue receipts, including the portion credited to Irrigation, are expected to fall short of the estimate by £443,900, chiefly in Bombay, Madras, Punjab and the United Provinces owing to partial failure of rains.

Irrigation Direct Receipts are also less by £101,400.

(3) Army expenditure is expected to be less than the estimate by £842,000: Special Expenditure is less by £884,400, while ordinary Expenditure is more by £42,400. This is only nominal, being more than covered by increase in receipts amounting to £150,300. Military Works Expenditure is also less by £71,200, chiefly in special expenditure connected with the reorganization of the Army. The grant of £253,200 for Special Defences has been used only to the extent of £192,000.

Owing mainly to the inability of the Local Governments to expend their full allotments, there are savings under most of the chief administrative heads, the more important being Civil Departments other than Political, £509,900, and Civil Works £178,500.

Political Expenditure is more by £272,300, chiefly in consequence of payment of Amir's subsidy.

Famine relief expenditure is £75,200 less than the estimate. There is a saving on the provision in Madras and Bombay, but it has been partially counterbalanced by expenditure in Ajmer and the United Provinces.

(4) Special grants, aggregating £400,000, have been made to the Governments of the Central Provinces and Eastern Bengal and Assam to start their new settlements.

(5) A loan of four crores of rupees was raised in India; and India 3 per cent stock of £2,000,000 was raised in England, of which £250,000 was applied to the discharge of Great Indian Peninsula Railway Debentures. £500,000 being the residue of India Bills, temporary, fell due, and were discharged.

(6) Fresh capital was raised through Railway Companies to the extent of £1,470,100 as compared with £2,520,800 entered in the Budget.

(7) The drawings of Councils in 1905-1906 are expected to amount to £31,576,300. Of this £3,543,000 represent remittances on account of the Gold Reserve Fund, and £1,333,300 on account of the Currency Reserve invested in sterling securities and

£26,700,000 are remittances on ordinary account, as compared with £16,500,000 entered in the Budget.

- (8) Out of the additional Council Bills sold during the year, silver to the value of £7,924,000 has been purchased and sent to India for coinage. Silver to the value of £400,000 has also been purchased from gold remitted from India in March last and a further quantity worth £250,000 will be purchased for the same purpose from the Currency reserve before the close of the current year.

- (9) The Gold Reserve Fund on 31st March 1906 stands at £12,262,700.

III.—1906-1907.

- (1) The Budget Estimates of 1906-1907 show a total revenue of £86,495,100, a total expenditure charged to revenue of £85,621,000 and a surplus of £874,100.

- (2) This surplus is obtained after providing for the following measures of fiscal relief and administrative improvement:—

(a) Repeal of the Patwari cess in Northern India and the Central Provinces, of the Ryotwari Village Service cess in Madras, and of the Village Service cess in Coorg; cost £524,300.

(b) Abolition of Zamindari Dāk cess in Bengal and Eastern Bengal; cost £23,600.

(c) Relief of District Boards in Northern India, Central Provinces, Coorg and Burma of contributions they have hitherto paid towards District Post charges; cost, including relief of United Provinces District Boards of some small school and other charges, £38,800.

(d) Further grant of £166,700 for police reform.

(e) Additional grant of £26,700 for agricultural and veterinary improvement and of £33,300 for European and technical education.

The total cost of these measures is estimated at £813,400. Under existing conditions the surplus would therefore have been £1,687,500.

- (3) Of the increase in receipts compared with current year's Budget £2,298,200 are due to Railways. There is a counterbalancing increase of £1,633,100 under Railway charges, thus affording a net additional gain of £665,100.

- (4) Other important variations in revenue are increases of £331,700 under Land Revenue including portion due to Irrigation, £140,000 Salt, £163,400 Stamps, £374,200 Excise, £118,800 Post Office, £148,500 Major Irrigation Works Direct receipts, and £100,200 Customs.

- (5) There are decreases of £646,600 under Opium, owing mainly to the price of Bengal opium being now taken at ₹1,125 per chest, and of £516,800 under Provincial Rates owing to the remission of cesses above mentioned.

- (6) The total Military expenditure, including Army, Military Works, Marine and Special Defences, is £21,841,600—£390,900 less than in the current year's Budget. Including Military receipts the net outlay is less by £521,100. The allotment for Re-organisation and other special expenditure included in the above is £2,766,600 against £3,266,600 provided this year.

- (7) Civil administration heads show general increase, the most important being £206,900 under Police, due to carrying out of reforms; £283,700 Political (payments to Amir); and £327,400 Famine Relief. Total Famine Relief Expenditure is £539,100.

- (8) A quasi-permanent settlement has been made with the Central Provinces and Berar, and the settlements previously made with Bengal and Assam are now revised with reference to re-constitution of province. Generally speaking, these provinces get one-half share of divisible revenues, and Central Provinces and Eastern Bengal obtain, as above mentioned, initial grants of £200,000 each.

- (9) Subject to the usual reservations, loans of £2 millions in England and of 4½ crores in India are announced. The sterling loan is required to discharge £749,900 Bombay, Baroda and Central India debentures and for advances to Indian Railway companies. The rupee loan is for capital expenditure on Railways and Irrigation.
- (10) Subject to the usual reservations, provision is also made for the raising of capital through railway companies as follows:—namely, (a) for outlay on State Railways £1,850,000 and (b) for expenditure on Companies' Railways £935,500.
- (11) Drawings of Council Bills are entered at £17,800,000.

IV.—Capital Expenditure.

The following table shows the capital expenditure on Railways and Irrigation Works:—

FORT WILLIAM,
FINANCE DEPARTMENT;
March 21, 1906.

APPENDIX II.

Memorandum by the Hon'ble Major-General C. H. Scott, C.B., R.A., on Army, Military Works, Special Defences, and Marine Expenditure for the years 1905-1906 and 1906-1907.

The estimates with which the Military and Marine Department of the Government of India is concerned are :—

- I.—The Indian Army Estimates.
- II.—The Home (India) Army Estimates.
- III.—The Military Works Estimates.
- IV.—Special Defences.
- V.—The Marine Estimates.

I will deal with them in this order.

2. Taking the Indian and the Home (India) Army Estimates together the net expenditure in 1906-1907 will, it is estimated, be less than that provided in the Budget of 1905-1906 by £572,600.

3. Before dealing with the estimates in detail I will refer to the measures carried out or in progress, during the present year for improving the efficiency of the army and also to those which we propose to continue or institute during the ensuing year.

Budget, 1905-1906.

4. As mentioned in Sir Edmond Elles' Budget Memorandum of the 22nd March 1905, the sum of 331 lakhs—£2,206,666—[including 50 lakhs (£333,333) on account of lapses in the Home and Indian Estimates of 1904-05] was provided in this year's Army Estimates towards carrying out the scheme for the reorganization of the Army in India framed by His Excellency the Commander-in-Chief. Of this sum, 144 lakhs (£960,000) were allotted for the rearmament of horse and field artillery. Among other important measures introduced, the following may be mentioned :—

*Army
Reorganisation.*

- Increase to the reserves of artillery ammunition and small arms ammunition ;
- Increase to the reserve of rifles ;
- Increase of ammunition columns due to the extra ammunition required in the field ;
- Provision of mobilization equipment for the increased field army ;
- Reorganization of the Supply and Transport Corps ;
- Provision of additional army transport carts ;
- Addition of 90 officers to the Indian Army ;
- Creation of the appointment of Inspector General of Ordnance Factories ;
- Formation of an additional railway company of sappers and miners ;
- Purchase of horses for Q. F. batteries ;
- Provision of local stores for field hospitals and of additional maps for the field army ;
- Erection of machinery in connection with the expansion of Ordnance Factories ;
- Acquisition of land for the extension of cantonments and buildings in connection with the redistribution of the army.

The manufacturing capacity of the Alipore and Madras factories being insufficient to meet the large demands for made up clothing for troops, and any extension of these factories at a reasonable cost not being practicable, it has been decided to start a factory at Fatehgarh where labour is cheap and the buildings of the late gun carriage factory are available for the purpose. The measure is at present on an experimental basis in order to test local conditions.

*Additional
Factory.*

general
requirements.

The introduction of the double company organization into the 42nd Deoli, 43rd Erinpura and 44th Merwara Infantry, which involves an extra expenditure of R7,380 (£492) annually, was sanctioned by the Secretary of State in 1905.

Owing to the number of troops now located in Northern India, and the distance of Bombay from the Punjab, it was desirable to adopt Karachi as a port for the embarkation and disembarkation of troops between India and England. Other military considerations also rendered the establishment of troop-ing at Karachi desirable.

The measure has been sanctioned by the Secretary of State. It will involve an initial expenditure of R20,108 (£1,340) and an annual saving of recurring expenditure of R37,684 (£2,512).

In 1903 sanction was accorded tentatively to the supply of regimental necessities to British troops in India by the Army Clothing Department, instead of under regimental arrangements. This change of system which has been found to conduce to greater rapidity and convenience of supply has now been permanently adopted.

A new system of clothing the native army was introduced on 1st April 1905, when the following measures were approved :—

- (a) increase of kit money on enrolment from R30 to R40 ;
- (b) purchase by the State of all rights to compensation with a view to their extinction ;
- (c) grant of an annual consolidated allowance in lieu of issues of clothing in kind.

With the amounts under (a) and (c) the soldier obtains his uniform on payment from clothing factories as he requires it, without being subjected to deductions from pay. An annual saving of R17,930 (£1,195) will result from these measures.

The pay of officers of the Army Veterinary Department below the rank of lieutenant-colonel was increased with effect from the 30th April 1905 as follows :—lieutenants from R400 to R480 a month ; captains from R450, R500, and R600 to R570 and R650 ; majors from R700 to R750. The cost involved comes to R50,000 (£3,333) a year.

Two officers have been added to the Army Remount Department, the annual charges on this account being R20,859 (£1,390). The strength of the Department is now 25 officers including 9 officers of the Army Veterinary Department.

In order to ensure effective supervision and control over the horse and mule-breeding operations carried on by grantees of land on the Jhelum canal and Chenab canal, it is proposed to withdraw four of the six districts comprising the Jhelum Canal Colony Circle and to form them into a separate circle designated the Chenab Canal Colony Circle. The cost involved is estimated at R48,375 (£3,225) a year.

With a view to removing administrative inconvenience the three presidential lists of military assistant surgeons have been amalgamated for all general service purposes. For purposes of promotion to the senior grades men now in the service will continue to be borne on their respective lists until they are absorbed.

The conditions of service of hospital assistants in army employ have been improved by the grant to them of the following concessions :—

- (a) free passage when proceeding on or returning from leave on reduced pay for a period of not less than six months ;
- (b) pension under Civil Service Regulations ;
- (c) an annual allowance of R12 in aid of the provision and maintenance of cloth uniform ;
- (d) pony allowance of R12 a month when at, proceeding to, or returning from, a camp of instruction, manœuvres, or concentration.

The cost of the above concessions amounts to about R13,000 (£866) a year.

It is considered desirable to maintain 15 sets of portable X-ray equipment for the use of the army. The cost of the measure is estimated at

Rs. 87,886 (£5,859) initial
9,961 (£664) annual recurring. Fifteen sets of equipment costing R49,455 (£3,297) are under supply from England.

General
requirements.

On a report on the working of the Punjab Military Transport Animals Act during the past year it has been decided that its further extension is not necessary to localities where camels and mules are not available. Local Governments and Administrations within whose jurisdiction such localities exist have, however, been requested to intimate what steps they propose to take to ensure supply of suitable bullocks, draught and riding ponies on mobilization. They have also been informed that the services of Registration officers will be available if their advice is required. The Act is now in force in the Punjab and in the North-West Frontier Province.

The salary allowed in India to Ridingmasters and Quartermasters, having less than 10 years' service, was deemed barely sufficient to enable them to maintain their position as regimental officers, in the present conditions of Indian service. Moderate increases of pay have accordingly been sanctioned for them. The extra cost is estimated at about R27,000 (£1,800) per annum.

It has been decided that the cost of Police employed in cantonments shall be borne by Provincial Revenues. This change it is estimated will relieve Cantonment Funds in India of charges amounting to R1,10,000 (£7,333) per annum, approximately; and will admit of funds being made available for expenditure on various objects conducive to the welfare of the inhabitants of Cantonments.

In pursuance of a programme of works which has been undertaken in consequence of the rearmament of the volunteer force with the Lee-Metford rifle, a sum of about R1,00,000 (£6,666) has been spent on the provision of buildings and ranges for volunteer corps in the places where they are most urgently required.

Progress has been made with the scheme for providing improved lighting and ventilation of the barracks and hospitals of British troops in the larger cantonments where the hot weather is of long duration. The installation in Fort William has been completed and that at Meerut practically completed.

Budget, 1906-1907.

5. In pursuance of the scheme for the reorganization of the Army in India, it is proposed to provide a sum of about 253 lakhs (£1,686,666) in the Army Estimates of the ensuing financial year. This sum includes ninety lakhs (£600,000) on account of regrant of lapses, due chiefly to non-completion of this year's programme of artillery rearmament. Artillery rearmament will therefore absorb a large portion of the funds allotted for reorganization and among other important measures for which funds will be provided in 1906-1907 are the following:—

Army
Reorganisation.

- Reorganization of Horse and Field Batteries;
- Reorganization of existing artillery ammunition columns and formation of additional columns;
- Additional mule corps and cadres;
- Provision of small arms ammunition columns;
- Increase to the reserves of artillery ammunition and small arm ammunition;
- Increase to the reserve of rifles;
- Provision of additional stores for Ordnance Field Parks;
- Additional officers for the Indian Army;
- Acquisition of land in connection with the redistribution of the Army;

A sum of R53,73,000 (£358,200) has also been provided in the Military Works estimates for buildings in connection with the redistribution of the Army and for the expansion of Ordnance Factories.

Proposals are under consideration for the manufacture of acetone (the solvent used in the manufacture of cordite) at the Cordite factory, Aruvankad. Factories.

Manufacture has commenced and it is hoped that the Gun factory at Cossipore will be able to supply 18 pr. and 13 pr. guns during 1906-1907.

General requirements.

It was anticipated that the Rifle factory at Ishapore would have been able to turn out 6,000 rifles during 1905-1906, but this could not be done. During 1906-1907, 16,000 rifles are to be manufactured.

The rolling mills, Ishapore (now called gun and shell factory, Ishapore branch) will be in full working order by the 1st April 1906.

It is anticipated that the Gun carriage factory at Jubbulpore will be in full working order by the 1st April 1907. Manufacture has already commenced.

A bounty of £15 has been offered to soldiers of British Infantry units of 8 or 7 years' service, and the grant of 6 months' furlough with free passage to and from England to men of 3 years' service, to induce them to extend their service with the colors to 12 and 8 years, respectively. The cost of this measure cannot be stated until the numbers accepting the bounty are known. A reference is also being made to the Secretary of State for India regarding the incidence of the cost.

In 1904 the Secretary of State sanctioned an increase to the reserves of the Native Army to bring their total strength up to 50,000 men. This involves an addition of about 25,000 men. It was decided that the measure should be carried out in the course of the next 10 years, and a sum of 3 lakhs (£20,000) was provided in the estimates of 1905-1906 to admit of an increase of 2,500 in that year. Budget provision has also been made in 1906-1907 for a further increase of 2,500 men. The formation of a Native Cavalry reserve will constitute a part of this measure.

The native artificers now serving as followers with R. A. units in India and with Ordnance Field Parks do not come up to the standard of modern requirements, and they will be replaced by competent artificers possessing a higher standard of mechanical skill. A corps will be recruited from men who have served a three years' apprenticeship in the Gun Carriage Factory at Jubbulpore. The cost has been estimated at—

	R
Initial expenditure . { Army	28,640 (£1,909)
{ Military Works	21,500 (£1,433)
Annual recurring saving	19,540 (£1,303)

The measure has been sanctioned by the Secretary of State and will be given effect to as soon as funds are made available.

For sanitary reasons it is necessary to remove the Sapper and Miner lines at Bangalore from their present site and to construct lines on a new site. A sum of ₹92,686 (£6,179) has been provided in the India Army Estimates of 1906-1907 for the purpose.

A sum of ₹1,05,117 (£7,008) has been provided in the estimates of 1906-1907 to meet expenditure on account of the establishment of new and extension of existing dairies during that year.

Four officers will be added to the establishment employed on farms with effect from 1st April 1906, at a cost of ₹53,499 (£3,566) per annum. The establishment will now consist of 14 officers.

To improve the efficiency of the volunteer force a sum of ₹50,000 (£3,333) will be provided in the Military Works Budget Estimates for buildings and ranges for volunteer corps.

For the improved lighting and ventilation of the barracks and hospitals of British troops, a sum of ₹1,00,000 (£6,666) will be provided in the Military Works Estimates. Electrical installations are to be commenced at certain stations, probably Lucknow and Peshawar.

I.—Indian Army Estimates.

Revised Estimates, 1905-1906.

6. The Revised Indian Army estimates for 1905-1906, compared with the

Comparison—
Revised for 1905-1906
and
Budget for 1906-1907.

Budget for that year, show a net increase of ₹2,43,000 (£16,200). This is caused by an increase in gross receipts of ₹19,23,000 (£128,200), and an increase in gross expenditure of ₹21,66,000 (£144,400).

The increase in receipts is chiefly caused by more receipts under clothing, due to issues to the Native Army being made on payment under the new clothing scheme; to larger demands of medical stores by Civil Institutions; to abnormal sales of unserviceable Ordnance Stores; and to the adjustment in the Indian accounts of a lump sum credit from the War Office on account of the five Native Infantry Regiments serving in the colonies; this increase is partly counterbalanced by smaller recoveries for malt liquor and by the adjustment, by credit to His Majesty's Imperial Government, of the value of peace equipment of corps returned from China and Somaliland.

7. The more important causes which have led to an increase in expenditure have been the following :—

- (a) Expenditure amounting to ₹16,67,000 (£111,133) on the manœuvres at Rawalpindi and other charges connected with the visit of Their Royal Highnesses the Prince and Princess of Wales.
- (b) Charges amounting to ₹12,80,000 (£85,333) on account of the five Native Infantry Regiments on garrison duty in the colonies, but which have been recovered from the Imperial Government and taken as a set-off under Receipts.
- (c) Excess strength of British troops and the deduction made in the Budget for probable savings not being fully realized, account for an increase of ₹8,00,000 (£53,333).
- (d) Clothing allowance to Native troops under the new clothing scheme, amount to ₹6,70,000 (£44,666).
- (e) More charges amounting to ₹5,00,000 (£33,333) on account of rise in prices of food-supplies.
- (f) More charges for conveyance of troops and stores, for warm clothing, supply of water, and toll on troops, etc., account for ₹4,25,000 (£28,333).
- (g) Extra expenditure amounting to ₹2,40,000 (£16,000), in connection with the earthquake at Dharmasala.
- (h) More charges amounting to ₹3,50,000 (£23,333) for pay of Regimental Officers, due to the deduction made in the Budget for probable savings having proved too high.
- (i) Increased expenditure in connection with the Aden Delimitation Commission and the Gilgit Agency, account for ₹1,54,000 (£10,266).
- (j) More non-effective charges, ₹2,00,000 (£13,333).

On the other hand, there have been decreases of expenditure under certain heads, the more important of which are the following :—

- (a) Less "Reorganization" expenditure in India, ₹16,09,000 (£107,266).
- (b) Less charges for Ordnance establishments and for purchase of stores for Arsenal and Ordnance Factories, amounting to ₹6,00,000 (£40,000).
- (c) Smaller expenditure anticipated under Army and Garrison Staff, Remount, Veterinary and Medical Establishments, amounting to ₹4,70,000 (£31,333).
- (d) Less charges for service pay and good conduct pay to British soldiers ₹3,00,000 (£20,000) and for clothing supplies and services, ₹2,60,000 (£17,333).
- (e) Lapse of the special provision for initial expenditure in connection with the Native Army Reserves and the formation of the 106th Hazara Pioneers, amounting to ₹2,00,000 (£13,333).
- (f) Smaller purchases of malt liquor, ₹2,52,000 (£16,800).
- (g) Less expenditure on account of "Tibet Mission" and "Seistan Boundary Commission," ₹1,68,000 (£11,200).

Estimates, 1906-1907.

8. The estimates for 1906-1907, in the net, amount to **₹20,22,41,000** (**₹13,482,733**) or **₹16,27,000** (**₹108,466**) more than the Budget for 1905-1906. This is due to an increase in gross receipts of **₹24,38,000** (**₹162,533**) and in gross expenditure of **₹40,65,000** (**₹271,000**).

Comparison—
Budget for 1905-1906
and
Estimates for 1906-1907.

The increase in receipts may be chiefly attributed to more realizations from dairy farms; to the introduction of the new clothing scheme for the native army under which issues of clothing are made on payment; to larger sales of Ordnance Stores and camp equipage; and to the expenditure incurred and charged to Indian revenues on account of the five Native Infantry Regiments serving in the colonies being recovered from the War Office and credited in the Indian accounts.

9. The more important causes of increase in expenditure are the following:—

- (a) Larger provision on account of Reorganization, **₹17,21,000** (**₹114,733**).
- (b) Provision on account of the five Native Infantry Regiments serving at Colonial Stations, amounting to **₹14,00,000** (**₹93,333**).
- (c) Larger provision owing to rise in prices of food-supplies, **₹8,50,000** (**₹56,666**); for Dairy and Grass Farms, **₹5,63,000** (**₹37,533**); for conveyance of troops and stores, **₹1,00,000** (**₹6,666**); for extra labour in the Ammunition Factory, Dum Dum, and Gun Carriage Factory, Madras, and for Arsenal Stores, **₹2,35,000** (**₹15,666**).
- (d) Smaller deduction for probable savings under pay of Regimental Officers and soldiers, **₹8,50,000** (**₹56,666**).
- (e) Clothing allowance to the Native Army, less half-mounting allowance abolished, **₹7,00,000** (**₹46,666**).
- (f) Provision of **₹2,20,000** (**₹14,666**) made for the Native Infantry Regiment returned from Somaliland, for which a deduction was made in 1905-1906.
- (g) Increased rate for purchase of mules in India and additional cost for importing transport mules from America, **₹1,86,000** (**₹12,400**).
- (h) More non-effective charges, **₹1,20,000** (**₹8,000**).

Against the foregoing increases there will be a set-off by reason of certain decreases, the most important of which are due to:—

- (a) Smaller provision on account of special measures other than Reorganization, **₹6,31,000** (**₹42,066**).
- (b) Smaller provision under Tibet Mission, **₹3,39,000** (**₹22,600**); and occupation of Chitral and its communications, **₹1,76,000** (**₹11,733**).
- (c) Smaller provision for good conduct pay and service pay, **₹2,34,000** (**₹15,600**).
- (d) No provision having been made for the Seistan Boundary Commission, **₹2,54,000** (**₹16,933**).
- (e) Omission of the special provision made in 1905-1906 in connection with the new scheme for the supply of clothing to the Native Army, **₹5,08,000** (**₹33,866**).
- (f) Smaller purchases of Remounts, **₹2,60,000** (**₹17,333**).
- (g) Smaller provision on account of compensation in lieu of clothing, **₹1,80,000** (**₹12,000**).
- (h) Smaller provision having been made for stores, including hides, for factories, **₹2,75,000** (**₹18,333**).
- (i) Initial expenditure provided in 1905-1906 for Native Army Reserves not repeated in 1906-1907, **₹1,50,000** (**₹10,000**).

II.—Home (India) Army Estimates.*Revised Estimates, 1905-1906.*

10. The Military Department is next concerned with the Home estimates for Army effective and non-effective charges. The Home Budget Estimates for 1905-1906 made provision for a gross expenditure of £6,309,400, but in the Revised Estimates this provision has been reduced to £5,323,200, or by £986,200.

This decrease in the Revised Estimate as compared with the Budget Estimate is stated by the India Office to be due mainly to less charges under the head "Reorganization—Stores for India;" less payments to the War Office in respect of British Forces serving in India; less charges for passage of officers and others not charged to Indian Troop Service; smaller demands for stores for ordinary requirements; less payments to War Office for retired pay, etc., of British Forces for service in India; less charges for pay and pensions of non-effective and retired officers of the Indian Service.

These decreases are partly counterbalanced by increases due to more charges for furlough pay during voyage of British forces serving in India and for furlough allowances of officers of the Indian Service; and larger expenditure under the head "Indian Troop Service" owing to increased payments for conveyance of troops to and from India in Imperial transports, etc.

The net figures of the Revised Estimate show a decrease of £1,008,300 as compared with those of the Budget Estimate for 1905-1906 due to less expenditure of £986,200, as explained above, and an increase in receipts of £22,100.

Estimates, 1906-1907.

Comparison—
Budget for 1905-1906
and
Estimates for 1906-1907.

11. The estimated receipts and expenditure for 1906-1907 are as follows:—

	Receipts.	Expenditure.	Net expenditure.
	£	£	£
Effective	273,300	3,199,300	2,926,000
Non-effective	30,000	2,403,500	2,373,500
TOTAL	303,300	5,602,800	5,299,500

12. Compared with the Budget for 1905-1906 the receipts show an anticipated decrease of £25,600 and this is chiefly due to smaller receipts on account of the Indian Troop Service and to a decrease in the value of articles in possession of regiments on their transfer from the Indian to the British Establishment. The gross anticipated expenditure for 1906-1907 is less than the amount provided in the Budget for the preceding year by £706,600. This decrease is chiefly accounted for by less requirements of stores (both ordinary and Reorganization); smaller provision of pay and pensions of non-effective and retired officers of the Indian Service and of pay of Non-effective Colonels of Royal Artillery, smaller anticipated expenditure on Indian Troop Service and on account of passage of officers and others not charged to the Indian Troop Service; and smaller provision under head "Miscellaneous."

These decreases are however partly counterbalanced by larger anticipated payments to War Office in respect of British forces serving in India; by larger

anticipated expenditure on account of furlough allowances and pay during voyage of British forces serving in India, of furlough allowances of officers of the Indian service and of payments to War Office for retired pay, etc., of British forces, for service in India.

13. The gross charges on account of effective services, as estimated for the coming year, include payments to the War Office in respect of the British forces serving in India (£650,000); furlough allowances and pay during the voyage of British forces serving in India (£130,000); furlough allowances of officers of the Indian Service (£270,000); Indian Troop Service (£319,000); passage of officers and troops otherwise than in transports (£15,000); Miscellaneous (£35,000); and stores for India, both ordinary and Reorganization (£1,780,300).

14. The gross charges on account of non-effective services comprise the retired pay, etc., of the British forces for service in India (£745,000); pay of non-effective Colonels of Royal Artillery (£15,500); pay and pensions of non-effective and retired officers of the Indian Service (£1,500,000); Miscellaneous, pensions, etc., (£88,000); and the Indian Military Service Family Pensions (£55,000).

15. The net anticipated expenditure for 1906-1907 is less by £681,000 than that for the preceding year, and, as explained in paragraph 12 above, this is due to a decrease of £25,600 in receipts and of £706,600 in gross expenditure.

III.—Military Works Estimates.

44—Military Works.

16. Including English expenditure, the Budget Estimate for 1905-1906 amounted to ₹1,72,36,000 (£1,149,000); but these figures have been modified during the year by various causes. The Revised Estimate is ₹1,60,67,000 (£1,071,100) which is less than the Budget of 1905-1906 by ₹11,69,000 (£78,000).

17. The Budget Estimate for 1906-1907, including English expenditure, is ₹1,75,41,000 (£1,169,400), showing an increase on that of 1905-1906 of ₹3,05,000 (£20,300).

18. The main heads of expenditure are in round figures :—

	₹	£
Original works, including those in progress and those to be commenced	97,09,000	647,200
Repairs	35,59,000	237,200
Establishment, Tools and Plant	33,73,000	224,800
Barrack Department—Establishments, Supplies and Tools and Plant	9,00,000	60,000

19. In connection with the more important original works, expenditure amounting to ₹4,03,000 (£26,800) will be incurred on water-supply projects; ₹1,00,000 (£6,600) will be spent on electric lighting and punkah-pulling in barracks, etc.; provision has been made in the Budget for ₹2,00,000 (£13,300) for completing the Central Gun-carriage Factory at Jubbulpore; ₹2,25,000 (£15,000) for the steel plant and cartridge metal rolling mills at Ishapur; ₹1,50,000 (£10,000) for the staff college at Quetta; ₹2,09,000 (£13,900) for accommodation at Maymye for a battalion of British Infantry; ₹4,00,000 (£26,600) for the Kirkee Arsenal; ₹1,25,000 (£8,300) for quarters for ordnance subordinates at Cossipore and Dum Dum; ₹1,43,000 (£9,500) for additional buildings at the Mona Remount Depot; ₹8,79,000 (£58,600) for expansion of Ordnance factories on account of the increase in the reserve of artillery ammunition, ₹36,67,000 (£244,400) for buildings in connection with the scheme for the redistribution of the Army. Progress will be made towards completion of the requirements of volunteer corps in the matter of buildings and rifle ranges. The remaining original works include roads, buildings for troops, buildings for a medical store depot at Calcutta, buildings for a young stock run and depot at Sargodha, and provide for the ordinary requirements of the Ordnance, Marine and Army Clothing Departments and of the Supply and Transport Corps.

20. Provision is made for 205 new major works and schemes, of which 73 are in progress and 132 have yet to be commenced. A sum of ₹7,00,000 (£46,600) is allotted to minor works, each costing over ₹2,500.

IV.—47—Special Defences.

21. Including English expenditure, the Budget Estimate for 1905-1906 was ₹37,98,000 (£253,200). The Revised Estimate of expenditure is taken at ₹28,81,000 (£192,000).

22. The Budget Estimate for 1906-1907, including English expenditure, is ₹34,73,000 (£231,500).

Marine Estimates.**HOME AND INDIAN.***Revised Estimates, 1905-1906.*

23. The total receipts in the Budget for 1905-1906 were ₹22,78,000 (£151,866) and the Revised Estimate stands at ₹18,00,000 (£120,000) showing a decrease of ₹4,78,000 (£31,866).

Comparison—
 Revised for 1905-1906.
 Budget for 1905-1906.

The decrease is chiefly due to falling off in receipts owing to less work done for and stores supplied to the Royal Navy and other Departments. A change in the method of adjusting recoveries on account of the employment of Royal Indian Marine vessels in carrying out the triennial reliefs of the five Native Indian Regiments on colonial garrison duty under the Imperial Government, has also contributed towards reducing the receipts which would otherwise have actually accrued to the Royal Indian Marine in 1905-1906. By this change which has been introduced from 1st April 1905, the liability of His Majesty's Imperial Government will be met by the payment of a capitation rate which, as at present arranged, will be wholly treated as military receipts in India.

24. The total expenditure provided for in the Budget for 1905-1906 was ₹82,19,020 (£547,935) but the Revised Estimate stands at ₹78,54,000 (£523,600), showing a decrease of ₹3,65,020 (£24,335). The decrease is chiefly due to less expenditure incurred than was provided for the construction of a new vessel to replace the "Canning."

Estimates, 1906-1907.

25. The total receipts for 1906-1907 are ₹21,45,200 (£143,013) against ₹22,78,000 (£151,866), the total of the Budget for 1905-1906, showing a decrease of ₹1,32,800 (£8,853).

Comparison—
 Budget for 1905-1906.
 Estimates for 1906-1907.

The decrease is chiefly due to less recoveries being anticipated on account of dockyard services and supplies.

26. The total expenditure for 1906-1907 is ₹89,09,300 (£593,953) against ₹82,19,020 (£547,935), the total of the Budget for 1905-1906 showing an increase of ₹6,90,280 (£46,018). This is chiefly due to large expenditure on stores in India and to the construction of new vessels at Home, to replace the "Canning" and "Nancowry." These increases are partly counterbalanced by savings in other directions.

27. In order to accelerate the promotion of officers of the R. I. M. the establishment of 1st and 2nd grade commanders has been increased from 7 to 8 and from 9 to 10 respectively.

General remarks.

The appointments of Marine Transport Officer, Mandalay, Superintending Engineer, Mandalay, Assistant to the Superintending Engineer, Burma, and Engineer and Harbour Master, Port Blair, have been reserved for officers of the R. I. M. The reservation of the appointment of Port Officer, Chittagong, for officers of the R. I. M., has also been recommended to the Secretary of State.

In addition to their usual trooping work, the R. I. M. vessels "Hardinge" and "Dufferin" were employed to convey troops between India and China. The "Dufferin" was also used to convey H. E. Lord Curzon and party to Suez. A vessel is under construction in England for use as a troopship in replacement of the R. I. M. S. "Canning." The cost will be £187,000, of which amount £72,000 has been spent this year and the balance £115,000 provided in the estimates of 1906-1907.

The R. I. M. S. "Investigator" has been employed during the past season on surveying work in the Persian Gulf and at Aden, while the "Nancowry" has been engaged in a survey of the Andamans. Arrangements are being made to replace the above vessels which are out of date.

C. H. SCOTT.

March 21st, 1906.

APPENDIX III.

Memorandum by the Railway Board

ON THE

Results of Indian Railway working 1905-1906 and proposals for 1906-1907.

The results of working of Indian Railways for the year 1905-1906 show larger gross receipts and larger revenue expenditure than in any previous year.

The estimated net surplus Revenue after paying all charges including interest is three crores three lakhs and eighty-three thousand (£2,025,600).

CAPITAL EXPENDITURE.

The Capital expenditure during the year 1905-1906 will amount to twelve crores fifty lakhs (£8,333,000) being about two crores in excess of the expenditure for the year 1904-1905.

For the year 1906-1907 these figures have been largely increased. The estimate provides for spending a sum of 15 crores (£10,000,000), an increase of 20 per cent. on the provision of last year.

Under the head of lines already open, including the provision of additional rolling stock, the amount expended in 1905-1906 will be 726 lakhs (£4,840,000), showing an advance of about 224 lakhs over the expenditure under the same head for the previous year.

Under the same heads in 1906-1907 provision is made for 891 lakhs (£5,940,000), an increase of about 23 per cent.

A comparison, showing capital expenditure for 1906-1907 and the previous five years, is contained in the following statement:—

	Lines already open including additional rolling stock.	LINES UNDER CONSTRUCTION.		Total.	Equivalent in sterling.
		Started in previous years.	Started in current year.		
	Lakhs.	Lakhs.	Lakhs.	Lakhs.	£
1901-1902 (actual expenditure)	3,52'58	5,09'06	25'64	8,87'28	5,015,199
1902-1903 (" ")	4,81'74	4,52'50	71'52	10,05'76	6,705,064
1903-1904 (" ")	5,58'77	3,13'68	84'62	9,57'07	6,380,468
1904-1905 (" ")	5,02'76	4,86'91	88'62	10,78'29	7,188,600
1905-1906 (latest grants)	7,26'63	4,81'04	42'33	12,50'00	8,333,334
1906-1907 (proposed grants)	8,91'09	5,38'91	70'00	15,00'00	10,000,000

The information showing in detail how the expenditure in 1905-1906 and 1906-1907 will be distributed is contained in statement A attached to this memorandum.

Under the order of the Secretary of State a programme has been submitted to him for expenditure on Railways during the next three years.

This "triennial programme," as it is called, has been definitely agreed to by the Secretary of State for the year 1906-1907 and provisionally approved for the remaining two years.

The year 1906-1907 is the first year this arrangement will come into operation. The object aimed at is to enable a Railway Programme, extending over a reasonable period, being made out under as fixed conditions, for new Railways and additions to existing ones, as Indian Finance will permit, and also to secure a definite continuity of Railway Policy, and the Railway Board have every hope that the funds required to meet the expenditure of 15 crores per annum for the next three years will be duly provided.

The mileage of lines of all gauges open to traffic on 1st April 1905 was 27,728, and under construction, 2,344; on 1st April 1906 there will be 28,684 open and 1,959 under construction.

At the end of the coming year there will be 1,509 miles under construction among which will be twelve new projects.

RAILWAY REVENUE ACCOUNT.

The Railways of India, taken as a whole, have for a succession of years shown at balance to the credit of general revenues, after allowing for working expenses, interest

on capital expended, charges for annuities in redemption of capital and miscellaneous railway expenditure. The following table shows the approximate figures for 1905-1906 compared with the actual results for the previous five years:—

(Figures in rupees omitting 000.)

	Gross receipts.	Working expenses.	Interest charges, etc.	Surplus of Revenue over expenditure.	Equivalent in sterling.
	R	R	R	R	£
<i>Actuals—</i>					
1900-1901 . .	27,44,04	12,69,86	14,25,41	48,77	325,100
1901-1902 . .	30,33,90	14,23,85	14,83,06	1,26,99	846,600
1902-1903 . .	30,20,68	14,74,08	15,11,66	34,34	228,900
1903-1904 . .	32,33,68	15,56,72	15,47,86	1,29,10	860,700
1904-1905 . .	36,03,37	16,94,32	15,93,23	3,15,82	2,105,500
<i>Estimate—</i>					
1905-1906 . .	36,98,72	17,44,54	16,50,35	3,03,83	2,025,600

Compared with the results of the previous year the figures for 1905-1906 show a falling off of Rs. 11,99,000 (£79,900). The receipts are more by Rs. 95,35,000 (£635,700) but the working expenses are higher by Rs. 50,22,000, (£334,800) while interest charges, etc., have increased by Rs. 57,12,000 (£380,800).

GROSS RECEIPTS.

In 1904-1905 traffic conditions were exceptionally favourable on all the larger railway systems. Pilgrim, grain and coal traffic accounted for a large increase on the East Indian railway, the recently completed irrigation works in the Punjab rendered possible the heavy export traffic in wheat *via* Karachi resulting in an extraordinary increase on the North Western railway, while the earnings of the Great Indian Peninsula, Rajputana-Malwa, and Bengal-Nagpur railways were also affected by favourable crops. During the current year, while there has been a considerable falling off in grain and seed traffic on the North Western railway, and the East Indian railway earnings were practically stationary, the earnings from the other three above-mentioned railways show still better results owing to further development of cotton, grain and specially coal traffic. The following are the principal differences resulting in the net increase of Rs. 95,35,000 in gross receipts:—

	Rs.
<i>Increases.</i>	
Bengal-Nagpur	56,65,000
Great Indian Peninsula	32,55,000
Rajputana-Malwa	30,70,000
Other railways (net)	33,93,000
	<u>1,53,83,000</u>
<i>Decrease.</i>	
North Western	58,48,000
	<u>95,35,000</u>
Net Increase	

WORKING EXPENSES, INTEREST CHARGES, ETC.

The increase in working expenses during the year 1905-1906 is estimated to amount to Rs. 50,22,000 (£334,800.) This increase to a large extent is due to increased traffic on certain lines of which the Bengal-Nagpur, Great Indian Peninsula and Rajputana-Malwa railways are the most prominent examples.

These three lines will have earned more than one crore of rupees (£665,700) in excess of their earnings during the previous year, and this increase in earnings necessitate increased working expenses.

There are, however, other causes which may increase both working expenses and interest charges in the future. The increase in working expenses should be to a considerable extent temporary; the increase in interest charges, however, will be permanent.

The causes are these—

Railways in India have now to run faster trains, provide better carriages, improve the conditions under which third class passengers are carried, introduce a more elaborate system of signalling, and generally conduct their business under more up to date methods than were in use in the past.

Some of these improvements will lead to increased revenue. Some will not, but have to be provided to meet the public demands.

The cost of many of these improvements being in the nature of renewals has to fall to a considerable extent on revenue.

During the period this raising of the standard is being carried out working expenses must rise, though in the end under some items more economical working should be secured.

Again it is generally admitted that there is economy in Railway working in hauling heavy train loads. To enable heavy train loads to be hauled the permanent way of railways has to be improved, and girders strengthened. Most lines now when making branches wish to use their light main line rails in these branches and renew the main line with heavier rails.

This is a sound business arrangement, but carrying out the policy indicated means that Revenue has to renew before the rail itself is nearly worn out. The result is increased debits to Revenue for a time causing increased working expenses. The Board hope that a practical solution may be found to meet this difficulty, so that working expenses may be steadied and not liable to unnecessary fluctuations.

The results of improvement in the standard of permanent way carrying with it the capacity to haul heavier loads will well repay the expenditure by ultimate reduction in cost of haulage.

NEW LINES TO BE CONSTRUCTED.

The new lines, the construction of which is to be commenced during 1906-1907, are:—

No.	Railway.	Gauge.	Probable length, miles.
<i>(i) State, by State Agency.</i>			
1	Bombay—Sind connection	5' 6"	295
Eastern Bengal—			
2	Lalgola-Gherria	5' 6"	13
North-Western—			
3	Jhang-Chiniot-Sangla	5' 6"	70
4	Lodhran-Khanewal	5' 6"	55
5	Shorkot Road-Chichoki	5' 6"	130
6	Thal-Parachinar	5' 6"	55
7	Kohat-Thal (conversion from the 2' 6" gauge, not resulting in increased open mileage)	5' 6"	62
<i>(ii) State, by Agency of Companies.</i>			
Assam-Bengal—			
8	Kalaura-Sylhet	3' 3½"	31
Burma—			
9	Daga-Naikban	3' 3½"	69
East Indian—			
10	Katwa-Azimganj-Barharwa	5' 6"	103
<i>(iii) From Capital of Companies.</i>			
Bengal-Nagpur—			
11	Vizianagram-Raipur	5' 6"	310
<i>(iv) From Capital of Local Boards.</i>			
12	Kurnool-Dhone	3' 3½"	32

OPEN LINE REQUIREMENTS.

In dealing with the Capital funds available for expenditure on railways the Railway Board have given due consideration to the demands of open lines for the provision of additional facilities required by a growing trade.

For improving railway working there are demands of high importance for doubling existing lines, additional crossing stations, improved signalling, improvement of railway workshops, more staff quarters and the general provision of facilities of smaller character required to enable Railways to deal more expeditiously with their traffic.

The total amount allotted during 1906-1907 to open lines, *viz.*, 891 lakhs (£5,940,000) out of a total for the year of 1,500 lakhs (£10,000,000) has been divided between general open line requirements and additional rolling stock approximately as follows:—

		Lakhs.
1906-1907	{ Open line requirements	509
	{ Rolling stock	382

This shows a considerable increase over 1905-1906, the figures for which were as follows :—

		Lakhs.
1905-1906	{ Open line requirements	452
	{ Rolling stock	274

ROLLING STOCK.

The question of what is a sufficiency of rolling stock on a railway is one about which there is considerable difference of opinion. If railways are to be worked commercially, their interests have to be considered. It is sometimes argued that it is in the interest of the railway to always be able to carry *all* traffic offering at *all* times.

To provide for a maximum demand for transport for a short period would necessitate a very large amount of extra rolling stock being kept to meet this exceptional demand. This rolling stock would lie idle for considerable periods and be a burden on the capital cost of the line.

In most countries of the world, especially in America, where a large export grain, seeds and coal business is done, there is shortness in the supply of rolling stock at certain times and during unusual briskness of trade.

On this important question, the Railway Board are of the opinion that Indian Railways as a whole are at present below what should be the standard of equipment of rolling stock, for present requirements. Since the Board was formed they have taken steps to improve this standard and will continue to do so to meet future developments of trade.

For the year 1906-1907 the sum of three crores eighty-two lakhs has been provided for new rolling stock, being an excess of one crore eight lakhs over the provision for 1905-1906.

The stock now under indent consists of heavier engines and higher capacity vehicles. This represents a considerable increase in power of transportation beyond that indicated by the actual numbers added.

Some of the restrictions on axle loads in existing stock have also been relaxed, which has permitted existing wagons being more heavily loaded.

THIRD CLASS PASSENGER TRAFFIC.

The question of improving the comfort and convenience of third class passenger traffic is a matter the Railway Board have been devoting considerable attention to during the past year.

More third class rolling stock is undoubtedly required.

Provision has, as far as practicable, been made for this during the year 1906-1907, the number sanctioned being double that supplied in 1905-1906.

The additional stock to be supplied during the ensuing year will be of a better type than formerly. The carriages will be of a large size, better lighted and be supplied with latrine accommodation. The stock being built for renewals is also of this higher standard.

Steps will be taken during the ensuing year to develop more rapidly the system of communication between passengers and guards and drivers of trains, the system being applied to third class carriages equally with those of the higher classes.

The Board would also note that in response to their representations, the various Railway Administrations are paying attention to the general convenience of third class passengers in taking tickets, avoiding crushes on platforms, and overcrowding in carriages, but much more remains to be done. The Board hope that this will induce larger numbers to travel and thus lead to improved receipts from this valuable class of traffic.

GENERAL.

During 1905 the Railway Board authorized a substantial reduction in the minimum rate for the carriage of coal. Railways, however, are moving cautiously in taking advantage of this reduction, but the Board feel sure the final result must be a large increase in the coal business and a general stimulus to industries situated far from their coal supply.

Attention is invited to statements B and C accompanying this memorandum, which contain information of interest.

STATEMENT B IN APPENDIX III.

Statement showing proposed lines which are under negotiation for construction by private Companies.

No.	NAME OF RAILWAY.	Length.	Estimated cost.	
		Miles.	Rs.	
	<i>Bengal—</i>			
1	Panchkura to Luff Point with terminal and loading arrangements for ships or steamers at the latter place	30	(a)	
	<i>Bombay—</i>			
2	Aden to Nobat Dakin (or Sheikh Othman and D'thala)	(b) 40	Not stated	
3	Dholka-Dhandhuka	40	Do.	
4	Dhandhuka-Ranpur	18	Do.	This is a tramway.
5	Idar Road to Bramhakhed	32	Do.	
	<i>Eastern Bengal and Assam—</i>			
6	Borjan to Suntak	8	2,70,000	This is a tramway.
7	Mymensingh, <i>via</i> Netrokona, to Bara-Ari, with branch from Shambhuganj to Gaunpur . . .	36	22,16,000	
8	Singhjani, <i>via</i> Shergpur, to Nalatabari	25	12,39,000	
9	Sirajganj-Ullapara	18	11,00,000	
	<i>Madras—</i>			
10	Tinnevely-Tiruchendur	38	20,52,000	
	<i>Punjab—</i>			
11	Rawalpindi-Murree, with extensions to Kuldana and Gharial	40	30,80,000	

(a) The share capital of the proposed company is £250,000, which, at Rs=71, is equivalent to Rs37,50,000.

(b) Represents the distance between Aden and Nobat Dakin, *via* Lahaj. The length of the alternative line is not stated.

STATEMENT C IN APPENDIX III.

Memorandum on the Construction of Railways.

Open lines on 1st April 1905.

	Miles.	Miles.
(i) Eastern Bengal	278.68	4,629.29

(xix) C. Raipura (2' 6") (f)	37.37	
(xix) D. Cooh Benar (2' 6") (f)	...	33.60

(a) Includes 5.81 miles of military line not used for public traffic and 26.18 miles of mixed 5' 6" and 3' 3 1/2" gauge line between Bhatinda and Kot Kapura, worked over by the North Western State and Rajputana-Malwa railways.

(b) Includes 10.79 miles of mixed 5' 6" and 3' 3 1/2" gauge line between Ferozpur and Bara Banki, 0.59 mile on the Cawnpore Bridge and 1.81 miles of 3' 3 1/2" gauge line between the Oudh and Rohilkhand State Railway Cantonment and the Bengal and North-Western Railway City stations at Benares.

(c) Worked by the Great Indian Peninsula Railway Company.

(d) Although for convenience classed amongst State railways, this line is the property of the Bengal Central Railway Company.

(e) Worked by His Highness the Nizam's Guaranteed State Railways Company.

(f) Worked by the Bombay, Baroda and Central India Railway Company.

(g) Worked by the Madras Railway Company.

(h) Includes 2.66 miles of mixed 5' 6" and 3' 3 1/2" gauge line between Berwada and Kistna Block but and 0.31 mile of 3' 3 1/2" gauge line between Kistna Block but and Tadepalli.

(i) Includes 39.23 miles of 3' 3 1/2" gauge line between Viramgam and Wadiwan.

(j) Worked by the Oudh and Rohilkhand State railway.

(k) Worked by the East Indian Railway Company.

(l) Worked by the North Western State railway.

At the commencement of 1905-1906, i.e., on the 1st April 1905, the total length of railways open for traffic was 27,727.68 miles, made up as follows:—

5' 6" gauge—	Miles.	Miles.
(i) State lines worked by the State	4,020.29	
(ii) State lines worked by companies	6,040.33	
(iii) Companies' lines guaranteed by Government under the old contracts	1,408.36	
(iv) Companies' lines guaranteed by Government under modern contracts	32.04	
(v) Branch line companies' railways assisted by Government under "Rebate" terms	659.57	
(vi) Assisted companies' lines—		
A. Subsidized by the Government of India	162.36	
B. Receiving land only from Government	22.23	
(vii) Native State lines—		
A. Worked by companies	709.93	
B. Worked by State railway agency	201.70	
	911.63	14,771.81
3' 3 1/2" gauge—		
(viii) State lines worked by the State	772.23	
(ix) State lines worked by companies	7,351.41	
(x) District Boards' lines	99.46	
(xi) Branch line companies' railways assisted by Government under "Rebate" terms	174.47	
(xii) Assisted companies' lines—		
A. Subsidized by the Government of India	53.92	
B. Subsidized by Local Governments	77.50	
C. Subsidized by District Boards	36.40	
D. Receiving land only from Government	1,023.15	
	1,190.97	
(xiii) Unassisted companies' lines	8.50	
(xiv) Native State lines—		
A. Worked by Native States	1,321.74	
B. Worked by companies	782.20	
	2,103.94	
(xv) Lines in Foreign Territory	73.60	
	11,777.58	
Special (2' 6" and 2' 0") gauges—		
(xvi) State lines worked by the State	168.41	
(xvii) State lines worked by companies	270.01	
(xviii) Assisted companies' lines—		
A. Subsidized by Local Governments	58.76	
B. Subsidized by District Boards	121.60	
C. Receiving land only from Government	120.53	
	300.89	
(xix) Unassisted companies' lines	33.27	
(xx) Native State lines—		
A. Worked by companies	372.11	
B. Worked by State railway agency	33.60	
	405.71	
	1,178.29	
TOTAL	27,727.68	

(m) Excludes 3.66 miles of the Lucknow-Bareilly railway between Aishbagh and Dalgam, worked over, but includes 9.10 miles of mixed 5' 6" and 3' 3 1/2" gauge line between Ferozpur and Bara Banki and 0.59 mile of the Oudh and Rohilkhand State railway on the Cawnpore Bridge.

(n) Worked by the Southern Mahratta Railway Company.

(o) Worked by the Jodhpur-Bikaner railway.

(p) Worked by the Rohilkhand and Kumaon Railway Company.

(q) Includes 2.10 miles at Ujjain, 1.07 miles between Agra Cantonment and Jumna East Bank and 0.04 mile between Lalori Gate Cabin and Brewery Cabin, Delhi, laid on the 5' 6" gauge, and 20.25 miles of mixed 5' 6" and 3' 3 1/2" gauge line between Kot Kapura and Bhatinda, worked over by the Rajputana-Malwa and North Western State railways.

(r) Worked by the South Indian Railway Company.

(s) Worked by the Bengal and North Western Railway Company.

(t) Worked by the Eastern Bengal State railway.

(u) Worked by the Assam Railway Company.

(v) Worked by the Assam Railway and Trading Company.

(w) Includes 5.23 miles of Bhavnagar-Gondal-Junagadh-Portbandar railway.

(x) Worked by the Bhavnagar-Gondal-Junagadh-Portbandar railway.

(y) Includes 3.03 miles of the Beldandur Dock estate line.

(z) Includes 16.75 miles of 2' 6" gauge line between Vankar and Morvi.

(aa) Worked by the Bengal-Nagpur Railway Company.

And the mileage under construction or sanctioned for construction on the same date, *vis.*, 1st April 1905, was 3,186·80 miles, as follows:—

5' 6" gauge—

	Miles.	Miles.
(i) State lines worked by the State	546·44	
(ii) State lines worked by companies	476·48	
(iii) Branch line companies' railways assisted by Government under "Rebate" terms	154·00	
(iv) Native State line worked by Company	1·39	
		1,178·31

3' 3½" gauge—

(v) State lines worked by the State	300·87	
(vi) State lines worked by companies	609·34	
(vii) District Boards' lines	5·53	
(viii) Assisted companies' lines—		Miles.
A. Subsidized by the Government of India	148·00	
B. Receiving land only from Government	116·94	
		264·94
(ix) Native State lines worked by companies	72·85	
		1,253·53

Special (2' 6" and 2' 0") gauges—

(x) State lines worked by the State	6·80	
(xi) State lines worked by companies	325·52	
(xii) Assisted companies' lines—		Miles.
A. Subsidized by District Boards	105·50	
B. Receiving land only from Government	214·66	
		320·16
(xiii) Native State lines—		
A. Worked by Native States	11·86	
B. Worked by companies	68·60	
C. Worked by State railway agency	22·02	
		102·48
		754·96
		TOTAL 3,186·80

There was thus a grand total of railways completed and in hand, on the 1st April 1905, of miles 30,914·48

Lines under construction and sanctioned on 31st March 1905.

	Miles.	Miles.	Miles.
(i) Eastern Bengal—			
Kankonachi Chord	2·25		
Panchooria to the river Ganges (a)	6·00		
Ranaghat to Lalga Ghat	97·50	105·75	
(ii) Nagda-Mutta (Southern section)—			
Nagda to the crossing of the Chambal river		141·52

Financial Summary.

The Accounts of 1904-1905 closed with a surplus of £3,456,066, being £29,434 less than the Revised Estimate. Revenue increased by £113,871 and Expenditure was less by £43,595, giving a gross improvement of £157,466. But the improvement in the Provincial and Local section was £186,900 and the Imperial result was therefore worse by £29,434. The chief increases of Revenue were:—Excise £51,424, Forest £40,997, Irrigation £39,836, and Assessed Taxes £14,002, but Opium Revenue was short by £22,501, Interest receipts by £20,121, and the net Railway Revenue Account by £149,062. There were decreases of expenditure under Army £139,006, Other Public Works £45,356, Direct Demands on Revenue £26,664, and Irrigation £24,947.

2. In the current year, the agricultural situation has been unfavourable in Rajputana, the United Provinces and the Deccan Districts of Bombay. This has necessitated extensive remissions and suspensions of Land Revenue in parts affected and has also involved some expenditure on relief works which will be larger in 1906-1907. Except in parts specially affected by drought, the revenue has come in well and shows signs of continued and healthy development.

3. The Revised Estimate shows a surplus of £1,755,700, being £851,900 larger than in the Budget Estimate. Revenue has increased by £1,396,500, and Expenditure is less by £906,100 giving a gross improvement of £2,302,600. Of this, however, £1,450,700 is in the Provincial and Local section, £400,000 of it being due to initial grants in connection with the new Provincial settlements with the Central Provinces and Eastern Bengal and Assam. The Railway Revenue Account and Mint show net improvements of £461,300, and £202,400, respectively. Increases of revenue also occur under Salt £76,700, Stamps £60,400, Excise £210,400, Other Principal Heads (chiefly Forest) £197,400, Interest £139,700, and Army £150,300. Land Revenue and net Irrigation revenue show decreases of £440,000 and £118,000. These give a net improvement of £940,600. Important decreases of expenditure are under Army £842,000, due mainly to charges for new artillery and stores being thrown forward to next year, Civil Departments £237,600, principally under Police, Education and Scientific Departments, Other Public Works £256,900, and Special Defences £61,200. Minor differences under other heads give a net worseness of £35,700.

4. The Budget Estimate of 1906-1907 shows a surplus of £874,100, which would have been £1,687,500 but for provision of £813,400 for the five following measures. First three are administrative improvements, namely, additional grant for police reform, £166,700; second, addition of £26,700 to current year's grant of £133,300 for agricultural and veterinary improvement; and third, grant for technical and European education, £33,300. Total of these three is £226,700. Fourth, by far the most important, provides at a cost of £547,900 for the repeal of the Patwari cess in Northern India and the Central Provinces, Ryotwari Village Service cess in Madras, Village Officers' cess in Coorg, and Zemindari Dāk cess in Bengal and Eastern Bengal: charges hitherto defrayed from these cesses will in future be borne by Government. Fifth is relief, at a cost of £38,800, of District Boards from contributions hitherto paid for district post in Northern India, Burma, Central Provinces and Coorg, and of District Boards in United Provinces from some small school and establishment charges. Total Estimate of Revenue is £86,495,100 and of Expenditure charged against Revenue £85,621,000. On the assumption that seasons next year will be normal, development of revenue, as compared with Revised Estimate, is anticipated under almost all heads except Opium in which, in view of recent decline in prices, a falling-off of £659,400 is provided, price of Bengal opium being taken at ₹1,125 per chest, and Provincial Rates which is £513,300 less owing to remission of cesses mentioned above. Railway Revenue is £1,496,400 higher and charges £1,292,600 more—net improvement £203,800 over Revised—Land Revenue, after allowing for remissions and suspensions in the United Provinces and Bombay

consequent on famine, is £735,500 more, considerable improvements being expected in Burma, United Provinces, Punjab and Bombay. Other improvements of revenue are Salt £63,300, Stamps £103,000, Excise £163,800, Customs, which show some drop in Revised, £139,300, and Irrigation Receipts £297,500. Other minor differences, chiefly under Interest and Mint, give net decrease of £160,500. Total increase of revenue is £1,665,600. Total increase of gross expenditure is £3,705,200, but of this £1,077,600 or £1,158,000 more than in the current year will be met from Provincial balances. The only decrease is in Interest charges £139,000; almost all other heads show increase, important items being Direct Demands on Revenue £287,300, chiefly Land Revenue; Salaries and Expenses of Civil Departments £1,140,600; Other Public Works £421,500; Army £406,400. Other minor differences give increase of £295,800. Chief items of increase under Salaries and Expenses of Civil Departments are—Police £410,100, Education £317,400 and Scientific and Minor Departments £151,200. Of the increase under Other Public Works, £91,500 is under Military Works and £331,500 under Civil Works. Increase under Army Services is due almost wholly to partial regrant of current year's lapses on grant for new artillery and stores. Total Military expenditure is £21,841,600 against £22,232,500 in this year's Budget and £21,233,800 in Revised. Provision for Famine Relief is £539,100 mainly in Bombay and the United Provinces.

5. For next year, the Capital Expenditure not charged to Revenue is as follows:—Irrigation £833,300, State Railways £7,997,900, net outlay of Railway Companies £2,032,900, or a total of £10,864,100. In addition, £836,000 for the discharge of permanent debt—chiefly Bombay, Baroda and Central India Railway debentures—£456,700 for loans and advances, and £1,030,600 for the net payment under Deposits and Remittances have to be found. The total requirements are thus £13,187,400, of which £2,785,500 will be met from capital to be raised by Railway Companies, £608,000 from savings bank deposits, £874,100 from the Revenue surplus, and £5,000,000 from loans of two millions sterling in England and four-and-a-half crores of rupees, or £3,000,000 in India. The cash balances will provide the remainder, £3,919,800, and they will stand at £12,305,770 in India and £5,218,981 in England on the 31st March 1907.

6. The Railway programme for next year stands thus:—Open lines including rolling stock £5,940,600, Lines under construction £3,592,734, Lines to be commenced next year £466,666. Total £10,000,000.

7. Council Bills for the Secretary of State's requirements next year are £17,800,000, but additional Bills will be sold, if needed, to meet the demands of trade.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 21st March 1906.

From the 7th April next till further notice, Parts I, IV, V, and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 31st March all Notifications and other matter intended for publication in those Parts should be addressed to the Officating Publisher at Simla.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's Gazette, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's Gazette. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next Gazette."

J. P. HEWETT,
Secretary to the Government of India.

- No. 380 of 1905.—Carl Nielsen, manufacturer, of Oerstedsvej, 20, Copenhagen, in the kingdom of Denmark. *Improvements in valves for pneumatic tyres, pumps, and the like.* (Specification filed 9 March 1906.)
- No. 428 of 1905.—The Ozonized Oxygen Company, Limited, of 20 Mount street, Manchester, in the county of Lancaster, England. *An improved process for bleaching or sterilising and apparatus therefor.* (Specification filed 13 March 1906.)
- No. 449 of 1905.—W. and F. Walker, Limited, manufacturers, and Joseph Thomas Freestone, manufacturing chemist, all of African House, 6 Water street, Liverpool, in the county of Lancaster, England. *Improved sanitary disinfecting and deodorising blocks.* (Specification filed 9 March 1906.)
- No. 490 of 1905.—Robert Haylock Owen, Lieutenant-Colonel of New Zealand Militia, of Wellington, in the colony of New Zealand. *Improved appliances for use in ascertaining distances and altitudes, the same being particularly applicable in range finding.* (Specification filed 13 March 1906.)
- No. 507 of 1905.—William Morris Mordey and Guy Carey Fricker, electrical engineers, both of 82 Victoria street, in the city of Westminster, England. *Improvements in electricity meters.* (Specification filed 9 March 1906.)
- No. 572 of 1905.—George Plummer Campbell, merchant, of The Croft, Freshfield, in the county of Lancaster. *Improvements in machinery for making building blocks.* (Specification filed 9 March 1906.)
- No. 47 of 1906.—Nicholas Forde Johnson, engineer, of 3 Westhorpe street, Putney, in the county of London, England. *Improvements in and relating to the furnaces of steam boilers.* (Specification filed 8 March 1906.)
- No. 55 of 1906.—Edmund Percy Wells, civil engineer, of 94 Larkhall Rise, Clapham, in the county of London, England. *Improvements in reinforced concrete construction.* (Specification filed 13 March 1906.)
- No. 56 of 1906.—Serge Berditschewsky Apostoloff, engineer, of 93 and 94 Upper Thames street, London, England. *An improvement in separating and utilizing the floury constituent of middlings and the like.* (Specification filed 13th March 1906.)

No. 1259 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

- No. 319 of 1894.—James Gresham and Harry Edward Gresham. *Improvements in injectors and connected apparatus for feeding steam boilers with water.* (From 25 March 1906 to 25 March 1907.)
- No. 4 of 1895.—Ebenezer Benton Beecher and Jacob Pulver Wright. *Improvements in and relating to machines for making matches.* (From 23 March 1906 to 23 March 1907.)

- No. 382 of 1896.—Mephan Ferguson. *Improved means for joining the edges of metal plates or sheets to each other, principally useful in the manufacture of pipes.* (From 26 April 1906 to 26 April 1907.)
- No. 140 of 1898.—John Clarke. *Improvements in warp-drawing machines.* (From 22 March 1906 to 22 March 1907.)
- No. 195 of 1899.—Dadabhoy Pestonji Mistry. *An improved feeding device for cotton gins.* (From 31 March 1906 to 31 March 1907.)
- No. 284 of 1899.—The Oxyliquit Gesellschaft Mit Beschränkter Haftung. *A new explosive compound.* (From 17 March 1906 to 17 March 1907.)
- No. 310 of 1899.—John Walter Ottley and Henry Vero Biggs. *Improvements in fittings and attachments for coats, jackets, military tunics, and the like.* (From 17 March 1906 to 17 March 1907.)
- No. 325 of 1899.—Anton Pollak, Joseph Virag, Julius Egger, and Dr. Friedrich Silberstein. *Improved method and apparatus for rapidly transmitting and recording telegrams.* (From 12 March 1906 to 12 March 1907.)
- No. 331 of 1899.—John James Marsland. *An improved seat and shoot for a latrine or privy to be called "the Aryan combined privy seat and shoot."* (From 13 March 1906 to 13 March 1907.)
- No. 441 of 1899.—John Walter Ottley. *Improvements in covers for the barrels of small arms.* (From 21 March 1906 to 21 March 1907.)
- No. 153 of 1902.—Louis Bernhard Baron. *Improvements in apparatus for manufacturing cigarettes.* (From 29 May 1906 to 29 May 1907.)

No. 1260 P.—AN application for an extension of the term of exclusive privilege in respect of the undermentioned invention has been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act:—

- No. 13 of 1893.—William Bull. *An improvement in burning bricks and tiles.* (Specification filed 13th March 1893.)

No. 1261 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling, and using the said inventions in British India, and of authorising others so to do, has ceased:—

- No. 142 of 1901.—Max Bernstein. *An improved arrangement for transmitting telegraphic messages in contrary directions simultaneously over a single wire.* (Specification filed 10 December 1901.)
- No. 154 of 1901.—The Linotype Company, Limited. *Improvements in the means for holding late linotypes in position upon the machine cylinder.* (Specification filed 11 December 1901.)
- No. 212 of 1901.—The Cotton Seed Company, Limited. *Improvements in or relating to the bleaching of oleaginous matter.* (Specification filed 10 December 1901.)
- No. 213 of 1901.—The Cotton Seed Company, Limited. *Improvements in or relating to apparatus for bagging or packing meal and the like.* (Specification filed 10 December 1901.)
- No. 360 of 1901.—Robert Oxlade and William Joseph White Richardson. *Improvements in audible electric telegraphy.* (Specification filed 12 December 1901.)
- No. 367 of 1901.—Joseph Anderson. *An improved collapsable canopy for cycles and other vehicles which may also be adapted for a sail for cycles.* (Specification filed 11 December 1901.)

Fee in respect of the continuance of an exclusive privilege—

- 4 (a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of Rs 50 for each of the above inventions.

- No. 125 of 1900.—James Simpson and Company, Limited. *Improvements in the construction of cupolas and the like.* (Specification filed 13 December 1900.)

No. 127 of 1900.—James Simpson and Company, Limited. *Improvements in the construction of cupolas and the like.* (Specification filed 13 December 1900.)

Fee in respect of the continuance of an exclusive privilege—

4 (b) After the expiration of the fourth year and before the expiration of the fifth year from the date of the filing of the specification—

The sum of Rs 50 for each of the above inventions.

No. 84 of 1898. William James Hadden. *Crushing and whitening common bay salt, and converting it thereby into salt to all appearance like Cheshire or Liverpool salt.* (Specification filed 13 December 1899.)

No. 266 of 1899.—The Westinghouse Brake Company, Limited. *Improvements in draw-gear and buffing apparatus.* (Specification filed 15 December 1899.)

Fee in respect of the continuance of an exclusive privilege—

4 (c) After the expiration of the fifth year and before the expiration of the sixth year from the date of the filing of the specification—

The sum of Rs 50 for each of the above inventions.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. A consolidated index for the year 1905, entitled "Inventions and Designs in 1905" is also on sale, price one rupee. It contains a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in that year, together with lists of designs applications.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 10th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or, if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo. volumes, paper cover, 13 annas or 1s. 1d. Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions
and Designs Act, V of 1888.

THE HONOURABLE THE RESIDENT IN MYSORE.

NOTIFICATIONS.

Bangalore, the 19th March 1906.

No. 10.—Whereas by the Notification of the Government of India in the Foreign Department, No. 2252 I., dated the 7th August 1883, the Indian Christian Marriage Act, 1872, was with certain modifications declared to apply to the Civil and Military Station of Bangalore, so far as regards marriages between persons, one of whom is a Native Christian subject of Mysore, and neither of whom is a Christian British subject.

In exercise of the powers conferred by sections 6 and 9 respectively of the Act, the Honourable the Resident in Mysore is pleased—

- (a) to grant a license to the Reverend Arthur Robert Slater of the Wesleyan Mission to solemnise marriages within the territories included in the Civil and Military Station of Bangalore; and
- (b) to grant a license to the said Reverend Arthur Robert Slater to grant certificates of marriage within the territories included in the Civil and Military Station of Bangalore between Native Christians, one of whom is a Native Christian subject of Mysore, and neither of whom is a Christian subject of His Majesty.

No. 11.—In exercise of the powers conferred by sections 6 and 9 respectively of the Indian Christian Marriage Act, 1872 (XV of 1872), as modified by Act II of 1891, and which have been delegated to him by the Governor-General in Council under section 86 of the Act by Foreign Department Notification No. 3747 I.B., dated the 1st October 1897, the Honourable the Resident in Mysore is pleased:—

- (a) to grant a license to the Reverend Arthur Robert Slater of the Wesleyan Mission to solemnise marriages within the territories of Mysore including the Civil and Military Station of Bangalore; and
- (b) to grant a license to the said Reverend Arthur Robert Slater authorizing him to grant certificates of marriage between Native Christians within the said territories.

The powers hereby conferred are to be exercised only so far as regards Christian subjects of His Majesty.

By order,

R. M. KING,

First Assistant to the Resident in Mysore.

THE HON'BLE THE CHIEF COMMISSIONER OF AJMER-MERWARA.

NOTIFICATION.

No. 54.—Munshi Jalal-ud-din Khan, Deputy Superintendent of Police, is granted 3 months privilege leave, under Article 260 of the Civil Service Regulations, with effect from the 16th March 1906 or such subsequent date as he may avail himself of it.

By order, etc.

F. W. JOHNSTON,
Secretary to the Chief Commissioner,
North-West Frontier Province.

The 19th March 1906.

No. 55.—The following additions and amendments which it is proposed to make to the rules framed in exercise of the powers conferred by section 9 of the Indian Petroleum Act, 1899 (VIII of 1899), and published with North-West Frontier Province Administration Notification No. 198, dated the 8th December 1904, are published for the information of all persons likely to be affected thereby. Notice is hereby given that the said additions and amendments will be taken into consideration on or after the 27th April 1906.

2. Any objection or suggestion which may be received from any person with respect to the said additions or amendments before the date aforesaid will receive consideration —

(1) After Rule 2 the following rule shall be inserted, namely :—

2a. Notwithstanding anything in Rules 2 and 4, licenses for the possession of dangerous petroleum otherwise than in bulk may be granted subject to the following conditions :—

(a) That it is stored in gas-tight tin or galvanized sheet iron, steel or lead plate drums or receptacles containing each not more than 10 gallons and fitted with well-made filling holes and well-fitting screw plugs or fitted with screw cap with metal air-tight undercap and that such drums or receptacles shall be packed in strong wooden cases, the thickness of the wood to be not less than half an inch. Provided that wooden cases shall not be necessary when the drums or receptacles are made of tin, galvanized sheet iron, or steel, and have the following thickness of metal :—

	Not less than.
(1) When the capacity does not exceed 2 gallons	25 B. W. G.
(2) When the capacity exceeds 2 gallons, but does not exceed 4 gallons	22 B. W. G.
(3) When the capacity exceeds 4 gallons	16 B. W. G.

- (b) That an air space of at least one-tenth of its capacity shall be left in each drum or receptacle.
- (c) That the drums or receptacles shall be so substantially constructed and secured as not to be liable except under circumstances of gross negligence or extraordinary accident to be broken or become defective, leaky or insecure.
- (d) That before any vessel containing, or which has contained, dangerous petroleum is repaired by the licensee, or is sent by him to be repaired, that vessel shall, as far as practicable, be cleared of all dangerous petroleum and of all dangerous vapours arising from the same.
- (e) That the building in which petroleum is to be stored shall be constructed of masonry or other unflammable material with terraced, tiled or iron roof and a tiled, paved or earthen floor.
- (f) That the doorways and other openings of such buildings shall be built up to such a height above the level of the road or street or the floor shall be sunk to such a depth below the level of the road or street, that the petroleum stored in it cannot flow out of the building in the case of its escape from the receptacles in which it is contained, or the building itself shall be surrounded with a masonry wall or embankment sufficiently high to contain all the petroleum in the building in case of its escape therefrom, or a combination of these methods may be adopted.
- (g) That all ventilating openings in the building shall be protected by strong wire gauze.
- (h) That no smoking or light or fire of any description shall be permitted at any time within or near any building licensed under this rule.
- (i) That all due precaution shall be taken for the prevention of accidents by fire or explosion and for the prevention of unauthorised persons having access to any dangerous petroleum or to any vessels containing or intended to contain or having actually contained the same.
- (j) That every person managing or employed on or in connection with any such licensed place of storage shall abstain from any act whatever which tends to cause fire or explosion and which is not reasonably necessary and shall prevent any other person from doing such act.
- (k) That the store-house shall be liable to inspection by the officers authorized on this behalf, under Rule 6 (1).
- (l) That no drum or other receptacle containing dangerous petroleum shall be opened or the petroleum drawn off within the room in which the stock of petroleum is kept.
- (m) That the filling or replenishing of any vessels with dangerous petroleum shall not be carried on, nor shall the contents of any such vessel be exposed in the

presence of fire or artificial light except a light of such strength, position and character as is not liable to ignite any inflammable vapour arising from the dangerous petroleum, and that no artificial light shall be brought within dangerous proximity of the place where any vessel containing dangerous petroleum is kept.

- (n) That the following distances are kept clear from the protected works round the place of storage :—

Quantity to be stored.	Distances to be kept clear when dangerous petroleum is stored in drums of not greater capacity than 4 gallons.	Distances to be kept clear when dangerous petroleum is stored in drums of capacity exceeding 4 gallons, but not exceeding 10 gallons.
Gallons.	Feet.	Feet.
Not exceeding 1,000	25	30
From 1,000 to 5,000	40	50
Do. 5,000 to 10,000	60	70
Do. 10,000 to 15,000	90	100
Do. 15,000 to 20,000	130	150
Do. 20,000 to 30,000	180	200
Do. 30,000 and over	200	200

- (o) Provided that when the quantity to be possessed does not exceed 40 gallons the provisions of sub-rules (e), (f) and (n) shall not apply, but the licensee shall observe the following conditions :—

- (i) That the store-house or building in which the dangerous petroleum is stored shall be well ventilated and constructed of un inflammable material, provided however that the doors and windows May be of wood.
- (ii) That the store-house shall have a separate entrance from the open air distinct from any building or dwelling in which persons assemble and that where such store-house forms part of or is attached to another building and when the intervening floor or partition is of an unsubstantial or inflammable character or has openings therein, the whole of such building shall be deemed to be the store-house and no portion of such store-house shall be used as a dwelling-house or as a place where persons assemble.

- (2) In rule 3 for the words " Rule 2 " the words " Rules 2 and 2a " shall be substituted.

- (3) In rule 6(1) before the words " the District Magistrate " the words " the Chief Inspector of Explosives, the Inspector of Explosives " shall be inserted.

- (4) (a) In Rule 8 for the scale of fees payable for licenses for the possession of dangerous petroleum the following shall be substituted, namely :—

	R
Where the quantity to be kept does not exceed 40 gallons.	3
Where the quantity to be kept exceeds 40, but does not exceed 500 gallons.	8
Where the quantity to be kept exceeds 500, but does not exceed 1,000 gallons.	12
Where the quantity to be kept exceeds 1,000, but does not exceed 5,000 gallons.	12 plus Rs extra for every 1,000 gallons or part thereof in excess of 1,000 gallons.
Where the quantity to be kept exceeds 5,000, but does not exceed 50,000 gallons.	20 plus Rs extra for every 1,000 gallons or fraction thereof in excess of 5,000 gallons.
Where the quantity to be kept exceeds 50,000 gallons.	250

- (b) In the scale of fees payable for licenses for the possession of petroleum other than dangerous petroleum for the last item shall be substituted :—

	R
Where the quantity to be kept exceeds 50,000 gallons.	250

- (5) For Rule 9(1) the following rule shall be substituted, namely :—

(9) (1) Dangerous petroleum shall not be transported in bulk and it shall not be carried in receptacles other than of the following description, namely, in gas-tight tin or galvanized sheet iron, steel or lead plate drums or receptacles containing each not more than 10 gallons and fitted with well-made filling holes and well-fitting screw plugs or fitted with screw cap with metal air-tight undercap. Such drums or receptacles shall be packed in strong wooden cases, the thickness of the wood to be not less than half an inch. Provided that

wooden cases shall not be necessary when the drums or receptacles are made of tin, galvanized sheet iron, or steel, and have the following thickness of metal :—

	Not less than
(1) When the capacity does not exceed 2 gallons	25 B. W. G.
(2) When the capacity exceeds 2 gallons, but does not exceed 4 gallons	22 B. W. G.
(3) When the capacity exceeds 4 gallons	16 B. W. G.

An air space of at least one-tenth of its capacity must be left in each drum or receptacle.

The drums or receptacles shall be so substantially constructed and secured as not to be liable except under circumstances of gross negligence or extraordinary accident to be broken or become defective, leaky or insecure. Licenses for the transport of dangerous petroleum shall be special or general.

(6) In Rule 10 for the words "other than," in the first sentence, the word "including" shall be substituted.

(7) In Rule 11 (1) (f) after the word "petroleum" where it first occurs the words "other than dangerous petroleum and" shall be inserted.

(8) After Rule 11 (1) (f) the following rule shall be inserted :—

"(g) When the pass is granted for the transport of dangerous petroleum, the petroleum must be contained in receptacles of the description detailed in Rule 9 (1) and packed in the manner therein described."

(9) In Rule 16 before the words "The District Magistrate," the words "The Chief Inspector of Explosives, the Inspector of Explosives" shall be inserted.

(10) For Rule 17 the following rule shall be substituted, namely :—

17. The following fees shall be charged for licenses for the transport of petroleum, namely :—

Licenses for the transport of dangerous petroleum.

	R
Where the quantity to be transported does not exceed 40 gallons.	2
Where the quantity to be transported exceeds 40, but does not exceed 480, gallons.	2 for the first 40 gallons plus 8 annas for every additional 40 gallons or part thereof.
Where the quantity to be transported exceeds 480 gallons.	8 plus R 2 for every additional 480 gallons or part thereof.
General license for the transport of dangerous petroleum.	100

Special licenses for the transport of other petroleum.

	R
Where the quantity to be transported exceeds 500 gallons, but does not exceed 5,000 gallons	1
For every additional 5,000 gallons or part of 5,000 gallons	1
General license for the transport of petroleum other than dangerous petroleum	100

(11) In Rule 21 for the word "two" the word "four" shall be substituted.

(12) After Rule the following rule shall be inserted, namely :—

"24A. Holders of special licenses in Form H may be granted also on payment of a fee of R 5, general licenses in Form I, to transport petrol otherwise than on a motor vehicle. Such licenses, which will be granted under the signature of the Assistant Secretary to the Chief Commissioner, North-West Frontier Province, shall have currency for a period of one year from the date of their issue; and shall, subject to the rules and conditions thereon endorsed, authorize the holders to transport petrol by road, by rail, or by water, up to a maximum of 60 gallons on each occasion."

(13) In Rule 25 for the words "and 23" the words "23 and 24-A" shall be substituted.

(14) After Form H the following forms shall be inserted :—

Form I.

General license to transport petrol granted to the holder of a special license (in Form H) No.

No. 1112.—Whereas the authorities of the Cantonment of Dera Ismail Khan with the sanction of the Government of India have agreed with the Committee of the Dera Ismail Khan Municipality that the same octroi limits shall be established for the Cantonments and Municipality and that the gross receipts (less cost of collection and refunds) shall be divided between the Cantonment fund and Municipal fund and whereas the following bye-law has been framed by the Municipal Committee of Dera Ismail Khan under the provisions of section 143, clause (3), of the Punjab Municipal Act, XX of 1891, and has been confirmed by the Chief Commissioner under section 146 (1) of the said Act, the said bye-law is hereby published for general information. The bye-law will come into force from the 1st April 1906.

Bye-law.

The octroi limits for the purpose of collecting the octroi tax within the Dera Ismail Khan Municipality and Cantonments limits shall be the following, *vis.*, the external limits of the Dera Ismail Khan Municipality and Cantonments combined.

The 15th March 1906.

No. 1214.—Whereas it appears to the Chief Commissioner, North-West Frontier Province, that land is required by Government for a public purpose, namely, extension of existing camping ground at Abbottabad.

It is hereby declared that the undermentioned land is required for the said purpose :—

Specification of land.

District.	Pargana.	Mauza.	Area in acres.	Direction.	Boundaries.	Place where the plans may be inspected.
Hazara	Abbottabad	Abbottabad	12.55	...	North—Old Cantonment boundary. East—Prolongation of the east boundary of latrine trenching ground. South—Field (belonging to Jehangir Baksh) between nullah and houses. West—East boundary of Sohan Lal's compound.	Abbottabad.

This declaration is made under the provision of section 6, Act I of 1894, and under section 7 of the said Act, the Deputy Commissioner, Hazara, is hereby directed to take order for the acquisition of the land specified above.

M. F. O'DWYER,

Revenue and Financial Secy. to the Hon'ble
the Agent to the Governor-Genl. and Chief
Commissioner, N.-W. Frontier Province.

* Agents for sale of the Legislative Department publications

NOTICE.—Books and Acts required for private use only can be purchased. Applications should be
accompanied by a remittance, unless it is wished that the books should be sent by value-payable post, in
which case, besides the ordinary postage, an additional charge is made for registration and commission.

Books and Acts required for the public service should be obtained through Local Governments to
whom the applicant is subordinate.

Application for Government publications which are no longer in print should be made to the Agents
of the particular Government under whose orders they were originally issued.

The amounts within parentheses are for packing and postage.

PART IV.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of the Governor General on the 21st March 1906, and is hereby promulgated for general information:—

ACT NO. IV OF 1906.

An Act further to amend the Presidency Small Cause Courts Act, 1882.

WHEREAS it is expedient further to amend the Presidency Small Cause Courts Act, 1882; It is hereby enacted as follows:—

1. This Act may be called the Presidency Small Cause Courts Act, 1906.

2. In section 28 of the Presidency Small Cause Courts Act, 1882, after the words "such decree" the words "and for the purpose of deciding all questions arising in the execution of such decree" shall be inserted.

3. In section 39 of the said Act, for sub-section (2) the following shall be substituted, namely:—

"(2) Unless the Judge is of opinion that the application has been made solely for the purpose of delay, the applicant shall be entitled to such order as of right:

Provided that the removal directed by such order shall, unless the Judge otherwise directs, be conditional upon the applicant giving security, to the approval of the Judge, within a reasonable time to be prescribed in the order, for the payment of the amount claimed and of the costs which may become payable by him to the plaintiff in respect of the said suit."

4. For section 69 of the said Act the following shall be substituted, namely:—
Substitution of new section for section 69 of same Act.

"69. (1) If two or more Judges of the Small Cause Court sit together in any suit, or in any proceeding under Chapter VII of this Act, and differ in their opinion as to any question of law or usage having the force of law or the construction of a document, which construction may affect the merits, or

if in any suit or any such proceeding, in which the amount or value of the subject-matter exceeds five hundred rupees, any such question arises upon which the Court entertains reasonable doubt, and either party so requires,

the Small Cause Court shall draw up a statement of the facts of the case and the point on which there is a difference of opinion or on which doubt is entertained, and refer such statement with its own opinion on the point for the opinion of the High Court; and the provisions of sections 519 to 621 of the Code of Civil Procedure shall, so far as they are applicable, be deemed to apply as if such

XIV of 18

reference had been made under section 617 of the said Code.

(2) When the Small Cause Court refers any question for the opinion of the High Court as provided in sub-section (1), it shall either reserve judgment or give judgment contingent upon such opinion."

5. In No. 11 of the second schedule to the Indian Limitation Act, 1877, after the words "the Code of Civil Procedure," the following shall be inserted, namely:—"or section 28 of the Presidency Small Cause Courts Act, 1882."

J. M. MACPHERSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of the Governor General on the 21st March 1906, and is hereby promulgated for general information:—

ACT NO. V OF 1906.

An Act further to amend the Indian Stamp Act, 1899.

WHEREAS it is expedient further to amend the Indian Stamp Act, 1899; It is hereby enacted as follows:—

1. This Act may be called the Indian Stamp (Amendment) Act, 1906.
Short title.

2. In section 2, clause (19), of the Indian Stamp Act, 1899 (hereinafter referred to as "the said Act"), sub-clause (c), and the word "and" prefixed thereto, are hereby repealed.

3. In section 11, clause (a), section 32, proviso, clause (c), section 35, proviso, clause (a), section 69 and 74, Act II, 1899. 40, section 41, section 69 and section 74, of the said Act, after the words "one anna," wherever they occur, the words "or half an anna" shall be inserted.

4. For section 29, clause (b), of the said Act, the following shall be substituted, namely:—
Substitution of new clause for clause (b) of section 29, Act II, 1899.

"(b) in the case of a policy of insurance other than fire-insurance—by the person effecting the insurance;

(bb) in the case of a policy of fire-insurance—by the person issuing the policy;".

5. To section 30 of the said Act the following paragraph shall be added, namely:—
Addition to section 30, Act II, 1899.

"Any person receiving or taking credit for any premium or consideration for any renewal of

any contract of fire-insurance, shall, within one month after receiving or taking credit for such premium or consideration, give a duly stamped receipt for the same."

6. In section 51 of the said Act, after the word "instruments" the words "by any banker or," and after the word "said" the word "banker," shall be inserted.
Amendment of section 51, Act II, 1899.

7. In Schedule I of the said Act, the following amendments shall be made, namely:—
Amendments of Schedule I, Act II, 1899.

(1) For clauses (b) and (c) of the exemptions from Article No. 24 the following shall be substituted, namely:—

"(b) Copy of, or extract from, any register relating to births, baptisms, namings, dedications, marriages, deaths or burials."

(2) In clause (b) of Article No. 41, for the words "one year" the words "eighteen months" shall be substituted.

(3) For divisions A and B of Article No. 47 the following shall be substituted, namely:—

	If drawn singly.	If drawn in duplicate, for each part.
"A.—SEA-INSURANCE (see section 7)—		
(1) for or upon any voyage—		
(i) where the premium or consideration does not exceed the rate of two annas or one-eighth per centum of the amount insured by the policy;	One anna.	Half an anna.
(ii) in any other case, in respect of every full sum of one thousand rupees and also any fractional part of one thousand rupees insured by the policy;	Two annas.	One anna.

	If drawn singly.	If drawn in duplicate, for each part.	" B.—FIRE INSURANCE— (1) in respect of an original policy— (i) when the sum insured does not exceed Rs. 5,000; (ii) in any other case ; and (2) in respect of each receipt for any payment of a premium on any renewal of an original policy.	Eight annas. One rupee. One-half of the duty payable in respect of the original policy in addition to the amount, if any, chargeable under No. 53."
(2) for time— (iii) in respect of every full sum of one thousand rupees and also any fractional part of one thousand rupees insured by the policy— where the insurance shall be made for any time not exceeding six months ; where the insurance shall be made for any time exceeding six months and not exceeding twelve months.	 Two annas. Four annas.	 One anna. Two annas.	 (4) To Article No. 53 the following note shall be added, namely :— " See also POLICY OF INSURANCE [No. 47-B (2)]."	

J. M. MACPHERSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of the Governor General on the 21st March 1906, and is hereby promulgated for general information:—

ACT NO. VI OF 1906.

An Act further to amend the law relating to merchant seamen.

WHEREAS it is expedient further to amend the law relating to merchant seamen; It is hereby enacted as follows:—

1. This Act may be called the Indian Merchant Shipping (Amendment) Act, 1906.

Short title.

2. To section 23 of the Indian Merchant Shipping Act, 1859, the following shall be added, namely:—

"Notwithstanding anything in this section, in the case of any such foreign-going ship as aforesaid, being a ship—

(a) registered in British India under the Merchant Shipping Act, 1894, or

(b) registered in the United Kingdom under the said Merchant Shipping Act, 1894, but not employed in trading with any port in the United Kingdom, a running agreement with the crew may be made to extend over two or more voyages so that it shall terminate either within six

months from the date on which it was executed or on the first arrival of the ship at her port of destination in British India after the expiration of that period, or on the discharge of cargo consequent upon such arrival, whichever of these dates shall be the latest:

"Provided that no such agreement shall continue in force, if, after the expiration of such period of six months as aforesaid, the ship proceeds on a voyage from a port out of British India to any other such port which is not on the direct road or a customary route to her port of destination in British India:

"Provided also that every such agreement shall, in addition to any other particulars required by law, contain such stipulations for the discharge of the crew and payment of their wages, for securing their return to the port at which they were shipped or to some other port in British India, and for other purposes on the termination of the agreement at a port out of British India under the foregoing proviso, as the Governor General in Council may direct."

3. In section 24A of the said Indian Merchant Shipping Act, 1859, as amended by section 2 of 1 of 1859.

Amendment of section 24A, Act I, 1859. amended by section 2 of 1 of 1859. the Indian Merchant Shipping Law Amendment Act, 1891, after the word "December" the words "or, as the case may be, after the expiration of a period of six months from the date on which it was executed," shall be inserted.

J. M. MACPHERSON,
Secretary to the Government of India.

1 of 1859.

PART VI.

Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA,
ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS,
UNDER THE PROVISIONS OF THE INDIAN COUNCILS ACTS,
1861 AND 1892 (24 & 25 VICT., CAP. 67,
AND 55 & 56 VICT., CAP. 14).

The Council met at Government House, Calcutta, on Wednesday, the 21st March, 1906.

PRESENT :

His Excellency the Earl of Minto, P.C., G.C.M.G., G.M.S.I., G.M.I.E., Viceroy and Governor General of India, *presiding*.
His Honour Sir A. H. L. Fraser, K.C.S.I., Lieutenant-Governor of Bengal.
His Excellency General Viscount Kitchener of Khartoum, G.C.B., O.M., G.C.M.G., Commander-in-Chief in India.
The Hon'ble Sir A. T. Arundel, K.C.S.I.
The Hon'ble Sir Denzil Ibbetson, K.C.S.I.
The Hon'ble Mr. H. Erle Richards, K.C.
The Hon'ble Mr. J. P. Hewett, C.S.I., C.I.E.
The Hon'ble Mr. E. N. Baker, C.S.I.
The Hon'ble Major-General C. H. Scott, C.B., R.A.
The Hon'ble Sir Rameshwara Singh, K.C.I.E., Maharaja Bahadur of Darbhanga.
The Hon'ble Rai Sri Ram Bahadur, C.I.E.
The Hon'ble Mr. L. A. S. Porter.
The Hon'ble Mr. L. Hare, C.S.I., C.I.E.
The Hon'ble Mr. H. A. Sim, C.I.E.

The Hon'ble Nawab Fateh Ali Khan, Kazilbash, C.I.E.
 The Hon'ble Mr. Gopal Krishna Gokhale, C.I.E.
 The Hon'ble Mr. A. A. Apcar, C.S.I.
 The Hon'ble Mr. S. Ismay, C.S.I.
 The Hon'ble Mr. W. T. Hall, C.S.I.
 The Hon'ble Mr. A. C. Logan.
 The Hon'ble Nawab Bahadur Khwaja Salimulla of Dacca, C.S.I.
 The Hon'ble Nawab Saiyid Muhammad Sahib Bahadur.

QUESTIONS AND ANSWERS.

The Hon'ble MR. GOKHALE asked :—

" Will the Government be pleased to state how the four members of the Cadet Corps, to whom commissions were granted last year, have been posted, and what are their prospects of being entrusted with regimental duties in the Indian Army?"

HIS Excellency THE COMMANDER-IN-CHIEF replied :—

" The four cadets who were granted commissions are :—

- (1) Wali-ud-din Khan of Hyderabad.
- (2) Aga Casim Shah, nephew of His Highness the Aga Khan of Bombay.
- (3) Bhanwar Amar Singh of Jaipur.
- (4) Zorawar Singh of Bhavnagar.

" The services of Wali-ud-din Khan have been placed at the disposal of the Resident at Hyderabad for employment, at the request of His Highness the Nizam, with the Hyderabad Imperial Service Lancers.

" Aga Casim Shah has been appointed A.-D.-C. to the General Officer Commanding at Poona.

" Bhanwar Amar Singh has been appointed A.-D.-C. to the General Officer Commanding at Mhow.

" The services of Zorawar Singh have been placed at the disposal of the Government of Bombay for employment, at the request of His Highness the Thakur Sahib of Bhavnagar, as Commandant of the Bhavnagar Imperial Service Lancers.

" It is impossible to say at present what is the prospect of these ex-cadets being entrusted with regimental duties in the Indian Army as they have been appointed to Imperial Service Regiments or to the personal staff of General Officers."

The Hon'ble MR. GOKHALE asked :—

" Have the Government of India noticed what has been described in the Press as the boycott of the *Weekly Chronicle* of Sylhet by the Government of Eastern Bengal and Assam? Is it a fact that for publishing in its news columns a report, which that Government regarded as 'a gross mis-statement', and which the Editor declared to be 'more than corroborated by careful inquiries made by him', that paper has been placed under a ban by the Lieutenant-Governor in the matter of official advertisements and official information and publications? Is it true that the Chief Secretary to the Government of Eastern Bengal and Assam has in a communication to the Editor described official advertisements and the supply of official information and publications as 'Government support' to the newspaper, of which the latter has been deprived as a punishment for his not tendering the apology which he was ordered to offer?

" Will the Government be pleased to state why no criminal proceedings were instituted against the Editor, or no official version of the occurrence, in regard to which his report was declared to be a gross mis-statement, published?

" In view of the fact that important questions of principle affecting the status, dignity and independence of the Press in India are involved in such executive action against newspapers, will the Government of India be pleased to state their position generally on the subject, so as to allay all reasonable anxiety? Will they also be pleased to call upon the Government of Eastern Bengal and Assam to re-consider its action against the *Weekly Chronicle*?"

The Hon'ble SIR ARUNDEL ARUNDEL replied :—

"The facts are that the *Sylhet Weekly Chronicle* published a statement that a Gurkha policeman had committed an indecent assault on a sweeper woman at Barisal. On enquiry being made the statement was proved to be false by the deposition of the woman herself supported by that of her husband, and it was further shown that she refused to sign a charge of attempted rape addressed to the Chairman of the Municipality which was drafted for her signature. Copies of these papers are laid upon the table. The Local Government considered that no useful purpose would be served by instituting criminal proceedings and therefore decided to withdraw from the newspaper certain facilities. The Government of India are not prepared to call upon the Local Government to reconsider its action in the matter.

"The Government of India are unable to admit that the status, dignity and independence of the Press in India are in any way affected by the adoption of executive action in cases of specific misconduct as distinguished from adverse criticism of Government measures."

PRESIDENCY SMALL CAUSE COURTS BILL.

The Hon'ble MR. RICHARDS moved that the Report of the Select Committee on the Bill further to amend the Presidency Small Cause Courts Act, 1882, be taken into consideration. He said :—"My Lord, I have on a former occasion explained to the Council the objects of this Bill. It effects three changes, small in themselves, but not unimportant, relating to the power of the Small Cause Court to decide certain questions with regard to execution proceedings, to the transfer to the High Court of cases instituted in the Small Cause Court and to references to the High Court. The only change of substance that has been introduced by the Select Committee is that in clause 3 of the Bill, which has been introduced on the recommendation of the Calcutta High Court. It gives a discretion to exempt applicants for transfer from furnishing security which they would otherwise have to furnish. No other change of substance has been made."

The motion was put and agreed to.

The Hon'ble MR. RICHARDS moved that the Bill, as amended, be passed.

The motion was put and agreed to.

INDIAN STAMP (AMENDMENT) BILL.

The Hon'ble MR. BAKER moved that the Report of the Select Committee on the Bill further to amend the Indian Stamp Act, 1899, be taken into consideration. He said :—"My Lord, I do not think I need add anything to the remarks which I made in introducing the Bill in January last, or to those contained in the Report of the Select Committee."

The motion was put and agreed to.

The Hon'ble MR. BAKER moved that the Bill, as amended, be passed.

The motion was put and agreed to.

INDIAN MERCHANT SHIPPING (AMENDMENT) BILL.

The Hon'ble MR. HEWETT moved that the Report of the Select Committee on the Bill further to amend the law relating to merchant seamen be taken into consideration.

The motion was put and agreed to.

The Hon'ble MR. HEWETT moved that the Bill, as amended, be passed.

The motion was put and agreed to.

FINANCIAL STATEMENT FOR 1906-1907.

The Hon'ble MR. BAKER introduced and explained the Financial Statement for 1906-1907. He said :—"My Lord, I beg to present the Financial Statement for the ensuing year 1906-1907. In doing so, I propose, with Your Lordship's permission, to follow the course adopted last year, *i.e.*, instead of reading out the Statement *in extenso*, I shall merely lay it on the table, and shall give a brief verbal account of those portions of it only which are likely to be of general interest.

"In certain parts of India, especially Rajputana, the United Provinces and the Deccan Districts of Bombay, the year now drawing to a close has been less favourable than those which immediately preceded it. The Arabian Sea branch of the monsoon was late in arriving, and the rainfall was irregular and deficient in amount. This was followed by serious delay in the winter rains in Northern India; and though these eventually came and greatly relieved the situation, they were too late wholly to save the unirrigated crops. Famine conditions have been declared to prevail in 10 British districts and several Native States, and at one time 360,000 persons were in receipt of relief. These misfortunes have led us to make extensive remissions and suspensions of the land revenue in the parts affected, and have also involved some expenditure on relief works.

"In the greater part of India, however, the seasons have, on the whole, been favourable and the harvests generally good; and except in the tracts especially affected by drought the revenue has come in well, and shows signs of continued and healthy development.

"A year ago we estimated that we should have a surplus of 136 lakhs of rupees. We now expect to have a surplus of 263 lakhs, the improvement being 127 lakhs. The main causes of this are as follows :—

	Lakhs.
(1) Our Railway earnings have expanded beyond our expectations, the <i>net</i> revenue account having exceeded the estimate by	69
(2) Our revenues generally have continued to develop, with the exception of Land Revenue. Customs and Irrigation, the aggregate improvement being	89
(3) There has been a large reduction in Military expenditure, mainly owing to the failure of the home authorities to provide the new artillery and stores budgeted for: the saving amounts to	149
and (4) There have been net savings of expenditure under other heads, mostly Police, Education and Civil Works, aggregating	38
These four causes of improvement have aggregated	345

On the other hand we have drawn upon Provincial and Local balances to the extent of 218 lakhs less than we anticipated; the net betterment thus amounting to 127 lakhs.

"During 1906-1907 we anticipate that, if the seasons are normal, our revenue will continue to develop under all heads except opium, in which, in view of the unfavourable prices obtained at recent sales, we expect a falling-off of 99 lakhs. In the Civil Administration we have provided for the normal growth of expenditure, and have also assumed that the Provincial Governments will be able to make up some of the ground which they failed to cover this year. But in view of the present agricultural situation, we do not consider ourselves justified in embarking upon any new projects involving considerable recurring expenditure, other than those to which I shall presently refer.

"For Military expenditure, in view of the heavy charge which has been thrown forward from the current year, we have made a special re-grant of a part of the lapse, to the amount of 40 lakhs, which is of course non-recurring. The total Military Budget is less than that of the current year by 58½ lakhs.

"On the present basis of taxation and expenditure, we estimate that in 1906-1907 we should have had a surplus of 253 lakhs of rupees; and we have decided to apply 122 lakhs of this to the remission of taxation, to the relief of

local bodies, and to the provision of funds for carrying out a modest programme of administrative improvement. More than two-thirds of the whole amount will be devoted to the relief of the agricultural tax-payer, who we consider has the strongest claim on our resources on the present occasion. The measures we propose are five in number and are as follows :—

- (1) We abolish the patwari cess and village officers' cess which are now levied in Madras, the Central Provinces, the United Provinces, the Punjab and the North-West Frontier Province, and in Ajmer and Coorg; we also abolish the zemindari dak cess in Bengal and the districts transferred to the new province. The charges hitherto defrayed from these cesses will in future be borne by Government. The total sacrifice of revenue occasioned by this measure is rather more than 82 lakhs of rupees per annum.
- (2) We discontinue the practice of making certain petty appropriations from local funds for Provincial purposes in the Provinces of Northern India, and in Burma and the Central Provinces. The practice does not obtain in other parts of India. The cost of this measure is a little under 6 lakhs per annum, and the District Boards concerned will benefit to that extent.
- (3) We make a further grant of 25 lakhs per annum for the reform of the Police in addition to the grant of 50 lakhs made for this purpose last year.
- (4) We raise the grant of 20 lakhs per annum which was made last year for agricultural improvement to 24 lakhs per annum; and
- (5) We make a grant of 5 lakhs per annum for education, of which approximately one-half will be devoted to technical education, and one-half to the education of Europeans and Eurasians.

The total cost of these five measures is—

	Lakhs.
Remission of taxation	82
Transfer to the local taxation account	6
Grants for police, agriculture and education	34
TOTAL	122

After providing for these requirements, we estimate that our revenue will amount to 129 crores 74 lakhs, and our expenditure to 128 crores 43 lakhs; and that we shall have a surplus of 131 lakhs of rupees.

"We have provided nearly 81 lakhs for expenditure on famine-relief, and have also made provision for the remission and suspension of land revenue in those provinces which are suffering from famine.

"For capital expenditure on Railways we have provided the large sum of 15 crores of rupees, of which about three-fifths are for the requirements of open lines, including 382 lakhs for rolling stock. For Irrigation Major Works we have provided 125 lakhs, which is as much as there is any likelihood of our being able to spend during the year.

"We have now no floating sterling debt, the whole outstanding balance having been paid off during the current year.

"We propose to raise a loan of 2 millions sterling in England, and one of 4½ crores of rupees in India, for capital expenditure on productive public works.

"The present intention of the Secretary of State is to draw bills on India next year to the amount of £17,800,000, but additional bills will as usual be sold, if needed, to meet the demands of trade. These announcements are made subject to the usual reservation."

The Council adjourned to Wednesday, the 28th March, 1906.

J. M. MACPHERSON,

*Secretary to the Government of India,
Legislative Department.*

CALCUTTA;

The 22nd March, 1906.

SUPPLEMENT TO
The Gazette of India.

No. 12.} CALCUTTA, SATURDAY, MARCH 24, 1906.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

FINANCIAL STATEMENT FOR 1906-1907.

PART I.

Preliminary.

I beg to lay on the table the Financial Statement for 1906-1907, together with the usual figures relating to the accounts of 1904-1905, and the Revised Estimates of 1905-1906.

2. The year now drawing to a close has in certain important Provinces been less favourable than those which immediately preceded it. The Arabian Sea monsoon current was late in arriving, and the total autumn rainfall was much below the normal in the United Provinces, the Punjab, the Deccan districts of Bombay, and Rajputana. In parts of Madras also there was at one time a serious deficiency in the rainfall, but this was made good by favourable rains in the cold weather. The partial failure of the monsoon was unfortunately followed by great delay in the winter rains of Northern India, and though these eventually came, and greatly relieved the situation, they were too late to save a large proportion of the unirrigated crops. Famine conditions have been declared to exist in ten British districts and in several States of Rajputana, and by the end of February, over 360,000 persons in all were in receipt of relief. These untoward events necessitated liberal remissions and suspensions of revenue, and expenditure on famine relief, which will affect both the current year, and also 1906-1907.

3. In the rest of India the seasons were on the whole favourable, and the harvests generally good. Our revenue has come in well, and shows signs of continued and healthy development; and if the rainfall of next season should be normal, we may look forward to the restoration of prosperity in those tracts which are now unhappily suffering. After making adequate provision for famine relief, and for the effect of the drought on our land revenue, we estimate that on the present basis of taxation and expenditure, we should have had in 1906-1907 a revenue surplus of £1,687,500. This is in excess of our needs, and we have accordingly decided to carry into effect certain reductions of taxation and transfers to the Local taxation account which are estimated to absorb £586,700 per annum. Almost the whole of this sum will be devoted to relieving the burdens of the agricultural tax-payer. An account of the particular measures to be adopted will be found in paragraphs 41 to 45 of the Financial Statement.

4. In view of the present agricultural situation, it would not have been prudent to embark on any important new schemes of administrative reform involving large recurring expenditure. We have therefore limited our proposals in this direction to three measures, of which the most considerable is one to which we are already committed, while the other two do not involve large present outlay and are deemed to be of pressing importance. These projects are estimated to cost us £226,700 a year, and an account of them will be found in its proper place.

5. The effect of these measures taken together is to diminish our revenue or increase our expenditure in the aggregate by £813,400, thus reducing the estimated surplus of the ensuing year to £874,100.

6. I now present the figures for the three years, reduced to their simplest form, and excluding Capital, Debt, and Remittance transactions. They are as follows:—

	1904-1905 (Accounts).
	£
Revenue	84,812,971
Expenditure charged against Revenue	81,356,905
	<hr/>
Surplus	3,456,066
	<hr/>

	1905-1906 (Revised Estimate).
Revenue	£ 84,829,500
Expenditure charged against Revenue	83,073,800
Surplus	1,755,700
	1906-1907 (Budget Estimate).
Revenue	£ 86,495,100
Expenditure charged against Revenue	85,621,000
Surplus	874,100

Accounts of 1904-1905.

7. This time last year we estimated that the year 1904-1905 would close with a surplus of £3,485,500. The final accounts agree closely with this, the actual amount being £3,456,066, a shortage of £29,434. The revenue exceeded the Revised Estimate by £113,871, and the expenditure was less by £43,595, but the improvement was confined to the Provincial and Local section of the accounts, which benefited to the extent of £186,900, leaving a net worseness in the Imperial section of £29,434.

8. Under Opium, the weighments in Malwa during March were exceptionally low and resulted in a reduction of £22,501. Excise receipts exceeded the estimate by £51,424, chiefly in Bombay, where, in consequence of a change in the excise year, the fees for retail licenses in the Presidency Town for 20 months were brought to account during the year. There were increases of £40,997 under Forests mainly in Burma, and of £14,000 under Assessed Taxes fairly distributed over the Provinces. Irrigation rose by £39,836, especially in the Punjab and Madras where Land Revenue due to Irrigation improved materially. Under Interest, there was a short receipt of £20,121, the major part of which was due to the non-payment within the year of interest due by the Kalka-Simla Railway. The net Railway revenue account was reduced by £149,062, mainly in consequence of increased working expenses and renewals on the East Indian, Bengal and North-Western, Tirhoot, North-Western, Oudh and Rohilkhand, Rajputana-Malwa and Bengal Nagpur Railways, the charges for which were brought to account in the closing months of the year. Army charges were less than the estimate by £139,006, of which £93,995 was on account of Reorganization. There were also reductions of expenditure amounting to £45,356, under Public Works, Civil and Military, £24,947 under Irrigation (chiefly in Burma and Bengal), and £26,664 under Direct Demands on the Revenues, chiefly in Bombay, partially counterbalanced by small increases under other heads. Taken as a whole, the figures approximate closely to those of the Revised Estimate framed last March, and do not call for special remark.

Revised Estimate, 1905-1906.

9. Last March, we anticipated that the revenue of the year 1905-1906 would amount to £83,433,000, the expenditure chargeable against revenue to £82,529,200, and the probable surplus on the Imperial section of the accounts to £903,800. The results now anticipated are more favourable. The revenue has increased by £1,396,500, while the expenditure chargeable against revenue has also increased by £544,600, and the surplus, as now estimated, will amount to £1,755,700. These results relate, as already stated, only to the Imperial section of the accounts. If we include the Provincial and Local sections, the position is somewhat modified. The figures of revenue, both for the Budget and the Revised Estimates, are unaffected. In regard to expenditure, however, we anticipated a year ago that the total disbursements on revenue account for Imperial, Provincial, and Local taken together would amount to £83,899,500; and we expected that of this sum, the Provincial Governments and local bodies would draw on their accumulated balances to the extent of £1,370,300, the direct charge against current revenue being thereby reduced by an equivalent amount. According to our present estimates, the aggregate expenditure in all three sections will amount to £82,993,400, being less than the budget figure by £906,100.

Instead, however, of having to draw on their balances, the Provincial Governments have increased the latter by £80,400, and as this constitutes a liability against Imperial revenues, it is, in accordance with established practice, charged off at once in the accounts, increasing the expenditure chargeable against the revenue of the year to an equal extent. The causes of the increase in the Provincial balances are set forth below.

10. In the last Financial Statement I explained that an endeavour was being made to attain a higher standard of accuracy in the estimating of our revenue and expenditure. The figures now presented to the Council will show to what extent these efforts have been successful during the past year. The comparison must of course be made with the aggregate revenue and expenditure, disregarding their allocation between Imperial, Provincial, and Local. It will be seen that our total revenue has exceeded the Budget Estimate by £1,395,500, which represents 1·67 per cent on the figure taken last March. On the expenditure side, the total disbursements are now estimated to amount to £905,100 less than in the Budget. This represents a difference of only 1·08 per cent on the original estimate.

11. So far as revenue is concerned, these results are not unsatisfactory: more than half of the increment of revenue occurred in the gross receipts from Railways, in which, if anywhere, a cautious estimate is justifiable. In regard to expenditure, although the percentage of variation from the original estimate is very low, the true result is less successful, for there were large lapses of grants both for civil expenditure in India and for army charges at home, and the net reduction would have been considerably greater than it is had we not applied a portion of the funds thus set free to meeting other charges not provided for in the Budget. Even here, however, there are some grounds for a more favourable view, for the lapse in army charges in England was due to special causes which we hope are not likely to recur. On the whole, I think, it may be said that a fair amount of improvement has been effected: and for the future I can merely repeat the assurance which I gave last year that we shall continue to do our best to eliminate all avoidable sources of error.

12. The following is a statement of the principal heads of Revenue and Expenditure in which the Revised Estimate differs from the figures of the Budget by £30,000 or more. The figures of the Railway Revenue Account and of Irrigation, Post Office and Mint are taken net:—

<i>Revenue.</i>									
DECREASE—									£
Land Revenue	440,000
Customs	39,100
Irrigation	118,000
INCREASE—									
Salt	76,700
Stamps	60,400
Excise	210,400
Other principal heads	197,400
Interest	139,700
Post Office	35,700
Mint	202,400
Railway Revenue Account	461,300
Receipts by Military Department	150,300

<i>Expenditure.</i>									
INCREASE—									
Interest	52,900
DECREASE—									
Civil Departments	237,600
Other Public Works	256,900
Army Services	842,000
Special Defences	61,200

Explanations on all points of importance will be found in the annexed Memorandum by the Financial Secretary. The only matters to which reference need be made here are the following:—

Under Land Revenue, the failure of the monsoon has produced the greatest effect in Bombay and the Punjab, where the falling-off in collections is estimated at ₹22,16,000 and ₹8,70,000, respectively. In the United Provinces the shortage amounted to ₹7,95,000, and would have been larger had not the loss due to the frost of January 1905 been overestimated. In Madras the collections fell short of the Budget

Estimate by ₹23,23,000, but this was due not to the character of the harvests but to the high collections of 1904-1905 which left a comparatively small amount of arrears to be recovered in the current year. Smaller shortages are anticipated in Burma, Eastern Bengal and Assam, and Ajmer, but the estimates will be exceeded in Bengal and Berar. In the two provinces chiefly affected by drought remissions of land revenue have been made aggregating ₹80,88,000, while a further sum of ₹86,17,000 is under suspension.

13. Last March the opinion was expressed in some quarters that we had pitched our estimate of Customs revenue for the current year too low. The actual results, however, are far from bearing out this view. The receipts have fallen short of our estimate by £39,100, and the shortage would have been considerably greater but for the increase of the duty on spirits effected by the Tariff Amendment Act in January last. The increase of duty took effect one month after the date of passing the Act, and extensive clearances of stocks took place during the interval, yielding an increase of revenue of £63,300. This will of course tend to reduce the revenue from this source in the ensuing year. Apart from this exceptional item, the chief features of the year were the great and continued development of the receipts from cotton piece goods and from the corresponding excise duty on Indian mills, and the large falling-off under petroleum, and under silver and other metals. The import duty on cotton piece goods yielded £886,700, and the excise duty £183,700, both figures being the highest on record. The latter is now 250 per cent greater than in 1896-1897, the first complete year of its operation, and affords gratifying testimony to the thriving and progressive state of the industry. The falling-off in the duty on petroleum was £73,300, and is due to the stoppage of imports of Russian oil after the destruction of the works at Baku. Its place was taken by Burma oil, which pays no duty. The imports of silver have received a severe check, and the receipts from duty have fallen short of the estimate by £106,700. In the earlier months of the year, the exports of rice were somewhat behindhand, and a shortage in the export duty seemed probable. This has, however, latterly been made good, and the returns will not fall far short of the original estimate. The other variations do not call for special notice.

14. Under Salt, we had made what seemed to be a liberal allowance for the probable increase of consumption due to the reduction of the duty last March. The results have, however, surpassed our anticipations. By the end of February the issues of salt had exceeded those of the corresponding period of the previous year by 14,38,000 maunds, and we now expect that this figure will have risen to 16 lakhs of maunds by the end of the year. This advance follows on a very large increase of 17,86,000 maunds which occurred in 1904-1905, by which time the first reduction of duty made in 1903 had come into full effect. We have recently received an interesting series of reports from the Local Governments on the results of the two successive reductions of the duty in 1903 and 1905. These show that the cumulative reduction of one rupee has been proportionately of greater effect than the preceding reduction of 8 annas; that the cheapening of the retail price, and often the cause to which it is due, have become known even among the humblest classes of the people, so that "even the Bhil woman who takes her salt as a dole with her supply of grain from the bania on bazar days knows that she ought to get about a third more than she used to do;" that a purchase which formerly sufficed for 3 or 4 days now lasts the same family for 5 or 6; that more salt is being given to the cattle; that in some provinces at least the consumption per head has risen by 10 per cent in the last three years; and that the saving per head of the population may be reckoned at about one day's wages of the poorest of the working classes. It must be many years before the revenue which we have sacrificed can be made good by the development of consumption; but in the meantime the results obtained are evidence that our policy has reached the classes whom it was intended to benefit.

15. The weightments of Malwa opium have fallen very short of the estimate and are now calculated at only 16,000 chests, the lowest number for many years past. The loss of revenue on this head is estimated at £209,300. On the other hand, Bengal opium has fetched an average price of ₹1,434 per chest as compared with the estimate of ₹1,400, and the number of chests sold has been raised to 49,200 in place of 48,000, the improvement amounting to £225,400. The net result is a betterness of £12,800 as compared with the Budget.

16. Excise has exceeded the estimate in all provinces except the United Provinces and Burma, the improvement being greatest in the Central Provinces and Berar, Bengal, Madras and Bombay.

17. The increase under Mint receipts represents seigniorage at 2 per cent on larger coinage. The coinage of the year depends on the demands of trade, and it is impossible to foresee with any certainty what amount of new coinage will be required. Last March we assumed that an outturn of 500 lakhs would be necessary, whereas

the actual demand has been exceptionally heavy, and is now estimated to amount to 16,50 lakhs.

18. The earnings of State and Guaranteed Railways continued to expand, though not so rapidly as in 1904-1905. The grain traffic on the North-Western Railway was adversely affected by the failure of the *rabi* crop in Northern India and the rise in local prices, and the net earnings of this important system fell below those of the previous year by £462,500. There was also some falling-off on the East Indian Railway due to diversion of traffic to other lines and increased expenditure on working and maintenance. Most of this, however, will have been made up before the end of the year. On the other hand, the Bengal-Nagpur Railway obtained greatly enhanced receipts chiefly from coal, and its net earnings rose by £239,000. There were also large improvements on the Great Indian Peninsula (£161,100) and Rajputana-Malwa (£142,500) systems, and to a smaller extent on most of the other lines. The net revenue account is behind the figure of 1904-1905 by £80,000, but is in excess of the Budget Estimate for the current year by £461,300. This last sum is no doubt substantial, but it represents little more than $1\frac{1}{2}$ per cent on the gross receipts of our Railways, which now approach the enormous sum of 25 millions sterling.

19. The chief factor in the increase under "Other principal heads of Revenue" was the development of the receipts from Forests which were exceptionally large in Burma, and also to a smaller degree in Bombay. Assessed Taxes also did well in all the principal provinces.

20. The saving under "Civil Departments" was due to the failure of the Local Governments to expend in full their allotments for Police (£203,200), Education (£243,700), Medical (£38,800), and Scientific and Minor Departments (£88,000). This is a matter for regret, but it is chiefly attributable to the fact that specially liberal grants had been made for the initiation of important schemes of administrative reform, and it is a common experience that delay unavoidably occurs in getting these under weigh at the outset. On the other hand, there was an increase of £272,300 under "Political," mainly due to payments aggregating £241,200 on account of the subsidy of the Amir of Afghanistan with arrears. At the time the Budget was under preparation the negotiations with the Amir were still proceeding, and it was considered expedient to make no reference to the matter in the estimates. The lapse under Public Works occurred chiefly in the Punjab, where the Local Government has so far failed to utilise in full the grant made for the improvement of Simla. Expenditure on Military Works also fell short of the estimate by £71,200 chiefly on works connected with Army reorganization.

21. The reduction of expenditure on the Army was mainly due to the inability of the India Office to supply within the year the full amount of stores, and munitions of war required chiefly in connection with the scheme of reorganization. There were also lapses of grants under other heads.

22. Instead of a Provincial and Local deficit of £1,370,300 as estimated, there will be a surplus of £80,400. As already explained, this item does not affect the actual revenue and expenditure, but only its allocation as between Imperial on the one hand, and Provincial *cum* Local on the other. The causes of the alteration were broadly these: in the first place, over and above the allotments made to Provincial in the Budget, we have during the year made two grants of 30 lakhs each to the Central Provinces and Eastern Bengal and Assam with reference to the new Provincial settlements. We have also transferred from the Imperial to the Provincial section three more grants of 7 lakhs, ₹17,20,000 and ₹5,00,000 which were provided in the Budget for expenditure on minor irrigation works, agricultural improvements, and University education respectively. The effect of these transfers was to increase the Provincial resources, at the cost of Imperial, to the extent of ₹89,20,000, or £594,600. Apart from these transfers, the Provincial and Local share of total revenue increased by £50,400 as compared with that which was estimated in the Budget. Their expenditure, on the other hand, as already explained, fell short of what was anticipated by £805,700.

Budget Estimate for 1906-1907.

23. For next year, we estimate that the revenue will amount to £86,495,100, and the expenditure (after allowing for a sum of £1,077,600 which is chargeable against Provincial and Local balances) to £85,621,000, thus leaving a surplus of £874,100.

24. We anticipate that the receipts from Land Revenue will be considerably better than during the current year, in which they have been adversely affected both by the frost of January 1905 and also by the irregularity and delay in the rainfall in some provinces. In the United Provinces it is satisfactory to know that in the opinion of the Local Government the agricultural prospects of the province as a whole are more encouraging than they were at this time last year; and after allowing for remissions and suspensions aggregating ₹31,31,000, we anticipate an increase of ₹36,61,000 over the collections of the current year. In Bombay also, in spite of the adverse conditions prevailing in the Deccan districts, a recovery to the extent of ₹21,92,000 is anticipated, after allowing ₹49,88,000 for remissions and suspensions. Considerable improvements are also expected in Burma where much new land is being brought under settlement, and also in Madras and the Punjab. It will of course be understood that, while due allowance has everywhere been made for existing conditions, these calculations are all based on the assumption that the rainfall of the ensuing year will be normal. Under Opium, we have had to take account of the heavy fall in the prices realized at the last two sales of Bengal opium. Last year, we estimated that the average price obtained would be ₹1,400 a chest, and the actual average has been ₹1,434. The sales in February and March, however, yielded rates of only ₹1,343 and ₹1,258 respectively, and for next year we cannot safely assume a higher average than ₹1,125. This involves a decrease of 111½ lakhs of rupees as compared with the Revised Estimate of the current year. On the other hand, we expect a small recovery in Malwa, where the weighments during 1905-1906 have been the lowest on record: and the net falling-off is estimated at ₹659,400.

25. The consumption of salt and the receipts from the salt duty have continued to expand in a very gratifying manner, and we consider that we shall be justified in assuming that there will be a further increase to the extent of 12 lakhs of maunds during 1906-1907, the increase of revenue being £63,300. The increase of revenue will not be in proportion to the increase of consumption because the receipts of the current year were swollen by credit sales of salt effected before the reduction of the duty in March 1905. Under Stamps and Excise we have allowed for the normal growth of revenue. Under Customs we anticipate a total increase of £139,300 over the receipts of the present year. Of this only £20,000 is attributed to the increased duty on spirits, for the reason stated in paragraph 13 above. It would not be safe to reckon on any increase in the receipts from petroleum, an industry in which duty-free Burma oil is claiming a rapidly growing share. Under other items, however, we consider that a moderate all-round growth may be looked for, especially in view of the somewhat disappointing returns of the current year; and the state of the Indian textile industry warrants us in expecting a further advance in receipts from the cotton excise duty. Under "Other principal heads" we calculate on a loss of £464,300. This occurs almost wholly under the head of "Provincial Rates" where a net reduction of £513,300 is allowed for. The explanation of this will be found in paragraph 44 below: it is wholly due to the reduction of taxation, but for which the head would have yielded a moderate increase of revenue.

26. The only other head of revenue which calls for remark is Railways. Last March, we thought it prudent to assume that the net results of the current year would fall short of the unprecedented figures of 1904-1905. In this we have been justified by the result; but the returns have nevertheless proved considerably better than we anticipated, and there is nothing in existing circumstances to warrant the belief that the revenue from this source will undergo a check in the immediate future. The figures of the past two years, and those which we have decided to take for 1906-1907 are as follows:—

	Actuals, 1904-1905.	Revised Estimate, 1905-1906.	Budget Estimate, 1906-1907.
	£	£	£
Receipts	24,022,465	24,658,200	26,154,600
Charges	21,917,027	22,632,700	23,925,300
Net Revenue . .	2,105,438	2,025,500	2,229,300

27. On the Expenditure side of the account, the only head under which a material reduction is anticipated, as compared with the Revised Estimate of the current year, is Interest, in which we expect a decrease of the charge by £139,000. This is partly due to the progressive transfer of debt from the non-productive to the productive class, but is also due in large measure to higher special charges in the current year which will not recur in 1906-1907.

28. Under almost all other heads, we anticipate an increase of expenditure, as compared with the current year, the more important items being as follows :—

	Increase in 1906-1907, compared with Revised Estimate of 1905-1906.
	£
Direct Demands on the Revenue	287,300
Salaries and Expenses of Civil Departments	1,140,600
Other Public Works	421,500
Army Services	406,400

29. The bulk of the first item will be incurred under the head Land Revenue, and represents increased charges of district administration, spread more or less uniformly over all the principal Provinces. There are also smaller increases under Stamps (chiefly in connection with the supply of the unified stamp); Excise, in the Central Provinces and Burma; and Forests, mostly in the two latter provinces and in Madras.

30. Of the large increase under "Salaries and Expenses of Civil Departments" the greater part occurs under the heads Police (£410,100), Education (£317,400) and Scientific and Minor Departments (£151,200). In all these cases, and especially in the case of Police, the increase is due in part to the additional grants which we have decided to allot, as explained in paragraph 36 below. In large part, however, it is also due to the fact that the Local Governments failed to expend in full the considerable sums assigned to them in the Budget for the current year. Their schemes for utilizing the money have been more completely elaborated during the past twelve months, and we hope that they will make up lost ground during the ensuing year.

31. Of the increase under "Public Works" over three-fourths is on account of Civil Works, mainly in Madras, the Central Provinces, Bengal, and Eastern Bengal and Assam, and in the provinces administered by the Government of India. Under Military Works there is an increase of £91,500 mainly in connection with reorganization of the army.

32. The increase in Military expenditure is almost wholly due to the fact that a very large lapse amounting to £777,100 occurred in 1905-1906 on the grant provided for expenditure in England on new artillery and other stores for reorganization. Of this, a large part represents liabilities which have been definitely contracted, and a charge of £734,000 has accordingly been carried forward to the Home Estimates of 1906-1907, a corresponding reduction being made in the Indian Estimates of that year. To obviate to some extent the inconvenience thus occasioned in carrying out the programme of reorganization, we have regranted a portion of the lapsed grant, *viz.*, £267,000, or 40 lakhs, for expenditure in India next year. This does not imply any actual increase of expenditure, but merely a transfer of charge from one year to the next. The effect is to increase the surplus of the current year by the amount of the lapse, and to reduce that of 1906-1907 by the amount regranted, which, as stated above, is £267,000. As compared with the Budget Estimate of last year, there is a decrease of £435,600.

33. For Famine Relief, we have provided £539,100, equivalent to ₹80,86,000. Of this, 42 lakhs are expected to be required in Bombay, 20 lakhs in the United Provinces, 13½ lakhs in the provinces administered by the Government of India, mostly Rajputana, and small sums in Madras and the Punjab. The total grant shown against the head "Famine Relief and Insurance" remains constant at one million sterling, the provision for reduction or avoidance of debt being absorbed, and some reductions made in the provision for construction of Protective Railways and Irrigation Works.

34. Had we maintained taxation on the same scale as in the current year, and had not undertaken the additional expenditure on police, education, and agricultural improvement to which reference is made below, our surplus would have amounted to £1,687,500. I now proceed to give an account of the measures to which we have decided to devote a portion of this sum.

Application of the Surplus.

35. The objects to which we have decided to devote so much of the surplus as is in excess of requirements are five in number. Three of these, as stated in paragraph 4, are measures of administrative reform involving increase of expenditure; the fourth which is by far the largest and most important, provides for the reduction of local taxation on the land; while the fifth, which is a small matter closely connected with the last named, provides for the relief of certain local authorities at the expense of Imperial revenues.

36. Taking these in order, we first provide a sum of 25 lakhs per annum for the reform of the Police, in accordance with the approved recommendations of the Police Commission. It will be remembered that last year a similar grant of 50 lakhs was provided for this purpose, and the grant now given is in addition thereto. We are pledged to carry out these reforms as funds become available, and though unfortunately a considerable part of the provision made last year has not been spent, we hope that this will be made good in 1906-1907 and a further material advance obtained. The principal objects to which the additional grant of 25 lakhs will be applied are the following :—

- (1) The introduction of improved scales of pay for the superior officers.
- (2) The recruitment of the new class of officers to be known as Deputy Superintendents.
- (3) The further recruitment of Sub-Inspectors.
- (4) The formation of Provincial Departments of criminal investigation.
- (5) The introduction of some of the reforms proposed in the police force of the towns of Madras, Calcutta and Rangoon.

If funds are available, some further measures may be undertaken, but this is at present uncertain.

37. The grant will be apportioned between the various Provinces as follows :—

	Lakhs.		Lakhs.
Madras	4½	United Provinces	3½
Bombay	2½	Punjab	2½
Bengal	4	Burma	2½
Eastern Bengal and Assam	2½	Central Provinces	2½
Minor Provinces		1	

38. Next, we make a further grant of four lakhs per annum for agricultural development and research, over and above the similar grant of 20 lakhs per annum made last year. This is not a new departure, but merely another step in furtherance of the policy on which we have embarked of rendering whatever assistance it may be in the power of the State to afford to the principal industry of the country. The money will in part be reserved for expenditure by the Imperial Government, while a part will be added to the grants made to the Local Governments last year.

39. Lastly, we have decided to provide a small sum of 5 lakhs a year for education, of which approximately one-half will be applied to technical education, and the remainder to the education of Europeans and Eurasians.

The grant for technical education will be allotted as follows, *viz.* :—

	R
Bombay	1,67,000
Bengal	35,000
United Provinces	30,000
Central Provinces	22,000

40. The grant to be given to Bombay is intended primarily to develop and increase the efficiency of the three central institutions, *viz.*, the College of Science, the Victoria Jubilee Technical Institute, and the Sir Jamsetji Jijibhai School of Art, Bombay; to provide adequate inspection for ordinary technical schools and schools of weaving and the textile industry, and for elementary drawing in all kinds of institutions; for the creation and maintenance of three new special technical schools, and for the development and improvement of a certain number of approved technical schools by increased grants; and for scholarships in all classes of approved technical institutions.

In the case of Bengal the grant will provide for the establishment and maintenance of a central weaving school at Serampore at which instruction in the best and latest methods of hand-weaving will be imparted.

The grant for the United Provinces is intended to assist in the proposed expansion of the mechanical apprentice class at the Roorkee College, with the object of giving a sound practical training in the principles of mechanics, steam, and electricity.

The grant to be assigned to the Central Provinces is for the establishment at Nagpur of an elementary school for handicrafts. It includes an initial grant of Rs 10,000 for buildings.

The balance of the grant, which is to be applied to the improvement of education for Europeans and Eurasians, has not yet been distributed, and its allotment is still under consideration.

41. I now turn to the principal measure to which we propose to devote the funds at our disposal. After considering various alternatives, to which I need not further allude, we have come to the conclusion that on the present occasion it is the agricultural taxpayer who has the first claim to relief. We made a small beginning in this direction last year, by abolishing the Famine cesses in Northern India * and the Central Provinces. We now propose to take a long step further by abolishing the cesses which are levied under various names such as the patwari cess, the village service cess and the like, in Madras, the Central Provinces, the United Provinces, the Punjab and the North-West Frontier Province, and to a trifling amount also in Ajmer and Coorg. The village establishments and land records which these cesses go to maintain are, in present circumstances, an important direct Government interest, and this has been recognized by the fact that in Madras only one-half of their cost has been defrayed from the village service cess, the remainder being borne by Government. Similarly in the United Provinces an annual contribution of 10 lakhs has been made from Provincial Revenues towards the Patwari Fund, and a similar practice has prevailed in the Central Provinces. In Bombay we have gone still further, for in that Province no village service cess at all is levied, and the village establishments are wholly remunerated by service lands, which means that their entire cost devolves upon the State. The cesses are administered by Government, and not by any local authority; and we now propose to abolish them altogether, subject to the minor exceptions mentioned below, and to arrange that the Provincial Governments shall take over the entire liability for maintaining the establishments, receiving compensation from Imperial revenues for the additional charges thus thrown upon them.

42. The exceptions referred to above are (1) the cess levied in Madras on "Proprietary," i.e., permanently settled estates, under Madras Act II of 1894, and (2) the village officers' cess in Sind. The latter is not really a separate cess at all, but is merely a portion of the land revenue assessment, which is earmarked for the payment of the village officials. The former is a real cess, supplemental to the land revenue, and we should have been prepared to abolish it, but for certain practical difficulties that have arisen by reason of the establishments employed in the "Proprietary" tracts of Madras being in a transitional state. In both cases the amount involved is small.

43. We further propose to abolish the zemindari dak cess in Bengal, and the eastern districts recently transferred to the new province. Both the district post, and the cess from which it is maintained, are an anachronism, and the cost of collecting the latter is out of proportion to the amount involved. In future, the entire postal service will be maintained by the Director General of the Post Office, at whose disposal funds will be placed, from Imperial revenues, for the work hitherto paid for from the cess.

44. The revenue sacrificed by this measure is Rs2,19,000 per annum and its allocation among the various provinces is shown in the following statement:—

Province.	Name of cess abolished.	Amount. R
Madras	Ryotwari Village Service cess	28,00,000
Bengal	Zemindari Dak cess	2,34,000
Do.	Patwari cess (Sambalpur)	26,000
Eastern Bengal .	Zemindari Dak cess	1,20,000
United Provinces .	Patwari cess	25,54,000
Punjab	Ditto	15,04,000
North-West Frontier Province	Ditto	1,40,000
Central Provinces .	Ditto	7,25,000†
Ajmer	Ditto	21,000
Coorg	Village Officers' cess	35,000

45. Lastly, we propose to discontinue the practice of making certain petty appropriations from the funds of District and Local Boards for various provincial purposes, such as the district post, normal schools, establishments employed in Government offices for local purposes, and the like. The amounts involved are in all cases small, but the practice, however defensible on logical grounds, has long been felt to be a blot on our administration of local funds. In future, the local bodies will receive their revenues intact, and the charges hitherto defrayed from the appropriations will be paid by the Local Governments, which will receive compensation from Imperial revenues. In the

* Practical difficulties have retarded the actual inception of this measure in the Punjab, but it will be carried out in that province from April 1906.

† This includes a sum of about Rs2,20,000 per annum which is collected direct from tenants by the patwaris, and does not pass through the Government accounts. The intention is to discontinue the levy of the whole cess.

case of appropriations for the district post, funds will be provided in the budget of the Post Office. The amounts involved aggregate ₹5,82,000, distributed as follows :—

Province.	Nature of appropriation.	Amount. R
United Provinces	For the district post	1,90,000
Do.	For normal schools	50,000
Do.	For local fund establishments in Commis- sioners' offices	11,000
Punjab	For the district post	1,41,000
North-West Frontier Province	Ditto	8,000
Burma	Ditto	1,21,000
Central Provinces	Ditto	48,000
Coorg and Ajmer	Ditto	7,000

46. These last two measures will, it is hoped, go a long way towards placing our system of local taxation on a sound basis. The arrangement at which we desire to aim is that no local cesses shall be imposed on the land, supplemental to the Land Revenue proper, except such as are levied by or on behalf of local authorities for expenditure by them on genuinely local objects; in other words, local taxation on the land shall, as far as possible, be limited to what is required for local administration by local bodies, and shall not form an asset of Imperial or Provincial revenues. We have not yet attained to that ideal. Certain exceptions still survive, and in some cases good reasons may exist for retaining them. But during the two years 1905-1906 and 1906-1907, we shall have remitted or transferred to the local account items aggregating 110½ lakhs per annum, and it may fairly be claimed that by these measures not only has substantial relief been afforded to the tax-payers, but that most of the more important excrescences which have grown up around our system of local taxation have been cleared away.

47. There is a matter to which allusion may conveniently be made in this connection, though it is not directly relevant to the Budget. We are considering whether, in those provinces where the rural tax-payer will receive substantial relief under the present proposals, the District Boards might not be empowered with their own consent to levy a small additional cess for the construction or guarantee of light local railways or tramways, such as is permitted by Madras Act VI of 1900. This system has had beneficial results in Madras, and it may be expedient to extend it to other parts of India. The power would in all cases be merely permissive. The project has not yet reached the stage of a definite proposal, and may not eventually be carried out: but as it will be facilitated by the measures which we are now undertaking, it is expedient to mention it in connection with them.

48. The cost of these five measures is £813,400 per annum, and it is distributed as follows :—

	£
Improvements in civil administration	226,700
Reduction of local taxation	547,900
Transfer to local taxation account	38,800
TOTAL	813,400

Ways and Means.

49. As stated in paragraph 23, our revenue account closes with a surplus of £874,100 which is carried forward to the second part of the statement dealing with Capital and Debt transactions, including Deposits, Remittances and Advances. Our total estimate of Capital Expenditure not chargeable to Revenue, on Railways and Irrigation Major Works is £10,864,100, of which £833,300 is for Irrigation, £7,697,900 for State Railways, £2,032,900 for expenditure by Railway Companies, and £300,000 for the purchase of the Simla-Kalka Railway. In addition to the above, we have to find £836,000 for the discharge of permanent debt (chiefly Bombay, Baroda and Central India Railway debentures). We have also to make a net payment of £1,030,600 under Deposits and Remittances, and of £456,700 on account of loans to local bodies, takavi advances to cultivators, etc. Our aggregate capital requirements thus amount to £13,187,400.

50. To meet this outlay we have (1) the revenue surplus of £874,100, (2) the net receipts of the Post Office Savings Banks which are estimated at £608,000, and (3) a sum of £2,785,500 to be raised by Railway Companies. These various resources amount to £4,267,600, leaving £8,919,800 still to be provided. We propose to meet

this by borrowing £5,000,000, of which £2,000,000 will be raised in England, and 4½ crores of rupees or £3,000,000 in India. The remainder will be obtained from our cash balances. These are expected to stand on the 31st March 1907 at £12,305,770 in India, and at £5,218,981 in England.

51. The announcement regarding the amounts to be borrowed in England and India is made subject to the usual reservation, and the Government of India retain full discretion to vary the programme, as now declared, to any extent that may be considered desirable.

52. The present intention of the Secretary of State is to draw bills on India to the amount of £17,800,000, but this also is subject to a similar reservation. This estimate of Council drawings is for the amount necessary to provide for the Secretary of State's requirements: but additional bills will, as usual, be sold, if needed to meet the demands of trade.

Army Services.

53. I append the usual statement showing the total expenditure on the Army under the various heads during the past five years:—

	Army.	Military Works.	Marine.	Special Defences.	TOTAL.
	£	£	£	£	£
1902-1903	17,346,392	1,096,669	378,211	...	18,821,272
1903-1904	17,865,208	1,034,654	580,307	27,054	19,507,223
1904-1905	20,175,604	981,599	589,467	128,295	21,875,055
1905-1906 (Revised Estimate) .	19,440,300	1,077,900	523,600	192,000	21,233,800
1906-1907 (Budget Estimate) .	19,846,700	1,169,400	594,000	231,500	21,841,600

54. There is little new to say on this subject. As already stated in paragraph 32, the home authorities found it impossible to complete the intended arrangements for the supply of new artillery and stocks of ammunition, and of the Budget provision the large sum of £998,700 will remain unexpended at the close of the year. The greater part of this, though not the whole, represents liabilities which will have to be discharged during the ensuing year. It is the usual practice to provide for the regrant of lapses up to a limit of 50 lakhs, or £333,000 a year, but in view of the magnitude of the lapse on the present occasion we have made a further grant in 1906-1907 of 40 lakhs or £267,000. Beyond this we have not found it possible to go; and even as it is, the ultimate completion of the scheme of reorganization will be somewhat retarded. No time will, however, be lost in effecting the full provision of new guns, rifles and reserves of ammunition, and we hope also to make substantial progress with the reorganization of our batteries of horse and field artillery, the provision of additional mule corps and cadres, and the supply of improved and increased ammunition columns, besides some other measures of less but still substantial importance. It has not been necessary to resort to borrowing for the prosecution of the scheme, and as was explained last year, it is not intended to have recourse to that step if it can be avoided by reasonable means.

Railway Construction and Earnings.

55. The following statement shows in the usual form the Capital Expenditure on Railways during the past five years, and the Budget Estimate for 1906-1907, whether incurred directly by the State or through the agency of Guaranteed or Assisted Companies:—

	1901-1902.	1902-1903.	1903-1904.	1904-1905.	1905-1906 (Revised).	1906-1907 (Budget).
	£	£	£	£	£	£
Open lines, including rolling stock	2,350,510	3,211,634	3,725,134	3,351,734	4,844,200	5,940,600
Lines under construction—						
(a) Started in previous year	3,393,756	3,016,666	2,091,200	3,246,066	3,206,934	3,592,734
(b) Started in current year	170,933	476,764	564,134	590,800	282,200	466,666
TOTAL	5,915,199	6,705,064	6,380,468	7,188,600	8,333,334	10,000,000

56. On the 31st March 1905 the total length of open lines was 27,728 miles classified according to gauge as follows :—

5' 6" gauge	14,772
Metre gauge	11,778
Special gauges	1,178
	<hr/>
TOTAL	27,728
	<hr/>

During the current year we have added to these approximately the following mileage :—

5' 6" gauge	389
Metre gauge	487
Special gauges	80
	<hr/>
TOTAL	956
	<hr/>

During the ensuing year, we hope to increase this length by 973 miles more.

57. The grant for the current year was 12½ crores of rupees, and we expect that this large sum will have been spent in full. This includes the purchase price, 27½ lakhs, of the Noakhali Railway, which has recently been bought by Government. We also purchased the Bengal Central Railway and the important Bombay, Baroda and Central India system during the year, but this was effected by the issue of stock, and does not affect the capital cash outlay of the year. The Madras Railway is now the only one of the old Guaranteed Railways which has not been taken over by the State. For next year, we have found ourselves able to provide the very large sum of 15 crores of rupees, or ten millions sterling, for capital outlay, of which 655 lakhs will be expended by the State, and 845 lakhs through the agency of Companies. Of the total grant, 891 lakhs have been reserved for expenditure on open lines, and 609 lakhs for new lines and lines under construction. The former very liberal allotment will enable the railway administrations to keep pace with the development of traffic on existing lines. The principal grants proposed are 210 lakhs for the North Western Railway, of which a little less than one-third is for the prosecution of the doubling of the line from Rohri to Samasata; 128 lakhs for the East Indian Railway, of which a small sum is for the new Agra City terminus, and the remainder is for the main line; 86 lakhs for the Great Indian Peninsula; and 117 for the Bengal-Nagpur Railway.

58. As regards new lines and lines in progress, we propose to allot 141 lakhs to the important Nagda-Muttra Chord, which has made good progress but which can scarcely be completed before 1907-1908; and 10 lakhs for the Baran-Kotah line, which will link up the Nagda-Muttra Railway with the Indian Midland system. Seventy-two lakhs will be spent on the Bengal-Nagpur Railway system, which will enable us to complete the short but useful Pench Valley Branch, and to effect material progress with the Purulia-Ranchi line. A beginning will also be made with the Vizianagram-Raipur line, 311 miles long, which is to link up the Central Indian plateau with the East Coast. In addition, we shall assign 57 lakhs for lines in Burma, 47 lakhs for further work on the Katihar-Godagiri Railway in Northern Bengal, a line which may eventually give the metre-gauge systems a direct entry into Calcutta; 26½ lakhs to the Great Indian Peninsula system; 35 lakhs for the Shilman branch of the North Western Railway, which was put in hand last autumn; 13½ lakhs for the Golakganj-Gauhati line; and 20½ lakhs and 24 lakhs for extensions of the South Indian and Tirhut State Railways respectively.

59. The earnings of the open lines continued to expand, and the net surplus of the current year, though falling short of that of 1904-1905, is expected to exceed £2,000,000. The following are the figures for the last seven years :—

Year.	Receipts.	Charges.	Net surplus.
	£	£	£
1899-1900	16,587,845	16,511,089	76,756
1900-1901	18,293,629	17,968,505	325,124
1901-1902	20,225,968	19,379,352	846,616
1902-1903	20,133,900	19,904,951	228,949
1903-1904	21,557,866	20,697,197	860,669
1904-1905	24,022,465	21,917,027	2,105,438
1905-1906, Revised	24,658,200	22,632,700	2,025,500
1906-1907, Budget	26,154,600	23,925,300	2,229,300

60. As has been explained on former occasions, the charges shown above include *inter alia* interest on capital of all lines whether open for traffic or not, and annuity payments in liquidation of the purchase price of certain lines which have been bought by Government. The capital at charge at the end of the present year is estimated at £250,129,517. The net receipts are estimated to amount to £13,027,900, which represents a return on the capital of 5.21 per cent. If open lines only are taken into account, the capital at charge amounts to £244,057,303 and the net return to 5.34 per cent. As the open mileage increases year by year, it may certainly be expected that both gross and net receipts will continue to expand: and as traffic develops it may be anticipated with reasonable confidence that over a series of years the net surplus after payment of interest and similar charges will also continue to grow. But experience shows that in any individual year, a set back is liable to occur. Thus the surplus of the current year is estimated to fall short of that of 1904-1905 by £80,000; and in 1902-1903 it receded by £618,000 as compared with 1901-1902. The growth may be continuous, but we cannot hope that it will be uninterrupted; and having regard to the great magnitude of the sums involved, it is manifest that in estimating the value of our Railway property as an asset of the budget, it is only common prudence to allow for a liberal margin of safety.

Irrigation.

61. The following table exhibits the principal figures of Revenue and Expenditure connected with Irrigation:—

		1902-1903.	1903-1904.	1904-1905.	1905-1906, Revised.	1906-1907, Budget.
		£	£	£	£	£
PRODUCTIVE WORKS.	Capital Outlay to end of year	23,137,270	23,718,032	24,081,700	24,636,900	25,490,100
	Direct Receipts	1,700,295	1,857,460	1,940,670	1,809,600	2,058,000
	Land Revenue due to Irriga- tion	805,713	828,571	803,800	901,000	942,000
	TOTAL	2,506,008	2,685,831	2,824,479	2,711,500	3,000,000
	Working Expenses	732,819	789,225	840,700	875,600	877,100
	Interest	910,285	933,105	949,928	907,700	995,000
TOTAL		1,643,104	1,722,330	1,790,628	1,843,300	1,872,100
NET PROFIT		922,904	903,501	1,024,851	868,200	1,128,800
PROTECTIVE WORKS.	Outlay on Construction to end of year	1,500,174	1,572,594	1,720,397	1,962,100	2,340,000
	Direct Receipts	55,973	62,570	53,001	61,300	61,000
	Land Revenue due to Irriga- tion	8,680	8,768	9,441	10,100	10,100
	TOTAL	64,053	71,338	63,102	71,400	72,000
	Working Expenses	21,791	21,520	25,581	23,300	24,000
	Interest	58,820	61,129	65,290	72,000	84,200
TOTAL		80,611	82,655	90,877	95,900	108,200
NET LOSS		15,958	11,317	27,775	24,500	36,200
MINOR WORKS AND NAVIGATION.	Direct Receipts	138,329	154,594	183,455	160,600	177,000
	Expenditure	851,529	875,021	895,848	960,300	1,012,000
	NET LOSS	713,200	720,427	712,393	799,700	835,000

62. To the end of 1904-1905 we had expended 3,613 lakhs on productive works, and 258 lakhs on protective works. We had constructed 19,057 miles of main and branch canals and 31,119 miles of distributaries, which, in that year, commanded and protected 43½ million acres of land and actually irrigated 20,167,957 acres. During the year now expiring we expect to have increased this mileage to 19,158 and 31,496 respectively, the area protected being increased by over 52,000 acres. The direct net return to Government on the capital outlay on productive works, which alone are constructed from loan funds, is estimated at 8·2 per cent, and the net profit to the State, after payment of all charges including interest, is estimated at 154 lakhs of rupees.

63. In addition to the works actually in operation, we have a lengthy programme of new projects, which are either under construction or are being examined by the professional advisers of Government, or in some cases awaiting sanction. The principal figures in regard to these are the following:—

	Productive.	Protective.	Minor works.
1. Number of projects	16	26	4
2. Culturable area commanded, in acres	5,164,704	4,309,686	45,691
3. Estimated annual irrigation, in acres	3,186,381	1,585,844	17,704
4. Do. cost	Rs 14,26,59,018	14,95,72,874	18,37,352
5. Do. net revenue	Rs 1,29,08,008	44,64,127	37,297
6. Do. return on capital outlay	9·05 per cent	2·98 per cent	—

64. In paragraph 44 of last year's Financial Statement I referred briefly to three of these projects which are still in course of construction in the Punjab. Only three others are of sufficient individual interest or magnitude to call for remark. One of these is the Upper Swat River Canal in the North-West Frontier Province, which will take off from the same source as the highly profitable Swat River Canal. It is designed to carry the water of the Swat River under the Malakand pass through a tunnel 5,000 feet long, and thence *via* the Dargai Nullah into the Peshawar valley. The fall from the lower end of the tunnel will probably be utilized to generate electric power for various purposes in the neighbourhood. The whole work is estimated to cost 178 lakhs, to command 449,000 acres, and to irrigate 382,000 acres, and is expected to yield the handsome return of 8½ per cent on its capital cost. The second project is the Mahanadi Canal in the Raipur District of the Central Provinces. It is estimated to cost 95 lakhs and to irrigate 200,000 acres of culturable land. The probable return is expected to be only 3·14 per cent, and if it is eventually decided to construct the canal, it will be undertaken as a protective work. Its chief interest lies in the fact that it is the first large irrigation work to be undertaken in the Central Provinces, a tract which has suffered severely from drought during the last ten years. The last scheme of which notice may be made is of a different character. It is a modest project for irrigating 50,000 acres of land on Divi island at the mouth of the Kistna River by raising water from the river by means of centrifugal pumps driven by Diesel oil engines. The cost is estimated at Rs 18,06,000, and it is expected to yield a return of 9½ per cent on the outlay. It constitutes the first attempt in this country to irrigate by means of power-lifted water on a large scale—a method which has been adopted with success in Egypt. The possibility of applying this method profitably in India has been brought within the sphere of practical politics by the development of the oil engine, which it is hoped can be worked at about half the cost of an equally powerful steam engine burning coal. If the experiment proves successful, it may render feasible a number of schemes of which the cost has so far proved prohibitive.

65. This programme is, broadly speaking, the first fruits of the labours of the Irrigation Commission, whose capable and comprehensive report has been in the hands of Government for some two years. But while the list of projects so far approved is sufficient to occupy the full strength of our engineer staff for the next four or five years, and to absorb all the funds likely to be available during that period, it is very far from exhausting the tale of useful schemes which the Commission presented for the consideration of Government. The latter contemplated an aggregate expenditure of 44 crores of rupees to be spread over a period of 20 years; and it will manifestly occupy a long time to examine the details of these, to weigh their respective financial and protective prospects, to select those which present the best promise, and to prepare the requisite plans and estimates. Many of them are now being examined in this manner by the various Local Governments, but the only one to which reference may now be made is the great Tungabhadra project in Madras.

This ambitious work is designed to irrigate 970,000 acres of land and, in years of drought to afford protection to a million acres more, in the Bellary, Anantapur, Kurnool, Cuddapah, and Nellore Districts, and is estimated to cost rather more than 12 crores of rupees. At its eastern extremity, where it connects with the Penna River, the work is likely to yield satisfactory results. To the west, however, much of the country traversed consists of black cotton soil, in which, in seasons of a favourable monsoon, irrigation is neither necessary nor particularly advantageous. Its main value will therefore consist in affording protection in time of drought, and, as a whole, it is only likely to yield a very small pecuniary return on its capital cost. Direct financial returns are not the main, or even an important, criterion of the merits of a protective irrigation work: and enormous though the cost may be, Government will not shrink from it if on full consideration it is found to be indispensable for the complete protection of a large and thickly-populated area. But it will be a matter for anxious thought whether other parts of India have not stronger relative claims, and whether the great sum of money involved might not be employed to better advantage elsewhere.

Exchange, Rupee Coinage, and the Gold Reserve Fund.

66. The question of sterling exchange no longer bulks largely in Indian Financial Statements as it used to do in former years. The average rate obtained for Council drafts during the first eleven months of the year was 1s. 4·047d., and the fluctuations were relatively trifling. This is the eighth year in succession in which practical stability has been secured; and it is perhaps not oversanguine to hope that public confidence in its permanent maintenance is in a fair way to be established, not merely in this country where the true facts are known and understood, but more particularly in London to which we must look for the cheap capital that India so sorely needs, and whose investors and capitalists have so long been warned off the Indian market by the uncertainties of exchange.

67. During the year we purchased silver for coinage to the value of £8,574,000. The net addition made to the rupee coinage during each year since 1899-1900, when minting operations were resumed, has been as follows:—

	Lakhs.
1899-1900	52
1900-1901	13,27
1901-1902	3,11
1902-1903	14
1903-1904	10,65
1904-1905	7,31
1905-1906 (Estimated)	16,50

68. Formerly it was the custom to defer the purchase of silver till it was actually required for immediate coinage. Purchases were thus usually made in large individual amounts, the bulk of them being concentrated into three or four months when the trade demand for rupees was highest. During the current year, however, it has been decided to alter this practice, and to spread both purchase and coining as far as possible over the whole twelve months. At the beginning of each quarter an estimate is framed of the amount likely to be required during the next three months, and arrangements are made to purchase that amount gradually within the quarter and ship it to India, where it is at once made over to the Mints. It is true that early in the year materials for a really accurate estimate do not exist. But even if we should happen to overpurchase (which has not yet happened), little or no harm is done, for in present conditions the demand for silver for new coinage, though liable to fluctuate, is persistent and inevitable, and any temporary surplus would soon be worked off. If the purchases are paid for by taking gold from the Currency Reserve, we do not even lose anything in the form of interest. The advantage of the new arrangement is that we are less liable to be rushed by sudden pressure, or forced to buy in a rising market. Taken in conjunction with the ingot reserve, of which a full account was given in the last Financial Statement, it greatly strengthens the position of the Government and increases its capacity to meet the demands of trade.

69. The ingot reserve has proved of great service during the past year. The sales of Councils during the year were on an exceptionally heavy scale, and in November notwithstanding extensive purchases of silver it became necessary to draw upon the ingot reserve, which was completely exhausted by the middle of January.

The experience thus gained shows that the amount at which it was originally fixed, *viz.*, three crores of tolas, is not sufficiently large, and it has been decided, with the approval of the Secretary of State, to raise it to six crores of tolas. This amount is approximately sufficient to keep the Mints fully occupied for two months. Further developments of this valuable special reserve are now in contemplation, but have not yet reached a stage at which it is possible to make any announcement regarding them.

70. The Gold Reserve Fund will have been augmented during the year by the sum of £3,734,100, of which £3,488,700 represents the profit on coinage, and £245,400 is interest. The Fund now stands at £12,262,700, the whole of which has been, or will very shortly be, invested in Consols, in National War Loan stock, Transvaal Government guaranteed stock, Local Loans stock, and a portion in Treasury Bills. The amount of gold held in the Paper Currency Reserve on the 15th instant was £11,575,400, of which £7,045,000 was in the Secretary of State's Currency Chest in London, and the remainder in India. This subject is further referred to in a later section of the Financial Statement.

Note Circulation and the Paper Currency Reserve.

71. I append the usual statements illustrating the note circulation and the Government balances with the Presidency Banks. The first of the two statements shows separately (1) the gross circulation, and (2) the circulation, excluding the notes held by the Reserve Treasuries, and by the Presidency Banks at their head offices.

Circulation of Currency Notes.

[Lakhs of rupees.]

	1902-1903.	1903-1904.	1904-1905.	1905-1906 (11 months).
GROSS CIRCULATION.				
Average	33.74	36.41	39.20	41.23
Maximum	35.72	38.21	42.52	43.79

December	2,82,02	3,05,84	2,79,07	3,01,32	2,76,70	

72. By the Paper Currency Act of 1905, which became law in March last, two changes of considerable importance were introduced in the law relating to the Currency Reserve. The first of these empowered Government to increase the currency investment by 2 crores, and to invest that amount in sterling securities of the United Kingdom or of the Government of India. Before the passing of the Act, investment was only permitted in rupee securities of the Government of India, and not in sterling. Effect was given to these provisions by the Secretary of

State in August 1905, when the sale-proceeds of Council drafts to the amount of £1,333,333½ were invested as follows, *viz.*, (1) 2½ per cent consols of the nominal value of £923,646-9-11 costing £837,614-6-8 and (2) 2½ per cent Exchequer bonds (1906—15) of the nominal value of half a million, costing £495,719. The interest on these investments amounts to £36,841 per annum, and this represents the gain to Indian revenues effected by the amendment of the law.

73. The other change was one rather of form than of substance, and its significance lies mainly in the greater extent and more systematic manner in which we have used powers already existing, rather than in any actual addition to those powers themselves. By the Gold Note Acts of 1898 and 1900, the Government of India had obtained authority to hold a part of the metallic portion of the currency reserve in gold coin (or temporarily in silver bullion) in London, instead of in India. The object of these enactments was merely to afford temporary relief to the Indian money market in seasons of stress when the trade demand for rupees was greater than could be supplied from the Treasury balances. A certain amount of gold had in this way been held in London during 1899 and 1900, but not to any large extent, and the occasion for doing so ceased, except in regard to gold in transit, from the middle of 1900. Experience had, however, shown not merely that it was desirable to possess the power, but also that it was advantageous to exercise it in a regular and systematic manner. Accordingly, the new Act was framed in such a way as to give full power to hold the metallic portion of the currency reserve, or any part of it, either in London or in India, or partly in both places, and also in gold coin or bullion, or in rupees or silver bullion, at the free discretion of Government, subject only to the exception that rupees should be kept only in India and not in London. Full power was also taken to vary the amounts held in London and India respectively from time to time, provided always that the aggregate holding was such as was required by law.

74. In accordance with this arrangement, the Secretary of State has established a currency chest in London, and during the year we have remitted thereto sums aggregating £7,045,000, the gold being held by the Bank of England on behalf of the Secretary of State as part of the paper currency reserve. The true nature of the transaction was not at first realized in some quarters, and a leading financial paper at Home, referring to one of the remittances, expressed the view that "to place the gold in the vaults of the Bank of England and to prevent its use in the market would be an act of waste which cannot be seriously contemplated." Subsequently, another paper observed that "this special earmarking seems a primitive and unduly costly device, if the aim of the Indian Government is, as is stated, merely to provide a fund which can be used as required for the purchase of silver; for that end would be equally well attained by an ordinary deposit with the Bank of England." These remarks indicate a misapprehension of the facts. The Government of India is required by law, for the purpose of securing the convertibility of its currency notes, to maintain a stock of gold or silver coin or bullion equal to the excess of its entire note circulation over the sum of 12 crores of rupees. This obligation exactly corresponds to that which is imposed by law on the Bank of England to maintain a stock of gold to cover its note issues in excess of the sum of £18,450,000. The gold which has been placed in the Secretary of State's currency chest in London forms a portion of this stock. It is equally withdrawn from the market, whether it is held in London or in Calcutta, and its place would not be taken nor its purpose served by an ordinary deposit with the Bank of England. On the other hand, if at any time it were found convenient to place the gold at the free disposal of the Secretary of State, we could immediately do so by transferring an equivalent sum from our treasury balances to our Currency Reserve in India, if the state of the former permitted of that course. This transaction could obviously be carried out much more promptly and easily than if the whole of the gold were locked up in this country.

75. The practical advantages of establishing a currency chest in London and keeping a substantial sum in gold therein are mainly the following :—

- (1) When held in London the gold is one stage nearer the point at which it becomes practically effective for its primary purpose of securing the encashment of currency notes. So long as gold is not in active circulation in India, what the presenter of currency notes requires is not sovereigns but rupees, and the silver bullion which must be purchased for the coinage of these can ordinarily only be procured in Europe and not in this country.

- (2) It enables the Secretary of State to effect his purchases of silver in the promptest and most convenient manner as occasion may require, and without the publicity attendant on the shipment of gold from India. It is open to him either to treat the silver so purchased from the first as a portion of the reserve, or, if preferred, to pay for it in the first instance from his Treasury balances, and then subsequently to recoup these from the currency chest, the latter being replenished by Council sales or direct remittances from India.
- (3) It also affords a method which might in certain circumstances be very useful of speedily replenishing the Secretary of State's Treasury balances. If at any time the demand for Councils should be insufficient to supply his current requirements, it would be possible for him to transfer a part of the gold in his currency chest to his Treasury account, a corresponding transfer of either rupees or gold being simultaneously made in India from Treasury to Currency.
- (4) Conversely, it affords a means of giving relief to our Treasury balances when the trade demand for Council drafts is too large for them to meet. In such a case, it would be possible for the Secretary of State to pay the sale-proceeds of the Councils into his currency chest, thereby setting free an equivalent amount in rupees in India, which would be available for meeting the drafts.
- (5) Lastly, it facilitates the prompt investment of the receipts of the Gold Reserve Fund. When profits on coinage accrue in India the Secretary of State can at any moment draw the equivalent amount from his currency chest and invest it, a corresponding transfer being made in this country from the balance of the Gold Reserve Fund to Currency.

76. The whole arrangement is the logical and legitimate corollary of the system which has long been in operation in India by which the utmost freedom of transfer is permitted between the Currency Reserve and Treasury balances, subject always to the essential condition that the aggregate amount of coin and bullion held in the various currency chests throughout India is invariably maintained at the figure prescribed by law. This system has been productive of substantial economy in obviating the unnecessary movement of coin and enabling the whole cash resources of the State to be made available wherever they are required at any moment. Analogous advantages may be expected to ensue from the present development.

Council Drawings.

77. The drawings of the Secretary of State have largely increased during the past three years, the average sales from 1903-1904 to 1905-1906 having been £26,620,200 against an average of £17,620,000 during the previous five years. This increase does not correspond to any equivalent expansion of the Secretary of State's requirements on revenue account (which constitute the Home charges proper), though there has been some growth of the latter also. It is due primarily to the great trade demand for remittance to finance the export trade of India which has developed very largely of late. Since the closing of the mints and the establishment of the gold standard, the only means of obtaining currency that was open to trade, apart from the purchase of Council drafts and transfers, was to bring out gold to India. When, as is now the case, a sufficient stock of gold has been accumulated in the Currency Reserve to make the standard effective, and so long as gold is not to any large extent in active circulation, this method is wasteful; for it involves the eventual reshipment of the imports of that metal to Europe for the purchase of silver for coinage. To avoid this result, the policy of Government has been to sell Council drafts freely so as to supply the trade demand to the fullest extent up to the limit of our capacity to meet them. A recent development of this policy has taken the form of selling telegraphic transfers against shipments of gold from Australia, which are thus diverted from India to London.

78. The surplus proceeds of these sales, in excess of the Secretary of State's requirements on revenue account, have been applied partly to the purchase of silver for coinage, partly to strengthening the cash balances of the Home Treasury, and partly to defraying capital outlay required in connection with railway construction. The following statement gives an abstract (in round figures) of the transactions of the last

eight years, from 1898-1899 to 1905-1906. Transactions on account of the Gold Reserve Fund and of the Paper Currency sterling investment are excluded :—

Amount of Council Bills, etc., drawn	£ 157,980,000
Remittance of gold on Treasury account	999,000
Receipts from His Majesty's Government against disbursements in India, mainly in connection with the war in South Africa, China, and Somaliland, <i>net</i>	8,001,000
TOTAL	166,980,000
Expenditure on Revenue account (<i>net</i>)	138,017,000
Surplus receipts	28,963,000

These have been applied as follows :—

Purchase of silver, <i>net, i.e.</i> , disbursements in excess of gold shipped from India, or withdrawn from currency, for that purpose	10,308,000
Gold transferred to Currency chest in London	1,045,000
Capital expenditure, <i>net, i.e.</i> , disbursements in excess of loan receipts, including transactions of Railway Companies	11,953,000
Remittance and deposit transactions, <i>net</i>	46,000
Increase of cash balances	5,611,000
TOTAL	28,963,000

79. During the current year, the sales are expected to reach the high figure of £31,576,300, or excluding £1,333,300 on account of the Paper Currency investment, to £30,243,000. This exceeds the Budget Estimate—which was as usual framed with exclusive regard to the Secretary of State's own requirements—by £13,743,000. The excess has been employed as follows :—

Purchase of silver for coinage (<i>net</i>)	£ 7,924,000
Sterling investments on account of the Gold Reserve Fund	3,543,000
Remitted to India through the Secretary of State's Currency chest	1,045,000
Transferred to the balances of the Home Treasury	1,231,000
TOTAL	13,743,000

The Secretary of State's cash balances were drawn upon during the year to the amount of £2,118,000. But for the addition made to them, as explained above, they would have been reduced by £3,349,000.

Countervailing Duties on Sugar.

80. By a notification, dated the 2nd December 1903, the countervailing duties on sugar were remitted, under certain safeguards, in the case of countries which had adhered to the Brussels Convention of 1902, and sufficient time has now elapsed to enable a fairly clear idea to be formed of the effect on the Indian sugar industry of the legislation on this subject which was inaugurated in 1899. It may therefore be of interest to take stock of the position. It must, I fear, be acknowledged that the practical results have been of the most slender description.

81. The legislation in question was embodied in four Acts of the India Council passed respectively in 1899, 1902, 1903, and 1904. The two last, however, were little more than continuing enactments, and the substance of the law was contained in the two former.

82. The idea underlying the Act of 1899 was that bounty-fed beet-sugar, the product chiefly of Germany and Austria-Hungary, was competing unfairly with the Indian article, that in consequence the area under sugar-cane was being reduced, and refineries closed down, and that to avert the ruin of the Indian industry it was necessary to countervail the export bounty. The following statement shows the approximate acreage under sugar-cane in British India in each year from 1890-1891 to 1898-1899 :—

1890-1891	2,758,000
1891-1892	3,100,000
1892-1893	2,748,000
1893-1894	2,897,000
1894-1895	2,764,000
1895-1896	2,930,000
1896-1897	2,651,000
1897-1898	2,648,000
1898-1899	2,755,000

83. In introducing the Bill, Sir J. Westland said that in recent years the area had contracted by 13 per cent. As regards refineries, Government has never possessed any statistics of the slightest value; but at that time it was reported that in the United Provinces, which is the most important sugar-producing province in India, 120 refineries had already been closed, and 60 more were about to be shut down. During the same period the imports of sugar from over-sea had been as follows (in tons):—

YEAR.	CANE.		BERT.		TOTAL.	
	Refined.	Unrefined.	Refined.	Unrefined.	Refined.	Unrefined.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
1890-1891 . .	90,944	9,870	45,781	...	136,725	9,870
1891-1892 . .	89,423	7,206	14,026	1	103,449	7,207
1892-1893 . .	77,510	5,596	14,883	...	92,393	5,596
1893-1894 . .	91,305	4,830	10,257	1	101,562	4,831
1894-1895 . .	100,499	9,708	14,311	13	114,810	9,721
1895-1896 . .	80,738	10,207	36,511	2	126,249	10,299
1896-1897 . .	89,782	8,939	44,341	8	134,123	8,947
1897-1898 . .	100,003	18,660	111,766	2	211,769	18,662
1898-1899 . .	111,931	15,629	76,314	...	188,245	15,629

84. The large imports of beet-sugar in 1890-1891 were quite exceptional, the highest figure previous to that year having been only a little over 3,000 tons. Allowing for this, the growth of the imports was undoubtedly large, and was clearly traceable to the operation of the Continental bounty system. There is no evidence to show that, in its origin, the grant of bounties on export was an essential condition of the latter system, or anything more than the complement of high duties on import and internal consumption. But from a variety of causes, among which the fixing of inaccurate equivalents of refined and unrefined sugar was prominent, it had gradually come to assume the position of a leading characteristic. In the late nineties the principal features of the system in force in the chief beet-growing countries included (1) a bounty on exports, (2) an internal tax on the indigenous industry, to provide the bounties, or recoup them, and (3) a prohibitive import duty to exclude foreign competition. So long as there was free competition within the producing country, the adventitious profit which local producers and refiners were able to exact from the home consumers was limited by the amount of the bounty on export: and it was in this view that the Indian legislature in 1899, following the lead of the United States of America, considered it sufficient to impose duties equivalent to the latter.

85. Continental manufacturers had, however, already perceived the limitation imposed on their profits by the existence of free competition, and had begun to form combinations—known as cartels—among themselves in order to restrict its effect. The primary object of these cartels was to raise the price of sugar in the home market approximately to that at which it would be possible to import and sell foreign sugar. The surplus outturn for which no market could be found at these enhanced prices had to be exported, and thus a fresh stimulus was given to the export of the bounty-fed article. The partial closing of the American market by legislation helped to divert a portion of the stream to India. The limit of the adventitious profit which this system rendered possible was the surtax, or difference between the import and local consumption duties. The first cartel, that of Austria-Hungary, was established in 1897-1898, and that of Germany followed in 1900.

86. It was in order to check the imports thus artificially stimulated that the legislation of 1902 was undertaken. The form and duration of the law were influenced by the resolutions adopted in the Brussels Convention which had been signed in March of the same year, the amount of the countervailing duties being limited to one-half the amount of the surtax and their operation to the 31st August 1903, to which date the enforcement of the Convention had been relegated. The power to levy duties was subsequently extended to 31st March 1904, and eventually continued indefinitely subject to certain conditions. As already explained, however, the duties were actually abolished in December 1903 in the case of those countries which had adhered to the Convention, and the only duties now remaining in force are those in respect of Denmark, Russia, Chili, and the Argentine Republic, from which the imports into India are practically *nil*.

87. To enable us to trace the effect, if any, of the duties, and of their withdrawal, on the Indian industry, I now give information similar to that in paragraphs 82 and 83 above, brought down to December 1905 :—

I.—Approximate acreage under sugar-cane in British India since 1899-1900.

1899-1900	2,693,000
1900-1901	2,522,000
1901-1902	2,474,000
1902-1903	2,358,000
1903-1904	2,280,000
1904-1905	2,400,000
1905-1906 (first nine months)	2,222,000

II.—Imports of sugar into British India by sea.

YEAR.	CANE.		BEET.		TOTAL.	
	Refined.	Unrefined.	Refined.	Unrefined.	Refined.	Unrefined.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
1899-1900 .	103,173	21,243	43,625	...	146,798	21,243
1900-1901 .	153,110	20,432	90,295	...	243,405	20,432
1901-1902 .	125,190	28,082	147,393	1	272,583	28,083
1902-1903 .	177,065	22,560	73,484	1	250,549	22,561
1903-1904 .	251,822	23,820	41,051	...	292,873	23,820
1904-1905 .	236,099	23,611	87,130	1	323,229	23,612
1905-1906 (first nine months) .	168,171	10,381	49,980	...	218,151	10,381

On an inspection of these figures, it is impossible to resist the conclusion that the experiment—for it was admittedly nothing more—has proved a disappointing failure. It has not so far arrested the progressive decline in the acreage under sugar-cane, which fell from 2½ million acres in 1898-1899 to 2¼ millions in 1903-1904. There was no doubt some recovery in 1904-1905, but it would be rash to build much on this, and in any case, should it happily prove to be the beginning of a permanent revival, there are independent causes at work which, so far as present indications go, are sufficient to account for it. The figures so far available for the current year exhibit a further decline. Neither has it seriously affected imports of beet-sugar, which reached their highest figure in 1901-1902, and which during 1904-1905 were far above the level of the average before the legislation of 1899 was undertaken. During the first nine months of the current year, 1905-1906, the imports of beet were less than in the corresponding period of 1904-1905, but were much in excess of those of the previous year; and the reduction was in part at least attributable to the shortage of the crop both on the Continent, and in Mauritius. The former cause led to high prices and over-speculation and resulted eventually in extensive disorganization of trade.

88. The question of prices is complicated by a variety of factors, some of which are unconnected with Indian legislation. The following table gives the prices per cwt. of beet-sugar (refined) at Calcutta and Bombay, and of Indian raw-sugar at Cawnpore, on the 1st September of each year since 1895 inclusive, that date being taken as representing the commencement of a new beet-sugar "campaign."

Price of refined beet-sugar at Calcutta and Bombay and of Indian raw sugar at Cawnpore on or about the 1st September of each year from 1895 to 1905.

YEAR.	REFINED BEET-SUGAR (PER CWT.).		INDIAN RAW-SUGAR (PER CWT.)

1900	12 6 9	13 0 0	6 12 11
1901	10 10 10	11 3 0	6 0 9
1902	9 11 2	(b) 9 0 0	4 11 9
1903	10 11 6	(c) 10 15 0	5 11 7
1904	10 8 9	10 9 0	6 6 6
1905	10 14 3	12 4 0	5 14 2

(a) Exclusive of town duty at as. 8 per cwt. (b) Ordinary crystals. (c) Dutch, superior.

It is impossible to trace in these figures any clear connection between Indian prices and countervailing legislation. The heavy fall in 1898 may conceivably be associated with the large imports of the two preceding years; but the level of prices remained the same in 1899, notwithstanding the duties imposed in March of that year. In the two following years prices recovered, notwithstanding the operation of the cartels and the rapid growth of the imports; but in 1902 there was a second severe decline despite the additional duties then imposed. The abolition of the duties has been followed by a somewhat unsteady revival of prices, but the level so far attained is still markedly below that which formerly prevailed.

89. So far, therefore, as any direct effect on Indian cultivation, imports, or prices is concerned, it must be confessed that the measures of 1899 and 1902 have been without material result. They yielded a certain revenue, some 94½ lakhs in the six years, which the Government of India did not particularly require, and which would certainly not have been imposed on fiscal grounds. On the other hand, the legislation itself, the imposition of duties thereunder, and the variation of these from time to time, occasioned no little dislocation of the import trade, which gave rise to vigorous and far from unreasonable complaints by the commercial public. It would, however, be unfair to omit certain indirect results of the action taken, which may be set down to the other side of the account. The Director of Agriculture in the United Provinces is of opinion that that action was of real value in allaying panic and creating confidence among the local manufacturers, and giving them time to readjust their methods. Of more permanent importance is the fact, which seems beyond reasonable doubt, that the Indian legislation of 1899, and the knowledge that we were about to proceed to the further measures adopted in May 1902, had an appreciable effect in bringing to a successful conclusion the Brussels Conference of 1901-1902, and that but for this, the latter might have had no more result than its various predecessors. Mr. Martineau, a well-known authority, has expressed the opinion that the eventual result of the Convention will not be to make sugar dearer, and that "free competition will allow sugar to be produced in larger quantities elsewhere, and probably in some new countries, so that eventually the beet-root crop, though still remaining an important factor, will cease to be so absolutely the governing factor in the price of sugar." If this anticipation is correct, the Convention should undoubtedly make for the benefit of the Indian sugar-producer, and no one is likely to advocate endangering its permanent maintenance by the repeal of the formal enactment which still remains on the Indian Statute Book.

90. There is one more point arising out of the figures given above which is deserving of brief comment. The acreage under sugar-cane in British India may for the present be taken at 2½ million acres. The yield of Indian cane per acre is exceedingly low, compared with that of other countries: but if the average output of raw sugar be taken at 1½ tons per acre (which is the rate estimated by the Department of Commercial Intelligence, and

substantially corroborated for the United Provinces by the independent enquiries of Mr. Saiyid Mahomed Hadi), the annual product of British India would be about 3,000,000 tons. If we add to this some half million tons for palmyra sugar, and allow something for the output of Native States, the aggregate yield of raw-sugar in India is from $4\frac{1}{2}$ to 5 million tons per annum. For reasons already stated, no attempt can be made to express the outturn of refined sugar. Now the imports of foreign sugar, both cane and beet, in 1904-1905 were only 323,000 tons of refined, and 24,000 tons of unrefined, sugar, and this represents considerably less than one-tenth of the local product. It will also be seen that approximately four-fifths of the imports are of cane-sugar, the great bulk of it coming from Mauritius and Java. In both cases the sugar is subject to the usual 5 per cent import duty, and to the cost of carriage over-sea, and in the former case, it is produced largely by the agency of labour imported at heavy expense from India. It cannot perhaps be said that the foreign article has as yet encroached very seriously upon the indigenous product; but having regard to the fact that India is well adapted by nature for the production of sugar, it is *prima facie* somewhat worthy of remark that there should be any imports at all. The explanation is probably to be sought in the fact that of late years there has arisen a growing demand for refined (in place of unrefined) sugar of good quality and moderate price, which is greater than the local refining industry can at present supply. If this view is correct, there should be a great future before Indian sugar.

The introduction of healthier and more prolific varieties of cane, the employment of greater care in cultivation, the use of more economical processes for extracting the juice, and, above all, the adoption of the most modern and effective methods of refining, should help to make India self-supporting in respect of sugar, and even possibly to enter the world's market as an exporter.

E. N. BAKER.

March 21, 1906.

PART II.

BEING A MEMORANDUM BY THE FINANCIAL SECRETARY EXAMINING THE DETAILS OF THE ACCOUNTS AND ESTIMATES.

Section I.—The Accounts of 1904-1905.

91. The Accounts of the year show a surplus of £3,456,066, being worse by £29,434 than the surplus of £3,485,500 anticipated in the Revised Estimates framed in March last. 1904-1905.
General Result
of Accounts.

92. The variations between the figures finally entering into the Accounts and those taken in the Budget and Revised Estimates of the year are fully explained in the Appropriation Report published in the *Gazette of India* of the 10th instant.

93. The following is a general comparison of the Revised Estimates with the Accounts of the year :— 1904-1905.
Statement of the
gross figures.

	Revised.	Accounts.	Accounts, better.	Accounts, worse.
Total Revenue, Imperial, Provincial and Local	£ 84,699,100	£ 84,812,971	£ 113,871	£ ...
Total Expenditure, Imperial, Provincial and Local	81,237,700	81,194,105	43,595	...
Adjustment of Provincial and Local Surplus or Deficit	—24,100	162,800	...	186,900
NET	81,213,600	81,356,905	...	143,305
SURPLUS	3,485,500	3,456,066	...	29,434

94. The revenue was higher, and the total expenditure smaller, than the estimate, the net improvement being £157,466. But as the improvement in the Provincial and Local section of the accounts was £186,900, the Imperial section was worse by £29,434. 1904-1905.
General Remark

95. The more important items which contributed to the increase of £113,871 in revenue are : Excise (£51,424), Forest (£40,997), State Railways (£45,437) and Land Revenue (including that due to Irrigation—£24,047), while there was a falling-off of £22,501 under Opium, £20,121 under Interest and £23,801 under Marine. The increase in Excise revenue was largest in Bombay (£47,779) where there was a considerable rise in the receipts from auction sales of licenses for the presidency town, while in Burma there was a falling-off of £17,889, due to the fact that the effect of a change in the date of holding auction sales of licenses from March to April, was not fully allowed for in the estimate. The improvement under Forest occurred chiefly in Burma and Bombay. Under State Railways, there was an improvement of £53,013 on the Great Indian Peninsula Railway and of £28,666 on the Rajputana-Malwa line, while there was a falling-off of £45,229 on the East Indian Railway, due to some outstandings on account of freight on coal recoverable from other Railways being under dispute. The variations on the other lines were small. The Land Revenue collections in Madras exceeded the Revised Estimate by £120,577 owing to smaller season remissions and greater promptitude in collections. On the other hand, there was a falling-off of £75,209 in Bombay in consequence of unfavourable agricultural conditions. The falling-off in Opium revenue occurred almost wholly in Bombay, the exports of Malwa opium in March last having been very small. The decrease under Interest was the result of the non-payment, during the year, of the amount due by the Simla-Kalka Railway for the half-year ending December 1904. Under Marine the recoveries from the Imperial Government on account of hire of Royal Indian Marine steamers were smaller than the estimate by £37,540, while pilotage receipts in Bengal showed an increase of £9,900. 1904-1905.
Variations under
Revenue.

1904-1905.
Decrease in
Expenditure.

96. The saving in expenditure was the net result of decreases and increases under a number of heads. The more important decreases occurred under (a) Minor Irrigation Works (£26,152), chiefly in Burma and Bengal; (b) Civil Works (£38,905)—chiefly on Provincial and Local Works in Bengal, there being an increase of £40,201 in the expenditure on Imperial Works; and (c) Army (£139,006). Under this last head there was a decrease of £60,105 in the effective charges, due mainly to an over-estimate of the charges for the Tibet Mission and Ordnance factories and to larger credits on account of stores returned from China and Somaliland. The charges for reorganization were also less than the Revised Estimate by £93,995, chiefly in expenditure on account of clothing, equipment for field hospitals and mobilisation equipment, and for hutting, clothing and gear in connection with the formation of additional mule corps and cadres. On the other hand, the non-effective charges exceeded the estimate by £15,094, mainly under payments to the War Office in settlement of its claims for 1903-1904.

1904-1905.
Increase in
Expenditure.

97. The chief increase in expenditure was under State Railways Working Expenses (£208,937), and accrued mainly on the East Indian Railway, £61,208; North-Western Railway £40,640; Bengal and North-Western and Tirhut Railways, £41,848; Rajputana-Malwa Railway, £24,497; Oudh and Rohilkhand Railway, £24,951; and Bengal-Nagpur Railway, £14,020. There was also an increase of £20,153 under Marine, chiefly in England, owing partly to increased expenditure on stores and partly to a payment on account of the construction of the R.I.M.S. *Dufferin*.

Section II.—The Revised Estimate of 1905-1906.

1905-1906.
Statement of the
Loss figures.

98. The following is a general comparison of the Budget and Revised Estimates of 1905-1906:—

	Budget.	Revised.	Revised, better.	Revised, worse.
Total Revenue, Imperial, Provincial and Local	£ 83,433,000	£ 84,829,500	£ 1,396,500	£ ...
Total Expenditure, Imperial, Provincial and Local	83,899,500	82,993,400	906,100	...
Adjustment of Provincial and Local Surplus or Deficit	—1,370,300	80,400	...	1,450,700
NET	82,529,200	83,073,800	...	544,600
SURPLUS	903,800	1,755,700	851,900	...

1905-1906.
General Remarks.

99. The surplus is £851,900 better than was expected (£1,755,700 against £903,800). This is arrived at by an excess of revenue over the Budget Estimate amounting, in the aggregate, to £1,396,500, partially counterbalanced by an excess of total expenditure charged to revenue of £544,600. The actual outlay is, however, £906,100 less than was provided in the Budget; but whereas the Budget provided for an expenditure of £1,370,300 by reduction of Provincial and Local balances, these have as a matter of fact increased by £80,400, with the result that the Imperial section of the account is worse to this extent by £1,450,700. This, of course, arises from the fact that while expenditure which is met from balances outside Imperial adjusts the total outlay of the year for the benefit of the Imperial surplus, the converse takes place when such balances are increased, since the increase is not at the disposal of the Government of India, and is, so far as it is concerned, on the same footing as additional expenditure. The change in the position in respect to the Provincial and Local balances arises mainly from initial grants to the extent of £400,000 (60 lakhs), made in accordance with usual practice to the Central Provinces and Eastern Bengal and Assam in connection with the new settlements with these provinces, having been added to their balances at the close of the year; to increase in the revenues of the Local Governments, supplemented by the distribution of the special grants for agriculture, minor Irrigation works and University reform referred to in paragraph 22 of Part I; and to the fact that they, as a rule, spent less largely than had been anticipated under Police, Education and Civil Works.

100. By Act I of 1906, passed on 26th January 1906, the duty on imported spirit was raised from R6 to R7 per proof gallon, with effect from 26th February last, and the duty on perfumed spirit and liqueurs was simultaneously enhanced from R8 and R6 per imperial gallon to R11 and R10 respectively. The object of this measure was to place the scale of taxation on imported spirit in a more suitable relation to that on country spirit. Financially the chief result of this Act during the current year was a large increase of duty receipts under Customs (spirits) in February, owing to importation of stock during the month's *moratorium* which had been allowed to enable the trade to adjust itself to the new conditions. The receipts under this head for February exceeded those of February 1905 by about 11½ lakhs, while a counterbalancing drop of 4½ lakhs is expected in the receipts of March.

101. Partial failure of rains has caused a considerable falling-off in the collections of Land Revenue, and Customs and Irrigation revenue have not been as good as was expected. But the deficiencies under these heads have been considerably exceeded by improvements under most of the others, the net increase in the total revenue being £1,396,500 as shown above. Notable increases have occurred in the traffic receipts of Railways, Excise and Forest revenue, seigniorage on silver coined, and interest on temporary investments of cash balances in England. There is also an enhancement of Army receipts in consequence of the inclusion therein of the recovery from the Imperial Government of the cost of Indian regiments employed in the colonies. In the Budget Estimate the expenditure on these regiments was omitted: it has now been decided to bring both expenditure and the corresponding receipts to account.

102. As mentioned above, there have been considerable savings in the estimates of Provincial Expenditure, owing to the inability of the Local Governments to spend fully the large allotments made to them in the Budget for reorganization of Police, Primary Education, and in aid of the resources of District Boards, the initiation of the necessary schemes having been unavoidably delayed. Nor has it been possible to spend in full the amount allotted for reorganization of the Army, especially in England where the expenditure is now expected to fall short of the Estimate by £777,100 owing to delay in the supply by the War Office of guns and other stores contracted for. On the other hand, a considerable amount of extra expenditure has been involved by the payment of 36.18 lakhs (£241,200) on account of subsidy to His Highness the Amir of Afghanistan which was not provided for in the Budget as negotiations with His Highness had not then been completed; by outlay amounting to nearly 16½ lakhs connected with the visit of Their Royal Highnesses the Prince and Princess of Wales; by the manœuvres at Rawalpindi (14 lakhs); and by an increase in the Working Expenses of State Railways consequent on improved earnings. The net result is a saving of £906,100 in the estimate of total expenditure.

103. The more important variations which have brought about the increase of £1,396,500 in the total revenue are as follows:—

		£	R
<i>Increases—</i>			
Salt	76,700	11,50,000
Stamps	60,400	9,07,000
Excise	210,400	31,55,000
Forest	188,200	28,23,000
Interest	139,700	20,96,000
Post Office	50,400	7,56,000
Mint	199,800	29,96,000
State Railways—Gross Receipts	794,300	1,19,14,000
Army Receipts	150,300	22,55,000
		<u>1,870,200</u>	<u>2,80,52,000</u>
<i>Decreases—</i>			
Land Revenue, including that due to Irrigation	443,900	66,58,000
Customs	39,100	5,87,000
Irrigation—Major Works—Direct Receipts	101,400	15,20,000
		<u>584,400</u>	<u>87,65,000</u>

1905-1906.
Enhancement of
duty on imported
spirit.

1905-1906.
Increase of
Revenue.

1905-1906.
Saving in
Expenditure.

1905-1906.
Variations under
Revenue.

1905-1906. <u>Salt Revenue.</u>	104. The reduction of the duty on salt made successively in March 1903 and March 1905 has stimulated consumption, and though provision was made in the Budget for a considerable increase, the actual consumption has been still larger, and the total revenue is now expected to exceed the estimate framed in March last by ₹11,50,000. All provinces show an increase except Bengal, where imports of Liverpool and German salt have fallen off and have been replaced by salt manufactured in Northern India.
1905-1906. <u>Stamp Revenue.</u>	105. Stamp revenue has also grown in all provinces except the Punjab where a falling-off of ₹3,50,000 is anticipated owing partly to the reduction of transfers and mortgages caused by the Land Alienation Act, and partly to the introduction of the Punjab Loans Limitation Act. The largest increases have occurred in Madras (₹4,80,000) and Bengal (₹3,05,000).
1905-1906. <u>Excise Revenue.</u>	106. The growth of Excise revenue has been higher than provided in the Budget Estimate in all provinces except the Administrations directly under the Government of India, Burma and the United Provinces. In the first-mentioned provinces there is a slight falling-off as compared with the Budget Estimate, owing mainly to scarcity in Ajmer-Merwara. In Burma the revenue is expected to fall short of the Budget Estimate by ₹2,00,000, owing to the restriction of retail sales of opium to the actual needs of consumers. In the United Provinces the result of a poor <i>kharif</i> , and of the serious injury to crops caused by the frost of last winter, has affected the Excise revenue of the province much more seriously than was anticipated in March last, and there is a decrease of ₹7,50,000 on the Budget Estimate. The largest increases have occurred in Madras (₹7,50,000), Bombay (₹10,00,000), Central Provinces and Berar (₹12,05,000), and Bengal (₹7,51,000). In the first two provinces it was anticipated that the receipts of 1904-1905 would not be worked up to owing to unfavourable agricultural conditions, a forecast which has proved erroneous: the receipts of 1905-1906 will now in both provinces somewhat exceed those of the year preceding. In Bengal and the Central Provinces the increase is due to prosperous seasons and the introduction of important reforms in administration.
1905-1906. <u>Forest Revenue.</u>	107. There has been a general growth of Forest revenue in almost all provinces. Of the total excess (₹28,23,000), as compared with the Budget, ₹19,00,000 accrues in Burma, and is due to increase in the amount of timber extracted by departmental agency and to exceptionally favourable conditions for the floating of timber down the rivers. In Bombay there is an increase of ₹6,00,000, chiefly from the supply of sleepers to railways and sale of grass in connection with famine operations.
1905-1906. <u>Interest Receipts.</u>	108. Under Interest, an additional sum of £157,700 has been obtained in England from the temporary investment of a larger proportion of the Secretary of State's cash balances at rates of interest higher than estimated. On the other hand, the investment of an additional two crores of the Paper Currency Reserve (<i>vide</i> paragraph 221 of last Financial Statement) having been made at a later date than was estimated, the receipts on account of interest thereon have fallen short of the estimate by £9,200. The only other notable variation is a falling-off of ₹1,08,000 (£7,200) in Bombay, the unfavourable season having adversely affected the recoveries of interest on loans granted to cultivators.
1905-1906. <u>Post Office Receipts.</u>	109. Under Post Office, the loss of revenue expected from the increase in letter-weight carried for half an anna and by a reduction in the rates of insurance fee has been more than made up by the increase resulting from the growth of the business of the department.
1905-1906. <u>Mint Receipts.</u>	110. The mints are credited with a seigniorage of 2 per cent on fresh issues of rupees, to cover the cost of coinage. Coinage in the current year has been unusually heavy, to meet the demands of trade as expressed through the Secretary of State's council drawings: hence the increase under Mint receipts.
1905-1906. <u>State Railways, Gross Traffic Receipts.</u>	111. In 1904-1905 the traffic on all the larger of railway systems was exceptionally favourable. Pilgrim, grain and coal traffic on the East Indian Railway, and the export wheat traffic on the North-Western Railway were specially heavy, while the traffic on the Great Indian Peninsula, Rajputana-Malwa and Bengal-Nagpur Railways was also good in consequence of favourable crops. In the Budget for 1905-1906 allowance was made for earnings on extra mileage to be opened and for an expansion of traffic on newly opened lines, while

it was anticipated that there would be a decrease on some of the lines which had shown unusually heavy receipts in the year before. The actual results are now, however, expected to be considerably better than the estimate. There has, indeed, been a falling-off in grain and seed traffic on the North-Western Railway; but this has been much more than counterbalanced by remarkable increases on the Bengal-Nagpur, Great Indian Peninsula and the Madras Railway (North-east section) owing to development of coal, cotton and grain traffic; and on the Rajputana-Malwa and Southern Mahratta Railways in consequence of movements of grain called forth by scarcity in parts of the country served by them. The total gross traffic receipts of State Railways are expected to exceed the estimate by ₹1,19,14,000 (£794,300); but Working Expenses are also likely to show an excess of ₹59,00,000 (£393,400). Increased outlay has been required to work the increased traffic, and there has also been an increase on the East Indian and Oudh and Rohilkhand Railways, in the charges for maintenance and renewals of rails and rolling-stock, and in the Company's share of the surplus profits of the Bengal-Nagpur and Burma Railways, which is included under Working Expenses. The net earnings are thus better than the estimate of March last by ₹60,14,000 (£400,900). The more important variations from the Budget Estimate are as follows:—

		INCREASE +.	DECREASE —	
		Gross Receipts.	Working Expenses.	Net Receipts.
		₹	₹	₹
Great Indian Peninsula				
Railway . . .	+42,50,000	+7,85,000	+34,65,000	
Rajputana-Malwa . . .	+30,00,000	+7,50,000	+22,50,000	
Bengal-Nagpur . . .	+37,00,000	+13,00,000	+24,00,000	
Southern Mahratta . . .	+9,00,000	+3,50,000	+5,50,000	
North-East line, Madras				
Railway . . .	+12,00,000	+6,50,000	+5,50,000	
East Indian	+19,50,000	—19,50,000	
North-Western . . .	—35,00,000	—18,00,000	—17,00,000	

112. The increase under Army receipts is due to a recovery of ₹13,87,000 (£92,500) from His Majesty's Government on account of five Indian regiments serving in the colonies as stated in paragraph 101; to larger receipts on account of the Indian Troop Service and of clothing issued to the Native Army on payment; and to abnormal sales of unserviceable ordnance stores. 1905-1906.
Army Receipts.

113. The decrease anticipated under Land Revenue, including the portion due to irrigation, occurs mainly in Madras (19'6 lakhs), Bombay (23'1 lakhs), the United Provinces (7'5 lakhs) and the Punjab (12'5 lakhs). In Bombay, this is the result of deficient rain. In Madras, as observed in paragraph 95, the collections of 1904-1905 were greater than had been anticipated when the Budget for 1905-1906 was framed, leaving less for realization in the latter year. In the United Provinces, the partial failure of the *kharif* and of the winter rains has necessitated remissions and suspensions. In the Punjab, the *kharif* has failed in the Delhi Division, and the earthquake in Kangra has also necessitated some remissions. 1905-1906.
Decreases of
Revenue.
Land Revenue.

114. The decrease in Customs revenue occurs mainly under silver bullion, private import of which has been checked by rise in price (16 lakhs); petroleum, owing to the cessation of imports of Russian oil consequent on the troubles at Baku (11 lakhs); and metals (other than silver) and manufactures of metals, where the falling-off occurs mainly under ironware, copper and tin (7½ lakhs). On the other hand, there has been a considerable increase under cotton manufactures, due mainly to larger imports into Bombay and Bengal (16 lakhs), while there is also a gain of 2½ lakhs under the excise duty on local manufacture. There is likewise an increase of 9½ lakhs under spirits owing mainly to the effects of the tariff legislation referred to in paragraph 100. 1905-1906.
Customs.

115. The falling-off under Irrigation, Major Works—Direct Receipts occurs chiefly in the United Provinces and the Punjab, and is due in the former province to decrease in the area irrigated for sugarcane owing to frost and bad seed, and in the latter to remissions necessitated by the failure of the cotton crop in certain tracts. 1905-1906.
Irrigation, Major
Works—Direct
Receipts.

1905-1906.
Variations in
expenditure.

116. The saving of £906,100 in the total expenditure is the net result of a large number of variations, the more important of which are as follows:—

DECREASES—		£	R.
Land Revenue		56,800	8,53,000
Police		203,200	30,48,000
Education		243,700	36,56,000
Scientific, etc., Departments		88,000	13,20,000
Famine Relief		75,200	11,29,000
Construction of Protective Irrigation Works		67,400	10,11,000
Civil Works		178,500	26,77,000
Military Works		71,200	10,68,000
Army Services		842,000	1,26,30,000
Special Defences		61,200	9,18,000
INCREASES—			
Opium		59,000	8,85,000
Interest		52,900	7,93,000
Telegraph		33,800	5,07,000
General Administration		81,500	12,22,000
Political		272,300	40,84,000
Miscellaneous		56,100	8,41,000
Reduction of Debt		119,800	17,97,000
State Railways—Working Expenses		393,400	59,00,000
Irrigation, Major Works—Working Expenses		44,800	6,71,000

1905-1906.
Decreases.
Land Revenue.

117. Under Land Revenue the Budget provision has in most provinces proved larger than was necessary. In the Central Provinces the transfer of the Sambalpur district to Bengal from the 16th October 1905, and the formation of the Drug district from 1st January 1906 instead of from 1st October 1905, have caused some savings. In Burma operations connected with Land Records and Agriculture and town surveys have been curtailed. In Eastern Bengal and Assam charges for survey and settlement are expected to show a saving of Rs. 2,75,000 owing to the postponement of settlement operations in Faridpur. In the United Provinces the charges for the purchase of estates under the Bundelkhand Encumbered Estates Act are expected to be less by Rs. 52,000, and delay in the introduction of measures for improving the position of the patwari and kanungo staff is likely to yield a saving of Rs. 46,000. In the Punjab there is a saving of Rs. 2,17,000 in settlement charges.

1905-1906.
Police, Education,
Medical and
Scientific and
other Minor
Departments.

118. The savings under Police, Education, and Scientific and other Minor Departments are due mainly to the special grants provided in the Budget Estimate for police reform, improvement of primary education, and agricultural and veterinary development not having been spent in full, and, to a smaller extent, to the usual savings in most of the provinces on the allotments made for salaries and other charges. A portion of these special grants has in most provinces been transferred to the Public Works Department for construction of buildings. The only points which need special mention are the following: Cantonment Funds have been relieved of police charges with effect from 1st April 1905. Under 'India General' the creation of a Central Research and an X-ray institute will involve an expenditure of Rs. 44,000 in the year for which no provision was made in the Budget Estimate. In Burma, provision was made for strengthening the Rangoon and Toungoo battalions of military police, but the scheme has not yet been sanctioned. In the North-West Frontier Province a special provision of Rs. 76,000 for the pay of the Border Military Police has not been required. In Madras there is a saving of Rs. 5 lakhs under Medical chiefly on the provision made for plague charges by Local Boards. In Bombay, a special payment of Rs. 2,00,000 is proposed to be made to the new Prince of Wales' Museum for Western India.

1905-1906.
Famine Relief,
Construction of
Protective Irriga-
tion Works and
Reduction of Debt.

119. The charges for Famine Relief are expected to fall short of the estimates in Madras and Bombay by Rs. 13,93,000 and Rs. 11,36,000, respectively, while in Ajmer and the United Provinces, where expenditure under this head was not contemplated when the Budget was framed, outlay to the amount of Rs. 6,96,000* and Rs. 6,46,000, respectively, has been found necessary. Taking all the

* This includes some small expenditure in Baluchistan and (payable by the Government of India) in Rajputana.

provinces together, there is a net saving of ₹11,29,000 under this head. A saving of ₹10,11,000 is also expected on the grant for the construction of Irrigation Works, chiefly in Bengal, United Provinces and Bombay, while the expenditure on the construction of Protective Railways in Madras is likely to exceed the allotment by ₹3,43,000. The net result under the three heads mentioned is a saving of ₹17,97,000, which has been charged under Reduction of Debt, in addition to the amount provided in the Budget, to work up to the full grant of ₹1,50,00,000 (£1,000,000) for Famine Relief and Insurance.

120. Under Civil Works (Provincial) expenditure, there is a saving on the Budget allotment of about 15 lakhs in the Punjab, and about 5 lakhs in Madras. 1905-1906.
Civil Works.
In the Punjab the grants for the Simla Extension scheme, residences for Government officials and construction of some special buildings and works of public utility have not been fully utilised, while in Madras the schemes for drainage and water-supply in certain towns for which provision had been made are not yet ripe for execution. In Bengal the Budget included a large reserve for police, jail and other buildings which has not been fully required, but this reduction is nearly counterbalanced by additional expenditure in Eastern Bengal and Assam consequent on the creation of that province. In other provinces there is an increase, the most notable being in the United Provinces, on account of the construction of normal schools and police buildings and repairs to archaeological buildings, and in Burma for schools and a General Hospital at Rangoon. There is a saving on the estimate for local expenditure of all provinces owing to the large grants made to District Boards not having been yet fully utilized.

121. It has been decided to eliminate the special sub-head Reorganization under the main heads 46.—Army and 44.—Military Works, and on the receipt side under XXXIII.—Army, as it has been found that although the Reorganization outlay can be approximately estimated, it cannot be brought to separate account with absolute accuracy, since, in the case of some measures recurring expenditure which simply goes to strengthening existing units cannot be separately earmarked without an immense amount of trouble. The figures for Reorganization and other special measures will, however, be separately exhibited with approximate correctness in paragraph 206 (Part IV). 1905-1906.
Military
Expenditure.

122. The decreases under Army and Military Works, and Special Defences are entirely due to lapses under Reorganization and other special expenditure, and are mainly caused by delay in the supply of new artillery, and stocks of ammunition and other stores contracted for through the War Office. 1905-1906.
Special Military
Expenditure.

123. Under ordinary Army charges there is an increase of ₹6,36,000 (£42,400), but this is only nominal. It arises from the inclusion under this head of nearly 14 lakhs for Indian regiments stationed in the colonies, the cost of which is, as already stated, recovered from His Majesty's Government. Apart from this, there would be a decrease of nearly 7½ lakhs, and that after allowing for an expenditure of 16·7 lakhs in connection with the Rawalpindi manœuvres and other charges connected with the Royal visit for which Budget provision was not made, and for 2·4 lakhs in connection with outlay consequent on the Kangra earthquake. But for these charges, there would be a decrease of 26½ lakhs. This occurs chiefly by reason of smaller expenditure on stores in England and payments to the War Office on account of British forces serving in India (31·4 lakhs), the chief counterbalancing item being 5 lakhs owing to rise in food prices in India. 1905-1906.
Army Ordinary.

124. The outturn of the opium crop in the Behar Agency has been greater than was expected in March last, and has resulted in larger payments to the cultivators for the raw product. 1905-1906.
Increases of
Expenditure.
Opium.

125. Under Interest on Debt, the discount on the 3 per cent stock for ₹2,000,000 issued in England has involved an extra payment of ₹47,500. In India also, there has been an extra payment of ₹70,000 (£4,700) on account of interest on a temporary loan of 70 lakhs (in rupees) procured from the Maharaja Sindhia in December, when the Secretary of State's large council drawings rendered it necessary to strengthen our stock of coined silver. 1905-1906.
Interest on Debt.

126. The increase under Telegraph is caused by the payment of ₹17,500 to the Telegraph Companies concerned for loss of receipts consequent on the operation of the reduced tariff for foreign messages between March 1902 and March 1904, and by addition to establishment to cope with increased traffic in India. 1905-1906.
Telegraph.

1905-1906.
General Administration and
Miscellaneous.

127. The special expenditure connected with the visit of Their Royal Highnesses the Prince and Princess of Wales has chiefly contributed to the increases under General Administration and Miscellaneous. The division of Bengal has also caused an increase under the first head, while the relief measures necessitated by the earthquake involved considerable expenditure under Miscellaneous in the Punjab.

1905-1906.
Political.

128. The items which are mainly responsible for the increase under Political are the payment of Rs 36,18,000 on account of the subsidy of the Amir of Afghanistan referred to in paragraph 102, extra charges incurred on account of the visit of the Prince and Princess of Wales, the strengthening of frontier militia corps, increase of consular escorts in Persia, and the purchase of a steam launch for the Consul at Mohamerah.

1905-1906.
State Railways—
Working
Expenses.

129. The increases in State Railways—Working Expenses and under Reduction of Debt have been explained in paragraphs 111 and 119.

1905-1906
Major Works—
Working
Expenses.

130. The increase in Working Expenses, Major Irrigation Works occurs chiefly in the Punjab, and is due to refunds of water-rates and outlay on some important works, and special repairs for which provision was not made in the Budget Estimate. A smaller expenditure under 49.—Irrigation, Capital Expenditure has also involved the debit to the former head of a larger share of the Establishment charges.

Section III.—The Budget Estimate of 1906-1907.

1906-1907.
Statement of the
Gross figures.

131. The following is a general comparison of the Budget Estimate of 1906-1907 with that of 1905-1906:—

	1905-1906.	1906-1907.	1906-1907, better than 1905-1906.	1906-1907, worse than 1905-1906.
Total Revenue—Imperial, Provincial and Local	£ 83,433,000	£ 86,495,100	£ 3,062,100	£ ...
Expenditure—				
Total outlay—Imperial, Provincial and Local	83,899,500	86,698,600	...	2,799,100
Adjustment of Provincial and Local Surplus or Deficit	—1,370,300	—1,077,600	...	292,700
Total net expenditure charged to Revenue	82,529,200	85,621,000	...	3,091,800
Imperial Surplus	903,800	874,100	...	29,700

1906-1907.
Remissions
of Taxation.

132. The above figures allow for the following remissions of local taxation mentioned in Part I of the Financial Statement:—

Repeal of the patwari cess in the United Provinces, the Punjab, the Frontier Province, Ajmer, the Central Provinces and the Sambalpur district of Bengal.

Abolition of the ryotwari village service cess in Madras, and of the village service cess in Coorg.

Abolition of the zamindari *dak* cess in Bengal and Eastern Bengal.

1906-1907.
Relief of
District Boards
in certain
provinces from
charges for
District Post, etc.

133. The cost of these measures is Rs 82,19,000 (£547,900). Rs 15,000 (£34,300) have also been allotted for the purpose of relieving District Boards in the United Provinces, the Punjab,* Burma, the Central Provinces, Frontier Province, and Coorg of the contributions they have hitherto paid towards District Post charges. These charges being now taken over by the Government of India, the District Boards concerned will be able to allot a corresponding amount of revenue for purposes of local improvement. The District Boards in the United Provinces have likewise been relieved of some small charges, amounting in all to

* In the Punjab District Post charges were taken over as Imperial in 1905-1906; but a contribution of Rs 1,41,000 formerly made by the District Boards for this purpose continued to be paid to the Local Government. This will now cease, the Local Government receiving a compensatory assignment from Imperial funds.

about R67,000, which they previously paid to the Local Government for school and establishment purposes.

134. Finally, another special assignment of 25 lakhs (£166,700), which will be placed at the disposal of the Provincial Governments, has been added to the 50 lakhs (£333,300) assigned last year for purposes of police reform*; 5 lakhs are to be assigned to the Local Governments for annual expenditure on European and technical education; and the grant of 20 lakhs for agricultural and veterinary development referred to in paragraph 126 of the last Financial Statement has been increased to 24 lakhs. Of the last mentioned sum, 21½ lakhs have been distributed to the provinces, while 2½ lakhs are reserved for expenditure classed as Imperial, such as that at the Agricultural Research Institute at Pusa and the provision of additional Civil Veterinary Officers.

135. But for these measures of fiscal relief and administrative improvement, the surplus of the year would have stood at £1,687,500 or £813,400 above the figure actually arrived at, while the revenue would have been £547,900 higher. After making the above adjustments and remissions, the year is estimated to close with a surplus of £874,100 or £29,700 less than the surplus budgeted for in 1905-1906. As compared with that year, there is an increase of revenue of a little over £3 million (£3,062,100), but an increase of about £2½ million (£2,799,100) in actual outlay. So far the net result is £263,000 better: the diminution in the surplus of the year as compared with that of its predecessor is consequent on the anticipation that £292,700 less of the actual outlay contemplated will be met out of Provincial and Local balances.

136. The greater part of the estimated increase of revenue in 1906-1907 as compared with the Budget of the preceding year is due to Railways, which show a total increase of £2,298,200 under Receipts, counterbalanced, however, by an increase of £1,633,100 under Charges, thus affording a net additional gain of £665,100.

137. Other important variations are increases of £331,700 under Land Revenue including portion due to Irrigation, £140,000 under Salt, £163,400 under Stamps, £374,200 under Excise, £100,200 under Customs, £186,900 under Forest, £118,800 under Post Office, £96,400 under Mint, £148,500 under Major Irrigation Works—Direct Receipts, and £136,900 under Army Receipts; counterbalanced by decreases of £646,600 under Opium and £516,800 under Provincial Rates. These will all be referred to below.

138. The most important heads of Receipt in the Indian Budget are the following:—

	£	R
Railways—		
Total gross receipts	26,154,600	39,23,19,000
Net current earnings of State Railways, deducting working expenses	12,897,900	19,34,69,000
Total net receipts deducting interest and all other charges debitable to Railways	2,229,300	3,34,40,000
Land Revenue proper	19,764,200	29,64,62,000
Excise	5,817,300	8,72,60,000
Opium	4,831,100	7,24,66,000
„ net	2,959,800	4,43,97,000
Customs	4,464,200	6,69,63,000
Salt	4,400,000	6,60,00,000
Stamps	3,970,700	5,95,60,000
Irrigation—		
Gross receipts	3,250,000	4,87,50,000
Net receipts	257,100	38,56,000
Provincial Rates	2,261,300	3,39,20,000
Forest	1,789,900	2,68,48,000
„ net	804,400	1,20,66,000
Post Office	1,727,100	2,59,06,000
„ „ net	126,200	18,93,000

139. *Railways*.—As explained in paragraph 111, there has been a continued expansion of traffic in the current year on most of the railways except the North-

* Besides 2 lakhs further allotted to the Government of Eastern Bengal and Assam in connection with reorganization of its military police.

Western line. Next year agricultural conditions are expected to be more favourable, and provision has been made in the Budget Estimate for a further expansion of traffic, for a recovery of the ground temporarily lost by the North-Western Railway, and for opening of additional mileage. The Budget Estimate of gross Railway receipts, the bulk of which are derived from State Railways, has accordingly been placed at £2,298,200 (345 lakhs) and £1,496,400 (224½ lakhs) higher than the Budget and Revised Estimates, respectively, of the current year; and that of net current earnings of State Railways (receipts, less working expenses) at £1,227,900 (184 lakhs) and £827,000 (124 lakhs) more in each case. A part of the increase in the gross traffic receipts is, it should be explained, due to the fact that the Bombay, Baroda and Central India Railway having become a State Railway with effect from 1st January 1906, the Budget Estimate for next year includes the gross receipts of the Railway for a whole year, while the Estimates for the current year include gross receipts for three months and only net earnings for the nine months, during which it was a Guaranteed Railway.*

140. The following are the more important differences in regard to gross receipts, working expenses, and net earnings of State Railways as compared with the Revised Estimate of the current year:—

	INCREASE + DECREASE —		
	Receipts.	Working Expenses.	Net Earnings.
	R	R	R
<i>Better than Revised—</i>			
Bengal-Nagpur Railway	+ 25,00,000	+ 7,00,000	+ 18,00,000
East Indian Railway .	+ 25,00,000	+ 6,50,000	+ 18,50,000
Burma Railways .	+ 7,00,000	— 78,000	+ 7,78,000
Rajputana-Malwa Railway	+ 5,00,000	...	+ 5,00,000
<i>Worse than Revised—</i>			
North-Western Railway	+ 45,00,000	+ 51,50,000	— 6,50,000

It will be observed that the increased receipts from the North-Western Railway will be more than counterbalanced by enhanced working expenses consequent on the necessity for renewal of permanent-way and rolling-stock.

Total results.

141. Taking the Railway Revenue Account as a whole, the Budget Estimate for next year compares as follows with the Budget and Revised Estimates of the current year:—

	IN HUNDREDS OF POUNDS STERLING.			IN THOUSANDS OF RUPEES.		
	1905-1906.		1906-1907.	1905-1906.		1906-1907.
	Budget.	Revised.	Budget.	Budget.	Revised.	Budget.
Gross Receipts, including net receipts of Guaranteed Railways, and repayments of advances of interest by Subsidised Companies	£ 23,856.4	£ 24,658.2	£ 26,154.6	R 35,78.46	R 36,98.73	R 39,23.19
Working Expenses	11,236.9	11,630.3	12,784.0	16,85.54	17,44.54	19,17.60
Interest, Annuities, Surplus profits payable to Companies, etc. . . .	10,917.1	10,907.6	11,018.6	16,37.56	16,36.14	16,52.79
Miscellaneous Charges	138.2	94.8	122.7	20.73	14.21	18.40
NET RECEIPTS	1,564.2	2,025.5	2,229.3	2,34.63	3,03.84	3,34.40

The net profit accruing to Government from railways is thus expected to amount to £2,229,300 next year, being in excess of the Revised Estimate of the current year by £203,800 and £665,100 better than the current year's Budget.

* Only the net earnings of Guaranteed Railways appear in the India Accounts.

142. *Land Revenue*, including the portion due to Irrigation, is placed at 1906-1907. £331,700 (nearly 50 lakhs) better than the Budget for 1905-1906 and £775,600 *Land Revenue.* (116 lakhs) better than in the Revised Estimate of that year, which has fallen materially short of the Budget in Madras, Bombay, the United Provinces, and the Punjab. The increase as compared with the 1905-1906 Budget occurs mainly in the United Provinces, where large remissions had to be given owing to the frosts of last year, and in Burma, and is counterbalanced by a decrease of nearly 12 lakhs in Madras, where the figure taken in 1905-1906 has proved an over-estimate.

143. *Excise* is taken at £374,200 (56 lakhs) better than in the Budget 1906-1907. of 1905-1906, the Revised Estimate of which allows for an increase of £210,400. *Excise.* The main increases as compared with the current year's Budget are, as in the Revised Estimate, in Bombay, Madras, Bengal and the Central Provinces—*vide* paragraph 106. There is also an increase of 4½ lakhs in the Punjab due to the replacement of illicit by licit consumption. In the United Provinces there is a decrease (5 lakhs), the result of unfavourable seasons in some districts.

144. *Opium* is a notoriously difficult head of receipt to estimate for, since its 1906-1907. main factor, the sale-proceeds of Bengal opium auctioned in Calcutta for export, *Opium.* is determined by circumstances in China of which we have little knowledge, and by the speculation of the market, and the prices obtained at the monthly auctions are subject to violent fluctuations. In 1904-1905 the average sale-price obtained was ₹1,587 per chest, and it was therefore thought safe to take ₹1,400 as the estimated price for 1905-1906. This figure has been slightly exceeded, the average for the whole year having been ₹1,434 per chest, but in the last months there was a heavy drop, and the March sales, which generally give a result better than that obtained as the average for the next 12 months, only produced a chest price of ₹1,258. This being so, it is not safe to estimate for more than ₹1,125 per chest for 1906-1907. The fall of revenue thus brought about is slightly counterbalanced by the fact that the number of chests sold per month has been raised, owing to accumulation of stocks, from 4,000 to 4,400 with effect from January last, so that in 1906-1907 there will be a sale of 52,800 chests against 49,200 in 1905-1906.

The export duty on Malwa opium is also an uncertain factor, and a considerable drop in exports during the current year warrants the expectation that the receipts under this head will yet be less by 21 lakhs than the amount taken in the last Budget. In all, therefore, there is a *decrease* of £646,600 (97 lakhs) under Opium as compared with the current year's Budget, the only material decrease of revenue anticipated save that under Provincial Rates.

The expenditure under Opium, on the other hand, shows an increase of £33,900, the amount provided in the current year's Budget having been shown by experience to be inadequate for present expenses of cultivation, and taking this into account the net falling-off under Opium receipts is thus £680,500 (102 lakhs).

145. The Revised estimate of *Customs* is placed at £39,100 less than in the 1906-1907. current year's Budget, while in the Budget for 1906-1907 it is estimated that *Customs.* this decrease will be made up and a further increase of £100,200 obtained. Increase as compared with the Budget of 1905-1906 is expected mainly under Cotton manufactures and Spirits, in the latter case owing to the recent enhancement of the duty on imported spirit from ₹6 to ₹7 per proof gallon, with proportionate increases for perfumed spirits and liqueurs. Decreases of 11 and 14 lakhs are allowed for under petroleum and silver with reference to the results of the Revised Estimate (paragraph 114).

146. The increases budgeted for under *Salt* and *Stamps* amount to 1906-1907. £140,000 and £163,400, respectively. In both instances they are justified by *Salt.* *Stamps.* excess of the Revised Estimate over the Budget forecast for the current year, and by the increasing consumption of salt consequent on the late reductions of duty. The increase under Stamps is spread over most of the provinces, the only noticeable decrease being in the Punjab which shows a falling-off, attributed, as stated in paragraph 105, to the effect of the Alienation of Land Act and the Punjab Loans Limitation Act.

147. Under *Irrigation* there is an increase of revenue of £148,500 1906-1907. in direct receipts from Major Irrigation Works, and that portion of the land *Irrigation* *Receipts.* revenue which is due to Irrigation shows an expansion of £36,200, while Minor

Irrigation receipts are estimated to be £10,000 better than in the current year's Budget. The increase in direct Major Irrigation receipts is largest in the United Provinces and the Punjab, where, as observed in paragraph 115, the Revised Estimate shows a falling-off, but where circumstances are favourable for increased irrigation in the coming year.

*Irrigation
Expenditure.*

148. On the expenditure side, however, there is an additional outlay of £99,500. Increased capital expenditure on Major Irrigation Works adds £30,900 to the Interest charges thereon, while the working expenses show an increase of £47,000 which occurs mainly in the Punjab and Madras. The outlay on Minor Irrigation Works is raised by £21,600, the largest increase being in Bombay (nearly 3 lakhs).

*1906-1907.
Net results under
Major Irrigation
works.*

149. Comparing the total current outlay under Major Irrigation Works with the revenue produced thereby, including the portion of land revenue due to Irrigation, the results are as follows:—

	Budget of 1905-1906.		Budget of 1906-1907.	
	£	R	£	R
Direct receipts	1,972,300	2,95,84,000	2,120,800	3,18,12,000
Portion of land revenue due to Irrigation	915,900	1,37,38,000	952,100	1,42,82,000
TOTAL	2,888,200	4,33,22,000	3,072,900	4,60,94,000
Charges, including interest	1,902,400	2,85,36,000	1,980,300	2,97,05,000
Net receipts	985,800	1,47,86,000	1,092,600	1,63,89,000

showing an estimated betterment of nearly £107,000 in the coming year.

*1906-1907.
Provincial Rates.*

150. *Provincial Rates* (£2,261,300) show a decrease of £516,800 owing to the remission of cesses referred to in paragraph 132, and, in Bombay, to the transfer of the receipts hitherto credited as village service cess in Sind to the head Land Revenue.

*1906-1907.
Forest.*

151. *Forest* revenue (£1,789,900) shows an increase of £186,900, or allowing for increased expenditure a net enhancement of £127,900. £113,300 of the net increase occurs in Burma, and is justified by the excess of the Revised Estimate over the Budget forecast for the current year.

*1906-1907.
Post Office.*

152. *Post Office* receipts (£1,727,100) show an increase of £118,800, but the expenditure is increased by nearly half this amount (£57,400).

*1906-1907.
Army receipts.*

153. There is an increase of £136,900 under Army receipts (£1,064,500) which is due to the causes already referred to in paragraph 112. The receipts anticipated are somewhat less (by £13,400) than in the Revised Estimate.

*1906-1907.
Telegraph.*

154. Only two other Revenue heads need special mention. Under *Telegraph* (£938,100) there is an increase of £29,000, which is more than swallowed up by increased expenditure to the amount of £120,600, mainly on construction and maintenance, and including a payment of £14,000 for guarantee to the Telegraph Companies concerned on loss of revenue consequent on the cheapening of foreign telegrams.

*1906-1907.
Mint.*

155. Under *Mint* (£201,900) an increase of £96,400 has been allowed for as compared with the Budget of the current year, but a decrease of £103,400 as compared with the Revised Estimate. The experience of the last few months warrants the expectation that coinage operations, on which, as stated in paragraph 110, a seigniorage of 2 per cent is credited to "Mint," will be larger than was allowed for in framing the last Budget. A concomitant but smaller increase of expenditure (£16,000) is also provided for.

*1906-1907.
Expenditure:
Main heads of
increase.
Railways.*

156. The greater part of the increase of £2,799,100 under total Expenditure shown in the table in paragraph 131 falls under the head Railways, which shows a total advance in charges of £1,633,100 (Rs. 2,44,96,000) as compared with the Budget of 1905-1906. This is due in the main to increased working expenses necessitated by the expansion of traffic, e.g. renewals of permanent way and rolling stock, and outlay on new extensions, and to growth of interest charges consequent on continued capital outlay. As observed in paragraph 136, this increase is more than covered by enhanced receipts, the railway transactions credited and debited to Revenue showing a net surplus which is £665,100 more than that provided in the current year's Budget.

157. Other noticeable increases in expenditure occur under —

Other Heads.

	£	R
(1) Land Revenue	95,000	14,25,000

Due to necessary increase of revenue establishments, and to reorganization of village establishments in Madras. The Central Provinces show a decrease of nearly 2 lakhs, but this is only nominal, as the constitution of a separate Judicial Service there will necessitate the transfer of a considerable amount of expenditure from this head to Law and Justice. Taking the two heads together, there is an increase of nearly 3 lakhs in the province which would have been greater but for a reduction in the number of districts in Berar.

	£	R
(2) Stamps	83,000	12,45,000

This is due to the cost of all stamps being now included under this head, whereas formerly Postal and Telegraph stamps were charged to those heads of account.

	£	R
(3) Forest	59,000	8,85,000

This, as above remarked, is the concomitant of a much larger increase in receipts.

	£	R
(4) General Administration	54,400	8,16,000

This occurs mainly in Eastern Bengal and Assam, and is due to expenditure consequent on the creation of the new province.

	£	R
(5) Courts of Law	97,000	14,55,000

This occurs mainly in the Central Provinces as explained above, and in Burma, where also a separate Judicial service, such as already exists in other provinces, is being evolved.

	£	R
(6) Police	206,900	31,04,000

This is due to the progress of Police reforms, facilitated by the fresh assignments to the Local Governments referred to in paragraph 134.

	£	R
(7) Education	73,700	11,06,000

This is spread over most provinces, and represents in the main additional expenditure on schools.

	£	R
(8) Political	283,700	42,56,000

As indicated in paragraph 102, no provision was made in the Budget for the current year for payments to the Amir of Afghanistan, as the negotiations then on foot with His Highness had not been concluded. The coming year's Budget provides for the normal annual subsidy of 18½ lakhs *plus* about 24 lakhs in part payment of arrears hitherto undrawn.

	£	R
(9) Scientific and other Minor Departments	63,200	9,48,000

Due mainly to the development of agricultural and veterinary improvement.

	£	R
(10) Irrigation	99,500	14,92,000

Explained in paragraph 148.

	£	R
(11) Civil Works	153,000	22,95,000

Explained in paragraph 168.

	£	R
(12) Famine Relief	327,400	49,11,000

Explained in paragraph 172.

1906-1907.
Decrease under
Military charges.

158. Under Military charges there is a net *decrease* of expenditure of £391,000 made up as follows:—

	£	R
Army	435,600	65,34,000
Military Works	+20,300	+3,04,000
Marine (Military portion)	+46,100	+6,90,000
Special Defences	—21,700	—3,25,000
TOTAL	—390,900	—58,65,000

If we further take into account the increase of £130,200 under receipts, shown in the table in paragraph 162, the decrease of net expenditure is increased to £521,100. Further information as to Military charges is given in paragraphs 162—164.

1906-1907.
Main objects of
Expenditure.

159. The main heads of Expenditure provided for in the Indian Budget are as follows:—

	£	R
Railways—Revenue Account	23,925,300	35,88,79,000
Military Services	21,841,600	32,76,25,000
Salaries and expenses of Civil Departments (General Administration, Law and Justice, Police, Education, Ecclesiastical, Medical, Political, Scientific, etc., Departments, and Marine, deducting the portion appertaining to Military Services)	13,689,300	20,53,40,000
Charges connected with collection of revenue (Land Revenue, Opium, Salt,* Stamps, Excise, Provincial Rates, Customs, Assessed Taxes, Forest, and Registration: also Refunds and Drawbacks, and Assignments and Compensations)	9,057,200	13,58,58,000
Civil Works	5,689,900	8,53,49,000
Miscellaneous Civil charges (Pensions, Absentee Allowances, Stationery and Printing, and Miscellaneous)	4,323,500	6,48,52,000
Irrigation	2,992,900	4,48,94,000
Post and Telegraph	2,755,900	4,13,38,000
Interest	1,278,800	1,91,82,000

1906-1907.
Railways.

160. Railway expenditure, the growth under which is, as has been shown, more than counterbalanced by enhanced receipts, falls under the following heads:—

	£	R	Increase over the current year's Budget.	
			£	R
Working Expenses of State Railways	12,784,000	19,17,60,000	+1,547,100	+2,32,06,000
Interest and Annuity charges	10,431,200	15,64,68,000	+727,400	+1,09,11,000
Payment to Guaranteed and Subsidised Companies	664,100	99,61,000	—625,200	—93,78,000
Miscellaneous	46,000	6,90,000	—16,200	—2,43,000
TOTAL	23,925,300	35,88,79,000	1,633,100	2,44,96,000

161. The increase under Working Expenses and under Interest is a necessary corollary to the larger earning capacity of State Railways and to the increased capital outlay on further Railway development. The decreases are mainly due to the transfer of the Bombay, Baroda and Central India Railway from "Guaranteed" to "State."

* Including cost of production.

162. The total Military expenditure budgeted for in 1905-1906 and in 1906-1907 compares as follows :—

	1905-1906, Budget.		1906-1907, Budget.	
	£	R	£	R
Army	20,282,300	30,42,35,000	19,846,700	29,77,01,000
Military Works	1,149,100	1,72,36,000	1,169,400	1,75,41,000
Marine*	547,900	82,18,000	594,000	89,10,000
Special Defences	253,200	37,98,000	231,500	34,73,000
TOTAL	22,232,500	33,34,87,000	21,841,600	32,76,25,000
<i>Deduct—Receipts</i>				
Army, Military Works and Marine	1,124,600	1,68,69,000	1,254,800	1,88,22,000
Total Net Expenditure	21,107,900	31,66,18,000	20,586,800	30,88,03,000

163. In the Budget Estimate of 1905-1906, 490 lakhs were allotted for special charges. *viz.*, Reorganization, and other special measures for the improvement of the Army, re-armament, special defences, and a new ship for the Royal Indian Marine, leaving the ordinary expenditure at nearly 28.45 lakhs. The Budget for 1906-1907 allows 415 lakhs for Reorganization and other special measures and 28.61 lakhs for ordinary expenditure, making a total of £21,841,600 (32.76 lakhs). Against this there is £1,254,800 in the shape of receipts, so that the net military outlay is £20,586,800 as against £21,107,900 in 1905-1906.

164. Ordinary Military expenditure shows an increase of about 16 lakhs, of which 14 lakhs are under Army; but this amount represents outlay on Indian regiments serving in the Colonies, the charges for which are refunded by His Majesty's Government, thus accounting largely for the increase under Military receipts. The net actual ordinary expenditure under Army is thus the same as in the current year's budget. A decrease of 16 lakhs on stores and payments in England is counterbalanced by increase of a like amount in India, mainly owing to rise in the price of food (8½ lakhs), unadjusted expenditure on account of the Rawalpindi manœuvres (1 lakh) and dairy farm charges (5½ lakhs). This latter amount, however, will, it is hoped, be covered by corresponding receipts.

165. Ordinary expenditure under Marine shows an increase of about 2 lakhs due largely to higher payments under wages. Here again the increase is likely to be covered or partially covered by receipts for work done for outside Departments.

166. Under *Salaries and Expenses of Civil Departments* the most important heads of account are Police (£3,761,700), Courts of Law (£2,508,200), Education (£1,912,800), General Administration (£1,555,100), Medical (£1,118,100), Political (£953,800), Scientific and Minor Departments (£803,000); and the Budget shows an aggregate increase of £903,000 over the estimate of the current year. This is spread over all the constituent heads except Ecclesiastical, which shows a small decrease. The principal increases have already been explained in paragraph 157.

167. Under *Charges connected with collection of Revenue, etc.* the principal heads are Land Revenue (£3,473,000), Opium (£1,871,300), Assignments and Compensations (£1,184,700), and Forest (£985,500), and there is an aggregate increase of £300,400. The principal variations have already been noticed in paragraph 157.

168. The expenditure under *Civil Works* naturally tends to expand, especially with reference to increased building provision consequent on Police reform and the development of primary education, and to the more favourable financial situation of most of the Local Governments. This was shown with marked effect

* Excluding expenditure of Local Governments on river navigation.

in the current year, the Budget provision for which was £5,536,900 against £4,778,295 actually spent in 1904-1905. The Revised estimate is, however, reduced to £5,358,400; while in the coming year's Budget the amount provided is £5,689,900. This allows for increased expenditure in Eastern Bengal and Assam consequent on the creation of the new province.

1906-1907.
Miscellaneous
Civil Charges.

169. Under *Miscellaneous Civil Charges* the most important element is Civil superannuation allowances and pensions (£2,988,200) which shows an increase of £46,600.

1906-1907.
Irrigation, and
Post and
Telegraph.

170. The expenditure under *Irrigation, Post and Telegraph* has already been noticed in connection with the receipts under these heads.

1906-1907.
Interest.

171. Of the total amount payable as *Interest* on debt (£7,824,800), the greater part is charged off against Railways and Irrigation where, as above shown, it proves a profitable investment. The balance, which relates to the ordinary non-productive debt, is gradually diminishing with the transfer of debt of this description to the Railway and Irrigation heads against capital outlay incurred from surplus current revenues. It amounts to £801,700 in the coming year's Budget against £895,800 in that of 1905-1906.

Interest on other obligations (£477,100), which are mainly Post Office Savings Bank deposits, shows a slight increase of £8,000. Including these, the total Interest charges debited as such amount to £1,278,800; but they are largely counterbalanced by a corresponding receipt item of £853,000, which represents interest on the invested portion of the Currency balances, on temporary investment from current balances held by the Secretary of State, and on loans to local bodies, cultivators, etc. The provision under the receipt head shows, it may be observed, an increase of £47,600 over the current year's estimate, which is due partly to the continued grant of new loans to local bodies, and partly to the anticipation of larger temporary investments out of the Secretary of State's cash balances and to the provision for a full year's interest on the additional currency investment of £1,333,000 (2 crores of rupees) made in the current year.

1906-1907.
Famine Insurance
Grant.

172. Finally, it has to be observed that though the total expenditure provided for against the *Famine Insurance Grant* in 1906-1907 is the same as in the current year, *vis.*, the normal figure of £1,000,000 (150 lakhs), the distribution of expenditure is very different as will be seen from the following statement:—

	1905-1906, Budget.		1906-1907, Budget.	
	£	₹	£	₹
Famine Relief	211,700	31,76,000	539,100	80,86,000
Protective Irrigation Works and Rail- ways	415,100	62,26,000	447,700	67,15,000
Reduction or Avoid- ance of Debt	373,200	55,98,000	13,200	1,99,000
	<u>1,000,000</u>	<u>1,50,00,000</u>	<u>1,000,000</u>	<u>1,50,00,000</u>

In 1905-1906 famine expenditure was budgeted for to the extent of 15 lakhs in Madras and nearly 17 lakhs in Bombay, while the Revised Estimate shows a total of 20½ lakhs, to be spent mainly in Ajmer-Merwara, Bombay and the United Provinces. For the coming year the agricultural situation in parts of the Bombay Presidency and the United Provinces is sufficiently unfavourable to justify an anticipated expenditure of 42 and 20 lakhs, respectively, under Famine relief, while there is also provision for 13½ lakhs in Ajmer-Merwara and 5½ lakhs in parts of Madras and the Punjab.

There is also some increase of expenditure under Protective Irrigation Works, chiefly in Madras and the Central Provinces, counterbalanced by a decrease of 4¼ lakhs under Protective Railways, and there is thus only a small balance to be charged under Reduction of debt.

Section IV.—Statements comparing the estimates under the more important heads of Revenue and Expenditure with the actuals of past years.

173. The estimates have been explained already in paragraphs 113, 117, 142 and 157. The revenue in the current year is expected to fall short of

the Budget Estimate in Ajmer, Burma, Eastern Bengal, United Provinces, Punjab, Madras and Bombay, owing generally to unfavourable agricultural conditions and in some cases to over-estimating. The Budget Estimate for next year provides for an increase in all provinces, due partly to the expectation of better agricultural conditions, and partly to revision of settlements, and extension of cultivation by development of irrigation and otherwise.

OPIUM.

	Accounts, 1902-1903.	Accounts, 1903-1904.	Accounts, 1904-1905.	1905-1906.		1906-1907, Budget.

Bombay—						
Chests passed for export	19,831	26,141½	18,821½	20,000	14,750	16,500
Rate of duty	₹500	₹500	₹500 & 600	₹600	₹600	₹600

174. The Estimates have been explained in paragraph 144. The quantity of Bengal opium sold monthly has been raised from 4,000 to 4,400 chests with effect from January last. The total sales for next year have been taken, accordingly, at 52,800 chests against 49,200 chests sold in the current year, but owing to the large drop in the price obtained at the sale this month, it has not been considered safe to estimate for a higher price than ₹1,125 per chest, though the average price obtained in the current year has been ₹1,434 per chest. The exports of Malwa opium are expected to amount to 14,750 chests in the current year against 20,000 chests assumed in the Budget Estimate. Those for next year have been taken at 16,500 chests.

(a) Chiefly excise on local manufacture.

(b) Chiefly duty on imported salt.

175. As explained in paragraphs 104 and 146, the successive reductions of duty made in March 1903 and March 1905 have led to a satisfactory growth of consumption. The Budget Estimate for next year assumes a further development of consumption to the extent of 12 lakhs of maunds. The largest increase has occurred in salt manufactured in Northern India and Bombay, while there is a slight drop in the importation of Liverpool and German salt into Bengal.

176. The revenue has continued to develop in every province except the Punjab, where there has been a falling off owing to the introduction of the Land Alienation Act and the Punjab Loans Limitation Act having led to a reduction of transfers and mortgages and suits for recovery of loans. The Budget Estimate provides for a further improvement upon the current year's Revised in all other provinces.

The increase in the charges in England is explained in paragraph 157.

177. The figures have been explained in paragraphs 106 and 143. The revenue continues to grow everywhere except in the United Provinces, where it has been seriously affected by unfavourable agricultural conditions.

178. The Budget Estimate for next year provides for an increase in the charges consequent on the reorganization of establishments in the Central Provinces and Burma.

PROVINCIAL RATES.

179. The remission of the cesses referred to in paragraph 132 decreases the receipts of next year by ₹78,65,000 under "Village Service and Patwaris" and ₹3,54,000 under Other Cesses (Zemindari Dāk cess). The former figure, however, allows for about 2 lakhs of payments by tenants in the Central Provinces which were not formerly passed through the Government accounts, and for an enhancement of the ryotwari village service cess in Madras which would have been made under ordinary circumstances. On the other hand the receipts are diminished, without reduction of taxation, by the transfer from this head to Land Revenue of the proceeds of the so-called Village Service cess in Sind referred to in paragraph 150. The eight lakhs still shown as derivable next year from "Village Service and Patwaris" represents the proceeds of the Proprietary Village Service cess in Madras referred to in paragraph 42 of Part I, and of a Jaglia (village police) cess in Berar which is shown under this head and produces about 3 lakhs.

180. The entry in the second head of the table represents a payment for cost of rural police which was formerly made direct from the Local Rates fund in the United Provinces. That fund having now been abolished, the adjustment has to be made by appropriation from District Local Funds to Provincial.

181. The increase under Provincial Cesses in the Revised Estimate is due to the Punjab Government not having been able to take the steps necessary for the remission of the "Famine" portion of its general cess during the current year. This will be carried out with effect from 1st April 1906.

TOTAL	£ 161,135	168,165	179,246	188,900	182,700	191,500

182. The principal features of the current year are (1) the great and continued growth of the imports of cotton manufactures and of the corresponding receipts from the excise duty on cotton goods manufactured in this country; (2) a decline in the imports on private account of silver consequent on a rise in the price; (3) a heavy falling-off in the imports of Russian kerosine oil owing to the disturbances at Baku, its place being taken by the Burma oil which pays no duty; (4) a falling-off in the imports of metals and manufactures of metals other than silver, chiefly enamelled and other ironware and tin, the falling-off being however partially counterbalanced by increased imports of steelware, machinery and mill works. As explained in paragraph 100 the enhancement of the duty on spirits and the month's *moratorium* allowed, has led to a considerable clearance of stock in the interval. The imports of spirit are likely to be smaller next year, owing partly to the heavy stocks lately laid by and partly to the check which consumption is likely to receive from the enhancement of the duty; but the higher duty will more than counterbalance this. The Budget for 1906-1907 provides for a moderate improvement under all other tariff heads as compared with the Revised Estimate.

ASSESSED TAXES.

England £	1,828	2,485	4,614	1,700	4,400	7,400
TOTAL £	751,783	813,618	869,138	926,500	949,400	985,500
NET REVENUE £	546,320	667,498	732,859	676,500	841,800	804,400

184. The revenue is increasing in every province, the largest increase in the current year being in Burma and Bombay. The Budget for next year provides for a moderate improvement as compared with the Revised Estimate in all provinces except the two just mentioned, where the current year's receipts were due in some measure to special circumstances (*vide* paragraph 107).

185. Increase in charges is naturally concomitant with development of revenue. The net receipts for 1906-1907 are estimated at about £128,000 more than in the current year's Budget, but at £37,000 less than in the Revised Estimate.

* The increase in the Revised is due to the transactions in connection with the purchase of the Bombay, Baroda and Central India Railway referred to in paragraph 234.

187. The Budget Estimate of the current year did not provide for the discount on the India 3 per cent stock of £2,000,000 raised in the current year. The transfer of a considerable amount of debt year by year from the nonproductive account to the Railway and Irrigation revenue accounts, as an equivalent for productive capital expenditure incurred from surplus revenue, is materially reducing the charge under this head.

188. The Postal Savings Bank deposits are increasing substantially year by year, but the net increase in the current year has not been as much as was anticipated, owing to larger withdrawals. These are probably due in the main to a change in the lowering of the rate of interest effected in July 1905. Formerly the uniform rate allowed was $3\frac{1}{8}$ per cent: now it is 3 per cent for deposits withdrawable at call and $3\frac{1}{4}$ per cent for those withdrawable at six months' notice.

189. The above table shows a steady development of the operations of the Department. The loss of revenue entailed by the increase in the letter weight carried for half an anna referred to in paragraph 126 of the last Financial Statement, and by a reduction in the rates of insurance fees, has been more than made good by the normal expansion of transactions.

190. The Revised Estimate of receipts shows an increase of Rs. 4,50,000 in the revenue of the Indian Telegraph Department and a decrease of Rs. 4,24,000 in that of the Indo-European Telegraph Department. The former arises partly from normal expansion of traffic, and partly from special work connected with the Royal visit and heavy speculation in the grain market. The latter is principally due to a reduction of the tariff rate between Europe and India from 1st August 1905. The Budget Estimate for 1906-1907 provides for a normal increase in traffic.

191. Compared with the Budget Estimate of expenditure for the current year, the Revised Estimate shows an increase in the Indian section, due to additional outlay on repairs to lines, and to extra signalling and clerical establishment required to cope with the increased traffic. Outlay on stores on capital account has also been larger, and the payment of the joint purse guarantee in respect of loss of receipts by the reduction in the tariff for foreign messages for the period 1st March 1902 to 31st March 1904, for which no provision was made in the Budget, has involved an additional expenditure of £17,500. These increases have, however, been partially counterbalanced by a decrease in the expenditure of the Indo-European section in cable maintenance and capital outlay, and in the net out-payments in respect of revenue.

The Budget Estimate for 1906-1907 provides for an increase in the expenditure of the Indian section both on revenue and capital accounts. Provision has also been made for a payment of £14,000 in respect of the guarantee for 1905-1906 and of £24,600 on account of net out-payments in respect of revenue

192. The Estimates have been explained in paragraphs 110 and 155. The exceptionally heavy rupee coinage of the current year has given a considerable increase of net revenue, a full recurrence of which in the current year it is not safe to anticipate.

193. The figures have been dealt with in paragraphs 118, 127, 128, and 157. The saving on the Budget Estimate of the current year is due to the inability of the Local Governments to spend the large allotments made in March last for police reform, primary education and grants to District Boards, in consequence of unavoidable delay in initiating the necessary schemes. The Budget for next year provides for the expenditure of the allotments made last March as well as for the further allotments now made, namely, 25 lakhs for additional police reforms, 5 lakhs for European and technical education and 4 lakhs for agricultural and veterinary development, and also for the normal growth of other charges.

194. The larger part of the expenditure shown under Marine is connected with Military Administration and is therefore also shown under Army Services in the table in paragraph 206.

196. The variations under the component factors of this main head have already been referred to in paragraphs 119 and 172. The first charge on the total grant of £1,000,000 is direct famine relief; then follows expenditure, to an amount not exceeding one-half the total grant, on Protective Irrigation Works and Railways; and the balance is devoted to 'reduction of debt,' by outlay on Productive Works for which money would otherwise have had to be borrowed. In the current year the amounts allotted to these various purposes are now

estimated roundly at 20, 56 and 74 lakhs respectively : in the Budget for 1906-1907 the allotments are 81, 67 and 2 lakhs. It is estimated that expenditure on famine relief will be required to the extent of 42 lakhs in Bombay ; 20 lakhs in the United Provinces ; and 19 lakhs in other parts, mainly in Ajmer-Merwara. The result is a very small available balance for 'reduction of debt.'

198. The estimates under this head have already been referred to in paragraphs 115, 130 and 147-149.

199. For 1906-1907, the direct receipts from Major Works and collections of Land Revenue due to Irrigation have been placed collectively at ₹43,50,000 higher than in the Revised Estimate of the current year, as circumstances are expected to be more favourable next year for increased irrigation in the United Provinces and the Punjab, which contribute the largest share of the revenue under this head. Working Expenses are expected to be about the same, but interest charges will increase with the additional capital outlay.

200. As regards "Minor Works," the net expenditure in the Revised Estimate is ₹3,61,000 less than in the Budget, owing to the special grant of 10 lakhs referred to in paragraph 161 of the last Financial Statement not having been spent in full. The Budget Estimate for 1906-1907 again provides for a special grant of 10 lakhs from Imperial revenues, and for a larger programme of works in Bombay.

201. The Military works expenditure of the current year is expected to be less than the Budget Estimate by £71,200 as it has not been possible to spend the full allotment made for works connected with the reorganization and redistribution of the army. The Budget Estimate has been fixed at R1,75,41,000 (£1,169,400) and is made up as follows :—

	R
Fixed quinquennial grant	93,53,000
Large works costing over R50,000 each and special items	28,15,000
Works required in connection with the reorganization and redistribution of the Army	53,73,000
	<u>1,75,41,000</u>

202. The Revised Estimate of Imperial Civil Works Expenditure in India is R14,55,000 more than the Budget Estimate. The principal items which have contributed to this increase are acquisition of property in Calcutta, the Agricultural Research College at Pusa, and Settlement offices at Ranchi. The Budget Estimate for next year provides, in addition to normal expenditure, for special expenditure connected with the Agricultural College at Pusa, on a new General Post Office in Bombay, and on a Currency Office at Cawnpore. The expenditure in Berar will from next year be included under Provincial, a new provincial settlement having been made with effect from that year for the combined province of Central Provinces and Berar.

203. As regards Provincial expenditure, the Revised Estimate shows an aggregate saving of R4,08,000. The principal variations leading up to this have already been explained in paragraph 120.

The Budget Estimate for 1906-1907 includes the expenditure in Berar, which, as explained above, used to be treated hitherto as Imperial. Apart from this, there is considerable increase in the Central Provinces, and in Eastern Bengal and Assam; in the latter case consequent on the creation of the province, and in the former on expenditure enabled by the favourable terms of the new settlement.

204. As regards Local expenditure, the Revised Estimate of the current year is R35,13,000 less than the Budget Estimate, as District and Local Boards have not been able to mature schemes for utilizing in full the large additional resources placed at their disposal by the grants made from Imperial Revenues as explained in paragraph 27 of the last Financial Statement. The Budget Estimate for next year provides for considerable additional outlay in most of the provinces.

207. The chief objects upon which the special expenditure for next year is to be incurred are as follows :

The artillery rearmament which has had to be postponed this year.
 Construction of buildings and acquisition of lands in connection with the scheme of army redistribution and the expansion of ordnance factories.
 Additional mule corps and cadres.
 Addition of officers to the Indian Army.
 Reorganization of Horse and Field batteries.
 Reorganization of existing ammunition columns of Horse and Field artillery and the formation of additional columns.
 Increase in reserves of rifles and small arms ammunition.
 Increase of the Native Army reserve.

Section V.—Capital Expenditure on Railways and Irrigation Works not charged to Revenue.

RAILWAY CONSTRUCTION.

208. The expenditure on Railway Construction for which the Government of India undertakes financial responsibility or gives any direct guarantee remains at **Rs 12,50,00,000** in 1905-1906 as originally budgeted. There was a lapse of about a crore of rupees in England from the amounts placed at the disposal of the Secretary of State; but the effect of this short outlay has been counterbalanced by increased expenditure in England by some Railway Companies; by increases to the grants for outlay in India on the North-Western, Nagda-Muttra and East Indian Railways; and by the commencement of construction work on the Purulia-Ranchi and Bara-Kotah Railways, and on the Shilman Branch of the North Western Railway. A sum of **17½ lakhs** has also been provided for the purchase by Government of the Noakhali Railway, and 4 lakhs for the construction of Local Board's lines.

For 1906-1907 the programme of capital outlay on Railway Construction has been expanded to **15 crores**.

209. The distribution of the total expenditure on Railway Construction between State and Companies' agency in each of the three years from 1904-1905 to 1906-1907 is as follows :—

	Accounts, 1904-1905.	Revised Estimate, 1905-1906.	Budget Estimate, 1906-1907.
<i>Expenditure in England.</i>			
1. State Lines	£ 1,495,093	£ 2,062,400	£ 3,544,000
2. Old Guaranteed Railways	311,047	444,100	608,500
3. Extensions of ditto	1,507
4. Other Guaranteed or Assisted Railways	744,073	795,100	1,562,400
TOTAL	2,551,720	3,301,600	5,714,900
<i>Equivalent in rupees of Expenditure in England.</i>			
1. State Lines	2,24,26,398	3,09,36,000	5,31,60,000

211. Details of the expenditure on State and Companies' lines, whether open or under construction, for 1905-1906 and 1906-1907, will be found in Statement A of Appendix III, furnished by the Railway Board.

CONSTRUCTION OF PRODUCTIVE IRRIGATION WORKS.

212. The figures are:—

	Accounts, 1904-1905.	Budget, 1905-1906.	Revised, 1905-1906.	Budget, 1906-1907.
Total in Rupees	54,17,580	1,25,00,000	81,18,000	1,25,00,000
Equivalent in Sterling	£ 361,172	833,300	541,200	833,300

Capital outlay on
productive
irrigation Works.
details.

The decrease of R43,82,000 in the Revised Estimate as compared with the Budget Estimate is due to short outlay on works, mainly in the United Provinces (R9,66,000), Bombay (R4,11,000), and the Punjab (R18,70,000). The Budget grant for 1906-1907 has again been fixed at R1,25,00,000.

213. The following table shows the projects included in the programme of 1905-1906 as now revised and in that of 1906-1907, and the amount to be spent on each.

Section VI.—Provincial Finance.

214. The system of *quasi*-permanent settlement described in paragraphs 211 to 213 of the Financial Statement of 1904-1905, has this year been extended to the Central Provinces and Berar, the new settlement with which will come into effect from 1st April 1906. The last temporary settlement with the Central Provinces proper was made in 1897, while in Berar revenue and expenditure have hitherto been Imperial. Financially, the whole province will now be on the ordinary Provincial footing. *New Settlement with Central Provinces and Berar.*

215. Under the former settlement the Central Provinces received three-fourths of its Stamp revenue, one-fourth share of Excise receipts, and one-half of Land Revenue, Forest, Registration and Assessed Taxes. Under the new settlement the principal divisible heads will be evenly shared between the Imperial and Local Governments, with the exception of Registration which will be wholly Provincial. The Government of India have, moreover, guaranteed that if in any year the Provincial share of the Land Revenue collection should fall below 82½ lakhs the deficit will be made up to the Local Government. The allocation of expenditure under the corresponding heads follows that of receipts, save that, under 3.—Land Revenue, the expenditure, which represents the cost of ordinary administration, has been made wholly Provincial.

216. The Local Government further receives a fixed assignment of 27·07 lakhs; and in order that it may start the new settlement under favourable conditions and provide for non-recurring public works expenditure, it has been given an initial grant of 30 lakhs in addition to an opening cash balance of 10 lakhs.

217. The reconstitution of the present provinces of Bengal and Eastern Bengal and Assam has necessitated new settlements with the Local Governments in question in supersession of those formerly entered into with the undivided province of Bengal and with Assam. Under the previous Bengal settlement, which came into effect from 1st April 1904, the Local Government received the whole of the Registration receipts, half of Stamps, seven-sixteenths under Excise, and, speaking generally, one-fourth of the remaining heads of divisible revenue.* Under the new settlement it receives the whole proceeds of Registration and of that portion of Land Revenue which is derived from Government estates *New Settlements with the reconstituted provinces of Bengal and Eastern Bengal and Assam. Bengal Settlement*

* 12 per cent of the Land Revenue receipts derived from Government estates under direct management were wholly Provincial.

under direct management, while as regards the remaining portion of Land Revenue and the other divisible heads it obtains a uniform share of one-half. In view of this much more favourable share of growing revenue, the fixed assignment to the province now stands at 5·72 lakhs instead of 49·03 lakhs at the previous settlement.

Eastern Bengal and Assam settlement.

218. The distribution of revenue in the Eastern Bengal districts followed that of Bengal proper, while in Assam the Local Government enjoyed, under the settlement which came into force on 1st April 1904, a uniform half-share of divisible revenue. This half share has now been applied to the divisible receipts of the whole of the new province with the exception of Registration which is wholly Provincial. Here too the more liberal share of growing revenues accorded has brought about a decrease of the fixed assignment, which is now a *minus* quantity of 6·23 lakhs instead of 12·00 lakhs formerly given to Assam.

219. The new province is also to receive an initial grant of 30 lakhs in addition to the 20 lakhs formerly granted to Assam, in order to start the fresh settlement and cover building expenses consequent on new administrative arrangements. It has also been given a minimum balance of 12 lakhs and will thus start the settlement with an aggregate opening balance of 62 lakhs.

220. In view, however, of the fact that the data on which receipts and expenditure of the Eastern Bengal districts have had to be calculated are not altogether certain, and that some uncertainty also exists as to the actual scale of expenditure which will be necessary under the new arrangements, it has been decided to make the new settlement with Eastern Bengal and Assam revisable at the end of 3 years.

General Financial results of the new settlements.

221. The shares of growing revenue and fixed assignments from Imperial to Provincial now stand as follows in the provinces concerned :—

	Central Provinces and Berar.	Eastern Bengal and Assam.	Bengal.
	R	R	R
Growing Revenue	1,49,36,000	2,18,42,000	4,67,01,000
Fixed Assignment	27,07,000	—6,23,000	5,72,000
TOTAL	1,76,43,000	2,12,19,000	4,72,73,000

Under the old settlement the percentage of Provincial receipts derived from growing revenues were as follows :—

Central Provinces.	Bengal.	Assam.
94	90	83

The Central Provinces now receives 85 per cent, Bengal proper 99 per cent, while the whole resources of Eastern Bengal and Assam will be derived from growing revenues. Though the Central Provinces now gets a smaller proportion of its resources in this way than it did before, this is due merely to the fact that it is now allowed a more liberal standard of expenditure necessitating a considerable supplementary assignment. As shown in paragraph 215, it gets on the whole a better share of divisible revenues than formerly. The betterment of the two other provinces in this respect is of course at the cost of Imperial revenues, while the standard of expenditure which all three provinces will be able to work up to on the basis of the present receipts is in each case a good deal more liberal than formerly.

Outstanding special grants which have merged in the new settlements with the Central Provinces.

222. Opportunity has been taken of the new settlements to merge therein the special grants for Police, Primary Education, Agricultural development, grants-in-aid to District Boards, and compensation for remission of famine cess referred to in paragraph 208 of the last Financial Statement, in so far as these appertain to the Central Provinces, Bengal or Eastern Bengal and Assam. The grants for Police, Primary Education and District Boards, assigned to the undivided

province of Bengal, have, in drawing up the terms of the new settlements, been recalculated as follows :—

	Police reform.	Primary Education.	District Boards.
	R	R	R
Bengal	9,00,000	6,67,000	8,69,000
Eastern Bengal	3,00,000	3,33,000	3,81,000
TOTAL	12,00,000	10,00,000	12,50,000

Bengal, and Eastern Bengal.

The Central Provinces share of the grants for education and improvement of district administration referred to in paragraph 207 of the last Financial Statement, and the compensatory payments granted to the province for loss of Income-tax receipts, repeal of the Pandhri tax, and extra expenditure consequent on the addition of Berar referred to in paragraph 209, have also been merged in the new settlement with that province.

223. The grant of 5 lakhs for the improvement of University and Collegiate education referred to in paragraph 208 of the last Financial Statement has now been distributed as follows for 1905-1906 and for the three subsequent years, at the end of which time the grant will lapse :—

Redistribution of grant for University and Collegiate education.

	1905-1906.	1906-1907, and the following years.
	R	R
Madras	1,05,000	1,05,000
Bombay	65,000	65,000
Bengal	1,10,000	1,60,000
Eastern Bengal and Assam	45,000	20,000
United Provinces	80,000	80,000
Punjab	60,000	60,000
Central Provinces	35,000	10,000
TOTAL	5,00,000	5,00,000

224. The recurring grant of 5 lakhs for technical schools and European education referred to in paragraph 134 *ante*, has been distributed as follows so far as the technical education portion is concerned :—

Distribution of new grants made in 1906-1907.

	R
Bombay	1,67,000
Bengal	35,000
United Provinces	30,000
Central Provinces	22,000
TOTAL	2,54,000

Grant for technical education.

The balance, which is intended for European and Eurasian education, has not yet been distributed. The grant to the Central Provinces includes Rs10,000 for buildings which will not be repeated in subsequent years.

225. The 25 lakhs additional recurring grant for Police reform referred to in paragraph 134 above, has been distributed among the provinces as follows :—

Grant for Police Reforms.

	R
Madras	4,50,000
Bombay	2,50,000
Bengal	4,00,000
Eastern Bengal and Assam	2,25,000
United Provinces	3,25,000
Punjab	2,50,000
Burma	2,50,000
Central Provinces	2,50,000
Minor Provinces	1,00,000
TOTAL	25,00,000

The Government of India have also made an additional grant of 2 lakhs to the Government of Eastern Bengal and Assam during the ensuing year for the reorganization of its Military Police.

*Grant for
Agricultural
and Veterinary
development.*

226. The grant of 20 lakhs for Agricultural and Veterinary development made this year was shown as undistributed in paragraph 208 of the last Financial Statement, but later on in the year 18·35 lakhs were distributed to the provinces.

In the coming year, as stated in paragraph 134, the grants to the Provinces have been increased to 21½ (Rs21,55,000) lakhs which are now distributed thus:—

	R
Madras	3,00,000
Bombay	3,50,000
Bengal	3,00,000*
Eastern Bengal and Assam	2,00,000*
United Provinces	3,00,000
Punjab	2,50,000
Burma	2,00,000
Central Provinces	2,20,000*
Frontier Province	35,000
TOTAL	21,55,000

* In these cases the grants are merged in the new settlements.

*Compensation to
Provinces
consequent on the
abolition of
the patwari and
village service
cesses.*

227. The remission of the patwari and village service cesses involves the following compensatory allotments to Provincial revenues:—

	R
(a) Madras	49,00,000

Of this, 28 lakhs represent compensation for the proceeds of the cess levied from the ryots. The Madras Government contributed an equivalent amount to village service, which was deducted from the total Land Revenue receipts and shown under Local. Hereafter this deduction will cease to be made, with the result that, as three-fourths of the land revenue receipts are Imperial, the Provincial Government would under the settlement conditions only receive 7 lakhs. Hence it is necessary to make a further compensatory assignment of 21 lakhs.

	R
(b) Bengal (for Sambalpur District)	26,000
(c) United Provinces	7,77,000

The total sum remitted in the United Provinces is Rs25,54,000, and the Local Government contributes Rs10,00,000 towards the cost of the patwari establishment which may, therefore, be taken at Rs35,54,000. This expenditure will now be shown under 3—Land Revenue, and under the terms of the Provincial settlement only half the cost (Rs17,77,000) will fall on Provincial revenues. As these revenues already bear Rs10,00,000 of the cost, the extra charge entailed on them by the change is Rs7,77,000 which is given in the shape of compensation. The cost to Imperial revenues is Rs17,77,000 + 7,77,000 = Rs25,54,000.

	R
(d) Punjab	15,64,000
(e) Central Provinces	7,25,000

The remission of these cesses will further cost nearly 2 lakhs in the Frontier Province, Ajmer and Coorg; but here the loss falls directly on Imperial.

An assignment of Rs2,50,000 has also been made to the Government of Bombay to cover the loss sustained by that Government by a reclassification of a portion of the land revenue receipts in Sind formerly classed as local under the head Provincial Rates, and devoted to the payment of village officers there. Hereafter this sum, amounting at present to Rs5,00,000, will merge in the ordinary Land Revenue head of which the Local Government obtains half. But as it will still pay the whole cost of the village service establishments, it receives a compensatory adjustment of Rs2,50,000.

228. The repeal of the zamindari dak cess in Bengal and Eastern Bengal mentioned in paragraph 132 will fall entirely on Imperial funds. In regard to the relief of District Boards in the United Provinces, the Punjab, Burma, the Central Provinces, the Frontier Province and Coorg of the contributions they have hitherto paid for district post charges, it is necessary to compensate the Central Provinces Administration for the sum formerly received by it in this connection, which was still considered as an item of Provincial revenue after district post charges had been Imperialised. The contribution thus necessitated is Rs 43,000. Compensation of a similar character has, as explained in the footnote to paragraph 133, to be made to the Punjab Government to the extent of Rs 1,41,000. In other cases the cost of the new arrangements falls entirely and directly on Imperial funds.

Other compensations consequent on adjustments referred to in paragraph 133.

A compensatory assignment of Rs 67,000 is also made to the Government of the United Provinces on account of the relief of District Boards there from the schools and establishment charges referred to in paragraph 133.

229. The special contribution towards the improvement of the port of Chittagong referred to in paragraph 209 of the last Financial Statement, will now fall to be paid to the Government of Eastern Bengal and Assam. In view of the necessary improvements being considerably more expensive than was at first anticipated, the Government of India have decided to raise their total contribution to 10 lakhs, of which 5.22 lakhs have been provided for in the Revised Estimate of the current year, and 4.78 lakhs in the Budget for 1906-1907. A final grant of 6.74 lakhs is also provided in the Budget for 1906-1907 as Imperial contribution towards the improvement of the Madras Harbour.

Special contributions for the Chittagong Port and the Madras Harbour.

230. The following table gives the usual information regarding revenue, expenditure, and balances of each province, compared with the standards assumed in the settlements in force in each:—

Revenue, Expenditure and balances of the various provinces.

Section VII.—Ways and Means.

HOME TREASURY.

231. The following are the details of the transactions of the Home Treasury in the Budget and Revised Estimates of 1905-1906 and in the Budget Estimate of 1906-1907 :—

	Budget, 1905-1906.	Revised, 1905-1906.	Budget, 1906-1907.
RECEIPTS.	£	£	£
Permanent Debt incurred for the Redemption of Railway Liabilities	2,927,400	12,480,400	...
Capital raised and deposited by Railway Companies—			
For Capital outlay	402,600	552,200	901,800
* For discharge of Debentures	2,274,800	600,100	2,718,300
Deposits and Advances—			
* Gold Reserve Fund	254,000	6,488,400	3,324,200
Currency Reserve	1,333,000	1,333,300	1,076,700
Other items	14,300	16,500	11,500
Remittance Account between England and India—			
Railway transactions	2,114,000	1,491,700	1,853,500
Remittance of Gold from India	400,300	...
Gold withdrawn from the Paper Currency Reserve	250,000	1,750,000
Other transactions	301,000	1,589,300	339,500
Total Receipts, excluding Council Bills and Loans	9,621,100	25,202,200	11,975,500

* The heads marked with an asterisk appear both on the receipt and payment sides. As the receipts and disbursements under each of them are generally equal, they do not affect the Ways and Means on the year to any material extent.

	Budget, 1905-1906.	Revised, 1905-1906.	Budget, 1906-1907.
	£	£	£
DISBURSEMENTS.			
Excess of Expenditure over Revenue	19,262,800	18,071,800	18,731,300
Railway and Irrigation Capital not charged to Revenue—			
Outlay on State Railways and Irrigation Works	2,372,500	2,088,900	3,590,000
Redemption of Railway Liabilities	3,427,400	12,980,900	...
Outlay of Railway Companies	1,145,200	1,241,900	2,172,700
* Payments to Railway Companies for discharge of debentures	2,274,800	1,236,700	2,718,300
Permanent Debt discharged	250,000	250,100	749,900

Deposits and Advances—			
* Gold Reserve Fund	254,000	6,488,400	3,324,200
Currency Reserve	1,333,000	2,378,300	31,700
Other transactions	3,600	6,000	1,500
Remittance Account between England and India—			
Railway transactions	1,654,300	1,832,000	2,209,500
Purchase of silver	8,574,000	750,000
Other transactions	408,300	371,200	422,000
Total Disbursements	32,885,900	56,020,200	34,701,100
Net Disbursements, excluding Council Bills, Loans, and Opening Balance	23,264,800	30,818,000	22,725,600
<i>Financed as follows :</i>			
Council Bills	16,500,000	26,700,000	17,800,000
Permanent Debt incurred	2,000,000	2,000,000	2,000,000
Reduction of Cash Balance	4,764,800	2,118,000	2,925,600
TOTAL	23,264,800	30,818,000	22,725,600
Opening Balance	10,338,282	10,262,581	8,144,531
Closing Balance	5,573,482	8,144,531	5,218,981

* The heads marked with an asterisk appear both on the receipt and payment sides. As the receipt and disbursements under each of them are generally equal, they do not affect the Ways and Means of the year to any material extent.

232. In the Budget Estimate of the current year, the net disbursements of 1905-1906. the Home Treasury were taken at £23,264,800, and it was proposed to meet *General Remark* these by the sale of Council Bills for £16,500,000, excluding £1,333,000 to be drawn from the Currency Reserve for investment in sterling securities, by the issue of £2,000,000 of India Stock and by drawing to the extent of £4,764,800 on the opening cash balance of the year.

233. The dominant feature of the year has been an exceptionally heavy demand for Council Bills, the total sales being now expected to amount to £31,576,300 or £26,700,000, excluding £3,543,000 drawn on account of the Gold Reserve Fund and £1,333,300 mentioned above as drawn for investment of a part of the currency reserve. Of the additional funds thus obtained, amounting to £10,200,000 as compared with the Budget provision, £7,924,000 has been spent for the purchase of silver sent to this country for the coinage of rupees required to meet the additional Council Bills; £1,045,000 has been remitted to India through the Secretary of State's currency chest in England, the institution of which has been referred to in paragraph 74 of Part I; and £1,231,000 is left as an increase in the resources of the Secretary of State. In addition to the quantity mentioned above as purchased from the extra drawings, silver to the value of £400,000 has been purchased from the remittance of £400,300 in gold received during the year from India, the remittance having been made from this country in March last. £250,000 worth of silver will also be sent to this country, before the 31st March, but this does not affect the Home Treasury balances as the value is to be recovered from the Secretary of State's currency chest, the cost of the silver being added to the bullion reserve of the Currency Department. The other important variations between the Budget and Revised Estimates which affect the closing balance are

(1) a saving of £1,191,000 on the Budget Estimate of net expenditure over revenue, chiefly by reason of lapses under military expenditure; (2) a decrease of £283,600 in the Capital Expenditure on State Railways; and (3) a net increase of £1,324,900 in the receipts from deposits and miscellaneous remittances from India. These together with the net balance of £1,231,000 derived from additional Council Bills have increased the resources of the Secretary of State by £4,030,500. On the other hand, the net payments to railway companies have exceeded the Budget by £1,383,700,* mainly in consequence of the East Indian Railway having raised a smaller amount of debenture stock and to the discharge by the Bombay, Baroda and Central India Railway Company of a part of their debentures. The net result of these variations is that the cash balances will be drawn upon to the extent of £2,118,000 instead of £4,764,800 estimated in March last.

*Redemption of
Railway Liabilities.*

234. In the Budget provision was made for permanent debt to the extent of £2,927,400 on account of the debenture capital of the Bombay, Baroda and Central India Railway, while on the expenditure side provision was made for this sum and for £500,000 against the purchase of the Bengal Central Railway as outlay on redemption of railway liabilities. The latter charge has been duly incurred, but of the debentures of the Bombay, Baroda and Central India Railway, £536,100 were discharged by the Company before the purchase of the line. The method of purchase had not been decided upon at the time the Budget Estimate was prepared. Ultimately, the purchase price of the undertaking was fixed at £11,685,600 which was discharged, as regards £2,000,000 by the creation of new 3 per cent. capital stock of the Company to that amount, and as to the balance of £9,685,600 by the creation of £10,089,100 India 3 per cent. stock issued to the Company. Hence the large variations which appear under the heads in question as between the Budget of 1905-1906 and the Revised Estimate: they do not affect the cash balances.

1905-1906.

*Investment of part
of the Currency
Reserve.*

235. The Budget Estimate provided for the remittance to London of £1,333,000 of the currency reserve held in India for investment of an additional sum of two crores of rupees in sterling securities: in accordance with the original intention, the remittance was made by means of Council Bills, and Consols of the nominal value of £923,646½ and £500,000 of Exchequer Bonds were purchased therewith by the Secretary of State. In December and February last, to relieve the great pressure on the Indian Treasury balances, occasioned by the very heavy sales of Council Bills and telegraphic transfers, the Secretary of State paid from his Treasury balance to the Currency chest held at the Bank of England, a sum of £1,045,000 in gold: this admitted of a corresponding transfer of 156½ lakhs of rupees from the Currency to the Treasury balances in India. This accounts for the increase of £1,045,000 shown against "Currency Reserve" on the payment side of the table in paragraph 231.

	Budget, 1905-1906.	Revised, 1905-1906.
* Capital raised and deposited by Railway companies—	£	£
For capital outlay	402,600	552,200
For discharge of debentures	2,274,800	600,100
Remittance Account between England and India—		
Railway transactions	2,114,000	1,491,700
Total Receipts	4,791,400	2,644,000
Railway and Irrigation Capital not charged to Revenue—		
Outlay of Railway companies	1,145,200	1,241,000
Payments to Railway companies for discharge of debentures	2,274,800	1,236,700
Remittance Account between England and India—		
Railway transactions	1,654,300	1,832,000
Total Disbursements	5,074,300	4,310,600
Net Disbursements	282,900	1,666,600
Increase		1,383,700

236. As already mentioned, the demand for Council Bills and telegraphic transfers has been exceptionally heavy throughout the year, and the sales are now expected to reach the record figure of £31,576,300. Of this sum, £3,543,000 and £1,333,300, respectively, have been appropriated for the remittance to London of the profit on coinage accruing to the Gold Reserve Fund and the sterling investment on account of the Currency Reserve. To avoid heavy shipments to India of gold from Australia, the Secretary of State in December last decided to purchase from certain selected banks and firms consignments of sovereigns, payment being made therefor by telegraphic transfers issued at 16d. per rupee. The sum of £31,576,300 mentioned above includes transfers aggregating £3,178,300 granted under these conditions.

237. The Budget Estimate provided for the discharge of the residue (£500,000) of the Temporary Sterling Debt, and for the issue as permanent debt of £2,000,000 India Stock for the purchase of the Bengal Central Railway (£500,000), the discharge of Great Indian Peninsula Railway Debentures (£250,000), and advances to Indian Railway Companies under Act 51 Vict., c. 5. This programme has been adhered to. The sterling loan was announced in April last, tenders being invited for £2,000,000 of 3 per cent India Stock at a minimum rate of 97 per cent. The applications received amounted to £5,203,800 and the average rate of accepted tenders was £97 18s. 1d.

238. The details of the transactions under Capital raised and deposited by Railway Companies are as follows:—

RECEIPTS.		Budget, 1905-1906.	Revised, 1905-1906.	1905-1906. Council Bills. Loans. 1905-1906. Capital raised and deposited by Railway Companies.
<i>Subscribed Capital.</i>				
<u>To discharge Debentures—</u>		£	£	
Assam Bengal Railway		300,000	...	
Bengal-Nagpur Railway Extensions		400,000	...	
Indian Midland Railway		150,000	..	
Southern Mahratta Railway		688,100	600,000	
Bombay, Baroda and Central India Rail- way		636,700	100	
Madras Railway		100,000	...	
		2,274,800	600,100	
<u>To meet Capital outlay—</u>

For discharge of Debentures		2,274,800	1,236,700	
For Capital outlay, i.e., Stores, Establish- ment Charges, etc.		1,145,200	1,241,900	
		3,420,000	2,478,600	

Railway debentures for £1,040,600 which matured during the course of the year were renewed and the discount paid on renewal amounted to £2,500. Debentures for £1,234,200 were discharged, but only £600,100 of these were replaced by fresh capital.

239. The Railway Companies whose transactions are dealt with above have separate capital deposit accounts in England, and funds raised and with- drawn by them in England are brought directly to account in the Home Treasury. There are, however, other Companies which work railways that are the property of the State, namely, the East Indian, the South Indian, the Great Indian Peninsula, the Bombay, Baroda and Central India and the

1905-1906.
Remittance
Account between
England and India
—Railway
transactions.

Rajputana-Malwa Railways. Advances are made to these Companies in England for the purchase of stores, and funds are sometimes raised by them and deposited with the Secretary of State: these deposits and advances, instead of being brought directly to account in England, are treated as Remittances from or to India and are brought to account in this country. The details of the transactions during the current year are as follows:—

RECEIPTS.		Budget, 1905-1906.	Revised, 1905-1906.
		£	£
<i>Debentures raised—</i>			
East Indian Railway	{ To replace Debentures	300	300
	{ For additional Capital	1,999,700	1,378,000

<i>Advances for Purchase of Stores—</i>		1,654,000	1,831,700
		<hr/>	<hr/>
TOTAL ISSUES		1,654,300	1,832,000
		<hr/>	<hr/>

The East Indian Railway issued only £1,500,000 of Debenture Stock instead of the £2,000,000 budgeted for. The proceeds amounted to £1,378,300.

*Budget Estimate
of 1906-1907.*

240. In the Budget Estimate of 1906-1907 the net disbursements, exclusive of receipts from Council Bills and Loans, are taken at £22,725,600: of this, £749,900 is for the discharge of Bombay, Baroda and Central India Railway debentures. Inclusive of £500,000 for the purchase of the Bengal Central Railway, and £250,000 for the discharge of Great Indian Peninsula Railway debentures, the net outgoings in the Budget Estimate of the current year were £23,264,800. The decrease next year is thus £539,200: this is the net result of several variations, the more important of which are:—

<i>Better.</i>	£
Net expenditure on Revenue Account (Decrease chiefly in Army Reorganization expenditure), <i>less</i>	531,500
Capital raised by Railway Companies for capital outlay (Debentures raised, <i>more</i> £943,500; Debentures discharged, <i>more</i> £443,500), <i>net better</i>	500,000
Temporary Debt discharged (India Bills), <i>less</i>	500,000
Redemption of Railway Liabilities, <i>less</i> £3,427,400, and Permanent Debt incurred therefor, <i>less</i> £2,927,400, <i>net better</i>	500,000
Gold withdrawn from the Paper Currency Reserve in London, including repayment to Secretary of State's treasury of the £1,045,000 referred to in para. 235, and £750,000 for the purchase of Silver, <i>more</i>	2,795,000
	<hr/>
	4,826,500
<i>Worse.</i>	
Issues to Railway Companies for capital outlay, <i>more</i>	1,027,500
Issues to Railway Companies working State Railways, for capital outlay, <i>more</i>	555,500
Debenture capital raised by Railway Companies working State Railways (Debentures raised, <i>less</i> £261,000; Debentures discharged, <i>less</i> £300), <i>net worse</i>	260,700
Outlay on State Railways and Irrigation Works, <i>more</i>	1,217,500
Permanent Debt discharged (Debentures of purchased Railways), <i>more</i>	499,900
Purchase of silver	750,000
	<hr/>
	4,311,100
	<hr/>

Of the net disbursement of £22,725,600 next year, it is proposed to meet £17,800,000 by the sale of Council Bills and £2,000,000 by the issue of India Stock. The remainder, £2,925,600, will be met by drawing upon the cash balance of the Home Treasury, which at the close of the current year is expected to stand at £8,144,581. The cash balance on the 31st March 1907 is therefore estimated at £5,218,981. The estimate of Council drawings is for the amount required to provide for the Secretary of State's requirements: but additional bills will, as usual, be sold if needed to meet the demands of trade.

241. There is no temporary Sterling debt now outstanding. Of the 1906-1907. £2,000,000 India Stock which it is at present intended to place upon the Loans. market, £749,900 is for the discharge of Bombay, Baroda and Central India Railway debentures which fall due next year, and the remainder for advances to Indian Railway Companies.

242. The details of the estimates of capital to be raised by Railway 1906-1907. Companies are as follows:—

	To replace Debentures.	Additional Capital.	1906-1907. Capital of Railway Companies.
<i>Subscribed Capital of Railway Companies:—</i>			
	£	£

*Summary of Debt
Transactions and
Capital Account
of Railway
Companies.*

244. The following is a summary of the figures relating to Council Bills and the Sterling Debt of Government and of Railway Companies included in the Estimates for 1905-1906 and 1906-1907 :—

RECEIPTS.	Budget. 1905-1906. £	Revised, 1905-1906. £	Budget, 1906-1907. £
Council Bills (exclusive of Bills for £3,543,000 in the Revised Estimate of 1905-1906 on account of the Gold Reserve Fund, and £1,333,300 in the Budget and Revised Estimates of 1905-1906 on account of the Currency Reserve)	16,500,000	26,700,000	17,800,000
Permanent Debt incurred for the Redemption of Railway Liabilities	2,927,400	12,480,400	...
Permanent Debt incurred (India Stock)	2,000,000	2,000,000	2,000,000
Receipts on account of the Subscribed Capital of Railway Companies	2,674,800	1,149,600	3,618,300
Receipts on account of the Debenture Capital of other Railway Companies (the East Indian and South Indian Railway Companies)	2,111,000	1,488,300	1,850,000
OUTGOINGS.			
Redemption of Railway Liabilities	3,427,400	12,980,900	...
Permanent Debt discharged	250,000	250,100	749,900
Temporary Debt discharged	500,000	500,000	...
Discharge of Railway Companies' Debentures	2,274,800	1,236,700	2,718,300
Discharge of East Indian Railway Company's Debentures	300	300	...

245. The programme herein announced of the probable drawings on India, and of the transactions in connection with the Government Sterling Debt and the borrowings of Railway Companies, represents the present intentions of the Secretary of State. But in view of the varying conditions of Indian finance and of the London money market, no assurance can be given that this programme will be adhered to either in amount or in form. The Secretary of State reserves to himself the right to vary the programme to any extent that may be considered necessary during the course of the year.

INDIA.

246. The following is a summary of the Estimates of Ways and Means in India during 1905-1906 and 1906-1907:—

	BUDGET ESTIMATE, 1905-1906.		REVISED ESTIMATE, 1905-1906.		BUDGET ESTIMATE, 1906-1907.*

* The figures under heads 2 and 13 (b) balance each other.

† Head 11 represents expenditure defrayed by reduction of Provincial and Local balances.

‡ The figures shown under head 14 differ from those given in the Home Treasury Ways and Means statement, as Bill drawn by the Secretary of State towards the end of one year are paid in India in the next. The figures of the present statement represent payments in India.

1905-1906.

Main features of
Budget Estimate.

247. In the Budget Estimate of 1905-1906 it was assumed that the year would open with a cash balance in Indian Treasuries of 15,50 lakhs. It was calculated (1) that the net Revenue receipts would amount to 30,25 lakhs; (2) that the deposits in Savings Banks and Provident Institutions would result in a net receipt of 1,27 lakhs; (3) that the remittances of Railway Companies and on other miscellaneous accounts would yield a net sum of 2,49 lakhs on the receipt side; (4) that a sum of 56 lakhs would be available from the Famine Insurance grant for avoidance of debt, after meeting the expenditure required for Famine Relief and construction of Protective Works; and that 60½ lakhs worth of silver bullion sent from England in March last would be received in the current year. On the other hand, provision was made (1) for a net expenditure from Provincial balances of 2,05½ lakhs; (2) for Capital expenditure in India on Railways and Canals, to the extent of 8,65 lakhs; (3) for discharge of Provincial Debenture loans falling due during the year for 9 lakhs, and for the payment of the annual instalment of 12 lakhs towards liquidation of the Gwalior loan of 1887; (4) for 32 lakhs for loans to Native States, cultivators, municipalities and other local bodies; and (5) for payment of Council Bills to the extent of 25,20 lakhs. The payments mentioned aggregate 36,43½ lakhs, while the receipts amount to 35,17½ lakhs, the net disbursements being thus 1,26 lakhs. A rupee loan of 4 crores was to be raised to meet this deficiency and to strengthen the cash balances.

1905-1906.

Main features of
Revised Estimate.

248. The results according to the Revised Estimate show considerable variations from this forecast. Council Bill payments have exceeded the estimate by 14,84 lakhs; but against this silver to the value of 12,50 lakhs (13,10 lakhs against 60½ lakhs estimated) has been received from England for coinage of rupees, the net excess payment being 14,84—12,50=2,34 lakhs. The net Imperial revenue in India is now estimated at 29,74 lakhs, being 51 lakhs less than the Budget Estimate. Savings Banks deposits are now expected to fall short of the Budget by 47 lakhs, while Capital expenditure in India on Railways and Irrigation works is expected to exceed the estimate by 2,65 lakhs. On the other hand, Provincial balances will be increased by 12 lakhs, instead of being drawn upon to the extent of 2,06 lakhs. The net payments to Railway Companies on account of Capital outlay are 322 lakhs less than the Estimate. The amount available from the Famine Insurance grant for avoidance of debt, after meeting the expenditure for Famine Relief and construction of Protective Works is 18 lakhs more. Loans granted to Native States, municipalities and other local bodies are 15 lakhs less, while deposits and remittance transactions are expected to show an excess receipt of 133 lakhs. The total improvements mentioned above amount to 7,06 lakhs and the increased disbursements to 597 lakhs, the net result being an improvement of 109 lakhs. The cash balances are accordingly expected to be better than on 1st April last by 383 lakhs instead of by 274 lakhs as in the Budget Estimate; adding a betterment of 62 lakhs in the opening balance, the year is expected to close with a cash balance of 19,95 lakhs against 18,24 lakhs taken in the Budget Estimate.

1905-1906.

Council Bills.

249. As mentioned already, the demand for Council Bills in the current year has been exceptionally heavy. In addition to the 40,05 lakhs shown in the table above as paid from treasury balances, 2 crores have been paid from the currency reserve and 5,31 lakhs from the Gold Reserve Fund for investment in England in gold securities. The total payments thus amount to the record figure of 47,36 lakhs.

1905-1906.

Rupee Loan.

250. In accordance with the intention expressed in paragraph 233 of the last Financial Statement, a 3½ per cent loan of 4 crores was announced in July last. Tenders were opened on the 2nd August and the result of the loan was as follows:—

Total amount tendered.	Amount accepted.	Average rate of accepted tenders.	Minimum rate accepted.
₹	₹	₹ a. p.	₹ a. p.
19,26,86,200	4,00,00,000	98 13 10·45	98 12 0

1906-1907.

Main features of
Budget Estimate.

251. In 1906-1907, the net Imperial revenue in India is estimated at 29,41 lakhs. Savings Banks are expected to yield a net receipt of 91 lakhs; but only 2 lakhs are expected to be available from the Famine Insurance grant for avoidance of debt; the transactions with Railway Companies are expected to show a net receipt of 357 lakhs of which 283 lakhs represent fresh capital to be raised by them; and deposits and miscellaneous remittance transactions are expected to show a net receipt of 166 lakhs. On the other hand, provision

has been made (1) for expenditure of 162 lakhs from Provincial balances; (2) for capital expenditure in India on State Railways and Irrigation Works of 786 lakhs; (3) for 13 lakhs for discharge of permanent debt, chiefly the payment of the annual instalment towards repayment of the Gwalior loan; (4) for 68 lakhs for loans to be granted to cultivators, Native States, Municipalities, and District Boards for construction of railways; (5) for a payment of 457 lakhs to the Currency Department as the equivalent of an amount to be transferred by the Secretary of State from his Currency chest to his treasury, of which 150 lakhs is for the purchase of silver to be sent to this country for coinage; and (6) for payment of Council Bills to the extent of 26,70 lakhs. The payments mentioned aggregate 41,56 lakhs while the receipts come to 35,57 lakhs, the net disbursements being 599 lakhs.

252. It is proposed to meet $4\frac{1}{2}$ crores out of the net disbursement of 599 lakhs by raising a new rupee loan for that amount in 1906-1907, the remaining 149 lakhs being met by drawing upon the cash balances. The year is thus expected to close with a cash balance of 18,46 lakhs. The announcement now made regarding the rupee loan is in accordance with present intention; but full liberty is reserved, as usual, to vary the programme now announced to any extent that may be considered desirable.

253. The following table gives details of the transactions of Savings Banks and Provident Funds during a series of years, and the estimated transactions for 1905-1906 and 1906-1907:—

YEAR.	Net additions to deposits, cash.	Interest.	Total addition.
	R	R	R
1892-1893	54,89,000	33,94,000	88,83,000
1893-1894	17,99,000	36,80,000	54,79,000
1894-1895	—8,45,000	29,70,000	21,25,000
1895-1896	24,77,000	33,85,000	58,62,000
1896-1897	—58,11,000	34,66,000	—23,45,000
1897-1898	—65,71,000	32,70,000	—33,01,000
1898-1899	—8,84,000	32,29,000	23,45,000
1899-1900	1,40,000	33,48,000	34,88,000
1900-1901	19,44,000	34,80,000	54,24,000
1901-1902	31,04,000	36,87,000	67,91,000
1902-1903	52,40,000	39,00,000	91,40,000
1903-1904	66,99,000	42,15,000	1,09,14,000
1904-1905	78,94,000	45,87,000	1,24,81,000
1905-1906 (Budget)	70,73,000	48,97,000	1,19,70,000
1905-1906 (Revised)	23,87,000	47,82,000	71,69,000
1906-1907 (Budget)	32,77,000	49,62,000	82,39,000

A net deposit in the Post Office Savings Banks of 70½ lakhs apart from interest was assumed in the Budget Estimate of the current year. The transactions of the first ten months of the year have resulted in a net increase in the deposits of only 22 lakhs, probably owing, as stated in paragraph 188, to the immediate effect of an alteration in the rates of interest. There is, however, some indication that the withdrawals in the closing months of the year are not likely to be as heavy as in 1904-1905 and it is now expected that, apart from interest, there will be a net increase in the deposits of about 23½ lakhs during the year 1905-1906.

In the Budget Estimate for 1906-1907, a net deposit of 32½ lakhs, apart from interest is anticipated.

Section VIII.—Summary.

254. The principal features in this statement are the following :—

I.—The Accounts of 1904-1905 closed with a surplus of £3,456,066, being £29,434 less than the surplus expected in the Revised Estimate of that year.

II.—1905-1906—

(1) The Revised Estimates show a total revenue of £84,829,500, a total expenditure charged to Revenue of £83,073,800, and a surplus of £1,755,700. This surplus is higher than that estimated in March 1905 by £851,900.

(2) There has again been a large development of revenue in all branches outside Land, Customs and Irrigation Revenue, net earnings of Railways showing the largest increase.

Railway traffic receipts have expanded largely, and the net receipts have exceeded the estimate by £413,600.

Excise has yielded an increase of £210,400 and Forest of £188,200.

Interest receipts show an improvement of £139,700 and Mint of £199,800 owing to exceptionally heavy coinage of rupees.

Land Revenue receipts, including the portion credited to Irrigation, are expected to fall short of the estimate by £443,900, chiefly in Bombay, Madras, Punjab and the United Provinces owing to partial failure of rains.

Irrigation Direct Receipts are also less by £101,400.

(3) Army expenditure is expected to be less than the estimate by £842,000: Special Expenditure is less by £884,400, while ordinary Expenditure is more by £42,400. This is only nominal, being more than covered by increase in receipts amounting to £150,300. Military Works Expenditure is also less by £71,200, chiefly in special expenditure connected with the reorganization of the Army. The grant of £253,200 for Special Defences has been used only to the extent of £192,000.

Owing mainly to the inability of the Local Governments to expend their full allotments, there are savings under most of the chief administrative heads, the more important being Civil Departments other than Political, £509,900, and Civil Works £178,500.

Political Expenditure is more by £272,300, chiefly in consequence of payment of Amir's subsidy.

Famine relief expenditure is £75,200 less than the estimate. There is a saving on the provision in Madras and Bombay, but it has been partially counterbalanced by expenditure in Ajmer and the United Provinces.

(4) Special grants, aggregating £400,000, have been made to the Governments of the Central Provinces and Eastern Bengal and Assam to start their new settlements.

(5) A loan of four crores of rupees was raised in India; and India 3 per cent stock of £2,000,000 was raised in England, of which £250,000 was applied to the discharge of Great Indian Peninsula Railway Debentures. £500,000 being the residue of India Bills, temporary, fell due, and were discharged.

(6) Fresh capital was raised through Railway Companies to the extent of £1,470,100 as compared with £2,520,800 entered in the Budget.

(7) The drawings of Councils in 1905-1906 are expected to amount to £31,576,300. Of this £3,543,000 represent remittances on account of the Gold Reserve Fund, and £1,333,300 on account of the Currency Reserve invested in sterling securities and

£26,700,000 are remittances on ordinary account, as compared with £16,500,000 entered in the Budget.

- (8) Out of the additional Council Bills sold during the year, silver to the value of £7,924,000 has been purchased and sent to India for coinage. Silver to the value of £400,000 has also been purchased from gold remitted from India in March last and a further quantity worth £250,000 will be purchased for the same purpose from the Currency reserve before the close of the current year.

- (9) The Gold Reserve Fund on 31st March 1906 stands at £12,262,700.

III.—1906-1907.

- (1) The Budget Estimates of 1906-1907 show a total revenue of £86,495,100, a total expenditure charged to revenue of £85,621,000 and a surplus of £874,100.

- (2) This surplus is obtained after providing for the following measures of fiscal relief and administrative improvement:—

- (a) Repeal of the Patwari cess in Northern India and the Central Provinces, of the Ryotwari Village Service cess in Madras, and of the Village Service cess in Coorg; cost £524,300.
- (b) Abolition of Zamindari Dak cess in Bengal and Eastern Bengal; cost £23,600.
- (c) Relief of District Boards in Northern India, Central Provinces, Coorg and Burma of contributions they have hitherto paid towards District Post charges; cost, including relief of United Provinces District Boards of some small school and other charges, £38,800.
- (d) Further grant of £166,700 for police reform.
- (e) Additional grant of £26,700 for agricultural and veterinary improvement and of £33,300 for European and technical education.

The total cost of these measures is estimated at £813,400. Under existing conditions the surplus would therefore have been £1,687,500.

- (3) Of the increase in receipts compared with current year's Budget £2,298,200 are due to Railways. There is a counterbalancing increase of £1,633,100 under Railway charges, thus affording a net additional gain of £665,100.
- (4) Other important variations in revenue are increases of £331,700 under Land Revenue including portion due to Irrigation, £140,000 Salt, £163,400 Stamps, £374,200 Excise, £118,800 Post Office, £148,500 Major Irrigation Works Direct receipts, and £100,200 Customs.
- (5) There are decreases of £646,600 under Opium, owing mainly to the price of Bengal opium being now taken at ₹1,125 per chest, and of £516,800 under Provincial Rates owing to the remission of cesses above mentioned.
- (6) The total Military expenditure, including Army, Military Works, Marine and Special Defences, is £21,841,600—£390,900 less than in the current year's Budget. Including Military receipts the net outlay is less by £521,100. The allotment for Re-organisation and other special expenditure included in the above is £2,766,600 against £3,266,600 provided this year.
- (7) Civil administration heads show general increase, the most important being £206,900 under Police, due to carrying out of reforms; £283,700 Political (payments to Amir); and £327,400 Famine Relief. Total Famine Relief Expenditure is £539,100.
- (8) A *quasi*-permanent settlement has been made with the Central Provinces and Berar, and the settlements previously made with Bengal and Assam are now revised with reference to re-constitution of province. Generally speaking, these provinces get one-half share of divisible revenues, and Central Provinces and Eastern Bengal obtain, as above mentioned, initial grants of £200,000 each.

- (9) Subject to the usual reservations, loans of £2 millions in England and of 4½ crores in India are announced. The sterling loan is required to discharge £749,900 Bombay, Baroda and Central India debentures and for advances to Indian Railway companies. The rupee loan is for capital expenditure on Railways and Irrigation.
- (10) Subject to the usual reservations, provision is also made for the raising of capital through railway companies as follows:—namely, (a) for outlay on State Railways £1,850,000 and (b) for expenditure on Companies' Railways £935,500.
- (11) Drawings of Council Bills are entered at £17,800,000.

IV.—Capital Expenditure.

The following table shows the capital expenditure on Railways and Irrigation Works:—

L. E. PRITCHARD,
Deputy Comptroller General.

A. F. COX,
Comptroller General.

W. S. MEYER,
Secretary to the Government of India.

FORT WILLIAM,
FINANCE DEPARTMENT;
March 21, 1906.

APPENDIX II.

Memorandum by the Hon'ble Major-General C. H. Scott, C.B.,
R.A., on Army, Military Works, Special Defences, and
Marine Expenditure for the years 1905-1906 and 1906-1907.

The estimates with which the Military and Marine Department of the Government of India is concerned are :—

- I.—The Indian Army Estimates.
- II.—The Home (India) Army Estimates.
- III.—The Military Works Estimates.
- IV.—Special Defences.
- V.—The Marine Estimates.

I will deal with them in this order.

2. Taking the Indian and the Home (India) Army Estimates together the net expenditure in 1906-1907 will, it is estimated, be less than that provided in the Budget of 1905-1906 by £572,600.

3. Before dealing with the estimates in detail I will refer to the measures carried out or in progress, during the present year for improving the efficiency of the army and also to those which we propose to continue or institute during the ensuing year.

Budget, 1905-1906.

4. As mentioned in Sir Edmond Elles' Budget Memorandum of the 22nd March 1905, the sum of 331 lakhs—£2,206,666—[including 50 lakhs (£333,333) on account of lapses in the Home and Indian Estimates of 1904-05] was provided in this year's Army Estimates towards carrying out the scheme for the reorganization of the Army in India framed by His Excellency the Commander-in-Chief. Of this sum, 144 lakhs (£960,000) were allotted for the rearmament of horse and field artillery. Among other important measures introduced, the following may be mentioned :—

Army
Reorganisation.

Increase to the reserves of artillery ammunition and small arms ammunition ;

Increase to the reserve of rifles ;

Increase of ammunition columns due to the extra ammunition required in the field ;

Provision of mobilization equipment for the increased field army ;

Reorganization of the Supply and Transport Corps ;

Provision of additional army transport carts ;

Addition of 90 officers to the Indian Army ;

Creation of the appointment of Inspector General of Ordnance Factories ;

Formation of an additional railway company of sappers and miners ;

Purchase of horses for Q. F. batteries ;

Provision of local stores for field hospitals and of additional maps for the field army ;

Erection of machinery in connection with the expansion of Ordnance Factories ;

Acquisition of land for the extension of cantonments and buildings in connection with the redistribution of the army.

The manufacturing capacity of the Alipore and Madras factories being insufficient to meet the large demands for made up clothing for troops, and any extension of these factories at a reasonable cost not being practicable, it has been decided to start a factory at Fatehgarh where labour is cheap and the buildings of the late gun carriage factory are available for the purpose. The measure is at present on an experimental basis in order to test local conditions.

Additional
Factory.

The introduction of the double company organization into the 42nd Deoli, 43rd Erinpura and 44th Merwara Infantry, which involves an extra expenditure of Rs 7,380 (£492) annually, was sanctioned by the Secretary of State in 1905.

Owing to the number of troops now located in Northern India, and the distance of Bombay from the Punjab, it was desirable to adopt Karachi as a port for the embarkation and disembarkation of troops between India and England. Other military considerations also rendered the establishment of troop-ing at Karachi desirable.

The measure has been sanctioned by the Secretary of State. It will involve an initial expenditure of Rs 20,108 (£1,340) and an annual saving of recurring expenditure of Rs 37,684 (£2,512).

In 1903 sanction was accorded tentatively to the supply of regimental necessities to British troops in India by the Army Clothing Department, instead of under regimental arrangements. This change of system which has been found to conduce to greater rapidity and convenience of supply has now been permanently adopted.

A new system of clothing the native army was introduced on 1st April 1905, when the following measures were approved :—

- (a) increase of kit money on enrolment from Rs 30 to Rs 40 ;
- (b) purchase by the State of all rights to compensation with a view to their extinction ;
- (c) grant of an annual consolidated allowance in lieu of issues of clothing in kind.

With the amounts under (a) and (c) the soldier obtains his uniform on payment from clothing factories as he requires it, without being subjected to deductions from pay. An annual saving of Rs 17,930 (£1,195) will result from these measures.

The pay of officers of the Army Veterinary Department below the rank of lieutenant-colonel was increased with effect from the 30th April 1905 as follows :—lieutenants from Rs 400 to Rs 480 a month ; captains from Rs 450, Rs 500, and Rs 600 to Rs 570 and Rs 650 ; majors from Rs 700 to Rs 750. The cost involved comes to Rs 50,000 (£3,333) a year.

Two officers have been added to the Army Remount Department, the annual charges on this account being Rs 20,859 (£1,390). The strength of the Department is now 25 officers including 9 officers of the Army Veterinary Department.

In order to ensure effective supervision and control over the horse and mule-breeding operations carried on by grantees of land on the Jhelum canal and Chenab canal it is proposed to withdraw four of the six districts comprising the Jhelum Canal Colony Circle and to form them into a separate circle designated the Chenab Canal Colony Circle. The cost involved is estimated at Rs 48,375 (£3,225) a year.

With a view to removing administrative inconvenience the three presidential lists of military assistant surgeons have been amalgamated for all general service purposes. For purposes of promotion to the senior grades men now in the service will continue to be borne on their respective lists until they are absorbed.

The conditions of service of hospital assistants in army employ have been improved by the grant to them of the following concessions :—

- (a) free passage when proceeding on or returning from leave on reduced pay for a period of not less than six months ;
- (b) pension under Civil Service Regulations ;
- (c) an annual allowance of Rs 12 in aid of the provision and maintenance of cloth uniform ;
- (d) pony allowance of Rs 12 a month when at, proceeding to, or returning from, a camp of instruction, manœuvres, or concentration.

The cost of the above concessions amounts to about Rs 13,000 (£866) a year.

It is considered desirable to maintain 15 sets of portable X-ray equipment for the use of the army. The cost of the measure is estimated at

Rs. ^{87,886 (£5,849) initial}
^{9,961 (£664) annual recurring} Fifteen sets of equipment costing R49,455 (£3,297) are under supply from England.

General requirements.

On a report on the working of the Punjab Military Transport Animals Act during the past year it has been decided that its further extension is not necessary to localities where camels and mules are not available. Local Governments and Administrations within whose jurisdiction such localities exist have, however, been requested to intimate what steps they propose to take to ensure supply of suitable bullocks, draught and riding ponies on mobilization. They have also been informed that the services of Registration officers will be available if their advice is required. The Act is now in force in the Punjab and in the North-West Frontier Province.

The salary allowed in India to Ridingmasters and Quartermasters, having less than 10 years' service, was deemed barely sufficient to enable them to maintain their position as regimental officers, in the present conditions of Indian service. Moderate increases of pay have accordingly been sanctioned for them. The extra cost is estimated at about R27,000 (£1,800) per annum.

It has been decided that the cost of Police employed in cantonments shall be borne by Provincial Revenues. This change it is estimated will relieve Cantonment Funds in India of charges amounting to R1,10,000 (£7,333) per annum, approximately; and will admit of funds being made available for expenditure on various objects conducive to the welfare of the inhabitants of Cantonments.

In pursuance of a programme of works which has been undertaken in consequence of the rearmament of the volunteer force with the Lee-Metford rifle, a sum of about R1,00,000 (£6,666) has been spent on the provision of buildings and ranges for volunteer corps in the places where they are most urgently required.

Progress has been made with the scheme for providing improved lighting and ventilation of the barracks and hospitals of British troops in the larger cantonments where the hot weather is of long duration. The installation in Fort William has been completed and that at Meerut practically completed.

Budget, 1906-1907.

5. In pursuance of the scheme for the reorganization of the Army in India, it is proposed to provide a sum of about 253 lakhs (£1,686,666) in the Army Estimates of the ensuing financial year. This sum includes ninety lakhs (£600,000) on account of regrant of lapses, due chiefly to non-completion of this year's programme of artillery rearmament. Artillery rearmament will therefore absorb a large portion of the funds allotted for reorganization and among other important measures for which funds will be provided in 1906-1907 are the following:—

Army Reorganization

- Reorganization of Horse and Field Batteries;
- Reorganization of existing artillery ammunition columns and formation of additional columns;
- Additional mule corps and cadres;
- Provision of small arms ammunition columns;
- Increase to the reserves of artillery ammunition and small arm ammunition;
- Increase to the reserve of rifles;
- Provision of additional stores for Ordnance Field Parks;
- Additional officers for the Indian Army;
- Acquisition of land in connection with the redistribution of the Army;

A sum of R53,73,000 (£358,200) has also been provided in the Military Works estimates for buildings in connection with the redistribution of the Army and for the expansion of Ordnance Factories.

Proposals are under consideration for the manufacture of acetone (the solvent used in the manufacture of cordite) at the Cordite factory, Aruvankad.

Factories.

Manufacture has commenced and it is hoped that the Gun factory at Cossipore will be able to supply 18 pr. and 13 pr. guns during 1906-1907.

The rolling mills, Ishapore (now called gun and shell factory, Ishapore branch) will be in full working order by the 1st April 1906.

A bounty of £15 has been offered to soldiers of British Infantry units of 8 or 7 years' service, and the grant of 6 months' furlough with free passage to and from England to men of 3 years' service, to induce them to extend their service with the colors to 12 and 8 years, respectively. The cost of this measure cannot be stated until the numbers accepting the bounty are known. A reference is also being made to the Secretary of State for India regarding the incidence of the cost.

The native artificers now serving as followers with R. A. units in India and with Ordnance Field Parks do not come up to the standard of modern requirements, and they will be replaced by competent artificers possessing a higher standard of mechanical skill. A corps will be recruited from men who have served a three years' apprenticeship in the Gun Carriage Factory at Jubbulpore. The cost has been estimated at—

The measure has been sanctioned by the Secretary of State and will be given effect to as soon as funds are made available.

A sum of Rs. 1,05,117 (£7,008) has been provided in the estimates of 1906-1907 to meet expenditure on account of the establishment of new and extension of existing dairies during that year.

To improve the efficiency of the volunteer force a sum of R50,000 (£3,333) will be provided in the Military Works Budget Estimates for buildings and ranges for volunteer corps.

For the improved lighting and ventilation of the barracks and hospitals of British troops, a sum of **Rs. 1,00,000 (£6,666)** will be provided in the Military Works Estimates. Electrical installations are to be commenced at certain stations, probably Lucknow and Peshawar.

Revised Estimates, 1905-1906.

Comparison—
Revised for 1905-1906
and
Budget for 1906-1907.

Comparison—
Revised for 1905-1906
and
Budget for 1906-1907.

The increase in receipts is chiefly caused by more receipts under clothing, due to issues to the Native Army being made on payment under the new clothing scheme; to larger demands of medical stores by Civil Institutions; to abnormal sales of unserviceable Ordnance Stores; and to the adjustment in the Indian accounts of a lump sum credit from the War Office on account of the five Native Infantry Regiments serving in the colonies; this increase is partly counterbalanced by smaller recoveries for malt liquor and by the adjustment, by credit to His Majesty's Imperial Government, of the value of peace equipment of corps returned from China and Somaliland.

7. The more important causes which have led to an increase in expenditure have been the following:—

- (a) Expenditure amounting to ₹16,67,000 (£111,133) on the manœuvres at Rawalpindi and other charges connected with the visit of Their Royal Highnesses the Prince and Princess of Wales.
- (b) Charges amounting to ₹12,80,000 (£85,333) on account of the five Native Infantry Regiments on garrison duty in the colonies, but which have been recovered from the Imperial Government and taken as a set-off under Receipts.
- (c) Excess strength of British troops and the deduction made in the Budget for probable savings not being fully realized, account for an increase of ₹8,00,000 (£53,333).
- (d) Clothing allowance to Native troops under the new clothing scheme, amount to ₹6,70,000 (£44,666).
- (e) More charges amounting to ₹5,00,000 (£33,333) on account of rise in prices of food-supplies.
- (f) More charges for conveyance of troops and stores, for warm clothing, supply of water, and toll on troops, etc., account for ₹4,25,000 (£28,333).
- (g) Extra expenditure amounting to ₹2,40,000 (£16,000), in connection with the earthquake at Dharmasala.
- (h) More charges amounting to ₹3,50,000 (£23,333) for pay of Regimental Officers, due to the deduction made in the Budget for probable savings having proved too high.
- (i) Increased expenditure in connection with the Aden Delimitation Commission and the Gilgit Agency, account for ₹1,54,000 (£10,266).
- (j) More non-effective charges, ₹2,00,000 (£13,333).

On the other hand, there have been decreases of expenditure under certain heads, the more important of which are the following:—

- (a) Less "Reorganization" expenditure in India, ₹16,09,000 (£107,266).
- (b) Less charges for Ordnance establishments and for purchase of stores for Arsenal and Ordnance Factories, amounting to ₹6,00,000 (£40,000).
- (c) Smaller expenditure anticipated under Army and Garrison Staff, Remount, Veterinary and Medical Establishments, amounting to ₹4,70,000 (£31,333).
- (d) Less charges for service pay and good conduct pay to British soldiers ₹3,00,000 (£20,000) and for clothing supplies and services, ₹2,60,000 (£17,333).
- (e) Lapse of the special provision for initial expenditure in connection with the Native Army Reserves and the formation of the 106th Hazara Pioneers, amounting to ₹2,00,000 (£13,333).
- (f) Smaller purchases of malt liquor, ₹2,52,000 (£16,800).
- (g) Less expenditure on account of "Tibet Mission" and "Seistan Boundary Commission," ₹1,68,000 (£11,200).

Estimates, 1906-1907.

8. The estimates for 1906-1907, in the net, amount to **₹20,22,41,000**

Comparison —
Budget for 1905-1906

and
Estimates for 1906-1907.

(**₹13,48,27,33**) or **₹16,27,000** (**₹10,84,66**)
more than the Budget for 1905-1906. This
is due to an increase in gross receipts
of **₹24,38,000** (**₹16,25,33**) and in gross

expenditure of **₹40,65,000** (**₹27,10,00**).

The increase in receipts may be chiefly attributed to more realizations from dairy farms; to the introduction of the new clothing scheme for the native army under which issues of clothing are made on payment; to larger sales of Ordnance Stores and camp equipage; and to the expenditure incurred and charged to Indian revenues on account of the five Native Infantry Regiments serving in the colonies being recovered from the War Office and credited in the Indian accounts.

9. The more important causes of increase in expenditure are the following:—

- (a) Larger provision on account of Reorganization, **₹17,21,000** (**₹11,47,33**).
- (b) Provision on account of the five Native Infantry Regiments serving at Colonial Stations, amounting to **₹14,00,000** (**₹93,333**).
- (c) Larger provision owing to rise in prices of food-supplies, **₹8,50,000** (**₹56,666**); for Dairy and Grass Farms, **₹5,63,000** (**₹37,533**); for conveyance of troops and stores, **₹1,00,000** (**₹6,666**); for extra labour in the Ammunition Factory, Dum Dum, and Gun Carriage Factory, Madras, and for Arsenal Stores, **₹2,35,000** (**₹15,666**).
- (d) Smaller deduction for probable* savings under pay of Regimental Officers and soldiers, **₹8,50,000** (**₹56,666**).
- (e) Clothing allowance to the Native Army, less half-mounting allowance abolished, **₹7,00,000** (**₹46,666**).
- (f) Provision of **₹2,20,000** (**₹14,666**) made for the Native Infantry Regiment returned from Somaliland, for which a deduction was made in 1905-1906.
- (g) Increased rate for purchase of mules in India and additional cost for importing transport mules from America, **₹1,86,000** (**₹12,400**).
- (h) More non-effective charges, **₹1,20,000** (**₹8,000**).

Against the foregoing increases there will be a set-off by reason of certain decreases, the most important of which are due to:—

- (a) Smaller provision on account of special measures other than Reorganization, **₹6,31,000** (**₹42,066**).
- (b) Smaller provision under Tibet Mission, **₹3,39,000** (**₹22,600**); and occupation of Chitral and its communications, **₹1,76,000** (**₹11,733**).
- (c) Smaller provision for good conduct pay and service pay, **₹2,34,000** (**₹15,600**).
- (d) No provision having been made for the Seistan Boundary Commission, **₹2,54,000** (**₹16,933**).
- (e) Omission of the special provision made in 1905-1906 in connection with the new scheme for the supply of clothing to the Native Army, **₹5,08,000** (**₹33,866**).
- (f) Smaller purchases of Remounts, **₹2,60,000** (**₹17,333**).
- (g) Smaller provision on account of compensation in lieu of clothing, **₹1,80,000** (**₹12,000**).
- (h) Smaller provision having been made for stores, including hides, for factories, **₹2,75,000** (**₹18,333**).
- (i) Initial expenditure provided in 1905-1906 for Native Army Reserves not repeated in 1906-1907, **₹1,50,000** (**₹10,000**).

II.—Home (India) Army Estimates.

Revised Estimates, 1905-1906.

10. The Military Department is next concerned with the Home estimates for Army effective and non-effective charges.

Comparison—
Revised for 1905-1906

and
Budget for 1905-1906.

The Home Budget Estimates for 1905-1906 made provision for a gross expenditure of £6,309,400, but in the Revised Esti-

mates this provision has been reduced to £5,323,200, or by £986,200.

This decrease in the Revised Estimate as compared with the Budget Estimate is stated by the India Office to be due mainly to less charges under the head "Reorganization—Stores for India;" less payments to the War Office in respect of British Forces serving in India; less charges for passage of officers and others not charged to Indian Troop Service; smaller demands for stores for ordinary requirements; less payments to War Office for retired pay, etc., of British Forces for service in India; less charges for pay and pensions of non-effective and retired officers of the Indian Service.

These decreases are partly counterbalanced by increases due to more charges for furlough pay during voyage of British forces serving in India and for furlough allowances of officers of the Indian Service; and larger expenditure under the head "Indian Troop Service" owing to increased payments for conveyance of troops to and from India in Imperial transports, etc.

The net figures of the Revised Estimate show a decrease of £1,008,300 as compared with those of the Budget Estimate for 1905-1906 due to less expenditure of £986,200, as explained above, and an increase in receipts of £22,100.

Estimates, 1906-1907.

Comparison—
Budget for 1905-1906
and
Estimates for 1906-1907.

11. The estimated receipts and expenditure for 1906-1907 are as follows:—

	Receipts.	Expenditure.	Net expenditure.
	£	£	£
Effective	273,300	3,199,300	2,926,000
Non-effective	30,000	2,403,500	2,373,500
TOTAL	303,300	5,602,800	5,299,500

12. Compared with the Budget for 1905-1906 the receipts show an anticipated decrease of £25,600 and this is chiefly due to smaller receipts on account of the Indian Troop Service and to a decrease in the value of articles in possession of regiments on their transfer from the Indian to the British Establishment. The gross anticipated expenditure for 1906-1907 is less than the amount provided in the Budget for the preceding year by £706,600. This decrease is chiefly accounted for by less requirements of stores (both ordinary and Reorganization); smaller provision of pay and pensions of non-effective and retired officers of the Indian Service and of pay of Non-effective Colonels of Royal Artillery, smaller anticipated expenditure on Indian Troop Service and on account of passage of officers and others not charged to the Indian Troop Service; and smaller provision under head "Miscellaneous."

These decreases are however partly counterbalanced by larger anticipated payments to War Office in respect of British forces serving in India; by larger

anticipated expenditure on account of furlough allowances and pay during voyage of British forces serving in India, of furlough allowances of officers of the Indian service and of payments to War Office for retired pay, etc., of British forces, for service in India.

13. The gross charges on account of effective services, as estimated for the coming year, include payments to the War Office in respect of the British forces serving in India (£650,000); furlough allowances and pay during the voyage of British forces serving in India (£130,000); furlough allowances of officers of the Indian Service (£270,000); Indian Troop Service (£319,000); passage of officers and troops otherwise than in transports (£15,000); Miscellaneous (£35,000); and stores for India, both ordinary and Reorganization (£1,780,300).

14. The gross charges on account of non-effective services comprise the retired pay, etc., of the British forces for service in India (£745,000); pay of non-effective Colonels of Royal Artillery (£15,500); pay and pensions of non-effective and retired officers of the Indian Service (£1,500,000); Miscellaneous, pensions, etc., (£88,000); and the Indian Military Service Family Pensions (£55,000).

15. The net anticipated expenditure for 1906-1907 is less by £681,000 than that for the preceding year, and, as explained in paragraph 12 above, this is due to a decrease of £25,600 in receipts and of £706,600 in gross expenditure.

III.—Military Works Estimates.

44—Military Works.

16. Including English expenditure, the Budget Estimate for 1905-1906 amounted to ₹1,72,36,000 (£1,149,000); but these figures have been modified during the year by various causes. The Revised Estimate is ₹1,60,67,000 (£1,071,100) which is less than the Budget of 1905-1906 by ₹11,69,000 (£78,000).

17. The Budget Estimate for 1906-1907, including English expenditure, is ₹1,75,41,000 (£1,169,400), showing an increase on that of 1905-1906 of ₹3,05,000 (£20,300).

18. The main heads of expenditure are in round figures :—

	R	£
Original works, including those in progress and those to be commenced	97,09,000	647,200
Repairs	35,59,000	237,200
Establishment, Tools and Plant	33,73,000	224,800
Barrack Department—Establishments, Supplies and Tools and Plant	9,00,000	60,000

19. In connection with the more important original works, expenditure amounting to ₹4,03,000 (£26,800) will be incurred on water-supply projects; ₹1,00,000 (£6,600) will be spent on electric lighting and punkah-pulling in barracks, etc.; provision has been made in the Budget for ₹2,00,000 (£13,300) for completing the Central Gun-carriage Factory at Jubbulpore; ₹2,25,000 (£15,000) for the steel plant and cartridge metal rolling mills at Ishapur; ₹1,50,000 (£10,000) for the staff college at Quetta; ₹2,09,000 (£13,900) for accommodation at Maymyo for a battalion of British Infantry; ₹4,00,000 (£26,600) for the Kirkee Arsenal; ₹1,25,000 (£8,300) for quarters for ordnance subordinates at Cossipore and Dum Dum; ₹1,43,000 (£9,500) for additional buildings at the Mona Remount Depôt; ₹8,79,000 (£58,600) for expansion of Ordnance factories on account of the increase in the reserve of artillery ammunition; ₹36,67,000 (£244,400) for buildings in connection with the scheme for the redistribution of the Army. Progress will be made towards completion of the requirements of volunteer corps in the matter of buildings and rifle ranges. The remaining original works include roads, buildings for troops, buildings for a medical store depôt at Calcutta, buildings for a young stock run and depôt at Sargodha, and provide for the ordinary requirements of the Ordnance, Marine and Army Clothing Departments and of the Supply and Transport Corps.

20. Provision is made for 205 new major works and schemes, of which 73 are in progress and 132 have yet to be commenced. A sum of ₹7,00,000 (£46,600) is allotted to minor works, each costing over ₹2,500.

IV.—47—Special Defences.

21. Including English expenditure, the Budget Estimate for 1905-1906 was **₹37,98,000** (£253,200). The Revised Estimate of expenditure is taken at **₹28,81,000** (£192,000).

22. The Budget Estimate for 1906-1907, including English expenditure, is **₹34,73,000** (£231,500).

Marine Estimates.

HOME AND INDIAN.

Revised Estimates, 1905-1906.

23. The total receipts in the Budget for 1905-1906 were **₹22,78,000** (£151,866) and the Revised Estimate stands at **₹18,00,000** (£120,000) showing a decrease of **₹4,78,000** (£31,866).
 Comparison—
 Revised for 1905-1906.
 Budget for 1905-1906.

The decrease is chiefly due to falling off in receipts owing to less work done for and stores supplied to the Royal Navy and other Departments. A change in the method of adjusting recoveries on account of the employment of Royal Indian Marine vessels in carrying out the triennial reliefs of the five Native Indian Regiments on colonial garrison duty under the Imperial Government, has also contributed towards reducing the receipts which would otherwise have actually accrued to the Royal Indian Marine in 1905-1906. By this change which has been introduced from 1st April 1905, the liability of His Majesty's Imperial Government will be met by the payment of a capitation rate which, as at present arranged, will be wholly treated as military receipts in India.

24. The total expenditure provided for in the Budget for 1905-1906 was **₹82,19,020** (£547,935) but the Revised Estimate stands at **₹78,54,000** (£523,600), showing a decrease of **₹3,65,020** (£24,335). The decrease is chiefly due to less expenditure incurred than was provided for the construction of a new vessel to replace the "Canning."

Estimates, 1906-1907.

25. The total receipts for 1906-1907 are **₹21,45,200** (£143,013) against **₹22,78,000** (£151,866), the total of the Budget for 1905-1906, showing a decrease of **₹1,32,800** (£8,853).
 Comparison—
 Budget for 1905-1906.
 Estimates for 1906-1907.

The decrease is chiefly due to less recoveries being anticipated on account of dockyard services and supplies.

26. The total expenditure for 1906-1907 is **₹89,09,300** (£593,953) against **₹82,19,020** (£547,935), the total of the Budget for 1905-1906 showing an increase of **₹6,90,280** (£46,018). This is chiefly due to large expenditure on stores in India and to the construction of new vessels at Home, to replace the "Canning" and "Nancowry." These increases are partly counterbalanced by savings in other directions.

27. In order to accelerate the promotion of officers of the R. I. M. the establishment of 1st and 2nd grade commanders has been increased from 7 to 8 and from 9 to 10 respectively.

The appointments of Marine Transport Officer, Mandalay, Superintending Engineer, Mandalay, Assistant to the Superintending Engineer, Burma, and Engineer and Harbour Master, Port Blair, have been reserved for officers of the R. I. M. The reservation of the appointment of Port Officer, Chittagong, for officers of the R. I. M., has also been recommended to the Secretary of State.

In addition to their usual trooping work, the R. I. M. vessels "Hardinge" and "Dufferin" were employed to convey troops between India and China. The "Dufferin" was also used to convey H. E. Lord Curzon and party to Suez. A vessel is under construction in England for use as a troopship in replacement of the R. I. M. S. "Canning." The cost will be £187,000, of which amount £72,000 has been spent this year and the balance £115,000 provided in the estimates of 1906-1907.

General remarks.

The R. I. M. S. "Investigator" has been employed during the past season on surveying work in the Persian Gulf and at Aden, while the "Nancowry" has been engaged in a survey of the Andamans. Arrangements are being made to replace the above vessels which are out of date.

C. H. SCOTT.

March 21st, 1906.

APPENDIX III.

Memorandum by the Railway Board

ON THE

Results of Indian Railway working 1905-1906 and proposals for 1906-1907.

The results of working of Indian Railways for the year 1905-1906 show larger gross receipts and larger revenue expenditure than in any previous year.

The estimated net surplus Revenue after paying all charges including interest is three crores three lakhs and eighty-three thousand (£2,025,600).

CAPITAL EXPENDITURE.

The Capital expenditure during the year 1905-1906 will amount to twelve crores, fifty lakhs (£8,333,000) being about two crores in excess of the expenditure for the year 1904-1905.

For the year 1906-1907 these figures have been largely increased. The estimate provides for spending a sum of 15 crores (£10,000,000), an increase of 20 per cent on the provision of last year.

Under the head of lines already open, including the provision of additional rolling stock, the amount expended in 1905-1906 will be 726 lakhs (£4,840,000), showing an advance of about 224 lakhs over the expenditure under the same head for the previous year.

Under the same heads in 1906-1907 provision is made for 891 lakhs (£5,940,000), an increase of about 23 per cent.

A comparison, showing capital expenditure for 1906-1907 and the previous five years, is contained in the following statement:—

	Lines already open including additional rolling stock.	LINES UNDER CONSTRUCTION.		Total.	Equivalent in sterling.
		Started in previous years.	Started in current year.		
	Lakhs	Lakhs.	Lakhs.	Lakhs.	£
1901-1902 (actual expenditure)	3,52'58	5,09'06	25'64	8,87'28	5,915,199
1902-1903 (" ")	4,81'74	4,52'50	71'52	10,05'76	6,705,064
1903-1904 (" ")	5,58'77	3,13'68	84'62	9,57'07	6,380,468
1904-1905 (" ")	5,02'76	4,86'91	88'62	10,78'29	7,188,600
1905-1906 (latest grants)	7,26'63	4,81'04	42'33	12,50'00	8,333,334
1906-1907 (proposed grants)	8,91'09	5,38'91	70'00	15,00'00	10,000,000

The information showing in detail how the expenditure in 1905-1906 and 1906-1907 will be distributed is contained in statement A attached to this memorandum.

Under the order of the Secretary of State a programme has been submitted to him for expenditure on Railways during the next three years.

This "triennial programme," as it is called, has been definitely agreed to by the Secretary of State for the year 1906-1907 and provisionally approved for the remaining two years.

The year 1906-1907 is the first year this arrangement will come into operation. The object aimed at is to enable a Railway Programme, extending over a reasonable period, being made out under as fixed conditions, for new Railways and additions to existing ones, as Indian Finance will permit, and also to secure a definite continuity of Railway Policy, and the Railway Board have every hope that the funds required to meet the expenditure of 15 crores per annum for the next three years will be duly provided.

The mileage of lines of all gauges open to traffic on 1st April 1905 was 27,728, and under construction, 2,344; on 1st April 1906 there will be 28,684 open and 1,959 under construction.

At the end of the coming year there will be 1,509 miles under construction among which will be twelve new projects.

RAILWAY REVENUE ACCOUNT.

The Railways of India, taken as a whole, have for a succession of years shown at balance to the credit of general revenues, after allowing for working expenses, interest

on capital expended, charges for annuities in redemption of capital and miscellaneous railway expenditure. The following table shows the approximate figures for 1905-1906 compared with the actual results for the previous five years:—

(Figures in rupees omitting 000.)

	Gross receipts.	Working expenses.	Interest charges, etc.	Surplus of Revenue over expenditure.	Equivalent in sterling.
	R	R	R	R	£
<i>Actuals—</i>					
1900-1901 . . .	27,44,04	12,69,86	14,25,41	48,77	325,100
1901-1902 . . .	30,33,90	14,23,85	14,83,06	1,26,99	846,600
1902-1903 . . .	30,20,68	14,74,08	15,11,66	34,34	228,900
1903-1904 . . .	32,33,68	15,56,72	15,47,86	1,29,10	860,700
1904-1905 . . .	36,03,37	16,94,32	15,93,23	3,15,82	2,105,500
<i>Estimate—</i>					
1905-1906 . . .	36,98,72	17,44,54	16,50,35	3,03,83	2,025,600

Compared with the results of the previous year the figures for 1905-1906 show a falling off of Rs. 11,99,000 (£79,900). The receipts are more by Rs. 95,35,000 (£635,700) but the working expenses are higher by Rs. 50,22,000, (£334,800) while interest charges, etc., have increased by Rs. 57,12,000 (£380,800).

GROSS RECEIPTS.

In 1904-1905 traffic conditions were exceptionally favourable on all the larger railway systems. Pilgrim, grain and coal traffic accounted for a large increase on the East Indian railway, the recently completed irrigation works in the Punjab rendered possible the heavy export traffic in wheat *via* Karachi resulting in an extraordinary increase on the North Western railway, while the earnings of the Great Indian Peninsula, Rajputana-Malwa, and Bengal-Nagpur railways were also affected by favourable crops. During the current year, while there has been a considerable falling off in grain and seed traffic on the North Western railway, and the East Indian railway earnings were practically stationary, the earnings from the other three above-mentioned railways show still better results owing to further development of cotton, grain and specially coal traffic. The following are the principal differences resulting in the net increase of Rs. 95,35,000 in gross receipts:—

	Rs.
<i>Increases.</i>	
Bengal-Nagpur	56,65,000
Great Indian Peninsula	32,55,000
Rajputana-Malwa	30,70,000
Other railways (net)	33,93,000
	<u>1,53,83,000</u>
<i>Decrease.</i>	
North Western	58,48,000
	<u>58,48,000</u>
Net Increase	95,35,000

WORKING EXPENSES, INTEREST CHARGES, ETC.

The increase in working expenses during the year 1905-1906 is estimated to amount to Rs. 50,22,000 (£334,800.) This increase to a large extent is due to increased traffic on certain lines of which the Bengal-Nagpur, Great Indian Peninsula and Rajputana-Malwa railways are the most prominent examples.

These three lines will have earned more than one crore of rupees (£665,700) in excess of their earnings during the previous year, and this increase in earnings necessitate increased working expenses.

There are, however, other causes which may increase both working expenses and interest charges in the future. The increase in working expenses should be to a considerable extent temporary; the increase in interest charges, however, will be permanent.

The causes are these—

Railways in India have now to run faster trains, provide better carriages, improve the conditions under which third class passengers are carried, introduce a more elaborate system of signalling, and generally conduct their business under more up to date methods than were in use in the past.

Some of these improvements will lead to increased revenue. Some will not, but have to be provided to meet the public demands.

The cost of many of these improvements being in the nature of renewals has to fall to a considerable extent on revenue.

During the period this raising of the standard is being carried out working expenses must rise, though in the end under some items more economical working should be secured.

Again it is generally admitted that there is economy in Railway working in hauling heavy train loads. To enable heavy train loads to be hauled the permanent way of railways has to be improved, and girders strengthened. Most lines now when making branches wish to use their light main line rails in these branches and renew the main line with heavier rails.

This is a sound business arrangement, but carrying out the policy indicated means that Revenue has to renew before the rail itself is nearly worn out. The result is increased debits to Revenue for a time causing increased working expenses. The Board hope that a practical solution may be found to meet this difficulty, so that working expenses may be steadied and not liable to unnecessary fluctuations.

The results of improvement in the standard of permanent way carrying with it the capacity to haul heavier loads will well repay the expenditure by ultimate reduction in cost of haulage.

NEW LINES TO BE CONSTRUCTED.

The new lines, the construction of which is to be commenced during 1906-1907, are:—

No.	Railway.	Gauge.	Probable length, miles.
<i>(i) State, by State Agency.</i>			
1	Bombay—Sind connection	5' 6"	295
2	Eastern Bengal— Lalgola-Gherria	5' 6"	13
3	North-Western— Jhang-Chiniot-Sangla	5' 6"	70
4	Lodhran-Khanewal	5' 6"	55
5	Shorkot Road-Chichoki	5' 6"	130
6	Thal-Parachinar	5' 6"	55
7	Kohat-Thal (conversion from the 2' 6" gauge, not resulting in increased open mileage)	5' 6"	62
<i>(ii) State, by Agency of Companies.</i>			
8	Assam-Bengal— Kalaura-Sylhet	3' 3½"	31
9	Burma— Daga-Naikban	3' 3½"	69
10	East Indian— Katwa-Azimganj-Barharwa	5' 6"	103
<i>(iii) From Capital of Companies.</i>			
11	Bengal-Nagpur— Vizianagram-Raipur	5' 6"	310
<i>(iv) From Capital of Local Boards.</i>			
12	Kurnool-Dhone	3' 3½"	32

OPEN LINE REQUIREMENTS.

In dealing with the Capital funds available for expenditure on railways the Railway Board have given due consideration to the demands of open lines for the provision of additional facilities required by a growing trade.

For improving railway working there are demands of high importance for doubling existing lines, additional crossing stations, improved signalling, improvement of railway workshops, more staff quarters and the general provision of facilities of smaller character required to enable Railways to deal more expeditiously with their traffic.

The total amount allotted during 1906-1907 to open lines, *viz.*, 891 lakhs (£5,940,000) out of a total for the year of 1,500 lakhs (£10,000,000) has been divided between general open line requirements and additional rolling stock approximately as follows:—

		Lakhs.
1906-1907	{ Open line requirements	509
	{ Rolling stock	382

This shows a considerable increase over 1905-1906, the figures for which were as follows :—

		Lakhs.
1905-1906	{ Open line requirements	452
	{ Rolling stock	274

ROLLING STOCK.

The question of what is a sufficiency of rolling stock on a railway is one about which there is considerable difference of opinion. If railways are to be worked commercially, their interests have to be considered. It is sometimes argued that it is in the interest of the railway to always be able to carry *all* traffic offering at *all* times.

To provide for a maximum demand for transport for a short period would necessitate a very large amount of extra rolling stock being kept to meet this exceptional demand. This rolling stock would lie idle for considerable periods and be a burden on the capital cost of the line.

In most countries of the world, especially in America, where a large export grain, seeds and coal business is done, there is shortness in the supply of rolling stock at certain times and during unusual briskness of trade.

On this important question, the Railway Board are of the opinion that Indian Railways as a whole are at present below what should be the standard of equipment of rolling stock, for present requirements. Since the Board was formed they have taken steps to improve this standard and will continue to do so to meet future developments of trade.

For the year 1906-1907 the sum of three crores eighty-two lakhs has been provided for new rolling stock, being an excess of one crore eight lakhs over the provision for 1905-1906.

The stock now under indent consists of heavier engines and higher capacity vehicles. This represents a considerable increase in power of transportation beyond that indicated by the actual numbers added.

Some of the restrictions on axle loads in existing stock have also been relaxed, which has permitted existing wagons being more heavily loaded.

THIRD CLASS PASSENGER TRAFFIC.

The question of improving the comfort and convenience of third class passenger traffic is a matter the Railway Board have been devoting considerable attention to during the past year.

More third class rolling stock is undoubtedly required.

Provision has, as far as practicable, been made for this during the year 1906-1907, the number sanctioned being double that supplied in 1905-1906.

The additional stock to be supplied during the ensuing year will be of a better type than formerly. The carriages will be of a large size, better lighted and be supplied with latrine accommodation. The stock being built for renewals is also of this higher standard.

Steps will be taken during the ensuing year to develop more rapidly the system of communication between passengers and guards and drivers of trains, the system being applied to third class carriages equally with those of the higher classes.

The Board would also note that in response to their representations, the various Railway Administrations are paying attention to the general convenience of third class passengers in taking tickets, avoiding crushes on platforms, and overcrowding in carriages, but much more remains to be done. The Board hope that this will induce larger numbers to travel and thus lead to improved receipts from this valuable class of traffic.

GENERAL.

During 1905 the Railway Board authorized a substantial reduction in the minimum rate for the carriage of coal. Railways, however, are moving cautiously in taking advantage of this reduction, but the Board feel sure the final result must be a large increase in the coal business and a general stimulus to industries situated far from their coal supply.

Attention is invited to statements B and C accompanying this memorandum, which contain information of interest.

F. R. UPCOTT, *Chairman.*

W. H. WOOD, }
T. R. WYNNE, } *Members.*

The 21st March 1906.

STATEMENT A IN APPENDIX.III.

STATEMENT

OF

Anticipated Capital Expenditure on Railways; Open and under Construction
for the year 1906-1907.

Branch lines under rebate terms are excluded.

CAPITAL EXPENDITURE ON RAILWAYS, 1906-1907.

(Figures in lakhs and decimals of lakhs.)

No.	RAILWAY.	Grants allotted for 1905-1906.	Distribution of grants during 1906-1907.

A. Worked by Native States	1,321.74	
B. Worked by companies	782.20	
(xv) Lines in Foreign Territory	73.60	
Special (2' 6" and 2' 0") gauges—		
(xvi) State lines worked by the State	168.41	
(xvii) State lines worked by companies	270.01	
(xviii) Assisted companies' lines—		
A. Subsidized by Local Governments	58.76	
B. Subsidized by District Boards	121.60	
C. Receiving land only from Government	120.53	
(xix) Unassisted companies' lines	33.27	
(xx) Native State lines—		
A. Worked by companies	372.11	
B. Worked by State railway agency	33.60	
TOTAL	27,727.68	

- (m) Excludes 3.66 miles of the Lucknow-Bareilly railway between Alshugh and Daligan, worked over, but includes 10.70 miles of mixed (2' 6" and 3' 3") gauge line between Burhwal and Bara Banki and 0.59 mile of the Oudh and Rohilkhand State railway on the Cawnpore bridge.
- (n) Worked by the Southern Mahratta Railway Company.
- (o) Worked by the Jodhpur-Bikaner railway.
- (p) Worked by the Rohilkund and Kumaon Railway Company.
- (q) Includes 2.10 miles at Ujjain, 3.02 miles between Agra Cantonment and Jumna East Bank and 0.94 mile between Lalohri Gate Cabin and Brewery Cabin, Delhi, laid on the 2' 6" gauge, and 10.24 miles of mixed (2' 6" and 3' 3") gauge line between Kot Kapura and Bhatinda, worked over by the Rajputana-Malwa and North Western State railways.
- (r) Worked by the South Indian Railway Company.
- (s) Worked by the Bengal and North-Western Railway Company.
- (t) Worked by the Eastern Bengal State railway.
- (u) Worked by the Assam-Bengal Railway Company.
- (v) Worked by the Assam-Bengal and Trading Company.
- (w) Includes 5.13 miles of Bhavnagar Dock estates and Junagad quarry lines.
- (x) Worked by the Bhavnagar-Gondal-Junagad-Forbandar railway.
- (y) Includes 3.03 miles of the Bell Bandar Dock estate lines.
- (z) Includes 10.75 miles of 2' 6" gauge line between Vankar and Morvi.
- (aa) Worked by the Bengal-Nagpur Railway Company.

And the mileage under construction or sanctioned for construction on the same date, *viz.*, 1st April 1905, was 3,186'80 miles, as follows:—

	Miles.	Miles.
<i>5' 6" gauge—</i>		
(i) State lines worked by the State	546'44	
(ii) State lines worked by companies	476'48	
(iii) Branch line companies' railways assisted by Government under "Rebate" terms	154'00	
(iv) Native State line worked by Company	1'39	
		1,178'31

3' 3½" gauge—

(v) State lines worked by the State	300'87	
(vi) State lines worked by companies	609'34	
(vii) District Boards' lines	5'53	
(viii) Assisted companies' lines—		Miles.
A. Subsidized by the Government of India	148'00	
B. Receiving land only from Government	116'94	
		264'94
(ix) Native State lines worked by companies	72'85	
		1,253'53

Special (2' 6" and 2' 0") gauges—

(x) State lines worked by the State	6'80	
(xi) State lines worked by companies	325'52	
(xii) Assisted companies' lines—		Miles.
A. Subsidized by District Boards	105'50	
B. Receiving land only from Government	214'66	
		320'16
(xiii) Native State lines—		
A. Worked by Native States	11'86	
B. Worked by companies	68'60	
C. Worked by State railway agency	22'02	
		102'48
		754'96
		TOTAL 3,186'80

There was thus a grand total of railways completed and in hand, on the 1st April 1905, of miles 30,914'48

Lines under construction and sanctioned on 31st March 1905.

	Miles.	Miles.	Miles.
(i) Eastern Bengal—			
Kankunghi Chord	2'25		
Panchoria to the river Ganges (a)	8'00		
Ranaghat to Lalga Ghat	97'50	105'75

(a) See foot-note (a) on page 119.

(b) See foot-note (b) on page 119.

(c) Worked by the Great Indian Peninsula Railway Company.

(d) Although for convenience classed amongst State railways, this line was the property of the Bengal Central Railway Company. It was purchased by the State on the 1st July 1905, and amalgamated with the 5' 6" gauge section of the Eastern Bengal State railway.

(e) Worked by His Highness the Nizam's Guaranteed State Railways Company.

(f) Includes 9·73 miles of 3' 3½" gauge line between Viramgam and Wadhwan.

(g) Worked by the Bombay, Baroda and Central India Railway Company.

(h) Worked by the Madras Railway Company.

(i) See foot-note (h) on page 119.

(j) Worked by the Oudh and Rohilkhand State railway.

(k) Worked by the East Indian Railway Company.

(l) Worked by the North Western State railway.

(m) See foot-note (m) on page 119.

(n) Worked by the Southern Mahratta Railway Company.

(o) Worked by the Jodhpur-Bikaner railway.

(p) Worked by the Rohilkhand and Kumaon Railway Company.

(q) See foot-note (q) on page 119.

(r) Worked by the South Indian Railway Company.

(s) Worked by the Bengal and North-Western Railway Company.

(t) Worked by the Eastern Bengal State railway.

(u) Worked by the Assam Railways and Trading Company.

(v) Includes 5·23 miles of Bhavnagar Dock estates and Junagad quarry lines.

(w) Worked by the Bhavnagar-Gondal-Junagad-Forbandar railway.

(x) Includes 3·03 miles of the Beil Bandar Dock estate lines.

(y) Includes 16·74 miles of 2' 6" gauge line between Vankaner and Morvi.

(z) Worked by the Bengal-Nagpur Railway Company.

* Correction of mileage.

† Purchased by the State with effect from the 1st January 1906 and transferred to State lines worked by Companies.

‡ Purchased by the State with effect from the 1st January 1906 and amalgamated with the Assam-Bengal railway.

§ Made up as follows:—

Open at the commencement of 1905-1906 27,727·68

Opened during 1905-1906 855·83

28,583·51

Net increase due to corrections of mileage 0·20

28,583·71

Lines under construction and sanctioned on 31st March 1906.

(c) Completion deferred.

GOVERNMENT OF INDIA.
DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 hrs., on Thursday, the 22nd March 1906, based on the India Daily Weather Reports of the period.

A depression from the west, which first appeared at Baghdad on the 17th, entered India from Baluchistan during the 18th. It caused a rapid fall of the barometer over the whole of north-west India and partially clouded the skies of that area, which had been clear in the early morning. No rain, however, followed its course beyond the border of Baluchistan, though reports from Ispahan and Teheran on the 18th, and from Chaman and Quetta on the 19th, indicate that light rain had fallen over the more western part of its path.

A fresh disturbance was visible in Persia on the 20th, and was even then giving cloudy, unsettled weather in Sind and the south-west Punjab. Between the 19th and 20th a small depression centre crossed the Sind and Gujarat coasts, eastwards from the head of the Arabian Sea, and by the morning of the 21st was passing over Rajputana and the neighbouring districts of central India. By the 22nd it had caused nearly general rain in the middle and east of the Central Provinces and scattered rain in the east of central India. Rain had fallen also in Baluchistan, the extreme north-west of India, with snow on the west Himalayas and scattered rain in the United Provinces. The following are the chief amounts reported from the 20th to the 22nd:—on the 20th Jacobabad 0·12", 21st Hyderabad 0·67", Akola 0·39" and Nagpur and Chanda 0·41"; 22nd Nagpur 0·78", Jubbulpore 0·75", Seoni 0·33", Sutna 0·28", Cherat 1·90", Peshawar 0·39", Rawalpindi 1·13", Cawnpore 0·35", Mainpuri 0·59" and Agra 0·20".

In the east of India local rain and scattered showers occurred during the week in Assam, Bengal, Chota Nagpur and Orissa. The largest amounts were:—on the 16th Sambalpur 1·13", Chaibassa 1·48" and Burdwan 1·61"; 17th Raipur 2·20" and Sambalpur 1·24"; 18th Pendra 1·20" and Balasore 1·49"; and on the 19th Narayanganj 1·90", Berhampore and Shillong 1·25" and Waltair 1·35".

In south India there was local rain on two days, during which one heavy fall of 3·18" was reported from Trichinopoly on the 18th and another of 3·35" from Wellington on the 21st. The following places received a half inch or more:—Trichinopoly, Kodaikanal, Bangalore, Coimbatore and Wellington.

J. H. FIELD,

for Officiating Meteorological Reporter to the Government of India
and Director General of Indian Observatories.

J. WILSON,

Secretary to the Government of India.

SIMLA,

The 22nd March 1906.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,
17th March 1906.

Burma.—Myitkyina received 18 cents and the Northern Shan States 16 cents of rain during the week. Ploughing for dry weather paddy has commenced in Myitkyina and sowing of the same crop is completed in parts of Thayetmyo. Sowing of early wet weather paddy in nurseries has commenced in the Southern Shan States. Reaping of miscellaneous island crops in Minbu and of miscellaneous hill side crops in Myitkyina has commenced. Reaping of wheat and gathering of beans, peas, and gram continue. The standing crops are generally in good condition. The price of paddy has risen slightly in Prome and has fallen slightly in Pyapon and Pakokku; elsewhere it is stationary.

Eastern Bengal and Assam.—The weather is seasonable. Slight to moderate rain fell in all districts except Jalpaiguri and Malda. Pruning of tea, pressing of sugarcane, and harvesting of mustard and pulses are in progress. The prospects of the crops are generally fair. Lands are being prepared for early rice and jute. Fodder is insufficient in parts of Bogra and the Khasi and Jaintia Hills. Prices of common rice:—Sibsagar and Chittagong 11; Gauhati and Tezpur 10; Dinajpur 9½; Jalpaiguri, Rangpur, Malda, Dacca, Barisal, Rangamati, Silchar, Dhubri, Nowgong, and Dibrugarh 9; Mymensingh 8½; Pabna 8½; Rampur Boalia, Comilla, and Noakhali 8½; Bogra 8½; Faridpur and Tura 8; and Sylhet 7½ seers per rupee.

Bengal.—Rain was fairly general, the fall being moderate in the Presidency, Burdwan and Orissa Divisions and light in the rest of the Province. Harvesting of the spring crops and the collection of opium are going on. Some damage to the standing crops by hail is reported from the Southal Parganas and Angul. Prospects are on the whole satisfactory. Fodder is reported to be insufficient in parts of Darbhanga and the Southal Parganas. Water-supply is sufficient. The price of common rice has risen in one and has fallen in five districts. It still continues high in most of the districts of the Presidency Division and also in Hooghly, Howrah, Muzaffarpur, Monghyr, Purnea and Darjeeling.

United Provinces.—Rain fell during the week in Dehra Dun, Almora, and Garhwal and there was also a slight sprinkling in parts of Moradabad, Meerut, Badaun, Pilibhit, Fyzabad, Jaunpur, Ghazipur and Mirzapur. Harvesting operations are now in progress in 31 districts and opium is being gathered in 23. The pressing of sugarcane has been completed or is nearing completion and extra crops and sugarcane are being sown in several districts. Fodder is scarce in ten districts and dear in three but supplies generally are sufficient and the markets full. Prices continue to fall and the prospects except in the distressed areas are good. The total number of persons on relief at the end of the week was 169,000.

The weekly report on the famine and scarcity is as follows:—There was no rain in affected districts. Harvesting operations are in progress in all districts except Muttra, Agra, and Etawah. The yield of irrigated crops in Cawnpore and Hamirpur is good and of unirrigated crops poor. Late sown irrigated crops in the Kunch tahsil of Jalaun are withering. Scarcity of fodder continues; grass is being imported from the forests. Prices are falling slightly; maize is selling at twelve and a half seers and over in Jalaun and Hamirpur and at fifteen seers in Muttra. The numbers on relief are:—workers:—Jalaun 39,000, Jhansi 24,000, Cawnpore 5,000, Hamirpur 26,000, Muttra 9,000; on gratuitous relief Jalaun 26,000, Jhansi 19,000, Cawnpore 1,000, Hamirpur 14,000, Muttra 6,000; total:—workers 103,000; on gratuitous relief 66,000; grand total 169,000. The condition of the workers and of the people is generally fair. Famine has been declared in two tahsils of Banda.

Punjab.—Good rain has fallen in Ferozepore, Sialkot, and in parts of the Amballa, Lahore, Shahpur, Rawalpindi, and Mianwali districts. Prices exhibit a steady downward course. Sowings of extra spring crops and of cotton and sugarcane are in progress in many districts. The standing crops are generally in good condition except in the south eastern districts of the Delhi Division, where unirrigated crops are only fair. Opium crop prospects are average in Lahore. Slight local damage has been done to crops by hail in two districts. Condition of cattle is fair to good except in Gurgaon. Dry fodder is still scarce; the supply of green fodder is improving and is sufficient in many districts. There are no complaints regarding the water-supply.

The weekly report on the famine or scarcity is as follows:—Rohtak:—on works 5,521; on gratuitous relief 5,159, total 10,680. Distress is moderate and only smaller cultivators and village menials are on works, people are generally resorting freely to the works. There is no wandering or emaciation apparent, and physically the condition of workers is generally good. Relief measures are sufficient and the public health is good except for a few cases of plague.

North-West Frontier Province.—Light showers have fallen during the week and have been beneficial to the standing crops, the prospects of which are excellent. The weather is cloudy. Extra spring sowings are in progress. Sugarcane is being sown in Peshawar. The water-supply is ample and there has been some irrigation from hill torrents in Dera Ismail Khan. The condition of cattle is poor in the Daman tract; elsewhere it is generally good. Fodder is sufficient except in the Daman tract of Dera Ismail Khan. Prices are falling slightly. Prices:—wheat 12 to 16; gram 15 to 19; maize 17 to 20; and bajra 14 to 16 seers per rupee.

Jammu.—There was slight rain in some parts of the province during the week. Prices are fluctuating. Prices:—wheat 12 to 24, and maize 25 to 34 seers per rupee. The condition of the standing crops is good. Fodder is sufficient.

Kashmir.—The weather is bright and pleasant. Prices are stationary.

Rajputana.—The spring crops are being harvested in some places, they are withering in North and Central Kotah and the cultivated area in the province is generally restricted. Pasturage and fodder are insufficient in North Mewar, Jaipur, Kishangarh, Alwar, Karauli, Bharatpur, Dholpur, Ajmer-Merwara, parts of Marwar, Tonk, Partabgarh and Kotah; in these tracts the condition of cattle is generally poor. Prices have fallen in Sirohi and Kishangarh and slightly in Tonk, Bundi, Bharatpur, Dholpur, and Merwara; they are practically steady elsewhere. The numbers on famine relief are:—Ajmer-Merwara 53,486; Native States 36,475. On test works:—North Mewar 2,478, Shahpura 38, Tonk 1,714, Jaipur 4,065; on gratuitous relief:—North Mewar 569, Shahpura 95, Tonk 297, grand total 99,217 or a decrease of 2,507.

The weekly report on the famine and scarcity is as follows:—Ajmer-Merwara on works 37,719; on gratuitous relief 15,767, total 53,486. Native States:—Marwar on works 3,877, on gratuitous relief 1,797, total 5,674; Kishangarh on works 2,844, on gratuitous relief 2,462, total 5,306; Alwar on works 3,283, on gratuitous relief 1,387, total 4,670; Eastern States on works 15,455, on gratuitous relief 5,370, total 20,825. The numbers have risen in Alwar and Karauli and slightly in Ajmer and have fallen in Merwara and Bharatpur, the decrease being due to the Holi festival. Prices:—Ajmer-Merwara 12, Marwar 11½, Kishangarh 14, Alwar 13½, Karauli 9½, Bharatpur 13, Dholpur affected area 11½ seers per rupee. The physical condition of relief workers is fair to good. Relief measures are adequate. Cattle mortality is increasing in Karauli and Dholpur.

Central India.—There is no rain during the week. Harvesting of spring crops is in progress. The standing crops are fair in Bhopal, Malwa, and Bhopawar; indifferent in Baghelkhand; and average in Bundelkhand. Irrigated spring crops are normal in parts of Gwalior. The probable outturn is normal in parts of Gwalior; fair in Bhopal and Bhopawar; and below average in Baghelkhand, Bundelkhand, and Malwa. Agricultural stock are in bad condition in parts of Gwalior; and average in Bundelkhand. Pasturage is bad in parts of Gwalior; scarce in North of Bundelkhand and sufficient in Bhopawar. Prices are high in Gwalior and Baghelkhand; and are rising in Bhopal. Opium has been slightly damaged in one pargana of Gwalior.

The weekly report on the famine and scarcity is as follows:—The general position is unaltered. Prices of staple food grains vary from eleven to sixteen seers per rupee in Gwalior and from twelve to thirteen and half in Bundelkhand. The numbers on works are:—in Gwalior 54,000; on gratuitous relief 9,500, total 63,500. In Orchha, Datia, Samthar, Baoni, Panna, Charkhari, Bijawar, Chhatarpur, Ajaigarh, Sarila, and Jajirs the numbers are:—on works 26,250; on gratuitous relief 3,250, total 29,500, grand total 93,000. The decrease in Bundelkhand figures is due to people being engaged in harvesting the spring crops.

Central Provinces.—Light to moderately heavy rain has fallen in most districts; the falls were heavy in Mandla, Seoni, Narsinghpur, Nagpur, Balaghat, Raipur, and Bilaspur ranging between 1 and 2½ inches. The rain was accompanied by hail in nine districts; some damage has been caused to the standing crops in parts of Narsinghpur, Nagpur, Bhandara, and Bilaspur but the extent of damage is not known at present. The harvesting and threshing of spring crops are in progress. Preparation of land for autumn sowings continues and will be much facilitated by the rain received. The prices of staple food grains are still slightly above the warning rates in all districts of the Central Provinces, except Betul, Chhindwara, Jubbulpore and Wardha and they are up to the scarcity level in

Bilaspur, Mandla and Balaghat; the past week has however witnessed a further fall in many districts especially in those where the spring crops are of most importance.

Baroda.—For week ending 10th March the numbers on relief were :—on works 3,092; on gratuitous relief 159, total 3,251.

Bombay.—Except in the affected tracts the standing dry and irrigated crops are generally in good condition but oilseeds have been slightly damaged by blight in parts of Larkana and wheat by rats in parts of Thar and Parker. Water in irrigation canals, tanks and wells is getting low in the affected districts but crops under them are fair. Preparation of lands for autumn sowing is generally in progress. Picking of cotton still continues in parts of Gujarat, the Karnatak, Baroda, Cutch and Kolhapur. Measures have been taken wherever necessary for the improvement of drinking water with aid of Government grants and takavi advances in affected districts. Fodder continues to be imported by Government agency for relief of cattle. Agricultural stock are generally sufficient but their numbers are decreasing owing to their sale at low prices. The price of fodder is two to three times above the normal. Imports and exports of grain are active and stocks with merchants adequate. The prices of staple food grains in the Deccan are 40 to 120 per cent., in the Karnatak 75 to 95 per cent., in Gujarat 15 to 95 per cent., and in the Konkan 10 to 30 per cent. above the normal. The numbers on test works are increasing in Poona, Belgaum, and Dharwar; the figures on the last day of week ending 10th instant were :—Poona 662, Sholapur 93, Satara 237, Bijapur 331, Belgaum 173, Dharwar 93, Phaltan 25, total 1,614. There is no acute distress as yet; petty cultivators are coming to the end of their resources but are still not freely resorting to relief works as they get employment in fields, on Local Boards and Government irrigation works and on private works organised by help of takavi grants. Labourers on relief works are in fair to good condition and relief measures are adequate. Emigrants continue to return though in small numbers. There is no aimless wandering observed and the condition of people is in general good. A poor-house has been opened in Bijapur. Relief works are in progress in Ahmednagar, Bijapur, and Belgaum districts and the Deccan and Southern Maratha Country States. The numbers on relief in British Districts are :—Deccan on works 4,220; on gratuitous relief 11,502, total 15,722; Karnatak on works 5,936; on gratuitous relief 12,953, total 18,889; Native States on works 2,654; on gratuitous relief 1,693, total 4,347.

Hyderabad.—There was no rain during the week. The spring harvest continues. The late rice is generally good and is being weeded. Lands are under preparation for autumn sowings. Fodder scarcity exists in 44 talukas and water scarcity in 39. The attendance on road works in the affected talukas amounted to 3,702 persons and at Ashti poor-house to 48 persons. The prices of jowar has risen one to three seers in ten taluks, and fallen half to four seers in eleven. Prices :—wheat 8½, coarse rice 7¼, and jowar 14 seers per rupee.

Mysore.—There was slight rain during the week in parts of the Mysore district. Prices are generally steady. The standing crops are indifferent in Tumkur but fair in other parts of the Province; prospects in Kolar depend on early rains and are not encouraging in Tumkur but are generally fair in other districts. Cattle are unhealthy in parts of Bangalore, Tumkur, Hassan and Kadur. Water and fodder are generally available except in parts of Tumkur, Mysore, Hassan, Shimoga, and Chitaldroog where the supply is running short.

Coorg.—Threshing of rice is completed. Prices of food grains are normal. Water and fodder are sufficient.

Madras.—There was light rain during the week in Ganjam and Tinnevely but none elsewhere. Irrigation supplies are insufficient except in Cuddapah, the Carnatic, North Arcot, South Canara, and Nilgiris. Ploughing, sowing, weeding, and transplanting are in progress in parts. The standing crops are generally fair, but some in parts of Coimbatore and Tinnevely require more rain and some in parts of Tanjore and Madura are withering. Harvests continue with outturn poor to normal and bumper. Pasture is insufficient except in Vizagapatam, the Carnatic, North Arcot, Tanjore, Malabar, and Nilgiris. Fodder is scanty in parts of Salem, Coimbatore, and Tanjore. The condition of cattle is generally good. The price of rice is stationary in fourteen districts; has fallen in seven; and has very slightly risen in two. The prices of millets have fluctuated as follows :—ragi is stationary in ten districts; has fallen in six; and has slightly risen in five. Cholam is stationary in three districts; has fallen in eight; and has slightly risen in three. Cumbu is stationary in five districts; has fallen in four; and has slightly risen in six.

J. WILSON,

Secretary to the Government of India.

GOVERNMENT OF INDIA.
HOME DEPARTMENT.

SANITARY. PLAGUE.

Calcutta; the 22nd March 1906.

The following statement of plague seizures and deaths reported in India during the week ending the 17th March 1906, is published for general information :—

The 29th March 1906.

No. 81.—The following is published for general information :—

Circular No. R. T. $\frac{262-A}{6}$.

RAILWAY BOARD.

Calcutta, the 12th March 1906.

Amendments in rule 14, Chapter III, Part II of the General Rules for working open lines of railway—Rules to regulate the packing and carriage by railway in India of certain compressed gases.

Read—

Section 47 of the Indian Railways Act, 1890 (IX of 1890).

Government of India, Public Works Department, Notification No. 118, dated the 21st March 1895, and the Government of India, Public Works Department, Circular No. 6 Railway, dated the 12th March 1895.

Government of India, Department of Commerce and Industry, Notification No. 801, dated the 24th March 1905.

Railway Board's Circular No. R. T. 173, dated the 30th August 1905.

Railway Board's letter No. R. T. $\frac{262}{4}$, dated the 8th September 1905.

RESOLUTION.—With their Circular No. R. T. 173, dated 30th August 1905, the Railway Board promulgated revised rules to regulate the packing and carriage by railway

in India of Liquefied Anhydrous Ammonia or Compressed Ammonia Gas as well as of certain other compressed gases, and in their letter No. R. T. ²⁶¹/₂, dated the 8th September 1905, they drew attention to the necessity for exercising greater care in accepting cylinders of compressed Carbonic Acid Gas for carriage by rail. They are now advised that consignors should be required, when tendering consignments, to hand in to the railway a certificate as to the packing and testing of the cylinders containing the compressed gases mentioned in the enclosure to the Railway Board's circular No. R. T. 173, dated 30th August 1905.

2. In exercise of the powers conferred by the notification of the Government of India in the Department of Commerce and Industry, No. 801, dated the 24th March 1905, read in the preamble above, the Railway Board sanction, under section 47, sub-section (4) of the Indian Railways Act, 1890 (IX of 1890), as in force in British India, or as locally applied, the adoption by the administrations of the railways concerned, whether in British India, in foreign territory or in Native States, to which the General Rules for working open lines of railway, promulgated with the Government of India, Public Works Department, circular No. 6 Railway, dated the 12th March 1895, apply, of the accompanying amendments in rule 14, Chapter III, Part II of the General Rules referred to, as amended by the Railway Board's circular No. R. T. 173, dated the 30th August 1905.

The Governments of Madras, Bombay and Burma,
Public Works Department, Railway Branch.

The Governments of Bengal, the United Provinces,
the Punjab, and Eastern Bengal and Assam,
Public Works Department.

The Government of Bengal, Marine Department.

The Honourable the Chief Commissioner of the
Central Provinces.

The Honourable the Resident at Hyderabad.

The Honourable the Resident in Mysore.

The Honourable the Agents to the Governor
General for Central India, Rajputana and Baluchistan.

The Honourable the Agent to the Governor
General and Chief Commissioner of the North-West
Frontier Province.

The Accountant General, Public Works Department.

The Consulting Engineers to the Government of
India for Railways, Calcutta and Lucknow.

The Managers, North-Western, Oudh and Rohilkhand
and Eastern Bengal (State) Railways.

ORDER—Ordered that this circular with its enclosure be published under a notification in Part I of the *Gazette of India* as required by section 47, sub-section (3) of the Indian Railways Act, 1890 (IX of 1890), and that a copy thereof be kept open for inspection at railway stations as directed by sub-section (6) of the same section; also that a copy of this circular and of its enclosure be communicated to the Governments, Administrations and Officers noted in margin, for information.

Document accompanying.

The amendments referred to.

[Enclosure to the Railway Board's circular No. R. T. ²⁶¹/₆ A., dated the 12th March 1906]

In rule 14, Chapter III, Part II, as amended by the Railway Board's circular No. R. T. 173, dated the 30th August 1905, add the following as condition No. 7 :—

7. No consignment of goods marked G in Rule 14 shall be accepted for carriage by rail unless the consignor has signed a certificate in the following form :—

FORM OF CERTIFICATE.

CERTIFIED that the cylinder or cylinders containing _____
tendered by ^{me}/_{us} as per Forwarding Order No. _____ of this date to
the _____ railway for despatch to _____ station ^{has}/_{have} been
packed and tested in accordance, and that the cylinder or cylinders ^{complies}/_{comply} in every respect,
with the rules promulgated under the Railway Board's circular No. R. T. 173, dated
the 30th August 1905, to regulate the packing and carriage by railway in India
of _____.

^I/_{we} also certify that the consignment complies with the conditions that the cylinder
or cylinders must be of wrought iron or mild steel of the best quality containing not more
than 0.25 per cent. of carbon, thoroughly annealed after manufacture, of sufficient strength
and efficiently tested.

Signature of ^{sender}/_{senders} _____

The 30th March 1906.

No. 83.—The following is published for general information:—

Circular No. R. T. $\frac{110}{5}$.

RAILWAY BOARD.

Calcutta, the 28th March 1906.

General Rules of 1895 for working open lines of railway in British India administered by the Government.

Amendment in Appendix B—Rules to regulate the transport and importation of explosives.

READ—

Section 47 of the Indian Railways Act, 1890 (IX of 1890).

Government of India, Public Works Department, Notification No. 118, dated the 21st March 1895, and Government of India Circular No. 6 Ry., dated the 12th March 1895.

READ ALSO—

Government of India, Home Department, Notification No. 5528 (Public), dated the 11th October 1901.

Government of India, Public Works Department, Notification No. 34, dated the 29th January 1902, and Government of India Circular No. 2 Ry., dated the 16th January 1902.

Government of India, Department of Commerce and Industry, Notification No. 801, dated the 24th March 1905.

Government of India, Department of Commerce and Industry, Notification No. 244—20, dated the 12th January 1906.

RESOLUTION.—In the notification by the Government of India in the Department of Commerce and Industry, No. 244—20, dated the 12th January 1906, read above, it was directed that a sub-rule be added to rule 5 of the rules to regulate the transport and importation of explosives under the Indian Explosives Act, 1884 (IV of 1884), which were published in the notification of the Government of India in the Home Department No. 5528 (Public), dated the 11th October 1901, read above.

2. In exercise of the powers conferred by the notification of the Government of India in the Department of Commerce and Industry, No. 801, dated the 24th March 1905, the Railway Board sanction, under section 47, sub-section (4), of the Indian Railways Act, 1890 (IX of 1890), as in force in British India, or as locally applied, the adoption by the administrations of the railways concerned, whether in British India, in foreign territory, or in Native States, to which the General Rules for working open lines of railway, promulgated with the Government of India, Public Works Department, Circular No. 6 Railway, dated the 12th March 1895, as revised by the Government of India, Public Works Department, Circular No. 2 Railway, dated the 16th January 1902, apply, of the accompanying amendment in Appendix B to the General Rules referred to.

3. The Railway Board also desire that the attention of all railway administrations may be drawn to the necessity for posting, at each bridge where the prohibition applies, and where the road traffic is under their control, a notice stating the substance of the rule.

ORDER.—Ordered that this circular, with its enclosure, be published under a notification in Part I of the *Gazette of India* as required by section 47,

The Governments of Madras, Bombay and Burma, Public Works Department, Railway Branch.

The Governments of Bengal, the United Provinces, and Eastern Bengal and Assam, Public Works Department.

The Government of Bengal, Marine Department.

The Honourable the Resident at Hyderabad.

The Honourable the Agent to the Governor General for Rajputana.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 21st March 1906.

From the 7th April next till further notice, Parts I, IV, V, and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 31st March all Notifications and other matter intended for publication in those Parts should be addressed to the Officiating Publisher at Simla.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's Gazette, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's Gazette. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next Gazette."

J. P. HEWETT,
Secretary to the Government of India.

GOVERNMENT OF INDIA. DEPARTMENT OF COMMERCE AND INDUSTRY.

INVENTIONS and DESIGNS.

Calcutta, the 29th March 1906.

NOTIFICATIONS.

No. 1362 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 24th March 1906 :—

- No. 153 of 1906.—Horace Bransby Bryant, District Forest Officer, Madura, South India. *A camp oven.*
- No. 154 of 1906.—Victor Watson Riley and Herbert William Rowing, engineers, of 7 St. George Street E., in the county of London, England. *Improvements in and connected with electric arc lamps.*
- No. 155 of 1906.—Louis Nissim, mechanic, of Mayfield, Rochford Avenue, Westcliff-on-Sea, in the county of Essex, England. *Improvements in or relating to lamps, stoves and like apparatus for burning liquid fuel.*
- No. 156 of 1906.—Gulam Hyder, gunmaker, electrician and mechanic, Managing-Proprietor of the Indian Invention Co., having his place of business at 387 Bhendi Bazar, Bombay. *Self-acting orifice cleaning needle for petroleum vapour lamp or stove.*
- No. 157 of 1906.—Robert Cochran Dickson, engineer, of Colombo, Ceylon. *Improvements in apparatus suitable for polishing tea and for other purposes.*
- No. 158 of 1906.—The Globe Rotary Engine Co., Iowa corporation, Marion, county of Lime, state of Iowa, United States of America. *Improvements in rotary engines.*
- No. 159 of 1906.—Dr. Hans Kuzel, gentleman, of Villa Sirius, Baden near Vienna, empire of Austria. *Improvements relating to the manufacture of light emitting bodies for electric incandescent lamps.*
- No. 160 of 1906.—Dr. Hans Kuzel, gentleman, of Villa Sirius, Baden near Vienna, empire of Austria. *Improvements in the process of making a metallic connection between the light emitting bodies and the supply conductors of electric glow lamps.*
- No. 161 of 1906.—Dr. Hans Kuzel, gentleman, of Villa Sirius, Baden near Vienna, empire of Austria. *Improvements in the process of manufacturing light emitting bodies for electric glow lamps and of connecting them with the supply conductors.*
- No. 162 of 1906.—Dr. Hans Kuzel, gentleman, of Villa Sirius, Baden near Vienna, empire of Austria. *Improvements in the process of electrically connecting the filaments of electric glow lamps with their supply wires.*
- No. 163 of 1906.—Thomas Leopold Willson, electrical engineer, of 188 Metcalf street, in the city of Ottawa, county of Carleton, province of Ontario, Dominion of Canada. *An improved striking means for bell buoys.*
- No. 164 of 1906.—Charles Matthews Manly, mechanical engineer, a citizen of the United States, and residing at 449 Twelfth street, Brooklyn, New York, United States of America. *Variable speed gear.*
- No. 165 of 1906.—Edward Deslandes Bowman, planter, of Baddegama, Ceylon. *Procuring latex from India rubber or other trees.*
- No. 166 of 1906.—Samuel Telford Dutton, signal engineer, East Indian Railway, Calcutta. *An improved method of controlling the operation of points and signals on railways.*

- No. 167 of 1906.—Thomas Gibson Rice, general manager, Bengal Silk Company, of Surda, Rajshahi, Lower Bengal, British India. *An improved apparatus for fumigating or destroying vermin and the like.*
- No. 168 of 1906.—Shapoorji Burjorji Fraser, merchant and agent, Fraser Ice Factory, Ballard Pier, Fort, Bombay. *Improvements in the smoke burning apparatus of steam boiler furnaces.*
- No. 169 of 1906.—Arthur Burdon Campbell Rogers, civil engineer, of Agra, United Provinces of Agra and Oudh. *An improved covering of pure mica powder and method of applying pure mica powder as a covering for heat or cold.*
- No. 170 of 1906.—Joseph Gouldie, gentleman, of The Gill, Brayton, in the county of Cumberland, England. *Improvements in brakes for railway trucks and other vehicles.*
- No. 171 of 1906.—William Baker Hartridge, engineer, of Granille House, Arundel street, London, England. *Improvements in or relating to elastic cushion or the like tyres for the wheels or rims of road vehicles.*
- No. 172 of 1906.—William Henry Nosworthy, engineer, of 1 Herbert Terrace, Ramsgate, in the county of Kent, England, and Samuel James Prescott, pawnbroker and jeweller, of 45 Church street, Camberwell, London. *Improvements in bottles and the like vessels and stoppers therefor.*

No. 1363 P.—THE undermentioned design has been registered, under the provisions of the Inventions and Designs Act, 1888, in the office of the Secretary appointed under that Act and copies have been sent to the Governments of Madras, Bombay and Burma. This and other designs are open to public inspection, from 11 A.M. to 3 P.M., at the Secretary's office, 2 Bankshall street, Calcutta, on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

- No. 4 D of 1906.—Hira Lal Ghosh and Bhurdhon, jeweller, 95/1/A Panchanontola road, Howrah. *A locket medal, etc., with picture of priest and words on opposite sides.*

No. 1364 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, United Provinces of Agra and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 3 P.M., at the Secretary's office, 2 Bankshall street, Calcutta, on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

- No. 384 of 1905.—Joseph Perrin, manufacturer, of Paris, France. *Improvements in and relating to drawing apparatus for textile fibres.* (Specification filed 21 March 1906.)
- No. 387 of 1905.—Govind Karsan Ramji, potter, of Kalian, Thana District, in the Bombay Presidency. *An improved method of working kilns for burning bricks.* (Specification filed 17 February 1906.)
- No. 470 of 1905.—Arthur John Hubbard, Doctor of Medicine, of 5 Raven-bourne Gardens, West Ealing, in the county of Middlesex, England, George Hubbard, architect, of 85 Gresham street, in the county of London, England, and Alfred William Stephens Cross, architect, of 46 New Bond street, in the county of London, England. *Improvements in reservoirs for collecting dew.* (Specification filed 21 March 1906.)
- No. 530 of 1905.—Adrien Gacon, chemist, of Montval par Marly le Roi (Seine & Oise) in the republic of France. *Improvements in and relating to the manufacture of artificial emery.* (Specification filed 21 March 1906.)
- No. 582 of 1905.—George Dubern, engineer, residing at No. 7 Convent road, in the town of Calcutta. *An improved duplex lighting microscope.* (Specification filed 15 March 1906.)
- No. 585 of 1905.—Marine Construction Company, of San Francisco, California, United States of America. *Improvements in apparatus for cleaning surfaces, such as those of structural metal by the abrasive action of sand or like material.* (Specification filed 21 March 1906.)

No. 65 of 1906.—Eugenio Boggiano, barrister, of 50 Via Monte della Farina, Rome, in the kingdom of Italy. *Improvements in automatic vote recording machines.* (Specification filed 19 March 1906.)

No. 1365 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

- No. 283 of 1892.—Carl Olof Lundholm and Joseph Sayers. *Improvements in the manufacture of explosives.* (From 21 April 1906 to 21 April 1907.)
- No. 311 of 1892.—William Richard Sumption Jones. *Improvements in central buffers for railway and other vehicles.* (From 20 April 1906 to 20 April 1907.)
- No. 71 of 1894.—Peter Black. *Improvements in apparatus for moving and locking railway points and safety bars.* (From 7 May 1906 to 7 May 1907.)
- No. 24 of 1895.—Francis Harley Davis. *Improvements in core boring apparatus and in the mode of gripping and raising cores therewith.* (From 3 April 1906 to 3 April 1907.)
- No. 87 of 1895.—James Leyster Courtice and John Wood. *Improvements in piano-fortes.* (From 2 April 1906 to 2 April 1907.)
- No. 125 of 1895.—The Deutsche Metallpatronenfabrik. *Apparatus or machinery for closing and securing metal tubes.* (From 22 August 1906 to 22 August 1907.)
- No. 126 of 1895.—The Deutsche Metallpatronenfabrik. *Method of and apparatus for filling tubes with viscid or semi-fluid material.* (From 22 August 1906 to 22 August 1907.)
- No. 361 of 1895.—Samuel Cleland Davidson. *Improvements in tea leaf rolling machines.* (From 30 April 1906 to 30 April 1907.)
- No. 419 of 1897.—Aerators, Limited. *Improved closing device for capsules designed to contain gas or other fluid under high pressure.* (From 4 April 1906 to 4 April 1907.)
- No. 395 of 1898.—Sidney Prescott Wood. *Improvements in means for locking railway points and signals.* (From 24 April 1906 to 24 April 1907.)
- No. 454 of 1898.—William Griffiths and William John Griffiths. *Improvements in or relating to facing point lock and signalling apparatus for railways.* (From 24 April 1906 to 24 April 1907.)
- No. 476 of 1898.—Samuel Cleland Davidson. *Improvements in centrifugal fans and pumps.* (From 11 April 1906 to 11 April 1907.)
- No. 56 of 1899.—Reginald Be'field. *Improvements in controllers for electric motors.* (From 14 April 1906 to 14 April 1907.)
- No. 409 of 1899.—William Albert McAdams. *Improvements in aluminium alloys and the method of casting them.* (From 16 June 1906 to 16 June 1907.)
- No. 334 of 1900.—The British Westinghouse Electric and Manufacturing Company, Limited. *Improvements in controllers for electric motors.* (From 23 April 1906 to 23 April 1907.)
- No. 454 of 1900.—John Hodgart. *Opening, cleaning and preparing cotton before pressing it into bales for export entitled Hodgart's Patent Cotton Preparing Machine.* (From 18 March 1906 to 18 March 1907.)
- No. 128 of 1901.—Bernard Coventry. *Improvements in the manufacture of indigo.* (From 14 April 1906 to 14 April 1907.)
- No. 453 of 1901.—Isaac Shone and Edwin Ault. *Improvements in the mode of and means for ventilating and flushing house drains and other drains and sewers.* (From 17 June 1906 to 17 June 1907.)
- No. 66 of 1902.—Henry Braithwaite Ashton. *Improvements relating to spinning frames.* (From 8 April 1906 to 8 April 1907.)

No. 1366 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive

privilege of making, selling, and using the said inventions in British India, and of authorising others so to do, has ceased:—

- No. 1 of 1901.—William Spencer. *Improvements in kilns for burning or calcining limestone or like substances.* (Specification filed 19 December 1901.)
- No. 202 of 1901.—Casimir Wurster. *An improved pulping and kneading machine* (Specification filed 19 December 1901.)
- No. 221 of 1901.—Franklin George Benson. *Improvements in sprayers for perfume, antiseptics and the like.* (Specification filed 19 December 1901.)
- No. 244 of 1901.—John Storer. *Improvements in or connected with cans or receptacles for kerosene and some other oils and liquids.* (Specification filed 19 December 1901.)
- No. 332 of 1901.—Herbert Samuel Reading, Percy Archibald Reading and Owen Elcome Reading. *Improvements in pianofortes.* (Specification filed 21 December 1901.)
- No. 340 of 1901.—Michel Lion and Thomas Cowburn. *Improvements in the manufacture of boots and shoes and fastenings and apparatus therefor.* (Specification filed 21 December 1901.)
- No. 426 of 1901.—Johannes Christiaan Wegerif. *Improvements in roller mills for crushing and grinding.* (Specification filed 21 December 1901.)

Fee in respect of the continuance of an exclusive privilege—

- 4 (a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of Rs 50 for each of the above inventions.

- No. 362 of 1899.—Thomas Macalpine. *Process and means for refining mineral and petroleum oils.* (Specification filed 21 December 1899.)

Fee in respect of the continuance of an exclusive privilege—

- 4 (c) After the expiration of the fifth year and before the expiration of the sixth year from the date of the filing of the specification—

The sum of Rs 50 for the above invention.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not “designs” within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable at Calcutta to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. A consolidated index for the year 1905, entitled “Inventions and Designs in 1905,” is also on sale, price one rupee. It contains a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in that year, together with lists of designs applications.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or, if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo. volumes, paper cover, 13 annas or 1s. 1d. Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,

Secretary under the Inventions
and Designs Act, V of 1888.

PURE SULPHATE OF QUININE AND SULPHATE OF CINCHONIDINE

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April 1905 the price of these articles will be as follows:—

Quinine 1-pound tin, R16, or post-free, R16-8			
$\frac{1}{2}$	"	R8	" R 8-6
$\frac{1}{4}$	"	R4	" R 4-6
Cinchonidine 1	"	R12	" R12-8
$\frac{1}{2}$	"	R6	" R 6-6
$\frac{1}{4}$	"	R3	" R 3-6

Analysis shows these articles to be of the purest manufacture; and they are guaranteed to be free from wilful admixture with the inferior alkaloids. They are for sale only to Government officers and only for cash, and may be had from the Superintendent, Botanic Garden, Sibpur, near Calcutta. Cinchonidine can also be purchased by dealers at the following rates:—

1lb tin, R16 or post-free R16-8	
$\frac{1}{2}$ lb " R8	" R 8-6
$\frac{1}{4}$ lb " R4	" R 4-4

THOMASON CIVIL ENGINEERING COLLEGE, ROORKEE.

NOTIFICATION.

Roorkee, the 4th December 1901.

A Registry Office for men of the undermentioned grades is kept up by the Principal, Thomason College, Roorkee. Officers and employers of labour requiring men are requested to apply to the Principal:—

1. Engineers.
2. Overseers.
3. Sub-Overseers.
4. Draftsmen.

5. Press workers.
6. Photo-Mechanical workers.
7. Mechanical apprentices.
8. Metal and wood carvers.

E. ATKINSON, Major, R.E.,

Principal, Thomason College.

**HON'BLE THE AGENT TO THE GOVERNOR GENERAL AND CHIEF
COMMISSIONER, NORTH-WEST FRONTIER PROVINCE.**

NOTIFICATIONS.

Peshawar, the 19th March 1906.

No. 55.—The following additions and amendments which it is proposed to make to the rules framed in exercise of the powers conferred by section 9 of the Indian Petroleum Act, 1899 (VIII of 1899), and published with North-West Frontier Province Administration Notification No. 198, dated the 8th December 1904, are published for the information of all persons likely to be affected thereby. Notice is hereby given that the said additions and amendments will be taken into consideration on or after the 27th April 1906.

2. Any objection or suggestion which may be received from any person with respect to the said additions or amendments before the date aforesaid will receive consideration —

(1) After Rule 2 the following rule shall be inserted, namely :—

2a. Notwithstanding anything in Rules 2 and 4, licenses for the possession of dangerous petroleum otherwise than in bulk may be granted subject to the following conditions :—

(a) That it is stored in gas-tight tin or galvanized sheet iron, steel or lead plate drums or receptacles containing each not more than 10 gallons and fitted with well-made filling holes and well-fitting screw plugs or fitted with screw cap with metal air-tight undercap and that such drums or receptacles shall be packed in strong wooden cases, the thickness of the wood to be not less than half an inch. Provided that wooden cases shall not be necessary when the drums or receptacles are made of tin, galvanized sheet iron, or steel, and have the following thickness of metal :—

	Not less than
(1) When the capacity does not exceed 2 gallons	25 B. W. G.
(2) When the capacity exceeds 2 gallons, but does not exceed 4 gallons	22 B. W. G.
(3) When the capacity exceeds 4 gallons	16 B. W. G.

(b) That an air space of at least one-tenth of its capacity shall be left in each drum or receptacle.

(c) That the drums or receptacles shall be so substantially constructed and secured as not to be liable except under circumstances of gross negligence or extraordinary accident to be broken or become defective, leaky or insecure.

(d) That before any vessel containing, or which has contained, dangerous petroleum is repaired by the licensee, or is sent by him to be repaired, that vessel shall, as far as practicable, be cleared of all dangerous petroleum and of all dangerous vapours arising from the same.

(e) That the building in which petroleum is to be stored shall be constructed of masonry or other unflammable material with terraced, tiled or iron roof and a tiled, paved or earthen floor.

(f) That the doorways and other openings of such buildings shall be built up to such a height above the level of the road or street or the floor shall be sunk to such a depth below the level of the road or street, that the petroleum stored in it cannot flow out of the building in the case of its escape from the receptacles in which it is contained, or the building itself shall be surrounded with a masonry wall or embankment sufficiently high to contain all the petroleum in the building in case of its escape therefrom, or a combination of these methods may be adopted.

(g) That all ventilating openings in the building shall be protected by strong wire gauze.

(h) That no smoking or light or fire of any description shall be permitted at any time within or near any building licensed under this rule.

(i) That all due precaution shall be taken for the prevention of accidents by fire or explosion and for the prevention of unauthorised persons having access to any dangerous petroleum or to any vessels containing or intended to contain or having actually contained the same.

(j) That every person managing or employed on or in connection with any such licensed place of storage shall abstain from any act whatever which tends to cause fire or explosion and which is not reasonably necessary and shall prevent any other person from doing such act.

(k) That the store-house shall be liable to inspection by the officers authorized on this behalf, under Rule 6 (1).

- (d) That no drum or other receptacle containing dangerous petroleum shall be opened or the petroleum drawn off within the room in which the stock of petroleum is kept.
- (m) That the filling or replenishing of any vessels with dangerous petroleum shall not be carried on, nor shall the contents of any such vessel be exposed in the presence of fire or artificial light except a light of such strength, position and character as is not liable to ignite any inflammable vapour arising from the dangerous petroleum, and that no artificial light shall be brought within dangerous proximity of the place where any vessel containing dangerous petroleum is kept.
- (n) That the following distances are kept clear from the protected works round the place of storage :—

Quantity to be stored.	Distances to be kept clear when dangerous petroleum is stored in drums of not greater capacity than 4 gallons.		Distances to be kept clear when dangerous petroleum is stored in drums of capacity exceeding 4 gallons, but not exceeding 10 gallons.	
Gallons.	Feet.		Feet.	
Not exceeding 1,000	25		30	
From 1,000 to 5,000	40		50	
Do. 5,000 to 10,000	60		70	
Do. 10,000 to 15,000	90		100	
Do. 15,000 to 20,000	130		150	
Do. 20,000 to 30,000	180		200	
Do. 30,000 and over	200		200	

- (o) Provided that when the quantity to be possessed does not exceed 40 gallons the provisions of sub-rules (e), (f) and (n) shall not apply, but the licensee shall observe the following conditions :—
- (i) That the store-house or building in which the dangerous petroleum is stored shall be well ventilated and constructed of un inflammable material, provided however that the doors and windows may be of wood.
- (ii) That the store-house shall have a separate entrance from the open air distinct from any building or dwelling in which persons assemble and that where such store-house forms part of or is attached to another building and when the intervening floor or partition is of an unsubstantial or inflammable character or has openings therein, the whole of such building shall be deemed to be the store-house and no portion of such store-house shall be used as a dwelling-house or as a place where persons assemble.
- (2) In rule 3 for the words "Rule 2" the words "Rules 2 and 2a" shall be substituted.
- (3) In rule 6(1) before the words "the District Magistrate" the words "the Chief Inspector of Explosives, the Inspector of Explosives" shall be inserted.
- (4) (a) In Rule 8 for the scale of fees payable for licenses for the possession of dangerous petroleum the following shall be substituted, namely :—

	R
Where the quantity to be kept does not exceed 40 gallons.	3
Where the quantity to be kept exceeds 40, but does not exceed 500 gallons.	8
Where the quantity to be kept exceeds 500, but does not exceed 1,000 gallons.	12
Where the quantity to be kept exceeds 1,000, but does not exceed 5,000 gallons.	12 plus Rs 2 extra for every 1,000 gallons or part thereof in excess of 1,000 gallons.
Where the quantity to be kept exceeds 5,000, but does not exceed 50,000 gallons.	20 plus Rs 4 extra for every 1,000 gallons or fraction thereof in excess of 5,000 gallons.
Where the quantity to be kept exceeds 50,000 gallons.	250

- (b) In the scale of fees payable for licenses for the possession of petroleum other than dangerous petroleum for the last item shall be substituted :—

	R
Where the quantity to be kept exceeds 50,000 gallons.	250

- (5) For Rule 9(1) the following rule shall be substituted, namely :—
- (9) (1) Dangerous petroleum shall not be transported in bulk and it shall not be carried in receptacles other than of the following description, namely, in gas-tight tin or galvanized

sheet iron, steel or lead plate drums or receptacles containing each not more than 10 gallons and fitted with well-made filling holes and well-fitting screw plugs or fitted with screw cap with metal air-tight undercap. Such drums or receptacles shall be packed in strong wooden cases, the thickness of the wood to be not less than half an inch. Provided, that wooden cases shall not be necessary when the drums or receptacles are made of tin, galvanized sheet iron, or steel, and have the following thickness of metal:—

	Not less than
(1) When the capacity does not exceed 2 gallons	25 B. W. G.
(2) When the capacity exceeds 2 gallons, but does not exceed 4 gallons	22 B. W. G.
(3) When the capacity exceeds 4 gallons	16 B. W. G.

An air space of at least one-tenth of its capacity must be left in each drum or receptacle.

The drums or receptacles shall be so substantially constructed and secured as not to be liable except under circumstances of gross negligence or extraordinary accident to be broken or become defective, leaky or insecure. Licenses for the transport of dangerous petroleum shall be special or general.

(6) In Rule 10 for the words "other than," in the first sentence, the word "including" shall be substituted.

(7) In Rule 11 (1) (f) after the word "petroleum" where it first occurs the words "other than dangerous petroleum and" shall be inserted.

(8) After Rule 11 (1) (f) the following rule shall be inserted:—

"(g) When the pass is granted for the transport of dangerous petroleum, the petroleum must be contained in receptacles of the description detailed in Rule 9 (1) and packed in the manner therein described."

(9) In Rule 16 before the words "The District Magistrate," the words "The Chief Inspector of Explosives, the Inspector of Explosives" shall be inserted.

(10) For Rule 17 the following rule shall be substituted, namely:—

17. The following fees shall be charged for licenses for the transport of petroleum, namely:—

Licenses for the transport of dangerous petroleum.

	R
Where the quantity to be transported does not exceed 40 gallons.	2
Where the quantity to be transported exceeds 40, but does not exceed 480, gallons.	2 for the first 40 gallons plus 8 annas for every additional 40 gallons or part thereof.
Where the quantity to be transported exceeds 480 gallons.	8 plus R 2 for every additional 480 gallons or part thereof.
General license for the transport of dangerous petroleum.	100

Special licenses for the transport of other petroleum.

Where the quantity to be transported exceeds 500 gallons, but does not exceed 5,000 gallons	1
For every additional 5,000 gallons or part of 5,000 gallons	1
General license for the transport of petroleum other than dangerous petroleum	100

(11) In Rule 21 for the word "two" the word "four" shall be substituted.

(12) After Rule the following rule shall be inserted, namely:—

"24A. Holders of special licenses in Form H may be granted also on payment of a fee of R 5, general licenses in Form I, to transport petrol otherwise than on a motor vehicle. Such licenses, which will be granted under the signature of the Assistant Secretary to the Chief Commissioner, North-West Frontier Province, shall have currency for a period of one year from the date of their issue; and shall, subject to the rules and conditions thereon endorsed, authorize the holders to transport petrol by road, by rail, or by water, up to a maximum of 60 gallons on each occasion."

(13) In Rule 25 for the words "and 23" the words "23 and 24-A" shall be substituted.

(14) After Form H the following forms shall be inserted:—

Form I.

General license to transport petrol granted to the holder of a special license (in Form H) No.

HIGH COURT, ORIGINAL SIDE.

It is ordered that Rule 36 of the Rules of Practice of the Court of Small Causes of Calcutta be amended by adding thereto the following words: "unless in the opinion of the Court or the Registrar an identifier is not required" and that the said Rule as amended do take effect from the 16th day of April 1906.

It is ordered that Schedule A referred to in Rule 107 of the Rules of Practice of the Court of Small Causes, Calcutta, be amended by directing that the words "Provided that on the application of the plaintiff the summons may be addressed to the defendant at the place where he is residing and forwarded to him by post duly registered if the Court or the Registrar be satisfied, on such evidence as the said Court or Registrar may consider sufficient, that the name, description and place of residence of the defendant are fully and accurately stated in the plaint" be added at the end of section 85 and that the amendment aforesaid do take effect from the 16th day of April 1906.

The Schedule as amended will be as follows :—

Chapters and Sections extended.	Modification, if any.
Sections 83 and 84 Section 85.	The words "provided that on the application of the plaintiff the summons may be addressed to the defendant at the place where he is residing and forwarded to him by post duly registered if the Court or the Registrar be satisfied, on such evidence as the said Court or Registrar may consider sufficient, that the name, description and place of residence of the defendant are fully and accurately stated in the plaint" being added at the end of the section.
Sections 86, 87, 88, 89, 90, 91 and 92.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA,
ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS,
UNDER THE PROVISIONS OF THE INDIAN COUNCILS ACTS,
1861 AND 1892 (24 & 25 VICT., CAP. 67,
AND 55 & 56 VICT., CAP. 14).

The Council met at Government House, Calcutta, on Wednesday, the 28th
March, 1906.

PRESENT :

His Excellency the Earl of Minto, P.C., G.C.M.G., G.M.S.I., G.M.I.E., Viceroy
and Governor General of India, *presiding*.
His Honour Sir A. H. L. Fraser, K.C.S.I., Lieutenant-Governor of Bengal.
His Excellency General Viscount Kitchener of Khartoum, G.C.B., O.M.,
G.C.M.G., Commander-in-Chief in India.
The Hon'ble Sir A. T. Arundel, K.C.S.I.
The Hon'ble Sir Denzil Ibbetson, K.C.S.I.
The Hon'ble Mr. H. Erle Richards, K.C.
The Hon'ble Mr. J. P. Hewett, C.S.I., C.I.E.
The Hon'ble Mr. E. N. Baker, C.S.I.
The Hon'ble Major-General C. H. Scott, C.B., R.A.
The Hon'ble Sir Rameshwara Singh, K.C.I.E., Maharaja Bahadur of Dar-
bhanga.
The Hon'ble Rai Sri Ram Bahadur, C.I.E.
The Hon'ble Mr. L. A. S. Porter.
The Hon'ble Mr. L. Hare, C.S.I., C.I.E.
The Hon'ble Mr. H. A. Sim, C.I.E.
The Hon'ble Nawab Fateh Ali Khan, Kazilbash, C.I.E.
The Hon'ble Mr. Gopal Krishna Gokhale, C.I.E.
The Hon'ble Mr. A. A. Apcar, C.S.I.
The Hon'ble Mr. S. Ismay, C.S.I.
The Hon'ble Mr. W. T. Hall, C.S.I.
The Hon'ble Mr. A. C. Logan.
The Hon'ble Nawab Bahadur Khwaja Salimulla of Dacca, C.S.I.
The Hon'ble Nawab Saiyid Muhammad Sahib Bahadur.

[*Mr. Gokhale; Mr. Baker.*]

QUESTIONS AND ANSWERS.

The Hon'ble MR. GOKHALE asked :—

" Will Government be pleased to state what expenditure has up to date been incurred in establishing new head-quarters at Dacca for the Government of Eastern Bengal and Assam ? "

The Hon'ble MR. BAKER replied :—

" It is understood that the question relates only to the expenditure incurred on buildings.

" The expenditure that will be incurred up to the end of the current month on establishing head-quarters at Dacca for the Government of the new Province is estimated at Rs. 1,77 000."

The Hon'ble MR. GOKHALE asked :—

" Have Government noticed the report of an alleged occurrence in Jullundur Cantonment, which has been published by the *Tribune* of Lahore in its issue of 16th instant under the heading ' A case of unmitigated zulum. Major Cowie surpasses himself ' ?

" Is it true that Lala Sheokarn Das is a wealthy banker and house-proprietor in Jullundur Cantonment, who rendered valuable services during the Sepoy Mutiny of 1857 to the British Government and the European community which took refuge in Jullundur barracks ?

" Is it true that for some time past the relations between Lala Sheokarn Das and Major Cowie, Cantonment Magistrate, have been of an unfriendly character ?

" Is it true that on the 4th instant, a grandson of Lala Sheokarn Das—a boy of 11 years—had an attack of fever, and that on 6th March, about noon, Major Burnside, the Sanitary Officer, declared the case to be one of small-pox ; that the banker thereupon declared his readiness to arrange for the case being specially treated in the house itself and to take all reasonable precautions against the spread of the disease ; that in spite of this assurance, a notice under section 203 of the Cantonment Code was served on him in the course of the day, asking him to remove the boy at once to the infectious disease huts ; that on receipt of the notice, Lala Sheokarn Das requested that he should be allowed at least 24 hours, as required by the Code, to arrange for the boy's removal, and that at the same time he submitted a written application through the Station Staff Officer to the Officer Commanding that as his house was well-built, clean and well-ventilated, he should be permitted to make special arrangements in the house itself for the treatment of the boy ; that he also personally represented to Major Stewart, the Station Staff Officer, his fears that Major Cowie, whom he regarded as his enemy, might send the police to his house at night and forcibly remove the boy, unless the permission applied for was granted to him at once ; that Major Stewart assured him that orders would be passed on the application the next day, and that nothing would take place in the meanwhile ; that in spite of all this, Mr. Schofield, the Police Inspector, accompanied by a Police Sergeant and the Bazar Chaudhri, went to the banker's house at about 9 P.M. to remove the boy from the house by force, and that, on his being asked to produce his authority, the Inspector went to Major Cowie's bungalow and returned at 11 P.M., armed with the necessary authority ; that meanwhile, fearing that the boy would be taken away by the police by force, Lala Sheokarn Das removed him himself to the house of a relative in Jullundur City ; that the Inspector, finding that the boy had been removed before his return, went back to Major Cowie in Lala Sheokarn's own

[Mr. Gokhale; Commander-in-Chief; Sir Arundel Arundel.] •

carriage to report what had taken place; that on 8th March, Lala Shokarn Das received the order of the Officer Commanding on his application, permitting him to have the boy treated in his own house; that thereupon he brought back the boy to his house from the city, and that the boy died on the morning of 10th March.

"Is it true that the Government of India in the Military Department, in their letter No. 3554, dated 24th July, 1895, have laid down as follows:— 'It is not intended that these powers (about removal) should be exercised in respect of well-to-do and respectable persons, who can and do arrange for being attended, when suffering from these diseases (malaria, small-pox, diphtheria and typhoid fever) at their own houses and when all reasonable precautions to prevent the spread of the disease are taken by those who are responsible for looking after them'; and that these orders have been communicated to Cantonment authorities by the Quarter-Master General of India in a Circular, No. 16, dated 11th September, 1895?"

"Is it true that last year Major Cowie himself issued printed rules, freely permitting plague patients to be treated in their own houses?"

"If the facts are as stated above, will Government be pleased to state what notice they propose to take of Major Cowie's conduct in the matter. Will they also be pleased to issue orders which will make a repetition of such proceedings impossible?"

His Excellency THE COMMANDER-IN-CHIEF replied:—

"Owing to the absence on tour of the General Officer Commanding the Jullundur District, details have not been received. The case is being investigated by the Local Government."

The Hon'ble MR. GOKHALE asked:—

"With reference to my question of last week about the *Weekly Chronicle* of Sylhet, are Government aware that the paper had alleged that the Mehtar woman had complained to the Chairman of the Municipality that she had been assaulted by a Gurkha? Was the statement of the Chairman taken? If so, why was it not included among the papers laid on the table last week? If it was not taken, why was it not taken? What opportunity was given to the Editor to prove his statement, and how did the Government satisfy itself that the woman had not changed her version? Is it to be understood that Government claim the power to punish a newspaper on the strength of a mere police report, without a regular trial and without even giving the Editor an opportunity to show that his version of an occurrence is based on facts? On what grounds does the Government of Eastern Bengal and Assam describe the supply of official publications and advertisements to a newspaper as 'Government support' of that paper?"

The Hon'ble SIR ARUNDEL ARUNDEL replied:—

"In answer to the series of questions put by the Hon'ble Member I have to say that the attention of Government has been called to the fact that the *Weekly Chronicle* of Sylhet alleged that the Mehtar woman made a statement to the Chairman of the Municipality to the effect that she had been assaulted by a Gurkha.

"The Government are not aware whether the statement of the Chairman was taken. The depositions of the woman and her husband laid on the table of this Council last week declare that the assault alleged never took place.

"The Government are not aware whether any formal opportunity was given to the Editor to prove his allegation, but it is obvious that he had every opportunity of publishing the evidence on which he relied. The papers laid on the

[*Sir Arundel Arundel; Nawab Saiyid Muhammad.*]

table show that the woman declared that she never made the complaint of attempted rape as alleged.

"The Government have already stated their views as to the action taken by the Local Government and they have nothing further to add. They are concerned only with the particular case.

"The Government are not acquainted with the groups upon which the Lieutenant-Governor made use of the expression 'Government support', but they see no reason to take exception to it."

DISCUSSION OF THE FINANCIAL STATEMENT FOR 1906-07.

The Hon'ble NAWAB SAIYID MUHAMMAD SAHIB BAHADUR said:—"My Lord, I beg to congratulate the Hon'ble the Finance Member and Your Lordship's Government on the Financial Statement that has been presented to this Council. It is now some years that the element of uncertainty, due mainly to the fluctuations of exchange, has been gradually eliminated from the Budget estimates, and in spite of cautious and partial surrender of revenue from taxation, it has been found possible to provide for a surplus year after year. I notice with pleasure the success that has attended the endeavour to attain a higher standard of accuracy in estimating revenue and expenditure. Thus the final accounts of 1904-1905 agree closely with the estimates at the beginning of the year. The same remark applies to the year which is now drawing to a close, though the conditions in some important provinces were less favourable than were anticipated. It is recognised on all hands that so long as exchange is in stable equilibrium, other causes, however regrettable or unexpected, cannot have a permanently disturbing effect on the Financial administration, and it is this important factor that has enabled the Government to deal more firmly with the problem of taxation than was found feasible in former years. The first word of acknowledgment in this connection is due to the salt tax. When the first reduction of 8 annas on the maund was made the effect was not very noticeable, as the boon did not reach to the poorest consumer. But the further reduction of another 8 annas on the maund has had a decisive effect upon consumption, as the Hon'ble Finance Member points out in paragraph 14 of his statement. Salt is not an article that can be wasted or abused, and the remarkable advance that has taken place in the consumption conclusively proves that the old rate of taxation pressed heavily upon the people, who had to go without the quantity of salt necessary for all their requirements. Even cattle are being given more salt, and the reduction of taxation has had the most beneficial effect, and I venture to think that this great boon which has given a powerful stimulus to the consumption of salt will have ultimately a wholesome effect on the health of the population.

"My Lord, the proposed application of the surplus is such as will commend itself to all right-thinking people. After reducing the salt tax and raising the taxable minimum of income it is in the fitness of things that the claims of the agricultural tax-payer to relief should be considered. I hope the time will come when the Government will be in a position to announce a reduction in the land-revenue demand itself, but in the meantime I gratefully welcome the beginning that has been made in abolishing a number of local cesses which pressed very heavily on the agricultural population. I recognise with special gratitude that the largest surrender of revenue occurs in the Presidency which I have the honour to represent, and that the Ryotwari Village Service Cess in the Madras Presidency has been abolished. At the same time I regret that it has not been found possible to abolish the cess levied in Madras on proprietary or permanently-settled estates. The Hon'ble the Finance Member states that this could not be done because of 'certain practical difficulties that have arisen by reason of the establishments employed in the "Proprietary" tracts of Madras being in a transitional state.' Consequently, the difficulty is not of a permanent nature, and since it is admitted to be a real

[*Nawab Saiyid Muhammad; Nawab Khwaja Salimulla of Dacca.*]

cess I submit that it may be abolished, on principle, as early as it is found practicable. I am glad the practice of making certain petty appropriations from the funds of District and Local Boards for Provincial purposes is to be abolished, since no criticism of the existing system can be severer than that employed by the Hon'ble the Finance Member himself, who characterises it as 'a blot on our administration of Local Funds.'

"Among the proposed irrigation works I note the reference to the great Tungabhadra project in Madras, though there seems to be no immediate likelihood of its being taken in hand. It is undoubtedly an ambitious scheme, but its scope of utility is correspondingly large, while its importance as a protective work cannot be exaggerated. Before finally making up their minds, I hope the Government of India will give the scheme their best attention and afford the Local Government an opportunity of placing it before them in all its bearings.

"In the memorandum of the Railway Board attached to the Financial Statement, it is satisfactory to find that the Board is devoting its attention to improve the comfort and convenience of third class passengers. The two urgent reforms are the development of the system of communication between passengers and guards and drivers of trains and the general convenience of third class passengers. In the higher classes of carriages the means of communication between passengers and guards and drivers exists on some of the lines at present, but it is still more necessary in third class carriages, particularly in carriages and compartments reserved for females. And as regards the general convenience of third class passengers, the Board admits that a great deal remains to be done.

"My Lord, I may be permitted to draw attention to the claims of Indians to higher appointments under Government in connection with the various redistributions of territories for administrative purposes. Besides such redistributions as have been already effected, there are, I understand, schemes in progress in the Madras Presidency for the creation of new districts out of the old ones which are considered to be too large or unwieldy. In every instance the administrative machinery is to be enlarged and the employment of a larger number of public servants becomes necessary. It is on occasions of this kind that the Government has a fitting opportunity for recognising the claims of the Indians and associating them more largely in the important work of administering the country."

The Hon'ble NAWAB BAHADUR KHWAJA SALIMULLA of Dacca:—
 "My Lord, allow me to congratulate Your Lordship's Government on the very satisfactory budget presented to us and the Hon'ble Finance Member for his clear, lucid and interesting exposition of the dry details of figures. We are grateful to the Government for the remissions in taxation it has granted since the budgets began to shew surpluses, and it was but right and proper that such remissions began with those on whom the taxation was pressing very hardly. The reduction of the salt duty has been one of the greatest blessings that could be conferred on the agricultural population of India, and the remarks of the Financial Member that even the Bhil woman knows that for the same price she ought to get a third more of salt than she used to do, shows that the beneficent results of the reduction have reached the humblest classes of His Majesty's subjects, classes for whom they are intended, and with regard to whom doubts had been expressed in some quarters, as to whether the effects would be felt by them at all. In two years, there has been an increase in consumption to the extent of nearly 34 lakhs of maunds, and the agriculturists are now able to use salt for their cattle. I trust our Finance Minister, before he lays down the reins of office, may be able to announce a further reduction from this Council Chamber to the further relief of the millions of the agricultural population of India. The raising of the taxable limit of incomes has conferred another great boon on the poorer middle classes, whose lot is the hardest in India. Unaccustomed to manual work, many of them, so far Bengal is concerned, unused to trade, their sole means of subsistence are the minor services which

[*Nawab Khwaja Salimulla of Dacca.*]

afford a scope which must daily become more and more contracted with increasing numbers. The lot of the 'Bhadra logs' in Bengal, Hindu or Mussulman, is very hard indeed, and no boon would be better appreciated by a large class of His Majesty's subjects than if the taxable minimum under the income tax were raised to Rs. 1,500 a year. If this were not possible at an early date, may I venture to suggest that the present minimum of Rs. 1,000 a year should be excluded from all incomes up to Rs. 2,000 a year, for while an income of Rs. 1,000 is wholly exempted, an income of Rs. 1,100 a year has to bear the tax on the whole amount. Incomes up to Rs. 2,000 a year are assessed to tax on a lower scale, and might not the Government ease the burden that sits on the bread-winners amongst the poorer classes, by extending the concession in the way I have ventured to suggest. It is a matter of very great disappointment to us, that the countervailing duties on sugar have availed nothing to revive the dying sugar industry of India. The resources of organization, capital and skill, which continental nations have brought to bear upon this industry, have been too much for the humble agriculturists in India, and sugar, like indigo, may soon cease to be an industry that may be taken into account in India. No grant is more useful and looked upon with greater interest by the landed classes than the one for agricultural development and research, and no part of the grant will be better employed than that which may be set apart for improving the sugarcanes in India and the methods of their cultivation.

"I have to thank Your Lordship's Government for the abolition of the Dak cess in Bengal; the days when it was necessary have long gone by, and a much needed reform has come to the great relief of the zamindars of Bengal. Though the amount remitted under the heading of cesses, in the combined provinces of Bengal and Assam, amounting to Rs. 3,80,000, is comparatively very small compared to the substantial relief granted to the other provinces in the Ryotwari village service cess and the Patwari cess, I do not grudge the good fortune of our sister provinces; Madras has had a remission of Rs. 28,00,000 and the United Provinces of Rs. 25,54,000: would it be too much to hope for a readjustment of the Road cess in Bengal in the light of these large and substantial remissions to the other provinces of India?

"My Lord, I have the honour to be the first representative in Your Lordship's Council of the new province of Eastern Bengal and Assam. The province has just been born amidst many fears and hopes. I venture to predict that with passing years, as the policy of the Government is better understood and appreciated, the fears will have passed away and the hopes will have become realized. I do not for a moment ignore the strong sentiment of attachment and a passionate desire to cling together, which a seeming severance has so unmistakeably evoked, but I am sure that time will show that there has been no severance, in the sense in which those who were opposed to the creation of the new province understood it, no division of the Bengali-speaking people, Hindus and Mussalmans, no weakening, but on the contrary, a greater development, of the two sister provinces, better government, better education in both, better means of intercommunication and generally a great accession of strength to the Bengali race. The Eastern Province is very largely Mahomedan; it is no exaggeration to say that the masses are practically Mahomedan, and the want of education from which they suffer is a source of weakness to the nation and a loss of available strength to Government. I do not plead for any exceptional treatment of the Mahomedans as against any other race or community in India. Given the same advantages and the same opportunities, the Mahomedan is as good an asset of the country and of the State as a member of any other community, but the Mahomedans have to recover lost ground, and in their efforts to do so I am sure they will have the sympathy of Your Lordship's Government and the Members of Your Lordship's Council, representing other interests and other communities. As the representative of a largely Mahomedan province I am deeply concerned in this. The only means to raise the Mahomedans—their only hope—is education; it is to be regretted that in the past, they have not been able to avail themselves of the

[*Nawab Khwaja Salimulla of Dacca; Mr. Logan.*]

opportunities offered to them by Government in this respect and they have allowed precious time to go by. The leaders of our community are now happily fully alive to the great importance of the question of Mahommedan education, and I trust that as in the case of the Europeans and Eurasians, for whom, having regard to their circumstances and position, a separate special allotment has been so justly and so generously made, some facilities by way of a special allotment should be given to the Mahommedan community so that they may get over the handicap from which they suffer so severely at present."

The Hon'ble MR. LOGAN said :—" My Lord, I desire to restrict my remarks to a point of practical importance, more especially to the Government of Bombay, but perhaps in a greater or less degree to all the Provincial Governments which are exposed to the contingency of famine. The liberality with which Bombay was treated in the Provincial settlement which came into force on April 1, 1905, has, I believe, been heartily acknowledged by the Governor in Council; but there is nevertheless one unsettled point which the occurrences of the last two years have brought into prominence, and which now requires solution. The Bombay Presidency, as everybody knows, has been suffering from scarcity, sometimes amounting to famine, in successive or occasionally alternate years since 1895; and although the tolerably favourable aspect of 1904, when the settlement was drawn up, excited the expectation that the lean years were passed, that expectation has unhappily not been fulfilled, and the Dekkhan at least has suffered from a partial, but severe, failure of the crops in both years since then. It is quite possible that such failures will continue to occur for some time, for we know from history that a series of famines commenced in the Dekkhan in 1396 and did not end till 1409, and these thirteen years so depopulated the country that little revenue could be collected for a generation afterwards. Such a cycle is evidently now recurring, and may prove all the longer, because the annual visitations are less intense. Thus scarcity may become a feature of the peninsula for nearly as many years in the future as it has been in the past.

" Now settlements with Provincial Governments are intended to provide for all regularly recurring charges. In the last settlement with Bombay, however, the Government of India made no proposals for the division and regulation of famine expenditure; and since all charges not settled on a Provincial Government are a liability on the Imperial revenues, it was at first supposed that as long as scarcity was chronic in the Presidency the charges would be met by the Government of India. Subsequently, however, it was made known that the principles laid down when famine was a rarity are to be followed under the very different circumstances now prevailing: in other words, that famine expenditure is first to fall on Provincial revenues, and only to be transferred to Imperial when the former are exhausted. This dictum at once called forth a moderate protest from the Bombay Government, but the point was then not pressed because of the hope that the cessation of lean years would deprive it of practical importance.

" But, my Lord, as I have already said, this hope has been disappointed and both years of the new settlement have been marked by scarcity. In the current season this is so serious that, as I observe, the Government of India have had to allot 42 lakhs in the Budget to the Presidency for famine charges from next month. The question of principle has thus become of pressing importance, and the Bombay Government has been compelled to draw attention to it emphatically. It holds that the stimulus to economical administration which Provincial settlements are intended to create will be destroyed by the prospect of all savings being swept away on each occurrence of distress, and asks the Government of India either to devolve famine charges on the Provincial Government as part of the settlement with a corresponding allotment of revenue, or else to undertake the whole of those charges itself. The latter it regards as the far preferable course; since famine, like wars, expeditions and political missions, is properly a matter to be financed by a Government which has powers, not possessed by Provincial Governments, of borrowing or otherwise raising funds for

[Mr. Logan.]

irregularly recurring emergencies. But so far the Financial Department of the Supreme Government has shown no disposition to accede to this request, and has merely accepted the liability for the coming year because the situation requires it.

"I may be allowed, my Lord, to dilate a little on the present situation. The Government of India started the new settlement with a special assignment of 50 lakhs to help in clearing off old famine and plague debts; yet in only the second budget framed under it in Bombay what do we find? Although the estimated receipts on which the settlement was framed have already increased by 15 lakhs, the expenditure estimated for the settlement has increased by 50½; and of this nearly 46 lakhs are expenditure on famine, or on village water-supply diminished by the failure of rain. So that the whole of the 50 lakhs meant to give the Bombay Government a clearance of old debt is absorbed by an accession of new debt; and in addition the Bombay Government have had to cut down desirable, and in some cases urgent, requirements in thirteen departments by over 15 lakhs, in order to make up the minimum balance of 20 lakhs required by the Civil Account Code. So here is the Bombay Government practically insolvent again in the second year of the settlement. The picture is sufficient to illustrate the disheartening circumstances under which the Presidency will continue to be administered if the failures continue; and it gives cogency to the argument that the principle of the exhausted balance should now be replaced by something less calculated to derange the orderly course of Provincial administration and worry the administrators. I do not see why this should pass the wit of the imperial statesmen. The conditions of the problem do not seem to me, *primâ facie*, very complex or delicate. What mischiefs, counterbalancing the inconveniences of the present system, does the Government of India apprehend from frankly relieving Local Governments of all liability for famine? Political pleasantries apart, we all know that Local Governments cannot either produce or prevent failures of the rain or rivers, and when famine does come they are bound to give relief in accordance with the minute and liberal regulations drawn up under the orders of the Supreme Government. They can therefore neither create nor materially control the liability, and the Government of India would risk little or nothing from a supposed recklessness on their part as to whether famine occurred or not. Nor can it be argued that if relieved of famine charges the Local Governments would be reckless in expending their money in other ways; for the settlements all proceed on the assumption that there will be no famines, and that the Local Governments will nevertheless evince economy and efficiency in the ratio of their independence, and this latter assumption I believe has never been belied. Thirdly, the Government of India can have no possible fear of financial difficulty on its own part, since it is positively embarrassed by its surpluses year after year, and will continue to be as long as the rupee stands where it is. I may add that undertaking all famine charges will be a stimulus to the Government of India to push on the great irrigation schemes which are the best means of mitigating future famines in the Dekkhan. I would therefore suggest that in future imperial budgets full provision should be made under the head Famine Relief and Insurance for all anticipated famine charges, irrespective of the balances of Local Governments. It is better to apply the surpluses in this way, if necessary, than in remitting taxation while Local Governments are in the utmost straits for money. But if there are valid objections to this course which I have overlooked, then I would suggest that in the Bombay Presidency at least, with its chronic liability to scarcity, an insurance account should be opened in the provincial budget, and that the late settlement should be revised so as to create an additional assignment for this purpose. This course may obviate some possible objections as to provincial responsibility which might apply to the former. But in either case the money must come from the Government of India, for to a Local Government famine means not only expenditure on relief but the loss of revenue as well, and therefore, except in the first of a series of famines, there never can be any substantial balance to meet the charges. Nor indeed ought there to be

[*Mr. Logan ; Mr. Hall.*]

any balance beyond the prescribed reserve, while the needs of the Presidency in a hundred directions continue to outrun its resources, or any funds which even by the most liberal settlement may be conferred by the Government of India. Knowing as I do how much money is urgently required for the improvement of almost every branch of the administration, and cannot be got, it seems to me very anomalous that the Government of India should call on the Local Government to deplete its already insufficient funds for abnormal emergencies, while their own money bags are overflowing. It is true that the Government of India have made a liberal allotment for the famine in the present budget; but I have already shown the straits into which the Government of Bombay was thrown before this was done. What is wanted is some settlement which will obviate such anxiety and disturbance in the future; and any device that can be adopted to this end will no doubt be welcomed by Local Governments."

The Hon'ble MR. HALL said:—"My Lord, I wish to congratulate the Hon'ble Finance Member and the Government upon the prosperous state of the finances—over one-third of a million persons are in receipt of relief and yet there is a large surplus in the current year, the agricultural taxpayers' burden is in some provinces to be substantially reduced, additional grants are promised for administrative improvements, while Districts Funds are to be aided by the abolition of certain contributions which they have hitherto had to make.

"I desire to express gratitude for the amelioration of the Burma Police and in particular for the special pension scheme for officers who joined the force some twenty years ago. I am convinced that the additional expenditure on the Police generally, large as it is to be, is fully required and that the results will be very gratifying.

"The grant for agricultural and veterinary development is also most welcome. Twenty-five years ago there were to be found people who doubted whether the Veterinary Department would ever become a success. But confidence in the Veterinary Assistants was gradually established. Their services are now much in request, and one would have to make a long journey to find any one—official or cultivator—willing to express doubt as to the utility of this Department in Burma.

"So it will be in the case of agricultural development. There may be some difficulty, doubt and delay at the outset. I am, however, confident that but a few years will elapse before it is recognised by all classes that a great boon was conferred on the country by the Government when it initiated the measures which are now being undertaken for the improvement of agriculture.

"One cannot but recognise that the reasons given in the Financial Statement for the abolition of certain cesses in some Provinces are sound. In Burma there is no patwari cess, and accordingly the agricultural taxpayer in that Province does not share in the relief which is to be so generously granted elsewhere.

"I would also mention here that Upper Burma did not get any share of the grant made a year ago in aid of District Funds, which was described as being approximately 25 per cent. of their total revenue from cesses on the land. There are District Funds in Upper Burma, but there is no cess, and so the poorer and more backward portion of the province did not participate in the grant, though its needs are undoubtedly very pressing.

"I desire to express gratitude for the discontinuance of the practice of taking a contribution from Local Funds for the district post—Burma so gains Rs. 1,21,000 a year. But at the same time I venture to hope that if there is any surplus available for distribution to District Funds a year hence, it may be found possible to make a somewhat larger assignment to my province and especially to Upper Burma.

"There is one other matter on which I would say a few words. The coming expiry of the current Provincial Settlement makes us who are particularly interested in the development of Burma somewhat anxious. The share of

[*Mr. Hall; Mr. Ismay.*]

the revenue under some of the principal heads which we have been allowed to enjoy has not been unduly low when compared with the shares as fixed in some other provinces. I would, however, represent that liberal expenditure in Burma, if well directed—and there is every ground for believing that it will be well directed—will pay, will in fact be immediately productive.

"In conclusion, then, I would express a confident hope that in the new settlement Burma will receive generous treatment and due consideration for its admitted needs."

The Hon'ble MR. ISMAY said :—"My Lord, the very brief remarks which I have to make on the Budget concern only its relation to the Central Provinces and Berar. I desire in the first place to acknowledge the very welcome relief which will be afforded to agricultural taxpayers by the abolition of the Patwari cess. All land-revenue cesses are more or less unpopular, but whereas the Road, School and District Dak cesses have been realized in the Central Provinces since the earliest days of British rule, the Famine Insurance cess and the Patwari cess have been the creation of comparatively recent years. The object of the former cess was never properly appreciated by those from whom it was realized, and its abolition during the current year was hailed with great satisfaction. The Patwari cess has always been regarded as a greater burden even than the Famine Insurance cess. At a time when the Patwari was the servant of the proprietary body the remuneration for his services as village accountant was never grudged. But under our present revenue system the Patwari has become as much a member of the district staff as any other official of the Land Record Department, and so far from being regarded as the natural friend of the Malguzar he too often labours under the suspicion of being inimical to his interests. Then again the incidence of the cess was such as to impose a not inconsiderable burden upon the agricultural classes. The local law provides that a Malguzar may be called upon to contribute any sum not exceeding six per cent. on the assessed revenue towards the remuneration of Patwaris and the defraying of charges incurred on account of the proper supervision, maintenance and correction of the Patwaris' records. My Lord, the removal of this heavy burden is a boon for which the agricultural classes of my Provinces will be deeply grateful.

"The only other matter on which I desire to offer any remarks is the new Provincial Contract for the Central Provinces and Berar. In lieu of the temporary settlements which have hitherto been made from time to time with the Central Provinces the new Contract with the amalgamated Provinces which will come into force from the 1st April is of a quasi-permanent nature. The present irregular distribution of revenue will then come to an end and the income derived from Land-revenue, Stamps, Excise, Forests and Assessed Taxes will be divided half and half between Imperial and Provincial.

"My Lord, I have examined with some considerable care the terms of the new Contract, and I find that the provision now made for developing the resources of the Provinces is very much more liberal than has been allowed on any previous occasion. The last temporary settlement with the Central Provinces was made in 1897, but under that settlement it was found impossible to make both ends meet, and the Provincial accounts have year by year disclosed a deficit varying from 15 to 30 lakhs which has had eventually to be made good by the Imperial Government. Apart from the ordinary terms of the present Contract, which in themselves appear to be sufficiently liberal, a special guarantee has been given insuring the Provinces against any extraordinary loss of land-revenue arising from famine or unfavourable seasons, and an initial gift of no less than 30 lakhs has been made to enable the amalgamated Provinces to make a fair start.

• "My Lord, it is probably only those who have served in the Central Provinces who are able to appreciate to the full how backward this part of the country is as compared with other parts of India. The Provinces are being rapidly opened up by railways and the exploitation of their mineral wealth is proceeding at an ever-increasing pace, but the resources of the Local Govern-

[*Mr. Ismay ; Mr. Apcar.*]

ment have hitherto not been such as enable it to keep abreast with the requirements imposed by the general development of the country. Many important feeder roads still remain to be constructed and such progress as has been made in this direction has only been rendered possible by sacrificing the Grand Trunk roads which before the advent of the railway were the pride of the Provinces. The Great Eastern road, upon which lakhs of rupees were spent in the seventies, is no longer properly maintained, and the same is the case with the road from the north which traverses the Nerbudda Valley. The road from Nagpur towards Bombay practically terminates in a swamp a few miles out of Nagpur, and even the road connecting Jabalpur with Nagpur, which was for many years one of the best in India, has, owing to the heavy manganese traffic, fallen into great disrepair at the Nagpur end.

"And what is true of roads is equally true of buildings. It is unnecessary to enter into detail, but it may not be out of place to say that, as head of the Judicial Department, I have recently found it necessary to urge upon the Local Government that the Court-houses in every district are becoming overcrowded and that nearly 20 lakhs will have to be expended upon Court buildings alone if proper accommodation is to be made available. At Nagpur, the head-quarters of the Administration, Judges are at present holding their Courts in tents and in temporary sheds.

"Then again there are other calls upon the Provincial revenues which are no less urgent than those connected with roads and buildings. I may refer briefly to one measure of reform in which I am personally interested. Until very recently no attempt had ever been made to separate the judicial and executive branches of the Administration, and the trial of civil suits was practically in the hands of Extra Assistant Commissioners and Tahsildars, who possessed no legal training and who were already burdened with executive and magisterial work. All this is now changed and a judicial service has been constituted consisting, as in other parts of India, of District Judges, Subordinate Judges and Munsifs. But the scale of pay at present sanctioned for members of this service is admitted on all sides to be unduly low, and as a natural consequence suitable candidates for judicial employment in the Central Provinces and Berar are no longer forthcoming. To put the judicial service upon a proper footing will entail considerable expenditure, but it is a reform which cannot any longer be delayed.

"My Lord, it is in no spirit of complaint that I have made these few remarks. I recognize fully that my Provinces cannot expect to be placed, at the expense of the general taxpayer, in as good a position as other Provinces in which local taxation is heavier and the land-revenue more productive. I frankly appreciate the liberal treatment we have received in connection with the new Provincial Contract, but I also desire to emphasise the fact that but for such liberality much good work which will now be rendered possible would have had to be left undone."

The Hon'ble MR. APCAR said :—"My Lord, I am glad to be able to congratulate the Hon'ble Member on the satisfactory Budget Statement he has submitted to the Council.

"In the Memorandum by the Railway Board for 1905-06 attached to the Budget Statement it is stated that the estimated net gain to the State on the working of the State and Guaranteed Railways is nearly 304 lakhs of rupees, almost the largest yet obtained in any year after meeting, as I understand, in addition to the expenses of working, all charges for interest on Capital outlay by the State and on Capital raised by Companies and also the annuity payments for railways purchased by the State. And it further appears that this is the sixth year in succession in which there had been a surplus.

"To Lord Curzon the credit must obtain of having opened the largest mileage. No less than 5,525 miles have been added during the first six years of his reign, and the total mileage open at the end of 1904 was 27,565 miles with a capital outlay of Rs. 35,285 lakhs. The gross earnings per mile have

[*Mr. Apcar.*]

risen from Rs. 63 in 1854 to Rs. 277 in 1904, and the percentage of net earnings on Capital from '22 to '91.

"In 1874 the goods carried were 5,503,000 tons: in 1904 they were 52,051,000 tons, while the number of passengers rose from 24,977,000 to 227,097,000. I gather these figures from the Administration Report of the Railway Board for 1904-05.

"Now this state of things is very satisfactory and should make the Government have no hesitation in further extending and developing railways in India, for it is evident that if wisely projected they will pay handsomely.

"The coal traffic is, I observe, a most important one for in 1904 no less than 8,233,451 tons are said to have been mined, of which 7,080,425 tons fell to Bengal. In 1885 the coal was only 1,294,221 tons out of a goods total of 18,925,000 tons. In other words, the percentage of coal carried has risen from 6·8 in 1885 to 15·8 in 1904.

"It is apparent from the above that the coal traffic is an important and expanding one, and that every effort should be made to facilitate it. I read in the report that 'as usual the needs of open lines, especially in regard to rolling stock, have received first consideration.' This is a statement which no doubt 'as usual' is inserted in every report, but it is one which it is difficult to reconcile with existing facts. I would very respectfully but earnestly ask that this statement regarding rolling stock be made a matter of practice rather than precept. With the splendid results shown, parsimony in providing the urgent needs of a railway in respect to rolling stock is worse than a mistake; it is wholly inexcusable and it indeed would be much better, if any question of funds arises, that a halt be made in the matter of extension and that the clamant needs of the existing railways in the matter of rolling stock be first attended to. I therefore notice with great pleasure a provision in the Budget of 382 lakhs for rolling stock. I hope that this sum will be spent, and more if necessary. It is satisfactory to see it at last acknowledged by the Railway Board that Indian railways as a whole are at present below what should be the standard of equipment of rolling stock for present requirements. The deficiency being admitted, it only remains to make it good.

"Another matter to which I would venture to draw attention to is that of the incidence of Income-tax. I am not unmindful of the fact that its continuance is suspiciously like a breach of faith. It is a convenient mode of raising revenue, and it is perhaps desirable that the machinery for levying the tax should be with us and in working order; but I think that the limit might be raised, and that in the case of small incomes there might be a rebate as is the case in Great Britain. There all incomes of £160 are exempt and for incomes between that amount and £700 an abatement which ranges from £160 to £70 is allowed. Thus an income of £400 pays tax on £240 and one of £700 on £60. This, my Lord, seems a reasonable thing, and I should like to see the minimum raised to Rs. 1,500 and an abatement of Rs. 1,500 allowed up to incomes of Rs. 3,600. The tax itself, as ways and means admit, should be reduced also.

"There is another matter which will before long come before my Hon'ble friend, the Finance Minister, though it will not probably be necessary to budget for it this year, and that is the Calcutta Improvement Scheme. This is not the time to discuss the merits of that scheme, but I would only point out that in the opinion of the mercantile community the contribution of Rs. 50 lakhs proposed by the Government is quite inadequate; it should be at least Rs. 120 lakhs. The improvement of Calcutta is not a municipal but an imperial matter, and I would ask the Government to think 'imperially' on this subject.

"When Mr. Risley introduced the present Municipal Act into Council just six years ago, he said that 'the state of the City calls for more than the attention of the Municipal Commission; it is a matter which concerns not only the Government of Bengal but the Supreme Government and is sure to attract very special notice in England as well as in other countries.' And again 'the

[*Mr. Spear ; Mr. Gokhale.*]

interests threatened are those of the foreign trade not of Calcutta only, but of the whole of Northern India and Assam.'

'With these remarks I entirely concur, and inasmuch as the improvement of Calcutta is designed in the first instance to eradicate the plague, and in the second place to generally improve the health of Calcutta, upon which in no small degree does the expansion of commerce depend, it is only fair that a large proportion of the cost should fall on the imperial revenues, and that that proportion should be fixed with no niggard hand.'

The Hon'ble MR. GOKHALE said:—"My Lord, for the second time, the Hon'ble Mr. Baker has laid before the Council a budget, which, judged by the limits within which he was free to move, is an interesting and satisfactory statement, and which for lucidity of exposition will take high rank among the Financial Statements of the Government of India. I am particularly pleased to read what the Hon'ble Member writes about the effect of the recent reductions of salt duty on the consumption of that article. Time was, not so long ago, when it was the fashion, both in this Council and outside, to regard the burden imposed on the masses by a high salt duty as after all only a light one, and to deny that its rate could seriously affect consumption. If ever the Government of India finds itself driven to enhance the duty again, I hope the Finance Member of the future will remember the eloquent testimony of my Hon'ble friend on the results of recent reductions, and no one will again venture to contest the proposition that in dealing with a prime necessary of life, such as salt, the only right policy is to raise an expanding revenue on an expanding consumption under a diminishing scale of taxation. Even at present, the level of the duty—about 1,600 per cent. of the cost price—is much too high, and I earnestly trust that the Hon'ble Member will have, as I have no doubt he will be glad to have, another opportunity during his tenure of office as Finance Minister to effect a further reduction, thereby making the duty throughout India at least uniform with what it is in Burma, namely, Rs. 1 a maund. The consumption in India, which was under 10 lbs. per head before these reductions, has now risen to about 11 lbs., but it is still far below the level of Burma, where it is about 17 lbs. per head. My Lord, the abolition of certain cesses on land and the discontinuance of certain appropriations from the funds of District and Local Boards for Provincial purposes will be greatly appreciated in the Provinces concerned, and I regard with sincere satisfaction the policy which underlies these measures. My only regret is that Bombay does not participate in the benefit of the relief accorded, and, if it is not yet too late, I would like to suggest one or two directions in which the Hon'ble Member could usefully come to our assistance on the same principle on which he has given the present relief to the other Provinces. One is as regards the loss which our Local Boards have to bear as a result of the suspensions and remissions of land revenue granted by Government. The principal part of the income of these Boards is derived from the one-anna cess on land; so when the Government, owing to the prevalence of famine, suspends or remits a part of the land-revenue, the one-anna cess that is paid with such revenue is also automatically suspended or remitted. The Government anticipates that the amount suspended or remitted this year owing to the present famine will be about 50 lakhs of rupees. This means that the Local Boards will lose a little above 3 lakhs of their revenue during the year. The proceeds of the one-anna cess for the whole Presidency are under 30 lakhs, and to lose 3 lakhs out of 30 lakhs is a serious matter. Moreover, the loss is not spread over the whole Presidency but has to be borne only by the districts affected, which means that in those districts the Boards will not have enough money even for their barest wants. I suggest, therefore, that the grant this year to the Boards from the Provincial revenues should be increased by 3 lakhs or whatever may be the amount of the one-anna cess suspended or remitted with the land-revenue, the Provincial Government receiving, if necessary, compensation from the Government of India for the purpose. I understand that this is the practice that is followed in the Punjab, where as

[*Mr. Gokhale.*]

a result the Boards receive their full amount intact, whatever suspensions or remissions the Provincial Government may grant to the agriculturists; and I only ask that our Boards may be treated with the same consideration. Another direction in which the Hon'ble Member could come to the rescue of these Boards is by relieving them of all responsibility for famine relief, which the Famine Code imposes upon them. Under the Code, the duty of relieving famine distress is first cast on the resources of the Local Boards and then on those of the Provincial and Supreme Governments. Now the means at the disposal of the Boards, even for the objects for which they have been brought into existence, namely, education, sanitation and medical relief, and roads, are woefully inadequate, and to throw on them in addition so heavy and unjustifiable a burden as famine relief is to take away from them practically all power of doing useful work. For the last ten years and more, we have had on our side an almost unbroken succession of unfavourable seasons, with no less than four famines, and the embarrassments of Local bodies have been further aggravated by plague and the cost of plague measures; as a result, over the greater part of the Presidency our Boards have been reduced to a position not far removed from bankruptcy. The relief I ask for, though small, will therefore not fail to prove useful in their present circumstances, and I earnestly trust that the Hon'ble Member, who has already given abundant evidence of his sympathy with Local bodies in their struggles, will realize the justice and necessity of granting it.

"Before I proceed to deal with the larger questions on which I wish to offer a few observations today, I would like to make two suggestions and address one inquiry to the Hon'ble Member. My first suggestion is that in the general statements of revenue and expenditure, given in Appendix I, the figures under Railways and Irrigation (productive works) should be given net. In the budget for the coming year the receipts under these heads have been estimated at about $29\frac{1}{2}$ millions and the charges at about 27 millions. The net receipts to the State, therefore, under the two heads amount to only about $2\frac{1}{2}$ millions. and I submit that it would give us a much more correct idea of the true revenue and expenditure of the country if only this sum of $2\frac{1}{2}$ millions were entered on the revenue side in the general statements and a separate statement appended showing the gross receipts and charges under the two heads, than that two such huge figures as $29\frac{1}{2}$ millions and 27 millions should be entered on the two sides of the account. The outlay on Railways and Irrigation is on a commercial basis out of borrowed capital, and the receipts are bound to go up, as the capital outlay increases. As a matter of fact, they have been going up of late years owing to increased capital expenditure and other causes by leaps and bounds, having nearly doubled themselves in ten years, standing today at $29\frac{1}{2}$ millions against $15\frac{1}{2}$ millions in 1896-97; but they make no real addition to the revenue of the country, except by that portion of them which represents the net profit earned by the State. In Japan, where they do things more scientifically than with us, the course that is adopted as regards State Railways is the one I have suggested, and only the profits on the undertakings appear on the revenue side in the Financial Statement. Our present practice has been responsible for many curious misapprehensions of the financial position, and it has misled even those who should know better. Thus two years ago, the Military Member of the Government of India—Sir Edmond Elles—advanced in this Council the obviously untenable proposition that though the military expenditure of the country had in recent years been growing, its growth, proportionately speaking, was less than that of our revenue; and he proceeded gravely to establish his contention by treating these rapidly increasing gross receipts under Railways and Irrigation as part of the revenue at the disposal of the State. And when I drew his attention to this error, he simply would not budge an inch, and contented himself merely with the remark that he did not know why he should not take the figures as he found them! My second suggestion is that the income and expenditure of Local Boards, included under the head of Provincial Rates, should be separated from the accounts of the Government of India. It is a small matter—only about 2 millions a year—but it gives rise to much confusion. Take, for instance,

[*Mr. Gokhale.*]

education. A reference to Statement B will give one the idea that the Government expenditure on education is nearly 2 millions sterling, when in reality it is only about a million; the rest is Local Boards' expenditure merely included in Government accounts. It is true that the heading 'Provincial and Local' is there to prevent a misconception: but that in itself is again misleading, as the term Local ordinarily includes Municipal also, whereas in the accounts of the Government of India, the income and expenditure of only Local Boards and not of Municipalities are included. I trust the Hon'ble Member will be able to effect this simple but necessary reform. If the suggestions I have made are accepted, our real revenue will be seen to be about 58 millions instead of 87 millions as the Statements in Appendix I lead one to imagine. The inquiry I want to make is about the Gold Reserve Fund and the profits from Coinage. It was stated by Lord Curzon two years ago that the Gold Reserve Fund was to accumulate till it rose to 10 millions sterling, which amount, he declared, 'will be sufficient for our purpose and will give us a permanent guarantee for stability of exchange.' This limit has been already passed and the Fund to-day stands at over 12 millions sterling, and I think the Hon'ble Member owes it to the country to say what he proposes to do with the profits from Coinage in future years. The fund is to accumulate at compound interest and may therefore be left where it is. And the profits—about 2 millions a year on an average of six years—may henceforth be used to provide money for loans to agriculturists in a comprehensive scheme for the relief of agricultural indebtedness. They will thus yield a better interest than when they are invested in consols; such a course will also enable the Government to make some reparation to those classes which have been hit the hardest by its currency legislation. Even if they were devoted to productive public works, reducing by a corresponding amount the annual borrowings of the State, that will be better than the present plan of investing in consols. The justification of a policy, which invests its own money in $2\frac{1}{2}$ per cent. and borrows at the same time for its purposes at $3\frac{1}{2}$, is not quite obvious.

"My Lord, our financial administration is bound up with questions of policy of the highest importance affecting the Government of the country, and unless that policy undergoes a radical change, our revenues will not be administered in a manner which will best promote the true well-being of the people. Of such questions, the most dominant, as it is the most difficult and delicate, is the question of the Army. My Lord, I fear that a protest in this country against the military policy of the Government and the ceaseless and alarming growth of our military burdens is almost like a cry in the wilderness, but the protest has to be made on every occasion that presents itself, as our most vital interests are involved in a proper solution of this question. Moreover, if ever there was a juncture when our voice in this respect should be heard by the authorities, that juncture is now. A profound change has taken place in the general position of Asiatic politics. The triumph of Japan in the late war has ensured peace in Mid and East Asia. The tide of European aggression in China has been rolled back for good. The power of Russia has been broken; her prestige in Asia is gone; she has on her hands troubles more than enough of her own to think of troubling others for years to come; and thus a cloud that was thought to hang for twenty years and more over our North-Western frontier has passed away, and, humanly speaking, is not likely to return, at any rate during the time of the present generation. The Anglo-Japanese alliance, concluded without considering how it would be regarded by the people of this country, is a further guarantee of peace in Asia, if such an alliance has any meaning. Surely, my Lord, this is the time, when the people of this country have a right to look for a substantial relief from the intolerable burden of an excessively heavy military expenditure, which they have had to bear for so many years past. And the first step in the direction of such relief is to suspend the execution of the Reorganization Scheme drawn up by His Excellency the Commander-in-Chief and estimated to cost more than 10 millions sterling. This scheme was projected in the early stages of the Russo-Japanese War, and was sanctioned in November 1904, when the issue of the struggle was not only uncertain but the odds seemed to be against Japan, and when

[*Mr. Gokhale.*]

Apprehensions were entertained of hostile movements of Russian troops in the direction of Cabul. Now, however, that the situation has undergone a complete change and the North-Western frontier has for the time ceased to be our one danger-zone, there is no justification for proceeding with a costly scheme, devised to ensure a concentration of the entire armed strength of the country on that frontier at the shortest notice. Ten millions, again, does not represent the whole cost of the scheme. There is to be in addition a permanent burden on its account; how much it will be we have not yet been told, but the Hon'ble Mr. Baker warned the Council last year that it would be considerable. This recurring charge is to appear on the scene after five years, during which period 2 millions a year are to be spent out of current revenues to carry out the scheme. My Lord, I respectfully protest against the execution of such a scheme at such a time, as involving an expenditure of money and effort wholly beyond our capacity and not called for or justified by the requirements of the situation. The Secretary of State for India stated in Parliament the other day in reply to a question that the matter was being further considered. I earnestly trust that his decision will be to hang up the scheme, at any rate till a more disquieting situation than the present arises on the North-Western frontier. Should the Government, however, unfortunately make up its mind to ignore recent events and proceed with the scheme, I would most strongly urge that the money required for the initial outlay should be found out of loan funds. My Lord, during the last eight years, the Government has spent its surpluses, amounting to about 35 crores of rupees, on railways, in addition to borrowed capital. Now such expenditure of current revenues as capital outlay on productive works appears in the accounts as an addition to our productive debt (which represents the capital expended on productive works), and this necessitates a reduction by a corresponding amount of the unproductive debt of the country. Last year, when I made this simple statement in connection with my plea that the cost of the Army Reorganization Scheme should be met out of borrowings, the Hon'ble Member, to my surprise, denied the correctness of my proposition. He no doubt spoke under a misapprehension and he evidently thought that my contention was that the total debt of the country, productive and unproductive taken together, had been reduced, when my whole argument was that as our unproductive debt, which after all is the only real debt, had been reduced by the amount of current revenues spent as capital, the whole cost of the new Army Scheme could be met out of loan funds and yet our unproductive debt would stand lower than where it was eight years ago. My Lord, it is most unjust to the tax-payers of this country that while the surpluses that accumulate should be spent as capital, heavy non-recurring charges in connection with the Army should be thrown on current revenues, when every pie that can be spared from these revenues is urgently needed for the education of our children and for a hundred other objects of internal progress. The Hon'ble Member may say that till the surpluses are actually realized, no one can tell what they will be. But surely when they have been realized and when they have been so employed as to reduce the unproductive debt of the country, I think there is no excuse for avoiding borrowing, within the limits of such reduction, for meeting heavy non-recurring charges.

"My Lord, I beg leave next to urge that the strength of the Army in India should now be reduced by at least those additions that were made in 1885 under the influence of the Penjdeh scare. The growth of the military expenditure in recent years has been simply appalling, as may be seen from the following figures:—

1884-1885	17·9 crores.	(Before the increases of 1885 were made.)
1888-1889	22·2 crores.	(After the increases had their full effect.)
1902-1903	28·2 crores.	
1906-1907 (Budget)	32·8 crores.	

Our military expenditure is now nearly double of what it was twenty years ago. Since 1888, it has risen by over 10½ crores a year and this notwithstanding

[*Mr. Gokhale.*]

ing the fact that the strength of the Army has not been increased by a single troop or company during the time. The increases made in 1885 were made in spite of the protest of two Members of the Government of India and in disregard of the view recorded by the Army Commission of 1879 that the then strength of the Army was sufficient both for internal peace and to repel foreign invasion, not only if Russia acted singly but even if Afghanistan joined her as an ally. And since that time the fear of Russian aggression has been the one dominating factor in all our military arrangements. With Russia now crippled and the Anglo-Japanese alliance concluded, the last trace of any such fear should disappear from the mind of the Government, and the country should be relieved of the burden imposed upon it specially as a result of that fear. The increasing difficulty that has of late been experienced in England in the matter of recruitment and in providing the annual drafts for India, with the resulting payment of bounties to short-service men here as an inducement to extend their service, also points to a reduction of the garrison in this country as a necessary measure of justice to the Indian tax-payer. Should the view, however, be upheld that such a reduction is not possible on the ground, urged in this Council by Sir Edmond Elles, that the Indian Army 'is no longer a local militia for purely local defence and maintenance of order' and that it 'must in the future be a main factor in the maintenance of the balance of power in Asia,' I submit that the Imperial Government ought in justice to bear a part of the cost of an army maintained for such a purpose. My Lord, our military expenditure has now grown to such proportions that it over-shadows the whole field of Indian finance, and under its chilling shade, no healthy development is possible for the people. And unless the axe is resolutely applied to its overgrown portions, our life will continue to exhibit the same signs of sickness that at present unhappily mark its growth.

"But the appalling increase in the weight of military burdens is not our only grievance in connection with the Army. The whole system of Indian defence, founded as it is on a policy of distrust, rests on an unnatural basis, and one notes with regret that the position is growing worse every day. Whole populations are now excluded from the Army. The abolition of the Madras Command under the new scheme involves the disestablishment of that Presidency as a recruiting ground and amounts to a denial to the people of Southern India of all opportunity of service even in the ranks. Recruitment is being confined more and more to frontier or trans-frontier men, to the people of non-Indian or extra-Indian areas, with the result that the Army is approximating more and more completely to a mere mercenary force. The Arms Act is being worked with increasing rigour and licenses to carry arms are now issued more sparingly than at any time before. I believe there are not more than thirty to forty thousand such licenses at the present moment in all India. A large increase has been made in the number of British officers attached to the Native Army, so as to give all Punjab regiments an establishment of 13 British officers and all other regiments of 12. This increase completely ousts the Native officers from even such positions of trust as were open to them before and not even the command of troops and companies is now really left to them. We have been asking for years that the commissioned ranks in the Indian Army may be thrown open to aspiring and qualified Indians, scions of aristocratic families and others, and the reply of the Government is a stiffer closing of such careers to us. It is true that four members of the Cadet Corps were granted commissions last year and the language used by the late Viceroy more than once in speaking of the Corps had raised the expectation that these young men would be allowed the same opportunities of attaining to positions of command in the Indian Army as British officers. The reply given by the Commander-in-Chief to my question on this subject last week disposes of this expectation, and we see that Lord Curzon's promise in the matter, though kept to the ear, has been broken to the hope. In pre-Mutiny days we had two systems, the regular and the irregular. Under the regular there were 25 British officers to a Native regiment, whereas under the irregular there were only just 3 picked ones. The Army Commission of 1859 pronounced in favour

[*Mr. Gokhale.*]

of the 'irregular' arrangement; and after considerable discussion a compromise was eventually arrived at and it was decided in 1853 that 7 British officers should be attached to each Native regiment—these to command squadrons and wings, while the Native officers were to have charge of troops and companies. The question was re-opened in Lord Mayo's time and an increase of British officers was demanded; and the discussion again went on till 1875-6, when it was finally decided by Lord Salisbury (then Secretary of State for India) that the 7 officers system should be upheld, his Lordship laying stress on the point that the position of the Native officers should be improved and raised. And now the question having been brought up afresh, we find the decision going against us and the number of British officers in Native regiments raised from 7 to 12 and 13! My Lord, such growing distrust of the people, after so many years of British rule, is to be deplored from every point of view, and not until a policy of greater trust is inaugurated will the military problem, or indeed any other problem in India, be satisfactorily dealt with. I recognize the difficulty of the situation and the undoubted need that exists for caution in the matter. But after all it is only confidence that will beget confidence, and a courageous reliance on the people's loyalty will alone stimulate that loyalty to active exertion. As long as things continue as at present, the problem of Indian defence, do what you will, must remain essentially and practically unsolved. The experts, who accompanied the Russian and Japanese armies in the late War, have declared that the Indian Army will be found too small, if a great emergency really arises. This is bound to be so, as long as reliance is placed on standing battalions exclusively, with such reinforcements as England might be able to send in the hour of need. Everywhere else in the civilized world, the standing army is supported by a splendid system of reserves, and the nation is behind them all. Here alone there are no reserves worth speaking of to augment the fighting strength of the country in times of war, and the matter is treated as if it were no concern of the people. The late Viceroy quoted last year the achievements of Japan to justify the enormous growth in our military expenditure. Does any one, however, believe that Japan's glorious achievements would have been possible, if the Government of that country had merely poured money like water on its standing battalions, unaugmented by reserves, and the magnificent spirit of every man, woman and child in that country had not been behind the Army to support it? Japan's ordinary budget for the Army is only about 37·3 millions yen, or a little under six crores of rupees. And for so small an expenditure, she has a standing army of 167 thousand men, with reserves, which can raise it to over six hundred thousand men in times of war. We spend nearly six times as much money a year and yet in return for it we have only an inextensive force of about 230 thousand men, with about 25 thousand Native reservists and about 30 thousand European volunteers! Both on financial and on political grounds, therefore, our present unnational system of military defence is open to the gravest objection. My Lord, I respectfully submit that it is a cruel wrong to a whole people—one-fifth of the entire population of the world—to exclude them from all honourable participation in defence of their hearths and homes, to keep them permanently disarmed and to subject them to a process of demartialization, such as has never before been witnessed in the history of the world. Lord George Hamilton once told an English audience that there were millions of men in India, who were as brave as any people on the face of the earth. Leaving such material in the country itself neglected, the Government has thought fit to enter into an alliance with a foreign Power—and that an Asiatic Power, which once borrowed its religion from us and looked up to us—for the defence of India! Japan came under the influence of western ideas only forty years ago, and yet already, under the fostering care of its Government, that nation has taken its place by the side of the proudest nations of the West. We have been under England's rule longer than forty years, and yet we continue to be mere hewers of wood and drawers of water in our own country and of course we have no position anywhere else. My Lord, things cannot continue—they must not continue—much longer on so unsatisfactory a basis. Time and events will necessitate a change and true statesmanship lies in an intelligent

[*Mr. Gokhale.*]

anticipation of that change. The present Prime Minister, speaking in November last on the subject of the Anglo-Japanese alliance, observed as follows:—‘I am enough of an Imperialist, if this be Imperialism—to hold that the maintenance of the integrity of India is our affair and no one else’s; and if further measures of defence are necessary—of which I have no assurance—the appeal should be to the loyalty of the people of India and to our own capacity for organizing their defence. Is there not danger that the pride of the Indian people may be wounded and the prestige of the Empire abased in the eyes of the world by the provision, by which Japan makes herself conjointly responsible for the defence of the Indian frontier?’ My Lord, this is true and far-sighted statesmanship and my countrymen ask for nothing more than that the military problem in India be dealt with in the spirit of this declaration of the Prime Minister. The measures needed are Short Service for the Indian Army, the creation of Indian reserves, and the gradual extension, first to select classes of the community, and then, as confidence grows, to all, of the privilege of citizen-soldiership, so that they may be able, if the need ever arises, to bear arms in the defence of their own land. The Government may move as cautiously as may be necessary, but it is in this direction that it must move; and then the whole situation will be altered. Our military defence will then be gradually placed on a national basis, the Army will have the support of the nation behind it, the present military burden will be largely reduced and funds set free to be devoted to other objects of national well-being, the people of the country, instead of being condemned, as at present, merely to pay the taxes and then helplessly look on, will be enabled to feel a real and living interest in their Army, and our position in the matter will cease to wound our self-respect. Now that all fear of any immediate aggression from outside has disappeared, a trial may be given to this policy, and I feel a profound conviction within me that England will have no cause to regret its results.

“My Lord, I am free to confess that there is but little chance of any considerable change in the military policy of the Government of India being made in the immediate future, and if I have spoken at some length on the subject today, it is both because the character of our national existence is bound up with the question and also because a special appeal for a reconsideration of the policy is justified at the present juncture. I have already said that military expenditure overshadows the whole field of Indian finance, and it is a matter for further regret that even such slender resources as remain at the disposal of the Government of India after meeting the cost of the Army are not employed to the best advantage. My Lord, during the last eight years, the surpluses of the Government of India have amounted to no less a sum than 35 crores of rupees, and the whole of this money has been spent by the Government on Railways in addition to the large amounts specially borrowed for the purpose! Now I do not wish to say anything against the construction of Railways as a commercial undertaking. Till recently they used to cost a net loss to the State every year, but that has now ceased; and there is no doubt that in future years they will bring a growing revenue to the Exchequer. To the construction of Railways on a commercial basis out of borrowed money I have, therefore, no objection, though even here the claims of irrigation to a larger share of the capital raised must be recognized better than they have been in the past. But I have the strongest possible objection to our surpluses being devoted to Railway construction, when they are urgently needed for so many other objects vitally affecting the interests of the masses. My Lord, I submit that there should be some sense of proportion in this matter. Already a sum of 250 millions sterling has been spent on Railways. For many years, it was the height of ambition to the Government of India to have in the country twenty thousand miles of Railways. The mileage open to traffic today is nearly twenty-nine thousand and another two thousand is under construction. Are Railways everything, is mass education nothing, is improved sanitation nothing, that the Finance Minister should lay hands on every rupee that he can get either by borrowing or out of surpluses and devote it to the construction of Railways only? Replying to my observations on this subject last year, the Hon’ble Member said:—‘When a surplus actually

[*Mr. Gokhale.*]

accrues either from a fortunate windfall or from sources the continuance of which is not assured, then I think no more advantageous use for it can be found than to devote it to the construction of remunerative public works.' Now, with all deference I beg to say that the Hon'ble Member's proposition is an unsound one. The course adopted by the Government would be right, if there was no need of non-recurring expenditure in other directions, more intimately connected with the well-being of the mass of the people. But with such urgent needs of the country as decent school-houses for primary schools, works of sanitary improvement beyond the capacities of local bodies, and so forth, unsatisfied, I submit it is not a justifiable course to employ the proceeds of taxation for purposes of remunerative investment. That the surpluses are uncertain does not affect my contention at all. Whenever they are available, they may be devoted to the objects I have mentioned. When they are not available, the position cannot be worse than it is at present.

"My Lord, the surpluses of the last few years,—rendered possible by the artificial enhancement of the value of the rupee, and realized first by maintaining taxation at a higher level than was necessary in view of the appreciated rupee, and secondly by a systematic under-estimating of revenue and over-estimating of expenditure,—have produced their inevitable effect on the expenditure of the country. With such a plethora of money in the Exchequer of the State, the level of expenditure was bound to be pushed up in all directions. Economy came to be a despised word and increased establishments and revised scales of pay and pension for the European officials became the order of the day. Some remissions of taxation were no doubt tardily granted, but the evil of an uncontrolled growth of expenditure in all directions in the name of increased efficiency was not checked and the legacy must now remain with us. The saddest part of the whole thing is that in spite of this superabundance of money in the Exchequer and the resultant growth of administrative expenditure, the most pressing needs of the country in regard to the moral and material advancement of the people have continued for the most part unattended to, and no advantage of the financial position has been taken to inaugurate comprehensive schemes of State action for improving the condition of the masses. Such State action is, in my humble opinion, the first duty now resting on the Government of India, and it will need all the money—recurring or non-recurring—that the Hon'ble Member can find for it. My Lord, the three evils to be combated in connection with the raiyat's position are his fearful poverty, his ignorance and his insanitary surroundings. And I hope your Lordship will bear with me while I indicate very briefly the lines on which action is really needed.

"(1) First come a group of three measures in connection with the land. They must really go together, if a substantial improvement is the object in view. Of these the first is a reduction of the State demand on land, especially in Bombay, Madras and the United Provinces, and a limitation of that demand all over India. There is ample evidence to show that over the greater part of India—especially in the older Provinces—the agricultural industry is in a state of deep depression. The exhaustion of the soil is fast proceeding, the cropping is becoming more and more inferior and the crop-yield per acre, already the lowest in the world, is declining still further. And such a deterioration in agricultural conditions is accompanied by an increase in the land-revenue demand of the State! The raiyat staggers under the burden, but, under the economic conditions prevailing, cannot help submitting to it. Mr. O'Connor, late Director-General of Statistics in India, speaking two years ago before the Society of Arts in London, and speaking with all his special knowledge of Indian agriculture, said:—'It is doubtful whether the efforts now being made to take the cultivator out of the hands of money-lenders will have much effect, or even if they have the fullest effect, that they will materially improve the cultivator's position until a larger share of the produce of the soil is left in his hands and he is protected against enhanced assessment by Government officials and against enhanced rent by private landlords.' And again:—"I have little doubt that the reduction of the land-revenue by 25 or 30 per cent. if the

[*Mr. Gokhale.*]

reduction is secured to the profit of the cultivator, would be of far more value in the improvement of the class who constitute the bulk of the population and who contribute most largely to the finances of the State.' The present system is having, and can have, but one effect. It tends to keep the one industry of the country in a hopelessly depressed condition, discouraging all expenditure of capital on land and rendering agricultural improvement an impossible hope. Whatever loss of revenue such a measure may cause directly to the State will be indirectly more than made up by a material improvement in the condition of the people.

(2) Next, a resolute attempt must be made to rescue the Indian agriculturist from the load of debt that at present overwhelms him. The problem is one of vast magnitude and probably the conditions of the different Provinces will need different treatment. The best plan will be to take in hand an experiment on a sufficiently large scale over a selected area in each Province. Thus take the Deccan Districts in the Bombay Presidency. It is the opinion of competent authorities that quite one-third of our agriculturists, if not more, have already lost their lands and they are remaining on them merely as the serfs of their money-lenders. Now I would take the cases of such men first, and I would appoint a special tribunal to go round and look into each case, going behind the bond where necessary, and I would have a composition effected, either by amicable arrangement or in exercise of legal powers with which the tribunal may be armed. I would place, say, a million sterling at the disposal of the tribunal out of which advances should be made to clear the debt, to be recovered by adding about $4\frac{1}{2}$ per cent. on them to the land-revenue demand of the State— $3\frac{1}{2}$ per cent. for interest and about 1 per cent. for repayment of capital, the repayment being spread over fifty years or so. Having helped to free the man in this manner, the Government may then fairly claim to impose restrictions on his powers of alienation. Of course, this is only a bare outline and the scheme will have to be worked out in detail and examined carefully before adoption. If the experiment shows signs of success, it can be extended to other parts. If it ends in failure, well, some money will be lost, but the risk has to be taken. When Lord Lansdowne was Viceroy of India, he was so impressed with this evil of agricultural indebtedness that he is understood to have left a minute behind, expressing his opinion that the condition of the agricultural community was a most serious danger to British rule, and pointing out the necessity for immediate action. It is now fourteen years since he left India, and yet the only attempt made by the Government to deal with the problem is represented by some legislation, intended to restrict the raiyat's powers of borrowing! What may usefully be the last link of the chain has thus been made by the Government the sole link, with the result that the situation today is as grave as ever.

" (3) But these two measures will fail to do any permanent good to the raiyat, unless they are accompanied by the third measure of the group, namely, the providing of facilities which, while encouraging thrift, will enable the agriculturist to borrow on occasions for his reasonable wants at a low rate of interest. The Co-operative Credit Societies, for which an Act was passed two years ago, will not go any long way in this direction. The communal spirit is now very weak over the greater part of India, and the unlimited liability principle, which the Act insists upon, will keep substantial men from these Societies, and any number of paupers brought together will have neither the cash nor the credit to help one another. If unlimited liability is removed and a portion of the Savings Banks deposits are made available to these Societies, they may do some useful work. But what the country really needs is the establishment of Agricultural Banks, like those which have been so successfully introduced into Egypt by Lord Cromer.

" (4) Two other measures necessary for the promotion of agricultural prosperity in India, one of which has already received a good deal of attention at the hands of the Government, and the other has been recently taken up by it, are Irrigation and Scientific Agriculture. About Irrigation, I would only like to ask why it is necessary to have the selected projects carried out

[*Mr. Gokhale.*]

departmentally and why their execution cannot be entrusted, as in Egypt, to expert contractors, who would find and train the required labour, the Government exercising supervisory control only? I think in this matter, too, the Government of India may well take a leaf out of the book of that great administrator, Lord Cromer. If this were done, far more rapid progress would be made in the matter of Irrigation. As regards Scientific Agriculture, the country is watching with keen interest the steps which the Government is taking in the matter. I must, however, express one fear in this connection. If it is proposed to import European experts for the work as a standing arrangement, there will be small chance of any substantial good being done. The knowledge brought into the country by a succession of foreign experts who retire to their own lands as soon as they have earned their pension, is like a cloud that hangs for a time overhead without descending in fertilizing showers, and then rolls away. Unless promising and carefully selected Indians are sent abroad to be trained and to take the places of the imported experts in due course, such expert knowledge will never become a part and parcel of the possession of the community. Of course to begin with, a reliance on foreign experts is necessary, but care must be taken to make the arrangement only temporary.

"(5) The promotion of industrial and technical education in the country is also an urgent necessity as a remedy for the extreme poverty of our people. This field has so far remained entirely neglected, with what results even the most superficial observer can see. The sum of 2½ lakhs of rupees, provided in this year's Budget, is as nothing compared with what is needed. The country requires at least one large fully equipped Technological Institute at some central place, with Branch Institutes in the different Provinces.

"(6) I now come to the question of Primary Education. From Mr. Nathan's Report on Education, we find that in 1901-2, the total expenditure on the primary education of boys in India from the funds of the State was the staggeringly small sum of 13½ lakhs! Since then the amount has been increased, but even so, it remains most miserably inadequate, compared with the requirements of the situation. My Lord, the question of mass education in this country has been neglected much too long, and the Government must lose no more time in waking up to its responsibilities in the matter. What is needed is a clear aim and a resolute pursuit of that aim in a feeling of faith and with enthusiasm for the cause. The first step is to make primary education free in all schools throughout the country, and that can be done at once. The total receipts from fees in Primary Schools throughout India in 1901-1902 were only 30½ lakhs of rupees, so the sacrifice will not be very great. Moreover, the larger Municipal Corporations might be asked to bear a portion of this loss, so far as their own areas are concerned. The next step will be to make this education compulsory for boys in the Presidency-towns and perhaps in a few other leading towns. When the minds of the people have been accustomed to the idea of compulsion in the matter of education, the area of compulsion may be gradually extended, till at last in the course of twenty years or so from now, we have in our midst a system of compulsory and free primary education throughout the country, and that for both boys and girls. It will not do to be deterred by the difficulties of the task. Our whole future depends upon its accomplishment, and as long as the Government continues listless in the matter, it will justly be open to the reproach of failing in one of its most sacred duties to the people.

"(7) Lastly, there is the pressing need of works of sanitary improvement, such as good water-supply and drainage. As I pointed out last year, most of our towns are simply powerless to undertake such costly works without substantial assistance from the State. With the ravages of the plague in all directions and with the death-rate of the country steadily rising, the question of sanitary improvements assumes an importance which the Government cannot long ignore. The resources of our local bodies are barely sufficient for their current needs and any large capital outlay is wholly beyond them. The present dis-

[*Mr. Gokhale : Mr. Sim.*]

tribution of resources and responsibilities between local bodies and the central Government is most unfair to local bodies, and that is the explanation of the spectacle we have seen during the last few years, namely, that of the Exchequer of the Government overflowing with money, while these bodies have been in a state verging on bankruptcy. It is necessary that the Government should formulate and announce a definite policy in this matter.

"All these measures that I have briefly outlined will require a large expenditure of money—both recurring and non-recurring. But even as our resources stand at present, there is room for undertaking them all. Thus if the Army Re-organization scheme is held up or at least its initial cost is met out of borrowings, a sum from one or two millions a year will be available, and that may be devoted to a vigorous extension of primary education. The profits of coinage—averaging now about two millions a year—may supply funds for the relief of agricultural indebtedness. The famine grant, which stands at a million sterling, may, after deducting the expenditure on actual famine relief, now be devoted to industrial and technical education. The deposits in Savings Banks may be made available to Co-operative Credit Societies. And whatever surpluses accrue may be devoted to assisting local bodies in the construction of works of sanitary improvement. At any rate an important beginning can be made in all these directions, only the spell, under which the official mind has been for so many years, must be broken.

"My Lord, the improvement of the condition of the masses and the conciliation of the educated classes are the two really great problems before the British Government in India. The success or failure of England's work in this country will be determined by the measure of her achievement in these two fields. I have already spoken of the work that must be taken forthwith in hand for the moral and material advancement of the mass of our people. The task is one of great magnitude, but it is comparatively a simple one. The question of the conciliation of the educated classes is vastly more difficult and raises issues which will tax all the resources of British statesmanship. There is but one way in which this conciliation can be secured, and that is by associating these classes more and more with the government of their own country. This is the policy to which England stands committed by solemn pledges given in the past. This is also the policy which is rendered imperative by the growth of new ideas in the land. Moreover, my Lord, the whole East is today throbbing with a new impulse—vibrating with a new passion—and it is not to be expected that India alone should continue unaffected by changes that are in the very air around us. We could not remain outside this influence even if we would. We would not so remain if we could. I trust the Government will read aright the significance of the profound and far-reaching change which is taking place in the public opinion of the country. A volume of new feeling is gathering, which requires to be treated with care. New generations are rising up, whose notions of the character and ideals of British rule are derived only from their experience of the last few years and whose minds are not restrained by the thought of the great work which England has on the whole accomplished in the past in this land. I fully believe that it is in the power of the Government to give a turn to this feeling, which will make it a source of strength and not of weakness to the Empire. One thing, however, is clear. Such a result will not be achieved by any methods of repression. What the country needs at this moment above everything else is a Government national in spirit, even though it may be foreign in personnel,—a Government that will enable us to feel that *our* interests are the first consideration with it and that *our* wishes and opinions are to it a matter of some account. My Lord, I have ventured to make these observations, because the present situation fills me with great anxiety. I can only raise my humble voice by way of warning, by way of appeal. The rest lies on the knees of the gods."

The Hon'ble MR. SIM said :—"My Lord, I wish to congratulate Your Excellency's Government on the continuance of the policy of 'popular' relief and reform, to which the Hon'ble Mr. Baker introduced us last year. The abolition of the *Village Cess* will be greatly appreciated in Madras: the relief

[Mr. Sim.]

will reach every Government raiyat in the Presidency, and though the individual sums may be small, the total of 28 lakhs will be considerable; as large, for instance, as the whole Forest-revenue of the Presidency was last year. Equally appreciated will be the words in which the Hon'ble Mr. Baker expresses the desire of Government to set bounds to the extension of *Local Taxation*; it is so easy to impose such taxation, and so easy to drag anything, even Famine Relief, within any definition of it that can be devised, that the Hon'ble Mr. Baker's words, backed, as he rightly claims them to be, by deeds, will be regarded as a very welcome pronouncement.

Similarly, the increased provision for expenditure on *Forests*, and the kindly mention of the *Tungabadra Irrigation Project*, will be greatly appreciated. In regard to the former, I would again put in a special plea for all the liberality that is possible; parsimony in the case of Forests simply means postponement—postponement of all the benefits, which we expect and which we have led the public to expect, the forests will eventually yield in return for present inconvenience; liberality means hastening those benefits, and there can be few departments in which a policy of vigorous development and liberal expenditure will more rapidly repay itself. For the staff, too, I would bespeak the most favourable consideration of Government, when occasion offers, for the work of a Forest-officer is work of a high order, and the conditions under which it is carried out are exceptionally arduous.

"The prominent mention of the *Tungabadra Project* and the strong and sympathetic consideration promised to it will be read with much satisfaction in Madras; so also, I think, and over a much larger area, will be the Hon'ble Mr. Baker's assurance that in considering the relative priority of works, direct financial returns will not be allowed to obscure or outweigh the awful indirect claims of Famine. We admit, of course, that the relative claims of others must be fairly considered before the project can be sanctioned, but, sincerely as Madras sympathizes with those others in their needs, it believes that there can be few places in India where greater good can be done by the introduction of irrigation than in the tract commanded by the Tungabadra Project; 1,500 square miles irrigated, 1,500 more commanded, and five districts protected, in the heart of the famine zone, constitute, we believe, a very strong claim.

"In such a connection, the need for cheap and easy loans at once obtrudes itself, and the success which has attended the *Agricultural Bank* in Egypt shows how much liberality and simplicity of procedure may accomplish in this direction. That Bank has been but a short time in existence, yet at the end of last year it had 185,530 loans out amounting to £5,900,000, and after discharging all its preference dues, it paid dividends at the rate of $7\frac{1}{2}$ per cent. on its ordinary shares, and £15-15-0 on its deferred. It is true that the concession to the Bank is an extremely liberal one and that the Bank does not attempt to combine its money-lending business with complicated lessons in self-help and co-operative credit; still it shows what can be done and has no doubt already attracted the attention of Government. Like myself, the Hon'ble Mr. Gokhale has just drawn attention to this in his speech.

"For its share in the additional grant for *Police*—shared with the Minor Provinces, I notice—as well as for the grants for *Railways*, the *Madras Harbour*, and the like, we shall be duly grateful; and if Madras does not figure in the distribution of this year's grant for *Technical Education*, we trust it is only because the Hon'ble Member in charge is considering how much he can give us next year.

"I should like to congratulate the Central Provinces, Bengal, and Eastern Bengal and Assam, on their *Provincial Settlements*, as set out in paragraphs 215—222 of the Statement. It does not perhaps seem to be a matter with which Madras has much concern, and certainly Madras does not grudge them the liberal terms which they have obtained from the Hon'ble Member. But Madras may perhaps be excused if, comparing its own terms with theirs, it wishes that *its* turn, too, for re-settlement had still to come, instead of being past and over.

[*Mr. Sim; Mr. Hare; Mr. Porter.*]

"It was in 1903-04 that the question of revising the Settlements came up, and the terms of revision were set out in paragraph 212 of the Financial Statement of March, 1904. There it was laid down that the revision should be carried out on a general basis of Provincial receiving not more than a *quarter share of growing revenues*, and Bengal, Madras and the United Provinces were at once, speaking generally, re-settled on this basis; the other Provinces, however, had to wait till the next year, and in the meantime more liberal ideas had come in, and in paragraph 203 of the Financial Statement for March, 1905, the present Hon'ble Member, in settling Bombay and the Punjab, raised their share of growing revenues, generally, to a *half*, instead of a quarter, and in the present year (paragraphs 215-217-218) he has similarly settled the Central Provinces, and (because of the partition) re-settled Bengal and Eastern Bengal and Assam. The result is that Madras and the United Provinces remain on the old *quarter share* basis, while the other Provinces are on the new *half share* footing.

"The balance, of course, was made up to Madras by a fixed assignment, and I am not now suggesting that the total amount granted to Madras was insufficient *at the time*; but it is easy to see that, while the greater part—in the latest cases, 99 and 100 per cent.—of the provincial revenues of the other Provinces will be continually increasing, a much smaller part of ours in Madras will be similarly developing, and the rest will be absolutely stationary: we may therefore, without difficulty, foresee a time when Madras will stand at a great disadvantage compared with the other Provinces; and I trust that when that time comes the Hon'ble Member, who, of course, is well aware of these conditions, will show the same liberality to Madras that he has shown to the rest of India.

"May I, at the same time, join with the Hon'ble Mr. Logan and the Hon'ble Mr. Gokhale in asking the Hon'ble Member to make *Famine Relief* less Provincial, and more Imperial, for the present arrangement tells with great hardship on such Provinces as Madras and Bombay. Famine in Madras is of such regular and certain recurrence, that the cost of relief ought, I would suggest, in fairness to the Presidency, to be either specially allowed for in the Provincial Settlement, or shared with Imperial: to treat it as a rare and remote contingency, which may, for that reason, be fairly met from Provincial savings, is to ignore the facts, and to place famine Provinces, like Madras and Bombay, under a heavy liability, from which other and more fortunate Provinces are virtually exempt, and which falls upon the famine-stricken Province at a time when it can least be borne.

"In conclusion, my Lord, I have to thank your Excellency's Government for the consideration shown to Madras."

The Hon'ble MR. HARE said:—"My Lord, I only wish to congratulate the Government on the Budget which has been presented and to express our gratitude for the remission of the Zamindari Dāk Cess. The relief given by this remission is not to be measured merely by the comparatively small amount of tax remitted, but by the removal of the disproportional annoyance which its collection has hitherto caused."

The Hon'ble MR. PORTER:—"My Lord, I congratulate the Financial Member on finding himself at length in a position to abolish the Patwari Rate. When last year the Hon'ble Rai Sri Ram Bahadur recommended the abolition of the rate, he pointed out that the argument for the abolition was that the patwari was no longer a village servant pure and simple, but was really an officer of the Provincial Land Records Department; and that—as such—his pay should be met from Provincial revenues. There is much force in this argument. It is true that even now the patwari does perform certain purely village duties, and that theoretically there would be no injustice in requiring the village to contribute a fair share of the patwari's pay. But the present arrangement, by which the local rate contributes 25½ lakhs and Provincial revenues only some ten lakhs, is not fair. His local duties now form but a minor portion of the patwari's work. What a fair distribution of the cost of the patwari

[Mr. Porter.]

establishment between Local and Provincial would be it is difficult to say ; as not only the amount but the nature of the patwari's duties have to be considered. Probably one-third Local and two-thirds Provincial would be a fair proportion. In remitting the cess altogether the Government have not only removed a genuine grievance, but have treated the agricultural taxpayer with generosity.

"There are one or two other matters in connection with the finances of the United Provinces to which I should like to call attention.

"The enhanced annual grant for the reform of the Police will, I hope, go far towards removing the reproach that Police-officers in the lowest grade of Sub-Inspector cannot live on their present pay. But I regret that the Financial Member has not seen his way to make a lump grant for the proper housing of superior Police-officers. No improvements in pay or other prospects will suffice to attract and keep men of the required stamp, unless the quarters in which they have to spend their lives are decent and sanitary. In the large majority of our police-stations the quarters for officers do not fulfil these requirements. The Local Government is fully alive to the necessity of providing suitable accommodation. Out of the special 6½ lakhs grant, over 3 lakhs have been allotted both this year and next for police buildings. This is in addition to the ordinary budget expenditure. But the leeway to be made up is enormous; and unless some special grants can be made, a generation must elapse before the police-force can be suitably housed.

"I regret also that no special grant has been made for non-recurring educational expenditure. A statement of the present educational requirements of the United Provinces will be found in the Local Government Resolution published in the *United Provinces Gazette* of the 13th January last. By far the most urgent of all the local requirements is the need of sufficient suitable boarding accommodation in connection with secondary schools. For primary schools boarding houses are of course not required; and in case of the various colleges much has been done by Government and by private liberality to provide suitable hostels and to secure thereby a healthy university life. But to a large extent the secondary schools have hitherto been left out in the cold, and it is at these schools that boys spend several of the most impressionable years of their life. The majority of these schools are under district boards; these boards have no powers of taxation, and they are not in a financial position to provide enough boarding houses. The result is that a very large number of the boys attending those schools are under no supervision or discipline outside school hours; and their moral and physical welfare has to look after itself. I do not see how we can expect to turn out good and loyal citizens under such a system of education as that.

"Another matter to which I should like to refer is the importance of aiding municipal boards to carry out urgent sanitary reforms with a view to preventing the spread of plague. In Benares work on the sewerage and drainage scheme is stopped owing to want of funds. Allahabad cannot yet begin its drainage scheme, estimated (I believe) to cost 5 lakhs, though it hopes to be able to borrow 2 lakhs to make a start. The important hill sanatoria of Naini Tal and Mussoorie both require help; and there are about 25 towns in the plains that have prepared schemes of sanitary improvements, for which it is difficult to find the money. The prevention of plague is not a purely local concern. The subject is one of supreme importance to the Provincial and to the Imperial Governments. Government might well assist local bodies in their efforts either by grants or by loans free of interest. The Local Government is powerless as it has not the money.

"I have mentioned these three matters, not because they exhaust the needs of the United Provinces, but for two reasons. In the first place, the expenditure required to meet these needs is non-recurring, and can therefore most fitly be met by grants from surpluses. The second reason is that no one but district officers like myself, who are in immediate touch with the people, can know how urgent these local needs are.

"It may perhaps be objected that the United Provinces have their allotted heads of income and that special grants over and above that income are doles,

[*Mr. Porter; Rai Sri Ram Bahadur.*]

and—as such—are opposed to sound finance. To that objection—if it were brought—there are two answers. In the first place, the United Provinces ask for no doles. Those provinces contribute more largely, I believe, than almost any other province to the Imperial Government; and all that they ask is that if in any year the Imperial Government has more money than it requires, a portion of their contribution should be returned to the United Provinces for local expenditure. The second answer is that though the new contract is more favourable to the provinces than its predecessor was, the Provincial revenues are still insufficient to carry on the administration with reasonable efficiency, and at the same time to meet the cost of those reforms which are admitted to be urgently needed. To make matters worse the last two years have been very unfavourable, and Provincial Revenues have suffered severely. In 1904-05 a cold blizzard of unprecedented severity caused enormous loss to the crops throughout nearly the whole of the provinces. This year the rains have failed over a considerable area, and relief works on a large scale have had to be started in some districts. According to the latest accounts some 170,000 persons are in receipt of Government relief. The Provincial treasury is so depleted that it is unable to meet the cost of these relief measures, which is estimated to amount to—this year and the next—some 26½ lakhs. The truth is that the Provincial income is insufficient for Provincial needs. This fact will have to be faced sooner or later. In the interest of the Provinces the sooner it is faced the better.”

The Hon'ble RAI SRI RAM BAHADUR:—“My Lord, it is a matter of great satisfaction that the first year of Your Excellency's administration should be signalised by the presentation of a Budget statement disclosing many pleasant features. The Hon'ble Mr. Baker is to be congratulated, because he has, since his assumption of the guardianship of the public purse, been able to present two consecutive Budgets in which the surpluses have been properly utilized and partial relief given to the Indian taxpayers by remission of taxation.

“GENERAL REMARKS.

“It is regrettable that the partial failure of the last monsoons has affected seriously the agricultural situation in the United Provinces, the Punjab, some of the districts of Bombay, Rajputana and parts of Madras. Necessity has thus arisen for expenditure on Famine Relief and for remissions and suspensions of revenue in the affected tracts. The consequent decrease in land-revenue has diminished the amount of surplus, and thus the resources at the disposal of Your Excellency's Government for improvement of administration and lightening of taxation have been very much curtailed. It must, however, be acknowledged that the manner in which the available surplus of this year is going to be applied has evoked a feeling of approbation. The sound and beneficial policy of relieving a portion of the heavy burden on land, by the abolition of some of the cesses, inaugurated by your distinguished predecessor, and a small beginning in which direction was, last year, made by the remission of the Famine cesses in Northern India and the Central Provinces, has, it must gratefully be noted, been continued and considerably expanded by Your Excellency's Government. The abolition of the Raiyatwari Village Cess in Madras, the Zamindari Dāk Cess in Bengal, the Village Officers' cess in Coorg and the Patwari Cess in the United Provinces, the Punjab, the North-West Frontier Province, the Central Provinces, Ajmer and in Sambalpur, has afforded relief to a class of taxpayers who required relief in this direction so urgently, who have been looking for it patiently so long and from whom it could no longer be withheld with justice, especially when the Indian finances have now for some years past been in such prosperous condition.

“THE PATWARI CESS.

“My Lord, the abolition of the Patwari Cess will be hailed with unmixed feelings of gratefulness by the agricultural taxpayers of the United Provinces. Since the remodelling of the system which completely altered the position of

[*Rai Sri Ram Bahadur.*]

the Patwaris from servants of the village to servants of Government, the levying of any cess from the classes connected with land, for defraying the expenses of their remuneration, was wholly unjustifiable. On the occasion of previous Budget discussions, at this Board, I have been urging the abolition of the Patwari rate. In doing so I simply echoed the universal voice of the payers of that rate in the United Provinces; and I am glad to notice that the same feeling existed in the minds of the officials also, as the remarks just made by the Hon'ble Mr. Porter, the official representative for those provinces, shows. In reply to the remarks made by me on this subject during the last year's Budget debate, and in defence of the action of Government for the retention of this rate, the Hon'ble Mr. Baker was pleased to say that 'the history of the patwari-cess in the United Provinces' threw "grave doubts on the reality of the benefits to be derived by the cultivating classes from the abolition of the cess.' But I beg to say that no such doubt ought to have been entertained, as the enactment (Act IX of 1889) governing the appointment of Patwaris empowered the landlords to realize from the actual cultivators of the soil a moiety of the cess paid by them to Government; and the landlords exercised this power to the full extent. Your Excellency's Government has earned the gratitude both of the land-holding and the cultivating classes who will be benefited equally by the relief now afforded them by the remission of the Patwari cess.

" WANTS OF THE UNITED PROVINCES.

" My Lord, with Your Excellency's permission, I would like first to notice briefly those portions of the Financial Statement which have a direct bearing on the United Provinces—the Provinces which I have the honour to represent, and to urge, for the consideration of Your Excellency's Government, some of the most pressing local requirements and the necessity for enlarging the amount at present allotted to the Provincial Exchequer for expenditure under the settlement now in force.

" I find that in the Budget Estimates—

- (1) provision has been made for Famine Relief and for suspensions and remissions of revenue;
- (2) an additional grant of three and a quarter lakhs has been given for carrying out the reforms recommended by the Police Commission, and
- (3) a sum of Rs. 30,000 has been given for the expansion of the mechanical apprentice class at the Roorkee College.

" As regards the first item, I beg to say that the Provinces have hardly had breathing time to recover from the injurious effects of the unprecedented frost of last year's Winter; the partial failure of the rains in the last rainy season and the keeping off of the Winter rains, too late to retrieve the lost position, have rendered the agricultural outlook in many parts very gloomy and serious. No less than eight districts, or portions of districts, comprising an area of 10,504 square miles, with a population of 3,337,000, have been declared by Government as affected by famine, and the number of persons now on the Relief Works in the affected areas is about 200,000. It cannot, however, at present be said with certainty whether the sum allotted in the Budget will suffice for the purpose.

" The three items described above are the only additional allotments. The Imperial Government has made no further additions to the amount at the disposal of the Local Government to meet the increasing expenditure required for sanitary, educational, and other administrative wants of the Provinces. Indeed, my Lord, the absence of any additional grants in the Budget allotments, for the removal of some of the most pressing needs of the Province, has, I must confess, engendered a feeling of great disappointment. I beg to mention some of the most important matters deserving immediate attention, but which, for want of funds, cannot be taken in hand.

[*Rai Sri Ram Bahadur.*]

"SANITATION.

"The United Provinces have a greater number of big and thickly populated cities and towns than any other province. The carrying out of sanitary measures in these urban areas does therefore occupy a most prominent place in the list of administrative works. The necessity for these measures has now acquired a greater importance in order to prevent and alleviate the severity of plague and other epidemic diseases. These cities and towns require funds to demolish their insanitary quarters, to improve the paving of their roads, alleys and side walks, to widen narrow streets, and to construct and perfect their systems of drainage. Some of the larger municipalities have already commenced to improve and construct their drainage system, but it is impossible for them to bring them to completion without substantial aid from the Government. The incomes which these and other municipalities derive from local sources do hardly suffice for their ordinary expenses. Without Government assistance the measures of sanitation so necessary for the improvement of the health of these towns cannot be taken in hand. In the Home Department Resolution No. 79, dated the 17th January, 1906, Your Excellency's Government has announced the policy that the municipalities and local bodies should be encouraged and assisted in carrying out measures of sanitary improvement.

"EDUCATION.

"The next matter which deserves an equal—if not greater—share of attention is Education. A considerable increase in the sum now allotted is necessary for the expansion of Education in all its branches, but those mentioned below require special consideration.

"*Secondary Education.*—The special grant of 6 lakhs, out of the 35 lakhs to the whole of India, has enabled the Educational Department to give a good start in Primary Vernacular Education; a still larger expenditure is required to bring the United Provinces abreast with other provinces. But I am sorry to say that Secondary Education has not received the care which its importance deserves. The grant for Primary Education being ear-marked, no portion of it can be applied to improve Secondary Education. In its last review on Education the Local Government, referring to Secondary Education, remarked that in no branch of public instruction is reform more urgently required. The local University has been trying to raise the standard of collegiate education; but this object cannot be attained as long as the students from the institutions imparting Secondary Education go to the colleges with meagre attainments and with no solid training. My Lord, the situation is so truly depicted in the concluding portion of those remarks that I cannot refrain from quoting them *in extenso* :—

'There can be little doubt that the policy of concentrating expenditure on Primary Education and leaving English Education to look after itself has been pushed to undue lengths, with results that were certainly never contemplated by the Government of India, and, in fact, are productive of general dissatisfaction. The remedy is to improve the position of teachers so as to attract good men, to improve the accommodation and surroundings of the schools, to build decent Boarding Houses, and to make large grants to aided schools. The Local Government is doing what it can, . . . but a full measure of reform must await a grant from the Imperial Exchequer.'

The sum annually required by the Local Government to improve the position of Secondary Schools is five and-a-half lakhs to be applied to the following objects :—

- | | |
|--|----------|
| (1) Improving the teaching staff in English Schools | 1,50,000 |
| (2) Increasing grants-in-aid to English Schools | 1,00,000 |
| (3) Improving the teaching staff in Vernacular Secondary Schools | 1,00,000 |
| (4) Grant for buildings | 2,00,000 |

[*Rai Sri Ram Bahadur.*]

"But on this point also the Budget Statement is totally silent and the prayer of the Local Government for additional allotments has not met with a favourable response.

"*Female Education.*—No Province is more backward in female education than the United Provinces. In the Quinquennial Report on Education in India (1897-98 to 1901-02) it was noticed that, except for the Frontier Province, the United Provinces stood at the bottom of the list, with only one girl out of every 203 attending a Primary or Secondary School. Matters have not improved much in the succeeding three years, for the Provincial Education Report, for the year ending 31st March 1905, gives the number of girls attending schools as follows:—

Secondary Schools	3,304
Primary Schools	18,309
Private Institutions	4,037
TOTAL									<u>25,640</u>

These figures give the very insignificant percentage of '74 only for every hundred (in other words seven girls in a thousand) of the female population of the school-going age. This deplorable condition of female education in the Province attracted the attention of the Local Government, and in the last year a committee of Indian gentlemen was appointed to go round and visit institutions imparting education to females in the different provinces, and submit a feasible scheme suitable to the condition and wants of the United Provinces. In due course the Committee submitted their Report containing suggestions for the improvement and expansion of female education; and the scheme proposed by them, when in full working, was ultimately to cost about 6 lakhs of rupees a year. To give the scheme a start a much smaller sum was required, but the Local Government in its letter dated 22nd February last addressed to the Director of Public Instruction, though valuing greatly the proposals of the Committee, expressed its inability to give effect to those proposals in their entirety for some time to come; and said that it had no funds to make any further allotment whatever for the purpose during the year 1906-07.

"My Lord, these facts speak for themselves and require no comment. The situation is deplorable indeed when not even a beginning can be made in the improvement of female education for want of funds.

"*Other Educational Reforms and Measures.*—In its Resolution reviewing the educational progress of the last year, the Local Government requires about 2½ lakhs of rupees as a recurring, and 14½ lakhs as non-recurring, for additional expenditure on reforms considered to be most urgently needed in collegiate education and in the inspecting staff. This demand of theirs also has received no favourable consideration.

"The educational awakening in the United Provinces is unprecedented. To commemorate the Royal visit, the establishment of a Medical College was decided upon, and within the short space of only six weeks no less than 12 lakhs of rupees were subscribed spontaneously for that purpose. 'Private liberality,' says the Local Government in its review on the last Educational Report, 'has done much. Within the last three years several lakhs of rupees have been spent on the schemes for the development of Arabic and Sanscrit, on the endowment of scholarships and on the building of Schools and Boarding Houses . . . Including these sums (19,55,500), and contributions from missionary bodies and donations . . . the subscriptions of the public for education in the Province must in three years have amounted to nearly 40 lakhs of rupees.'

"Surely, my Lord, a people who have shown their eagerness for educational advancement in such a practical way deserve every encouragement from the Government who should help them in their efforts with liberal pecuniary aid.

"The aggregate amount of money received from all sources and spent on the education of each unit of population in the United Provinces is very low

[Rai Sri Ram Bahadur.]

as compared to all other provinces, with the exception of the North-West Frontier Province. The tabular statement given below (compiled from the returns contained in the various Provincial Educational Reports for the last year) will show that the United Provinces spent only Rs. 80 for each thousand of their population, whilst Bombay, which tops the list, spent Rs. 245 for the same unit.

Table showing for each Province (excluding Native States), the total expenditure on education from Provincial Revenues, Local and Municipal Funds and the special grant of Rs. 35,00,000; and the expenditure per thousand of the population according to the census of 1901.

Province.	Provincial Revenues.	Local Funds.	Municipal Funds.	Provincial share in the special grant of Rs. 35,00,000.	Total of columns 2, 3, 4 and 5.	Population according to the census of 1901.	Expenditure per thousand of population.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.		Rs.
Bombay	26,79,430	9,72,209	4,51,887	5,00,000	45,53,526	18,550,561	245
Burma	9,34,388	2,53,605	2,42,626	2,00,000	16,41,619	10,190,624	156
Central Provinces and Berar	6,29,478	6,50,736	1,09,260	2,00,000	15,95,485	12,750,662	126
Punjab	13,26,732	5,76,036	3,10,443	3,00,000	25,44,111	20,370,339	125
Assam	3,08,427	3,28,298	8,500	1,00,000	7,45,225	6,126,543	121
Madras	25,51,641	9,45,280	2,69,829	6,00,000	43,66,750	38,209,436	114

"PROVINCIAL SETTLEMENT.

"On the occasion of previous Budget debates I have tried to show that the United Provinces are not being fairly treated by the Imperial Government in the matter of allotments made to them for local expenditure out of the revenues raised by them. When the last Provincial settlement was being made we hoped that it would be effected in such a way as to put the Local Government in possession of funds which would suffice not only to cover the actual expenses, but leave a good margin to enable it to meet the ever-increasing wants of a progressive Province, in matters administrative, sanitary and educational. In the Financial Secretary's Memorandum appended to the Budget the estimated revenue for the previous provincial settlement is given at Rs. 3,42,62,000 and the expenditure also comes to the same amount. For the present 'quasi-permanent settlement' the figures both for revenue and expenditure are Rs. 3,66,64,000. No doubt the Government of India have now and then been helping the provincial exchequer with additional grants to meet certain unforeseen charges, such as Famine Relief and remissions of revenue, etc.; but, my Lord, though the sums thus doled out serve the purpose for which they are given, yet unless the allotment is increased by 50 lakhs a year the provincial wants cannot be adequately relieved, nor can improvements of a satisfactory nature be effected in the various administrative measures required to promote the material prosperity and educational advancement of its people. That the United Provinces have been starved in the past admits of no doubt, but that is no reason why the same state of things should be allowed to continue in the future. Justice requires that they should receive the same treatment financially as the other provinces of India. They contribute no less than a quarter of the total amount of land-revenue payable by the whole of British India. They do not receive as liberal a share in certain heads of divisible revenue as the other provinces do. The subjoined table will show the approximate shares which the different provinces receive

[*Rai Sri Ram Brhadur.*]

respectively in those heads of revenue; these shares have been calculated from the figures given in Finance and Revenue Accounts of the Government of India for the financial year 1904-05 at pages 6-7, 18-19 and 22-23 :—

Province.	HEADS OF DIVISIBLE REVENUE.					
	Land Revenue.	Stamp.	Excise.	Assessed taxes.	Forest.	Registration.
United Provinces.	$\frac{1}{4}$	$\frac{1}{2}$	$\frac{1}{4}$	$\frac{1}{4}$	$\frac{1}{4}$	$\frac{1}{4}$
Bengal . . .	$\frac{3}{8}$	$\frac{1}{2}$	$\frac{7}{16}$	$\frac{1}{4}$	$\frac{1}{4}$	1
Central Provinces	$\frac{7}{8}$	$\frac{3}{4}$	$\frac{1}{4}$	$\frac{1}{2}$	$\frac{1}{2}$	$\frac{1}{2}$
Burma . . .	$\frac{3}{4}$	$\frac{3}{4}$	$\frac{1}{3}$	$\frac{1}{2}$	$\frac{1}{2}$	$\frac{1}{2}$
Punjab . . .	$\frac{6}{7}$	$\frac{3}{4}$	$\frac{1}{4}$	$\frac{1}{2}$	$\frac{1}{2}$	$\frac{1}{2}$
Madras . . .	$\frac{1}{2}$	$\frac{1}{3}$	$\frac{1}{4}$	$\frac{1}{4}$	$\frac{1}{4}$	1
Bombay . . .	$\frac{7}{8}$	$\frac{3}{4}$	$\frac{1}{4}$	$\frac{1}{2}$	$\frac{1}{2}$	$\frac{1}{2}$

A glance at this table will show that the United Provinces' share in land-revenue is only one-fourth, while the shares of the more favoured provinces range from one-half to seven-eighths. Under head Stamp four provinces get three-fourths, while the United Provinces get only one half. Excise gives a larger share to Burma and Bengal—that of the last-named being seven-sixteenths, *i.e.*, a little less than one-half—than given to the United Provinces which get only one-fourth. In Assessed Taxes no less than four provinces get one-half, but the United Provinces get only a quarter. Under the head Forest four provinces get one-half, but the United Provinces receive only a quarter. Under no head is this difference more visible than Registration. Two provinces get the entire revenue, others get a moiety, the United Provinces alone getting only a quarter.

"The total receipts under the different heads of divisible revenue for the United Provinces in 1904-05 were as follows:—

	Land Revenue.	Stamps.	Excise.	Assessed Taxes.	Forest.	Registration.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Total amount . . .	6,31,00,000	84,46,000	1,02,00,000	20,90,000	23,97,000	4,54,000
Imperial share . . .	4,57,00,000	42,23,000	76,68,000	15,76,000	17,97,000	3,40,000
Provincial share . . .	1,73,00,000	42,23,000	25,00,000	5,13,000	5,99,000	1,13,000

If the United Provinces' share in land-revenue alone be equalised to those of the more favoured provinces, their finances will be placed in a satisfactory financial condition. The same object can also be attained by the equalisation of the United Provinces' share in two or three other heads of revenue, say Stamp, Excise and Assessed Taxes, with those of other provinces, who are more favourably treated in this respect.

"INDUSTRIAL EDUCATION AND INDIGENOUS INDUSTRIES.

"My Lord, one of the highly disappointing features of the Budget Statement is that only a very small addition has been made to the amount to be spent on technical and industrial education; the total additional sum for the whole of British India being Rs. 2,54,000 only. It is hardly necessary to state that the

[*Rai Sri Ram Bahadur.*]

addition now made is wholly inadequate when we take into consideration the great importance of the matter, the gravity of the situation, the large interests at stake, the incalculable injury which the absence of a proper and well-organised system of technical and industrial education has done to the material condition of the people, the previous neglect by Government in this direction, and lastly though large surpluses have been accruing since the last seven or eight years yet this branch of education excepting agriculture has not been further advanced. And this paltry sum of 2½ lakhs of rupees has been given to only four provinces and for specified purposes.

"My Lord, opinions may differ as regards the causes—economic or otherwise—which have brought about the poverty of the masses of the Indian population; they may differ also on the question whether the people are getting poorer or richer, but there can be no diversity of opinion as to the fact that the great masses of the people of India are really poor. No better or higher authority can be cited on this point than Your Excellency's distinguished predecessor Lord Curzon himself, who, when summing up the Budget Debate in 1903, said as follows:—

'I do not wish it for a moment to be thought . . . that there is no poverty in India. Far from it. There is enough, and far more than enough. There is a great deal more than anyone of us can contemplate with equanimity or satisfaction.

"Such a conclusion must force itself irresistibly upon the mind of every impartial observer of the state of affairs in this country. The whole of the vast population of India may be divided into three classes—the upper, the middle and the lower. The upper class consists of a handful of big zamindars, rich merchants, and holders of important Government offices. They may be left out of consideration as they form only an infinitesimal portion of the population. As regards the middle classes, who form the backbone of the nation, a large number of them look to service or one of the professions as their only haven. But these walks of life cannot absorb any appreciable number of them; they have very slender chance of earning even a humble livelihood, as trade, commerce and industry are practically shut to the majority of them. If we descend to the lower classes—the vast mass—we are confronted with a spectacle of poverty which, as Lord Curzon said, is 'a great deal more than any one of us can contemplate with equanimity or satisfaction'—and these lower classes form more than 80 per cent. of the three hundred millions of the population of India. In days gone by a goodly number of them had either agriculture or an independent calling of their own as means of livelihood. They either tilled the soil themselves, or were employed by the agriculturists as labourers, or followed some handicraft. The only employment now available to the great majority of the population in the rural areas is either cultivation or labour. The lot of the cultivator, though a little better, is not the less hard or less precarious than that of the labourer. The majority of the peasant classes is involved in deep and inextricable indebtedness, and if the condition of the agricultural labourer is miserable in ordinary times, it becomes simply unbearable, when by the least vicissitude of the season there is a stoppage or cessation of work in the fields. The labouring classes are in a chronic state of poverty hardly raised above the point of starvation.

"The problem of a few thousand of the unemployed in England is deeply exercising the minds of His Majesty's Ministers, but here in India millions of human beings, also subjects of the same Sovereign, are without employment and sufficient food. This problem of the unemployed in this country, I humbly submit, should engage the serious attention of the Government.

"My Lord, one of the most disastrous and far-reaching effects of the great famine of 1877 was that vast numbers of the artisan and industrial classes, finding their occupations crippled or gone altogether, forsook their hereditary callings and betook to agriculture as a means of subsistence. This combined with foreign competition dealt a death-blow to native industries and handicrafts. A great portion of the rural population has thus been driven to fall back upon land,

[*Rai Sri Ram Bahadur.*]

and adopt as their calling agriculture, the success of which in India, more specially in those parts where the means of artificial irrigation are deficient or non-existent, depends largely on the downfall of rain at seasonable times and in suitable quantities. A fierce competition for land for agricultural purposes has sprung up and pressure on it has increased to an alarming magnitude.

"In order to protect the rural masses against the consequences of drought and to improve their condition to resist the effects of famine, the first Famine Commission in their report of 1880 suggested (1) extension of means of irrigation wherever it was practicable with advantage, and (2) improvement in the methods of agriculture. Both these subjects have now been taken in hand by the Government and are receiving due consideration. As regards the first, recommendations of the Irrigation Commission are being carried out in several parts of the country. With regard to the second, steps have already been, or are being, taken to establish institutions for scientific research, for imparting instruction in scientific and practical agriculture and for introducing measures calculated to improve the indigenous methods. Liberal allotments for these purposes have been made to the different Local Governments. The provincial Departments have been awakened to their real duties and it is hoped that, within a reasonable period, lasting and extensive improvements will be effected in the agricultural methods of the country, and which would help to remove the poverty of the rural classes to a considerable extent.

"It is an historical fact that only a hundred and fifty years ago India was industrially one of the foremost countries in the world. Not only did it supply its own cotton and silk fabrics, its metal utensils, its sugar and other industrial products, but exported many of these articles to foreign countries, including the British Isles. But the adoption of the policy of protection by the ruling country in days gone by and other potent causes have dealt the death-blow to the once flourishing industries of India, and alas! her people have now been reduced to the condition of a purely agricultural nation. The figures given in the last Census Report reveal the very disquieting fact that the means of livelihood of a great majority of the Indian population is agriculture. Roughly speaking, of the total population of 300 millions, no less than nearly 192 millions are returned as having agriculture as the means of their subsistence. This indicates that out of every hundred people no less than nearly 66 live by agriculture. A merely agricultural nation, my Lord, which depends to a very large extent on the manufactured goods of other countries, can never rise in prosperity. 'An agricultural nation,' observed Frederick List, the eminent German economist, 'is a man with one arm, who makes use of an arm belonging to another person, but cannot be sure of having it always available. An agricultural manufacturing nation is a man who has both his arms of his own and at his disposal.' The first Famine Commission, in their report, alluded to above, noticed with concern 'that at the root of much of the poverty of the people of India, and of the risk to which they are exposed in seasons of scarcity, lies the unfortunate circumstance that agriculture forms almost the sole occupation of the mass of the population, and that no remedy for the evils can be complete which does not include the introduction of a diversity of occupations, through which the surplus population may be drawn from agricultural pursuits, and led to find the means of subsistence in manufacture or in some such employments.' My Lord, this was the state of things in 1880; more than a quarter of a century has passed away since then. Has any substantial, enduring and appreciable improvement taken place in the condition of the majority of the people, regarding whom the above remarks were made? I am deeply grieved to say that the only answer which can be given to this question is in the negative. It is true that some people have found employment as operatives in the mills established since 1880, in the mining industries recently introduced and on the extensive lines of railways opened since that time. But, my Lord, when the fact is taken into consideration that in the last census (1901) the persons whose means of subsistence is agricultural labour came to about 35½ millions—leaving out the agriculturists proper—the number of men who have found employment in the newly established mills, mines and railways sinks into insignificance, and it cannot be said that any appreciable change for the better in the general condition of that class of people has taken place.

[*Rai Sri Ram Bahadur.*]

"The question of industrial education has sometimes been mooted, but it has never engaged the attention of Government to the extent which its importance demands. Your Excellency's predecessor appointed a Committee in 1901, which was directed to visit the different Provinces with a view to enquire into the advisability of establishing Industrial Schools at suitable places and to advise Government, after consultation with local educational officers and others, what in the opinion of the Committee would be the best means of establishing such institutions. The constitution of the Committee had, however, one great drawback—it had no Indian on it as a member. The Committee visited various industrial centres and the head-quarters of the Provincial Governments, held local conferences, collected much useful and valuable information and finally submitted their report. That report embodied proposals which did not commend themselves to the Government of India, and in the Home Department Resolution of 14th January 1904 those proposals were characterised as not fulfilling the requirements laid down in the instructions given for the guidance of the Committee. The recommendations of the Committee were described as open to serious objections. The said Resolution laid down certain lines according to which Local Governments were desired to take action with regard to Industrial Schools as well as the adoption of means to produce better handicraftsmen. But the solution of the problem was left to Local Governments.

"My Lord, this was in 1904; since then the Government has created a new bureau specially devoted to Commerce and Industry, and has placed it under an officer who is possessed of an intimate knowledge of the requirements of the various Provinces and who by his broad sympathies is fitted to advance the cause of industrial training and of the indigenous industries. My Lord, the subject divides itself into two branches; first, industrial education, and, second, revival and creation of indigenous industries. It is hoped that both these matters will receive a more careful attention from Your Excellency's Government than they did during the late *régime*; that prompt, well-defined and systematic action will be taken, and means devised for the resuscitation, promotion and encouragement of indigenous industries, for starting industrial schools where none exist, and for placing the existing institutions on a more useful and efficient footing. In order to attain these objects the appointment of special expert officers, European and Indian, both under the Central and Local Governments, appears to me to be a necessary step. These officers should devote the whole of their time to the subject. What I beg most earnestly to submit is that not only would Your Excellency's Government be pleased to devote their best attention to this matter, but would so place sufficient funds at the disposal of the Provincial Governments to enable them to carry on a well-defined, progressive and gradually expanding system of technical and industrial education. No time should be lost in adopting measures, in addition to those already taken, to resuscitate dying industries and manufactures, and to develop and expand those which are in existence, so that every possible resource of the country may be profitably tapped and utilized, and a substratum of wealth, among the people, may be created, which would enable them to tide, over without great suffering, calamities like famine and scarcity. The adoption of such measures will not only improve the material condition of the people, but will also save, to a great extent, the large expenditure which the Government incurs on such occasions and for the recoupment of which recourse is not unfrequently had to harassing taxation. The considerable sums which Governments of other civilized countries devote to Industrial Education and to the promotion and encouragement of indigenous industries place in very unfavourable light the very small amount which is devoted to this purpose in this country. My Lord, the people of India entertain a very sanguine hope that Your Excellency's Government will be pleased to take a more extensive and more vigorous action in the matter of technical and industrial education and of the revival, establishment and development of indigenous industries. This hope of theirs is strongly fortified by the fact that one of the first measures taken by Your Excellency was the appointment of a Committee to enquire into and report on the question of purchasing supplies and stores for Government Departments from local manufacturers. The Resolution appointing the Committee and indicating the lines to be followed in purchasing stores of local manufacture has

[*Rai Sri Ram Bahadur.*]

in some quarters been styled as the 'Swadeshi' Resolution. The sympathetic policy indicated in that Resolution will, when carried out, no doubt give great impetus and encouragement to local industries.

"Before I conclude my remarks on this subject, I beg to bring to Your Lordship's notice that the recent action of some of the Government Departments is not calculated to encourage local industries. I refer particularly to supplies of warm clothing issued, through the Army Clothing Department, to the troops; although worsted socks of good make and finish could be supplied by the Cawnpore Woollen Mills, yet, I am told, a very large order has just been sent Home without giving the said mills or any other Indian firm a chance to submit a tender for supplying that article. When the Cawnpore Woollen Mills asked for a specification to enable them to submit a tender, they were told that none was available. Articles imported from England have to be paid for long before they can be brought into use; and they cannot be rejected if found inferior in quality. The English manufacturers pay no income tax in India, while the Indian mills, by whom such tax is paid, are deprived of the profits which they would make by getting such jobs.

"INCOME-TAX.

"My Lord, there is one item of income which requires special explanation. While presenting the Budget Statement for 1903-1904, Sir Edward Law anticipated a decrease of £240,000 = ₹36,00,000 in the receipts under the head of Income Tax, from the rise of the taxable limit of incomes to ₹1,000. For the year preceding, the Accounts gave the total collections under the head of Assessed Taxes as amounting to ₹2,11,56,423. In the first year after the remission this amount fell to ₹1,82,19,976. But from the next year the amounts began to rise annually; in the year 1904-1905 it reached to ₹1,90,47,032, and for the current year (1905-1906) it is estimated to come to ₹1,96,33,000. For the coming year it is estimated that this item of revenue will yield ₹2,01,48,000. A glance at these figures raises in one's mind a very strong suspicion that many persons who ought to have been exempted either have got no exemption at all or that they are being reassessed. The increase of more than 19 lakhs in the estimated income for the year 1906-1907 over that of 1903-1904 appears to be otherwise inexplicable.

"GRADE PROMOTIONS OF SUBORDINATE, JUDICIAL AND EXECUTIVE OFFICERS.

"There is one matter connected with the public services in India to which I beg to invite the special attention of Your Excellency's Government. Under Chapter VI of the Civil Service Regulations grade promotions are allowed to the members of the services enumerated therein, but the subordinate judicial and executive branches of the Provincial Service are excluded from that category; the result is that Munsifs and Subordinate Judges in the judicial branch and Deputy Collectors, Sub-Deputy Collectors and Tahsildars in the executive branch, do not get any temporary grade promotions. These classes of public servants yield to none in their devotion to duty and the performance of the work entrusted to them. In fact, it is they on whom the great bulk of the executive and judicial work in the districts and the sub-divisions falls. The allotment of small sums to each of the provinces will suffice to cover the cost of giving temporary grade promotions to these hard-worked public servants. The bestowal of this privilege will be highly appreciated by them and will give them an incentive to work still better.

"APPOINTMENT OF INDIANS AS ASSISTANT ENGINEERS.

"There is another question relating to the public service in India to which I would draw Your Lordship's attention. It is the appointment of Assistant Engineers to the Indian Public Works Department made in England by the

[*Rai Sri Ram Bahadur.*]

Secretary of State for India. Until recent years the door of competition for entrance into the Public Works Service of the Imperial branch was open to such Indians as had the means and the enterprise to compete for those appointments by entering the Royal Engineering College at Cooper's Hill. Lately the number of appointments open to Indians was limited to two. The notices issued by the Secretary of State during the last two years inviting applications from candidates for appointment as Assistant Engineers expressly excluded the Indians, but as the appointments advertised for were in addition to those to be made from the Royal Engineering College at Cooper's Hill, the appointments which were open to Indians, as pointed out by the Hon'ble Sir Denzil Ibbetson during the Budget discussions last year, remained untouched. The Cooper's Hill College is going to be closed, I think, after this year: the Indian public are anxious to know what steps the Government is going to take in order that the appointments which can now be secured by Indians will remain open to them in future when the Cooper's Hill College ceases to exist.

"ACCOMMODATION FOR THIRD CLASS RAILWAY PASSENGERS.

"My Lord, there is one matter connected with the Railway administration to which the Indian public attach great importance, and therefore I consider it my duty to bring it to Your Lordship's notice. There has been a complaint now of long standing that the number of carriages for third class passengers is insufficient on almost all the railway lines, and falls much below the requirements of the constantly growing traffic. This drawback is most injuriously felt when there is a great pressure of third class traffic, specially on the occasion of great gatherings at the religious places. The inconvenience and discomfort to which third class passengers are put, and the great risk of falling victims to epidemic diseases which they incur because of the overcrowding in the carriages, and the long time they have to wait before they can find accommodation in a train, are matters which pass description. It is not an infrequent sight to find the passengers huddled together in trucks and waggons intended for carrying goods. These goods waggons have sometimes labels attached to them limiting the number of passengers to be accommodated in the hot and cold weather, but this injunction is more honoured in the breach than in the observance. My Lord, it is the third class passengers who contribute the large sums which go to swell the railway earnings in coaching traffic. They being voiceless cannot give utterance to their grievances; their case therefore deserves the greater attention. In order to remove their just grievances and to minimise their discomfort and inconvenience, it is necessary that the number of third class carriages on the principal lines should be largely increased. There can be no excuse now for not increasing the number of this class of carriages, as large yearly surpluses have been accruing to those railways, a portion of which can be applied to no better object than providing sufficient accommodation for the class of passengers who contribute so largely to their earnings.

"My Lord, before I conclude I beg to say a few words on the reduction of postage on letters. The time, in my opinion, has come when the minimum charge should be reduced from half-an-anna to one pice. The concession made to the public, by increasing the weight of letters to be carried for half-an-anna, is not of much benefit to them, as half-tola weight letter paper is used more generally than paper exceeding that weight. But by the reduction of postage from half-an-anna to one pice real benefit will be conferred on the public. Receipts of the Postal Department have been increasing steadily every year, and after deducting all expenses, large annual savings have been accruing to Government. In the Financial Secretary's Memorandum the increase for the year about to close is estimated at a little over 15 lakhs, and for the ensuing year it is anticipated to reach nearly 19 lakhs. No apprehension should be entertained of any ultimate loss of income from the concession. Past experience of the working of the Postal Department has shown that

[*Rai Sri Ram Bahadur ; the Maharaja of Darbhanga.*]

whenever any concession has been made the increase in the receipts has always exceeded the anticipated loss."

The Hon'ble THE MAHARAJA OF DARBHANGA said :—"My Lord, it has become the custom for unofficial Members of Council like myself to take advantage of the yearly discussions upon the Budget to lay before the Government of India their submissions upon questions of internal administration in which they feel themselves to be interested. In past years there have been occasions more than one in which it has been impossible to avoid controversy or, at all events, serious disagreement with the policy of Government. Today I am glad to recognise that we are meeting in an atmosphere of rest and calm. As the Secretary of State for India observed, in his suggestive speech in the House of Commons some weeks ago, the time has come to allow India to take breath : and we in Bengal at any rate are glad to think that in those words we have discovered the keynote of the policy which Your Excellency intends to pursue in internal affairs. But we are not without our hopes also of progress upon the lines of genuine sympathy and mutual trust which stand revealed by Your Excellency's public utterances. We are in no hurry. The bustle and excitement of the past seven years have cured even the most advanced of Indian reformers of any desire in that direction : but we are nevertheless full of anticipations. Year by year the educated class in India is growing : and while we take a pride in our connections with England, and are grateful for the privileges we enjoy, we are looking forward to the time when Mr. Morley's visions may be realised and when we may be more closely associated with the government of the country than we are at present. Personally all my instincts and all the instincts of the land-owning class to which I belong are against change ; but we like, my Lord, to feel that we are trusted by our rulers, and that our efforts to act as the mouthpiece of Government to the people are being appreciated.

"Your Excellency has already heard from many an authoritative source of the sincerity and the depth of loyal welcome which India has been proud to extend to Their Royal Highnesses the Prince and Princess of Wales. We in Bengal affirm that we yield to none in our affection for the Royal House ; and although Their Royal Highnesses were not able to extend their tour to any other portion of Bengal than the capital of the province and of the Empire, they may rest assured that whether at Dacca or at Bankipore the manifestations of joy and respect would have been no less outspoken than they were in Calcutta. The memories of Their Royal Highnesses' visit will long be cherished in India, and the kind and sympathetic words which they have everywhere spoken in response to our greetings have sunk deeply in our hearts.

"I now venture, my Lord, to approach the consideration of two questions in which I confess I am greatly interested. The one relates to the separation of Executive and Judicial functions, the other to the development of Agriculture.

"I am glad to observe from the recent home telegrams that there is a possibility of some reduction being made in the Army expenditure—an economy which I am sure would be applauded by the whole country. If an expenditure of 15 millions was considered sufficient during the South African War, when Russia was in her full strength, there can surely be no sound reason why an expenditure of considerably over 20 millions should be necessary now when the power of Russia has been broken for years to come, and when we are further protected by '*ententes cordiales*' and the Japanese Alliance. What, I ask, is the use of alliances if we are not to take advantage of them ? There is not the shadow of a doubt that 5 millions a year might safely be cut off the army expenditure for the next ten years, and if the 50 millions thus saved were sunk in developing the great resources of the country, we should at the end of that time have laid the foundations of a new India : and with our sinews of war thus strengthened we should thereafter be in a much better

[*The Maharaja of Darbhanga.*]

position to cope with Russia, should she have designs upon India in the future. On the other hand, if we sink our resources in militarism while Russia, which is sick of war, sinks hers in peaceful development, it may go very hard indeed with India should the shock of conflict ever come. Five million sterling a year represents a capital of one hundred and fifty million sterling. Just imagine for a moment what that would mean if applied for ten years to the development of the country.

"Among the resources of the country which require developing, the great industry of agriculture stands pre-eminent. I am aware that Government intends spending at least 20 lakhs every year in the improvement of our great industry; but unless the cultivators are placed in a position which will enable them to take advantage of the improvements which Government so generously offers, I am afraid that the money spent will be to a large extent wasted. As Mr. Moreland, Director of Agriculture for the United Provinces, remarked in his paper read at the Benares Industrial Conference :—

'Quite apart from the advance that is to be hoped for from the applications of agricultural science to this great industry, the fact stands out that capital is the great need; and so long as the cultivator cannot find money to realise his existing ideal, it is of little use to try and enlarge his ideal by the introduction of new elements that need still more money for their realisation. You are aware that the Government of India has decided to increase largely the expenditure on the Agricultural Department; but this policy can meet with full success only if the supply of capital is organised at the same time.

"Here then is a further need for cheap capital, for much of the labours of the Agricultural Department will necessarily be wasted if capital is not forthcoming to enable the people to realise their results. So that the supply of cheap capital stands out clearly as the central factor in the problem of agricultural improvement at the present time.

"It would be beyond the scope of this brief paper to discuss in detail the methods by which capital can be brought within the cultivators' reach, but a few governing conditions may be briefly stated.

"Firstly, the capital required by the individual cultivator is small; but, secondly, the aggregate amount required is very great; while, thirdly, the supply must be made promptly and on terms that the cultivator can accept. It follows that a very complex organization is required to control a large capital and distribute it in small sums among a great number of individuals with due regard to the character and competence of each. These conditions make it impossible for the need to be met by banks working on European lines; and to my mind, at least, they make it equally impossible to rely on the action of Government agency. In a word, the necessary organization must be built up among the people who are to share its benefits.

"As you are aware, an attempt is now being made to create the beginnings of such an organization in India. The economic side of the co-operative movement will no doubt be dealt with fully by other speakers at this Conference: it suffices for my present purpose to point out that either this or some other equally effective form of organization is a necessary preliminary to any considerable improvement in the agriculture of the country—nay, more, it is necessary to prevent the progressive degradation of our greatest industry.'

"These, my Lord, are weighty words.

"What I have to suggest, therefore, is that Government should tackle the great question of agricultural finance in a much bolder spirit than they have hitherto done. In the Co-operative Credit Societies Act an excellent measure was passed a couple of years ago, but I do not think that Government are backing it up as they ought to do. I am aware that a fair number of Societies have been started in various provinces; but altogether the money turned over by them, so far as I can learn, amounts to only a few thousand rupees, and at the present rate of progress I am afraid that the end will not be reached this side of the millennium. Cultivators themselves have not the capital required to develop their holdings, and moneyed men are naturally chary of new ventures. But while, as Mr. Moreland says, it might be difficult for Government itself to directly finance the cultivators, can it not do something to encourage the moneyed men of the districts to venture a little in the way of financing the villagers? I

[*The Maharaja of Darbhanga.*]

daresay, my Lord, some could be found who would be willing to risk their capital if they had some sort of Government guarantee behind them. With such help, small local banks might be formed which would finance the surrounding villages, or perhaps Government itself might deposit something experimentally in selected villages working under the Co-operative Act, without waiting for the people to first of all put down their money ; or Government might deposit in the village society one rupee for every rupee deposited by non-members. I merely throw out these suggestions for what they are worth. All I want is to impress upon Government the absolute necessity of tackling fearlessly this great problem, which is in reality the pivot on which all other problems turn. If the Imperial Government would give a few lakhs every year out of its surpluses to the Local Governments, to deal with as they may think best in developing a sound system of rural finance, it would be indeed surprising if great good to our Indian Empire did not result.

"I now turn, my Lord, to the question of the separation of the Executive and Judicial functions. In my Budget Speech last year I ventured, my Lord, to touch upon this matter, which is regarded by a large and influential section in our community as a matter of the highest importance. What I said then I will, with Your Excellency's permission, repeat today. I ventured to remind Your Excellency's predecessor that the Government of India had since 1898 had before it a memorial signed by a number of distinguished Anglo-Indian officials, in which a prayer was made for the initiation of this reform and a number of weighty arguments advanced in its favour. So far as the public is aware, no reply has yet been given to that memorial. The reform is influentially advocated, and with it so acceptable to a large section of Indian public opinion that I trust I may be allowed to hope that Your Excellency may find the time to give the matter a favourable consideration. In the note of dissent which I appended to the report of the Indian Police Commission I took the liberty of indicating the methods in which, in my humble judgment, the reform can be carried out. It is proposed by no one that it shall be universally introduced throughout India, but we pray that its adoption may be sanctioned in certain carefully selected districts in more settled portions of Bengal, Madras and Bombay.

"Regarding the Calcutta Improvement Scheme, there is very little to be said this year. By next session we may look forward to have the matured proposals of Government before us, and I feel assured that the representatives of the various public bodies and associations will meet with every attention from Your Excellency.

"I have just one other matter to which I wish to refer.

"There was a question asked, my Lord, in the Bengal Council not long ago regarding the bunding of the open space of the Gorai River, which appears to me to open up a question of extreme public importance ; and I should like to be allowed to dwell upon it for a moment. The extension of Railway enterprise in Bengal has undoubtedly been of great utility, and eloquent testimony of public appreciation is rendered by the large number of those who take advantage of the facilities afforded ; but the fact remains that there is a strong body of opinion that an enormous silent mortality has been the result of rising enterprise in Bengal, beginning with the construction of the East Indian Railway to Burdwan in 1856. It is held that malaria has been intensified in almost every deltaic district traversed by railways by the restriction to drainage caused by the heavy embankments and the neglect from economical resources to provide sufficient waterways for flood water. When Your Excellency's illustrious grandfather was Governor General, Burdwan was a health resort for Calcutta folks. Why has it now gained an unenviable reputation in exactly the opposite direction ? There was a time when roads were considered a superfluity in Bengal. It was upon one occasion placed upon record by the Hon'ble Court of Directors that the development of commerce in the province and the convenience of the people were amply provided for by the many waterways to be found in all directions through out the year. I do not ask Your Excellency to aid us to

[*The Maharaja of Darbhanga; Major General Scott.*]

revert to the primitive conditions of travel which that despatch reveals, nor am I asserting that there is nothing to be said by way of refutation of the popular views that the establishment of every railway in the deltaic districts means an increase of mortality from malaria. But there is no gainsaying the fact that that is the popular view: and I venture to suggest to Your Excellency the appointment of an expert to investigate the matter and to report if anything can be done. There has been a tendency, which I take leave to deprecate, to reduce expenditure on bridges by narrowing waterways to the utmost limits: and in some cases this had the effect of destroying their efficacy as means of transportation. There is plenty of room in Bengal for raisings and waterways to exist side by side, and there are many districts in Bengal where small rivers are still the best substitute for feeder roads.

"I now turn, my Lord, to a consideration of the Budget Statement which has been placed before us by my Hon'ble friend Mr. Baker. In certain quarters I observe that it has not received a welcome which might be described as altogether friendly. It has been pointed out that Bengal's share in the distribution of the surplus has not been as adequate as the amount of her contributions to the public revenue entitles her to expect. I am free to confess, my Lord, that I should have been glad if the sums allotted to Bengal under the heads of relief to the agricultural tax-payer and of technical education had been larger. But I shall not upon that account forget to be grateful for what we in Bengal have managed to get: and, upon the whole, I think it may be said that the distribution of the surplus is such as to give general satisfaction. Three of the directions in which the surplus has been applied commend themselves to my humble judgment. The remission of the Patwari and Zamindari Dāk cesses is very welcome: and I venture to hold that the disappearance of these imposts will be viewed without regret by the Government no less by the individuals upon whom the burden of payment has fallen. The amount realized has never been large, and the difficulties of realization have been considerable. Again, in the direction of agricultural improvement, I am especially glad to see that it has been found possible to increase last year's grant by four lakhs. Nothing could be better, if I may say so: but I hope I shall not be deemed to be difficult to please if I repeat the note of regret, which I sounded a moment ago, with respect to the disproportionate amount which has been allotted to Bengal, both as regards the grant for agricultural development and the grant for technical education. As regards the proposal to devote twenty-five lakhs for the purpose of police reform, I see that a Calcutta newspaper, whose comments are none the less valuable because of their independence of tone, remarks that Bengal asks for knowledge and is offered a policeman. And no doubt the people of the province would have been glad of a larger appropriation on account of education. But I am not myself sorry to see that the police are being given a turn. The reforms which have followed the report of the Police Commission do not run as fully upon the lines of the popular demand as I and others desired; but we are not insensible of the important advance which it is proposed to make, and I for one should strongly deprecate any attempt upon financial grounds to starve these much-needed reforms or to hinder them from attaining complete development.

"With these observations, my Lord, I shall ask leave to bring my remarks to a close. But I cannot conclude without offering my respectful congratulations to Your Excellency upon the handsome surplus with which Your Excellency's term of office is inaugurated. The circumstance is full of happy omen, and I venture to hope that every succeeding Budget will be as pleasing in its indications of prosperity and as gratifying in its disclosures as the present.

The Hon'ble MAJOR GENERAL SCOTT said:— "My Lord, in reference to the Hon'ble Rai Sri Ram Bahadur's remarks on the non-purchase of socks of local manufacture, I should like to explain that it is the consistent policy of Government in the Military Supply Department to encourage in every possible way the local manufacture and supply of military stores. As an illustration of this I would refer to the recent expansion of our Ordnance

[*Major General Scott; Mr. Hewett.*]

Factories, by which last year a saving to the country of about 27 lakhs was effected after defraying all the expenses in connection with their maintenance. As a matter of fact, Government in the Military Supply Department is the largest Swadeshi institution in the country, and rightly so.

"In regard to this question of socks, I wish to say that their local purchase was only discontinued in consequence of the serious complaints of their quality made by the troops who pay for the same out of their own pockets, and to the refusal of officers commanding regiments to take any more until the quality was improved. This resulted in a comparatively large stock being left on the hands of the Army Clothing Department which had to be disposed of at a loss. I can assure the Hon'ble Member that if Indian mills manufacture socks of a sufficiently good quality to satisfy the troops and at prices not higher than the imported article, the Army Clothing Department will place their orders with them.

"There is only one other point in the Hon'ble Member's speech I should like to refer to, and it is that portion in which he speaks of the disastrous condition into which the artisan and industrial classes have fallen. I can only say that one of the great difficulties our Government factories have to contend with, and which I understand is shared by private industries, is that of obtaining skilled labour in sufficient quantity. In spite of the high wages prevailing, men are not forthcoming. I understand, however, that Government has appointed a commission to enquire into and report on the matter."

The Hon'ble MR. HEWETT said:—"My Lord, the general results exhibited in the Financial Statement are very satisfactory from the point of view of the commerce of the country. The value of our trade for 1904-05 exceeded by more than 6 per cent. that of 1903-04, which was in turn 15 per cent. in excess of that of the previous year. In a period during which the seasons have been either bad or indifferent over wide tracts of country, it would not have been surprising had there been a serious decline in the aggregate value of our trade, which depends so much on their character and their effect on the agriculture of the country. It is satisfactory, then, to find that the returns of our trade for 1905-06 are higher than in any previous year except 1904-05. There has been a large falling-off in the imports of the precious and other metals, and a smaller decline in mineral oils, due, in the latter case, to the substitution of a local for an imported article; but in other articles, especially piece-goods, cotton yarn and machinery, there has been a substantial advance. Although our Customs revenue is £39,100 below the estimate, it is still £358,600 more than it was two years ago. The decline in the export of wheat and seeds has been very great, but there has been a large increase in the amount of raw cotton, hides and raw jute exported, while the increase on the exports of cotton yarn, jute bags and cloth, and, to a lesser extent, of cotton piece-goods is also remarkable. The net result is that the falling-off in the total value of our exports has been insignificant. The enhanced income of our railways, the activity now being shown in the improvement of the different ports, and the increasing outturn of minerals, alike testify to the advance which is being made in the development of the resources of the country. The most satisfactory feature of the trade returns for the year is that the exports of manufactured articles, *i.e.*, cotton yarn, cotton goods and jute goods, are higher than they have ever been. The trade of India consists at present mainly of the exchange of natural products for artificial products of European manufacture. The manufactured goods which India obtains are necessarily, in the main, paid for by unmanufactured raw materials; and the goods imported have often been worked up from the materials which she had exported in the raw state. These features represent a primitive stage in the system of international exchange which makes up the trade of the world. It is an assured fact that there is available in India the raw material requisite for almost every form of industry, and the idea that the country ought to be able to produce most of the manufactured articles which it requires is not one which its natural resources render utopian. People argue—and argue rightly—that these resources should be utilised for the benefit of India itself,

[*Mr. Hewett.*]

and not for that of other countries. But when they go further, and contend that restrictions should be placed on the export of food stuffs, they are advocating a policy which must have fatal results in a country that, whatever stage of development in industrial enterprise it may ultimately attain to, must ever remain essentially an agricultural one. The margin of profit on the export of produce such as wheat is close enough to make contraction of export certain whenever there is a serious rise in prices in India; and the fact that the exports fell in the famine year of 1900-01 to 50,000 tons, while they rose in 1904-05 to over 43 million tons, demonstrates both the extent of the fluctuations and the automatic character of the check on exports which the relative level of prices in India, as compared with that on the large wheat markets of the world, affords. In view of the operation of this compensatory and absolutely automatic adjustment, it is, I think, difficult for any one to contend that the payment of 1,760 lakhs of rupees for the wheat exported last year did not benefit the cultivator, the buyer, and the taxpayer in India alike.

"When the question of the manner in which our resources should be developed comes to be considered, opinion as to the lines on which we should proceed is not unanimous. Some argue that what is required for the industrial development of the country is the revival of the indigenous arts and manufactures of India, and reason that Indians have not the capital nor the requisite knowledge and experience to carry on successfully industries imported from Europe. There will be general sympathy with the advocates of the resuscitation of the ancient arts and industries of India, even though one may feel convinced that by this line of development alone India will never take the place in the commerce of the world to which her natural resources entitle her. But those who take the extreme view, to which I have just referred, seem to attribute to the people on whose behalf they speak a want of the qualities of self-help and self-reliance which I should be sorry to think had real existence. The decline of indigenous industries before the competition of the manufactures of Europe has been mainly due to the conditions under which they are carried on. They are on too small a scale to be commercially successful; little capital is employed, and the methods used are antiquated and unscientific. The revival of indigenous industries to the stage of prosperity which they reached, individually, in their palmiest days, would only aid in a very partial and incomplete manner the industrial development of a country the conditions of which have necessarily undergone a radical change since she was brought into intimate communication with the other nations of the world. The Government of India are, however, in full sympathy with those who are endeavouring to improve the state in which our indigenous industries are at present. Much information bearing on this subject has been collected in the Census Reports, and in Monographs which have been prepared on the different industries; but the material is scattered, there is no co-ordination of results, the subject is in general treated from the artistic point of view, rather than from a business standpoint, and the information is in many cases neither sufficiently detailed nor sufficiently exact to be of much practical use. The Madras Government have recently taken the lead in establishing what is practically a Government agency for the fostering and improving of Indian industries. The success which has been attained in developing the aluminium industry and the chrome leather industry by Mr. Chatterton is a good augury for further developments in the improvement of industries in the south of India. We hope that other Local Governments will now make a survey of the state of indigenous industries within the areas of their jurisdiction, with a view to ascertaining the exact state of the various industries and handicrafts, the amount of the earnings and the present condition of the artisans respectively employed in them, the precise manner in which the different industries have been affected by competition with imported articles, the practicability of creating new markets, or of developing markets which already exist, and the possibility of giving a new lease of life to these industries either by means of special instruction, or by the improvement of the appliances in use. It is not too much to hope that something tangible may be done to improve their efficiency and increase their scope by reorganizing them on modern lines. But while the Government of India sympathise with those who advocate the revival and improvement of

[*Mr. Hewett.*]

indigenous industries in the country, they feel assured that the welfare and prosperity of India in its present stage of development cannot be secured by this means alone, and that the main line of its industrial progress must be the promotion and development of its industries and manufactures in accordance with the scientific methods and experience of Europe. They find themselves in complete agreement with the view expressed by His Highness the Gaekwar of Baroda at the Industrial Exhibition held at Ahmedabad in 1902, that those who are anxious for the development of the country should devote their attention more to the establishment of the larger industries involving an extensive use of machinery, since it is upon this that the increase of the wealth of the country must mainly depend. Development on these lines is also a matter of the highest importance from the point of view of our increasing population. Although our railways find employment for some 400,000 Indians, our jute and cotton mills for about 330,000, the tea industry for 660,000 and the coal mines for 100,000, the aggregate number of those employed in the more modern forms of industrial enterprises is as yet but an insignificant fraction of the total population of the country. The Hon'ble Mr. Sri Ram has, however, in my judgment, very seriously overstated the case in describing the labouring classes as being in a chronic state of poverty hardly raised above the point of starvation. The information before the Government is that the demand for labour, and for well paid labour, is much in excess of the numbers ready to resort to it. I can corroborate what the Hon'ble Major General Scott has said about the difficulty of obtaining labour, for everywhere the cry is for more labourers: more are required on railways, irrigation works, docks, mineral enterprises, especially mining for coal and manganese, cotton mills, jute mills, and in fact for practically every form of enterprise in the country. The Hon'ble Member is perhaps aware that during the past year we have had to make special inquiries as to the shortness of labour for industrial concerns in the United Provinces and Bengal. The avenues of employment are not few, but the difficulty of inducing people to enter them is immense. It will appear remarkable that this should be the case when Oudh has a population of nearly 550 to the square mile, while many individual districts in the United Provinces and Bengal are still more seriously congested. The fact is that the Indian labourer is still essentially an agriculturist: his heart is in the village, not in the factory or the mine; and his reluctance to leave his home often proves too inveterate to allow him to go away to seek his fortune elsewhere. The diversion of a substantial proportion of the population from agricultural to industrial pursuits is still an ideal the realisation of which cannot be looked for in the near future; but it is in this process that the salvation of the country must lie. There is this much cause for congratulation, that, small though it be at present, the industrial population of the country has rapidly increased during the past decade, and with increased openings for employment, and a change in the attitude of the labouring population, it may be hoped that it will increase much more rapidly in the next.

"Some contend that the revival of Indian industries, and the establishment of industries worked on European methods but with Indian capital, must necessarily involve some displacement of British industry and British capital. There is no foundation for this contention. India is in need of as much capital as is likely to be furnished for her development, whether it comes from within her own boundaries or is introduced from other countries; but no one who has her welfare at heart can look round with feelings other than of regret and see that the Indian community have hitherto, speaking generally, not shown any alacrity to put their capital into manufacturing enterprises, even when their soundness and productiveness have been practically demonstrated. There is no lack of capital in the country for immediate requirements, and in this connection it may be mentioned, as a striking fact, that in the past five years India has absorbed no less than 50 million pounds worth of the precious metals. But the capital which exists is frequently not available; it is scattered and disorganized; and it is largely employed in traditional methods and for unproductive purposes. The first requirement necessary for the material advancement of the country is the development of a more liberal spirit among the people themselves, and the inauguration

[*Mr. Hewett.*]

of a system for the active utilisation of any idle capital they may have. The Government of India welcome the awakening of interest in this very important question which was evident in the discussions at the recent Industrial Conference at Benares.

"It is the fashion sometimes to place the blame for the present state of affairs on the Government for not having provided the necessary opportunities in the way of technical education. The difficulty, however, has been not so much that there has been no opportunity for obtaining education of a technical character, as that students were, in the absence of industries in which they could obtain employment, ready enough to attend technical institutions and to enjoy scholarships there, but preferred careers other than industrial ones so soon as their school days were over. It is to be hoped that this reproach will cease to be deserved. We now have students holding Government scholarships in mining, geology, agriculture and textile industries at institutions in Europe and elsewhere, and we are allotting $2\frac{1}{2}$ lakhs in the coming and successive years to certain Local Governments for expenditure on technical education, in the manner described in the Financial Statement. There is, I venture to think, no question that the provision which the State has made for instruction of a practical character is at least equal to, if it is not in advance of, the demand that exists for it.

"With reference to what I have previously said upon the desirability of encouraging local industries on European methods, I may mention that the most important matter which the Commerce and Industry Department has recently had to consider is that of the establishment of an iron and steel industry on a scientific basis. The scheme owes its inception to the far-sighted views of the late Mr. J. N. Tata, who was undoubtedly the pioneer among Indians in the scientific organisation of industries, and whose name will be associated for all time with the establishment of the Tata Institute for research. The Government of India have taken the liveliest interest in the late Mr. Tata's project, and they have determined to encourage it by making certain concessions which were asked for by Messrs. Tata and Sons. It is proposed to locate the works at Sini on the Bengal-Nagpur Railway, and to bring the iron ore from a hill situated some fifty miles from the railway in the Mourbhanj State. The Government have agreed to construct a railway from the hill to the main line; they have arranged with the Bengal-Nagpur Railway that the freight on raw materials required for the works shall be reduced to one-fifteenth of a pie per maund, and that this rate shall also apply in the case of the manufactured products sent to Calcutta for export. They have also engaged to take, for a term of ten years, 20,000 tons of steel rails each year, provided that they are rolled to the required standard and supplied at a cost not exceeding that which would be incurred in importing rails of the same quality. The Government of India have every hope that this venture will result in success, and though they have limited their custom to a term of ten years in the first instance, this indicates no intention on their part of abandoning the purchase of rails at the conclusion of this period, provided that the conditions as regards quality and price are fulfilled. They have also no doubt that, if steel rails and other articles of good quality are rolled at the works, the demand for them will be great not only among the Departments of Government, but also among the railway companies and the public generally. The establishment of an iron and steel industry on a large scale will not only enable the Government and the public to purchase many steel articles of local manufacture which are now imported, but will also help to develop subsidiary industries, particularly those for the production of coal-tar and sulphate of ammonia, for both of which a ready market can be found in India. I think I may claim that the Government have, in the assistance they have promised to give to this very important project, given a practical proof of their desire to encourage local enterprise; and I may also point to the recent Resolution issued on the appointment of the Stores Committee as evidence of our wish to give every encouragement to products of local manufacture. We have expressed our recognition of the fact that local

[*Mr. Hewett.*]

industries must frequently lean, to some extent, in the first instance, on the support of Government, and it is our intention to insist that whenever an article required by Government can be produced in this country of the same quality and at the same price as the imported article can be laid down in India, the preference shall be given to the locally produced article.

"I have mentioned, my Lord, the activity now being shown in the development of our more important ports. The statistics showing the volume of traffic demonstrate, in a striking manner, the rapid expansion of the trade of the country. The value of the goods passing through the ports of Calcutta, Bombay, Rangoon, and Karachi has increased by 37, 17, 75, and 152 *per cent.* respectively during the past decade (1895-96—1904-05), while the tonnage of the vessels entered at these ports has increased, during this period, by 86, 40, 82, and 128 *per cent.* The Local Governments, and the port authorities, are fully aware of the importance of anticipating the probable requirements of trade; at Bombay a comprehensive scheme for the improvement of the port has been prepared, and is now being carried out; the Port Commissioners of Karachi have also taken up the question of the arrangements to be made in order to enable them to cope with the large and increasing traffic which the success of the Punjab Canal Colonies has brought to that port; and similar activity has been displayed at Rangoon, where various projects, forming part of a general scheme for the improvement of the port, have already been carried out. Complaints have recently been made as to the inadequacy of the present arrangements at Calcutta; and doubts have been expressed as to whether the Port Commissioners fully appreciate the necessity for providing facilities adequate to the demands which will certainly be made upon their resources in the near future. These doubts are not indeed shared by the Chamber of Commerce; and I have no reason to believe that they are in fact well founded. But, in view of the great importance of the subject, we have invited the attention of the Government of Bengal to the matter, and have suggested that the Commissioners should be called upon to prepare a scheme for the improvement of the port, calculated to provide adequately for the probable development of trade over a reasonably long period.

"Since the Department was constituted in March last, India has entered into, or adhered to, several important commercial Conventions. As a result of repeated representations, the Government of Japan has concluded a Convention with this country, securing reciprocal most-favoured-nation treatment. It was found that, under the general tariff, Indian indigo entering Japan was subject to a rate of duty which still further increased the differential advantage already enjoyed in that country by the synthetic dye; and it became clear that the Japanese market would soon be entirely lost to India unless some reduction in this excessive tariff rate could be obtained. This was secured under the Convention, but further efforts which were made to obtain for Indian indigo additional advantages, with the object of placing it in a stronger position to meet the ever-increasing competition of the artificial dye, have proved infructuous. In view of the widely varying duties leviable under the Japanese general and convention tariffs, the conclusion of the Convention will, it is anticipated, prove of considerable value in fostering trade between India and Japan. In the case of the Bulgarian treaty also, certain important concessions were obtained in the course of the negotiations. Jute sacks intended for the export of cereals will be admitted into Bulgaria free of duty, the duties on rice and jute fabrics have been reduced to approximately half the rates which were at first suggested, and the tariff for cotton yarns has been considerably reduced. The Treaty secures reciprocal most-favoured-nation treatment. India has adhered to the commercial treaty concluded between the United Kingdom and Switzerland, and in that case also substantial concessions were obtained during the course of the discussions. The rate of duty finally adopted for cleaned rice is half that originally proposed; and the tariff on indigo has also been reduced by half, although our request for a fiscal discrimination between the natural and the artificial dye was rejected.

"Last year, I explained the genesis of the proposal to create an Imperial Customs Service for India, which will be entrusted with the administration of the customs at all the more important ports. Owing to the necessity for a

[*Mr. Hewitt.*]

further reference to the Secretary of State regarding certain minor points, the inauguration of the new Service was considerably delayed ; but all preliminaries have now been settled, and members of the new Service have already been appointed to the ports of Calcutta, Bombay and Rangoon. Save in the case of a limited number of appointments, the scheme can only be brought into operation as vacancies occur in the existing establishment ; but the nucleus of the new Service has now been formed, and we are confident that it will do much to facilitate business, to introduce uniformity of practice at the various ports, and to place the administration of the customs upon a satisfactory and consistent basis.

" The concessions that have been made since the last Financial Statement was presented, with the object of improving facilities in postal and telegraphic business, have been appreciated by the public. The result of the various reductions made in postal charges has been that the normal annual increase of revenue has been swallowed up by the cost of the concessions made. As I stated last year, the increase of the weight to be carried for half-an-anna from $\frac{1}{2}$ to $\frac{3}{4}$ tola was regarded by the Government of India as a step towards the ultimate raising of the weight to be carried for half-an-anna to 1 tola, and of that to be carried for one anna from $1\frac{1}{2}$ to 2 tolas. I am able to say that, should the revenue from the Post Office increase during the coming year in the same ratio as it has in recent years, and should the financial position remain otherwise satisfactory, we hope to recommend to the Secretary of State that this reform, which will, it is estimated, cost between 13 and 14 lakhs of rupees, may be carried into effect in the financial year 1907-1908. It is not, I am afraid, possible to hold out any hope that the further reduction suggested by the Hon'ble Mr. Sri Ram can be carried out. The present half-anna rate of letter postage is one of the lowest in the world, and its existence has necessitated the adoption of a quarter-anna rate of postage for postcards, which is actually the lowest in the world. It may be necessary to consider whether in reviewing the net financial results in future we should not combine the results of both the Postal and Telegraph Departments, but this is a matter which has not been so far investigated. Sir Arthur Fanshawe, who has presided over the Postal Department for 17 years, is about to sever his connection with the post of Director-General. There is no branch of the Department on which he will not leave the impress of his zeal and ability, and I gladly take this opportunity of saying that his services are much appreciated by the Government of India, as they are also, the Government believe, by the public generally.

" The reductions in the cost of internal telegraphic messages have resulted in a large increase in the traffic. During the period from 1st July to 31st December the number of four-anna private telegrams increased by 65 per cent., while the percentage of telegrams of this class to the total number of deferred telegrams increased during the same period from 33 to 46 per cent. These figures afford eloquent testimony to the popularity of our cheap telegrams. The reduction effected from 1st August last in the cost of ordinary telegrams between India and Europe from 2s. 6d. to 2 shillings a word has not so far resulted in a material increase in the traffic ; but traffic will doubtless respond in time to the reduction. The Press rate, in spite of the efforts of the Government of India to secure its reduction to eight pence, remains at a shilling a word, and I am afraid that no hopes can be held out that the companies will, for the present, grant any further reduction.

" The question whether the Postal and Telegraph Departments should be amalgamated has for some time been under the consideration of the Government of India. Amalgamation in some form or another has been carried out in a large number of the States of Europe. We have had the conditions under which these Departments are administered in the more important of these States examined by an officer deputed to Europe for the purpose. He has obtained much useful information, which has received our earnest attention. We are of opinion that amalgamation can only be justified if it can be shown that it will result in a financial saving without loss of efficiency or will secure increased efficiency with a similar standard of expenditure. The enquiries which have

[*Mr. Hewett.*]

been made tend to show that some economy must result if both Departments be brought under one Director General and if an arrangement be made under which the management of traffic would be entrusted to one set of officials, while the management of the scientific and technical work of the Department would be under the control of another set of officials, namely, the engineers. In determining whether the change would tend to increased efficiency there is more than one aspect of the question which requires the most careful consideration. At the present time the organization of the two Departments is entirely different, and it would be absolutely impossible to amalgamate them without a radical change in the Telegraph Department. Moreover, the conditions in this country differ from those in most countries in Europe in which amalgamation has been effected: the operations of both Departments are conducted over vast areas, a circumstance which in itself furnishes an argument against too great centralization of authority; while the work of the Director General of the Post Office in India is already of a most exhausting character, and tends year by year to increase. I have great doubts as to whether it would be possible to impose upon that officer the duty of supervising the Telegraph Department, even in a general way, in addition to the work of his own special Department. Another obstacle to amalgamation seems to be that, in a country where the rank and file of both the Postal and Telegraph Departments are imperfectly educated, and where the development of both Departments on independent lines has already proceeded for so many years, the dislocation which would at first result from a change would be far greater than that experienced in the majority of European countries. It seems then very doubtful whether the amalgamation of the two Departments would under the circumstances be a measure of practical reform. Since they have been placed under the same Department of the Government of India, considerable progress in the work of co-ordination between them has been effected. This process will, we hope, continue, and, so far as one is able to judge at the present stage, it will be in this direction, and by steadily enforcing the principle that post and telegraph offices should be combined wherever possible, that the development of the two services will proceed. Our enquiries have, however, led us to the opinion that an internal reorganization of the Telegraph Department may be desirable in order to relieve the Director General of the mass of details with which he is at present burdened, by entrusting greater responsibility to the intermediate officers. The former will, if such a scheme can be devised, be in a position to devote more time to the more serious problems of administration, while the devolution of authority will enable the latter to deal more efficiently and more promptly with the complaints and representations of the public.

"The memorandum by the Railway Board attached to the Financial Statement gives in a small compass the most important facts connected with our programme of railway administration for the coming year. Last year the allotment of 1,250 lakhs for the railway programme marked a material advance in the allotment of funds for the improvement and extension of our railway system. The sum allotted during the coming year amounts to 1,500 lakhs. Of this sum 891 lakhs are allotted to open lines, 539 lakhs to lines already under construction, and 70 lakhs to lines which are to be commenced during the year. The table on page 1 of the Railway Board's memorandum is instructive. Our annual expenditure on the Railway programme has risen in five years by over 66 per cent., and the expenditure which we propose on open lines in the coming year is more than the total expenditure on all lines in 1901-02, and about 150 per cent higher than the expenditure on open lines in that year. With the remarkable development of the internal resources of the country that has taken place in the last few years, the claims of the open lines for improvement, and especially for the addition of rolling stock, have become more and more urgent. I trust that the Hon'ble Mr. Apcar will be satisfied that the Government has not ignored the need for increasing the rolling stock when I assure him that it has in the past five years devoted about 12 crores to this object. The Railway Board have noticed how the equipment of a railway company with rolling-stock adequate to meet all traffic demands at all times is inconsistent with its management on commercial principles. But there is no doubt, on the other hand,

[*Mr. Hewett.*]

that the Board are right in their opinion that the standard of rolling-stock on Indian railways generally is below what the trade of the country demands. The Railway Board and the Government of India will do all they can with the resources at their command to remedy this defect, but it has to be remembered that the amount of capital that can be provided for the improvement of our railway system is not unlimited, and that the process of increasing the rolling stock must necessarily be more gradual than we could wish.

"The public will read with interest the Railway Board's remarks regarding the conditions under which third class passengers travel. In the last twenty years the number of third class passengers travelling during the year has risen from about 70 millions to over 200 millions. This section of the travelling public is out of all proportion the most profitable to the railways. The Government of India, as stated during the discussion of the last Financial Statement, attach great importance to the improvement of the arrangements made for their comfort on the railways, and it is gratifying to learn that this matter is now receiving the earnest attention of the railway administrations. It must, however, be apparent to any traveller that the arrangements for the comfort and convenience of the third class passenger are still very often far from what they should be, and the need for further improvement will continue to be pressed by the Railway Board and the Government.

"I should like, my Lord, to say a few words on one or two matters connected with railway administration which are of special interest to the mercantile community. They are:—the uniform classification of goods and the simplification of railway tariffs; the question of minima rates; that of a more simple procedure than is provided by the Indian Railways Act for the settlement of disputes between the public and the administrations; and the terms of the risk note to be used on our railways.

"The existing system, under which each railway has its separate classification of goods, often of too elaborate a character, and a separate scale of rates on the portion of its journey for which a consignment has to proceed over its own line, leads to uncertainty on the part of the public and great waste of time, and tends to hamper trade. The Indian Railway Conference Association have appointed a Committee to consider the lines on which change should proceed, and it is to be hoped that they will be able to devise a workable scheme for the simplification of the goods tariff, a reform which is, in the opinion alike of the public and the Government, a crying need. The matter is one requiring a considerable examination of details, and will of necessity occupy some time before completion.

"Where powers have been reserved to the State under the contracts with the different Railway Companies, certain maxima and minima rates have been fixed, each railway being free to vary its rates within these limits. The imposition of minima rates was necessary to prevent guaranteed companies from arranging their freights without regard to the interests of the State which guarantees them interest, and which has the largest stake in the undertakings, and the abolition of a minimum would unquestionably lead to internecine competition such as led to disastrous results in America and caused serious complications in Great Britain. Permission has recently been sought by the East Indian Railway to reduce the rates in force on its system below the fixed minima on the ground that its natural advantages enable it to carry long distance traffic at rates which are below the minima and below those which would pay other companies. This representation has received the support of the Bengal Chamber of Commerce and other mercantile opinion in Calcutta. It has been urged in favour of the proposal that freight charges should bear some relation to the cost of working of each railway system. It has also been contended that the present system leads to the deflection to the Western ports of both import and export trade from the port of Calcutta, the natural advantages of which entitle it, it is urged, to cheap inland transport. It is stated that the maintenance or reduction of the present rates of freight on wheat and seeds might be the factor to determine whether India or some other country should supply the markets

[*Mr. Hewett.*]

in which she has to compete with foreign countries. On the other hand, the mercantile community of Western India contend that while the reduction of minima rates generally is a measure which should be supported, it would not be fair to allow one railway to have lower minima rates than another. It will be understood that the proposal before Government does not provide for any general lowering of rates on the East Indian system. Reductions are contemplated only at the competitive points, and with the avowed object of taking traffic away from other lines, and it cannot be presumed that the result of these operations would have any stimulating effect on the total production of the competitive zone inasmuch as no proof has been afforded that the diversion of trade to Calcutta would cheapen the total cost of transport to the markets of the world. The proposition that each railway system should be allowed to carry traffic at rates consistent with a fair return on its capital, and no more, is, at first sight, reasonable; but the principle on which it is based could not be carried out in practice. The receipts of individual railway systems vary much from year to year according to the character of the seasons and the briskness of particular branches of trade. It would therefore be quite impracticable to fix, except for the very shortest periods, rates of freight based on the principle that freights must be adjusted so as to secure an approximately even return on capital, and any attempt in this direction must result in an infraction of the generally accepted proposition that rates should be kept as steady as possible. Moreover, the State is responsible that the railway systems, in which the Indian taxpayer is either immediately or prospectively interested to the extent of some 250 million pounds, are worked so as to secure a reasonable return on the total capital invested in them. The reduction of the minima rates on the East Indian Railway alone would involve the transfer to that line, at the expense of other lines, of traffic which would be conveyed at a lower cost, and a consequent reduction of the general income of our railway systems without a demonstrable increase of the general volume of our internal trade. Nor can the argument, that the reduction of railway freights would lead to Indian produce being landed cheaper in markets in which India has to meet foreign countries in competition, be legitimately advanced in favour of the reduction of rates on the East Indian Railway alone in order to benefit only one of our ports. These reasons are, in the opinion of the Government of India, convincing against the proposal of the East Indian Railway Company that it should be allowed to reduce its minima rates below those to be enforced on other railway systems.

"It will be remembered that in September last the minima rates at which coal can be carried over distances beyond a certain length were reduced. The East Indian Railway has not as yet availed itself of the opportunity of reducing its rates for the carriage of coal to the minima rates then brought into force and is, it is understood, unwilling to do so until the grand chord line is opened; nor is its traffic generally carried at the lowest rates already permitted. One may fairly infer from these facts that that Company agrees with the Bengal Chamber of Commerce in holding that a general reduction of minima rates is undesirable, although a good deal of support might be found for this measure on the ground that it may be expected to lead to the expansion of trade and also to the reduction of the price of Indian produce in the markets of the world. This question is, however, a large one which cannot be determined without detailed enquiry as to the manner in which the present minima rates operate and the effect that a reduction would be likely to produce upon the returns from our railway systems. That inquiry the Government of India will now direct the Railway Board to undertake.

"Our present Railway Act contains provision for the determination of differences regarding through rates and traffic facilities generally by the appointment of Railway Commissions. Complaints have been made that the process prescribed by the Act is an expensive one, and that it does not give authority to all persons interested to make applications for the appointment of a Railway Commission. Support is given to these complaints by the fact that no such Commission has been appointed during the fifteen years for which the law has been in force. The matter has recently been under the

[*Mr. Hewett; Sir Denzil Ibbetson.*]

consideration of the Government of India, who now propose to recommend to the Secretary of State that the law should be amended so as to give to the Railway Board powers corresponding to those exercised by the Board of Trade under the Railway and Canal Traffic Acts in force in Great Britain, and to confer on individuals and public and commercial bodies the right to seek the assistance of the Railway Board and Railway Commissions in questions relating to traffic. The results of the proceedings of the Railway Board will be recorded for the information of the Government of India, but, like the Board of Trade, they will have power to act as a Board of Conciliation only. The only final and binding award will still be, as in England, that of a Railway Commission, to which, however, no one will be entitled to apply for a through rate until he has first made a complaint to the Board and the Board have disposed of it. The Government of India trust that the exercise of these powers of conciliation by the Railway Board will result in a great portion of the disputes as regards through rates and unfair treatment being amicably settled.

"In his Report on Indian Railways Mr. Robertson observed that the conditions hitherto attached to the risk notes in use on Indian railways are of a very onerous nature. In the first place, railways are exempted from all liability as regards loss or damage to the property while in transit which they could not have prevented with due care; and, in the second, they are not held responsible for the wilful acts of their servants. Now there can be no question that the present form of risk note is irksome, not only to the mercantile community, but also to all classes of the public; and the question of amending it has been for some time before the Railway Board and the Government. Under the Railway Act the risk note in use on a railway administration has to be in a form approved by the Government of India, but we are advised by our legal advisers that the law does not empower us to prescribe a form of risk note which the railway companies would be bound to accept. The Railway Board do not consider that it is possible to obtain acceptance by the railways of a form of risk note of a more liberal character than that adopted by the Railway Conference of 1904 which, though an improvement on the present form, still gives special protection to the railways, except for the loss of a complete consignment, or of one or more complete packages of a consignment, due to the wilful neglect of the railway administration. To my mind this is an unsatisfactory conclusion, but in the present state of the law it is impossible to arrive at any other. I can only hope that further consideration of the matter by the railway companies will lead to a proposal to assimilate their risk notes more closely to those in force in England. I am led to believe that this hope may not be vain by the facts that at the Railway Conference of 1904 there was a strong minority of representatives of the various Railway Companies in favour of a more liberal form of risk note, and that when a Resolution to this effect was proposed at the Conference of the Indian and Ceylon Chambers of Commerce held in Calcutta last year it was not opposed by the Agents of the three lines which centre in Calcutta, all of whom were present at the meeting.

"The Hon'ble Sir Denzil Ibbetson will, I believe, make some remarks upon inland navigation, to which the Hon'ble the Maharaja of Darbhanga has referred, and all that I need say upon this subject is that the Railway Board recognize no antagonism between railways and our splendid inland waterways, and that the Commerce and Industry Department, like the mercantile community, regards the improvement and development of the latter as of very material importance to the interests of commerce."

The Hon'ble SIR DENZIL IBBETSON said:—"My Lord, in placing the Financial Statement before the Council last Wednesday, my Hon'ble Colleague in charge of the Finance Department alluded very briefly to the climatic conditions which have led to a reduction of over 50 lakhs in the Land Revenue entries in the Budget of the current year, to an allowance for suspensions and remissions of land revenue during that and the coming year amounting, in two provinces alone, to nearly 2½ crores, and to the

[*Sir Denzil Ibbetson.*]

provision, during the same two years, of over a crore for expenditure upon famine relief. The distress from which parts of India are now suffering is, I am glad to say, not comparable, either in dimensions or in intensity, with that which prevailed in 1895-97 or in 1899-1900; and it has not been thought necessary, as on those occasions, to make a separate Famine Statement in Council; but I propose to preface my remarks today by a brief account of the position as it now stands, and of the prospects for the approaching season.

"The shortage of crops in certain parts of India has led to a general rise of prices which, even where the harvests have been fairly good, has caused some hardship to the poorer classes. But the areas in which serious distress exists are at present confined to two tracts; the first lying immediately to the south-west of a line drawn from Amballa to Allahabad, and embracing the south-eastern districts of the Punjab, the south-western districts of the United Provinces, and the northern States of Rajputana and Central India; and the second comprising the Deccan and Karnatak districts of Bombay.

"Although five of the Punjab districts have suffered from a failure of the rainfall of last monsoon and from the delay in the arrival of the usual cold weather rains, the ample rain that fell in February has so relieved the situation that famine relief is required in one district only, where an area of 930 square miles with a population of 320,000 is affected, and there are now some 10,000 persons on relief. It is not expected that relief works will be required in any other district of the Punjab, but in all the five south-eastern districts liberal suspensions of revenue amounting to 14 lakhs of rupees have already been granted, and it is anticipated that further suspensions of some 10 lakhs will be required. Arrangements are also being made to grant advances aggregating about 4 lakhs of rupees.

"The United Provinces had already suffered severely from the unprecedented frosts of last February, which destroyed the hopes of a bumper harvest throughout a great portion of the Province. This led to a serious rise in prices, but the distress was sufficiently met by very liberal remissions of the rabi land revenue, amounting to 37½ lakhs of rupees. The frost, however, was followed by a serious deficiency in the monsoon rainfall in Bundelkhand and parts of the Agra Division, where the kharif crop on unirrigated land was a virtual failure. In these areas the cold weather rains have also been unfavourable and the unirrigated rabi crop very poor. It has therefore become necessary to declare that famine conditions exist in the whole of four districts and in portions of three others, comprising in all an area of nearly 10,000 square miles with a population of over 3 millions. In the affected districts 10 lakhs of rupees of the kharif demand have been suspended or remitted, and advances to the amount of nearly 7 lakhs have been made. Relief operations have been started, and there are now 160,000 persons on relief in the United Provinces. Notwithstanding the favourable rains of February, which have materially relieved the situation throughout the greater part of the province and have already led to a fall in prices, it will be necessary to grant liberal suspensions of land revenue in the rabi instalment, and preparations are being made for large advances on the approach of the monsoon.

"In the northern and eastern states of Rajputana and the British districts of Ajmer-Merwara that lie within them, the drought has been more severe. The whole area of Ajmer-Merwara, with a population of nearly half a million, has been suffering from famine for some months past. The outturn of the kharif harvest was exceedingly poor, while the cold weather rainfall has been much less favourable than in the Punjab and the United Provinces. Preparations to meet the distress were made in good time. Liberal suspensions were granted of the demand of last rabi, which also was a poor harvest in these districts, and two-thirds of the land revenue demand for the kharif has been suspended or remitted. Takavi advances to the amount of nearly a lakh and a half have been made and relief works have been opened on a liberal scale. According to the latest returns there were 56,000 persons on relief of all kinds, amounting to about an eighth of the population. In ten of the neighbouring States of Rajputana, famine conditions prevail in greater or less intensity over an area aggregating

[*Sir Denzil Ibbetson.*]

34,000 square miles with a population of 5 millions; and although, in accordance with Rajputana custom large numbers of the people have temporarily left their homes, and taken their cattle to Sind and Malwa and other districts where water and fodder are to be found, it has been necessary to undertake relief measures in most of these States and there are now 48,000 persons on relief. Much assistance has been derived from the construction of the Nagda-Muttra Railway, which passes through several of the distressed states, and where necessary loans of money and the services of officers have been granted by the Government of India to the Durbars. In the northern States of Central India also famine conditions prevail, the area affected being estimated at 18,000 square miles with a population of $2\frac{1}{2}$ millions. Here, too, the rainfall of the monsoon was very deficient and the winter rains have been poor, so that the loss in both the kharif and rabi harvests is very serious. The Chiefs of the affected States have granted liberal suspensions and remissions amounting to some 32 lakhs of rupees; where necessary famine works have been opened; and 80,000 persons are now on relief.

"The affected area in Bombay comprises, either in whole or in part, eight districts in the Deccan and Karnatak which aggregate 25,000 square miles with a population of 4 millions. In the tracts which are most affected the rainfall of last monsoon was very deficient and badly distributed, and the outturn both of the kharif and of the rabi crops much below the normal. Prices have therefore risen to double the ordinary rates; but fortunately the occurrence of fair harvests in parts of the territories of His Highness the Nizam, in the Berars, and in Khandesh where the cotton crop was particularly good, has afforded employment to large numbers who have left their homes in search of work, while the prosperity of the textile industry in Bombay has further provided an unusual amount of employment in the mills; and it is roughly estimated that from 150,000 to 200,000 people have left the distressed districts and found employment elsewhere, so that notwithstanding the failure of the crops and the rise in prices, there has been little demand for relief work at famine wages and only some 40,000 people are at present on relief. The Bombay Government have met the scarcity by very liberal suspensions and remissions of land revenue amounting to 65 lakhs of rupees, or half the total demand. They have also suspended about 30 lakhs of arrears of land revenue and 26 lakhs of takavi, and have made liberal advances amounting to over 20 lakhs of rupees to enable the people to deepen their existing wells, to dig new ones, to make other small improvements, and to purchase fodder for their cattle.

"A small area in the extreme west of the Kathiawar Peninsula belonging to the Baroda State with a population of 70,000 is also suffering, and here too liberal suspensions of land revenue and advances of takavi have been made and some 3,000 persons are on relief. Some portions of the Hyderabad State also are in a distressed condition and adequate measures have been taken, but the distress is not acute and the number of persons on relief is only 3,500.

"To sum up, 18 British districts and 35 Native States are more or less affected by famine, the distressed area aggregating for the whole of India nearly 100,000 square miles, with a population of 16 millions, of whom half are in British and half in Native territory; and the number at present on famine relief in all parts of India amounts to 400,000. One marked feature of the administration of the present famine is the liberality with which, both in British districts and Native States, land revenue has been suspended and remitted and advances made to help the people to meet the distress. The Famine Commission of 1900 laid great stress upon the importance of help of this description in the early stages of famine, as tending to put heart into the people; and the action thus taken has gone far to render the distress less acute and to postpone the appearance of famine conditions.

"In one respect we are better prepared to meet famine than on any previous occasion, in that the Famine Codes of all Provinces have recently been revised in accordance with the experience of the last two famines, and that the Native States have accepted the same general lines for their guidance. The

[*Sir Denzil Ibbetson.*]

revised Codes embody two new principles of great importance, namely, the abolition of the minimum wage, and selection for admission to village works; and, if famine was to come, it is fortunate that it should be possible to test the operation of these changes on a small scale, before they are acted on in presence of widespread calamity. Everywhere the arrangements made are adequate. Very little aimless wandering or emaciation is reported, the people even in the distressed tracts are physically in good condition, and there is nowhere any serious increase of mortality or crime. There is, however, in almost all parts of the affected area, a very serious dearth of fodder, and great difficulty is experienced in keeping the cattle alive. Such measures as are possible to save them have been undertaken. Reserved forests have been thrown open for grazing, arrangements have been made to supply grass and fodder on a large scale, and the chief railway administrations have reduced their charges for its transport by rail. It is to be feared, however, that there will still be considerable mortality among the cattle before the next rains replenish the local supply of fodder, and it will be necessary to make liberal advances to cultivators to enable them to replace their plough cattle.

"It is anticipated that when the rabi harvest has been reaped there will be a considerable increase in the number of persons seeking for relief, which will be maintained until the advent of the monsoon renders preparations for the autumn harvest possible, and arrangements have been made to meet the probable requirements of the situation.

"In January, 1900, when speaking upon the Famine Statement which I had just made to the Council, Lord Curzon said:—

'I should like to recognise the generosity with which Native States—and I am alluding more particularly to some of the States of Rajputana and Central India—have accepted from the Government of India an interpretation of their obligation in respect of scarcity and famine, more liberal and more exacting than has ever before, at any rate in those States, been applied. We have done our best to help them by the loan of officers, and by the offer of expert advice. But the Chiefs and Durbars have also helped themselves, and have worthily proved their right to the affection of their people.'

"These words, true as they were then, are even still more true on the present occasion; and I am sure, my Lord, that you will desire to associate yourself and the Government of India with me, when I cordially recognise the admirable spirit in which the Chiefs in whose territories distress is now present have realised their obligations, and have prepared to discharge them.

"The Hon'ble Mr. Gokhale has pressed upon us a liberal policy in the matter of Government loans for the relief of agricultural indebtedness. There are two distinct aspects of the question which must be considered separately; namely, the general relief of the indebtedness of agriculturists, great and small, throughout the country, and the relief of those special cases to meet which Encumbered Estates Acts are framed, where the object is to save from expropriation families of influence whom it is desirable on public grounds to maintain in the possession of the estates to which they owe that influence.

"I take the wider issue first. In the first place, the task is beyond our powers. It is true that the Hon'ble Member suggests an experiment only; and no doubt, if action were eventually to be taken on a large scale, it would be wise to begin experimentally. But the experiment would be made with the avowed intention of extending it, if successful, to the whole of India. Now, as the Hon'ble Member himself recognises, it would be out of the question to advance public money to satisfy the book claims of creditors without examination and equitable reduction of those claims; and such an examination of the agricultural indebtedness of India would be a stupendous work, for which we do not possess the necessary agency. Moreover, it would be of but small avail to relieve the agriculturist of his existing burdens, if we left him to accumulate new ones by a repetition of the old process; and the alternative is, either that we should forbid alienation—and I welcome my Hon'ble friend with open arms, as a distinguished, if tardy, convert to a course which I have advocated for so long, although I understand that he demands a price for his acquiescence, —or that we should undertake, to a very

[*Sir Denzil Ibbetson.*]

large extent, the financing of the agriculture of India—an operation to which any resources at our disposal, whether from revenue or from loans, would be wholly inadequate.

“ But if we cannot interfere with complete efficiency, then any interference on a considerable scale would do more harm than good. I find that the analogy which I am about to employ was used by Sir James Westland in the debate of 1896 to which the Hon'ble Mr. Gokhale referred us the other day; but I may say that it occurred to me quite independently when thinking over his remarks. In times of famine, the Government of India have always steadfastly declined to attempt to supplement the food supplies of the country by Government importation of grain. It is true that Government could do more than any individual importer; but it is equally true that it could do far less than the collective private enterprise of the country. And if Government were to step into the market as an importer on a large scale, its interference would paralyse individual, and thereby destroy collective, enterprise, the place of which it could never hope to supply efficiently. Exactly the same considerations hold good in the matter of agricultural finance; and it was for this reason—it was out of consideration for the ultimate interests of the agriculturists, and not, as the Hon'ble Mr. Gokhale so incorrectly suggested the other day, out of ‘tender solicitude for the interests of the money-lender’—that Sir James Westland refused to hold out hopes of Government intervention on a large scale.

“ But if the cure of existing evils is beyond the power of Government, it is doing its best to prevent their repetition or aggravation. By making takavi advances on a scale which, though insignificant by comparison with the total needs of agriculture, is considerable in itself, it steadies the money-market, and tends to keep the interest demanded by private lenders within reasonable limits; and only last November a resolution was published which impressed upon Local Governments the importance of greater liberality, elasticity, and simplicity in their takavi systems, while I hope shortly to ask the Council to assent to legislation designed to give them a freer hand in the matter than they now possess. Just two years ago an Act was passed which provided very exceptional facilities for the establishment by the people of co-operative societies; since then the larger provinces have appointed whole-time officers whose duty it is to encourage and assist them in availing themselves of these facilities; and I shall presently show that the results already obtained are encouraging. Finally, we have under consideration at the present moment a scheme for the institution of an experimental agricultural bank, financed indeed by private capital, but based upon a Government guarantee, which, if it should prove successful, will doubtless find imitators in other parts of India; and if Indians will, as the Hon'ble Maharaja of Durbhanga seems to think they will, consent to employ a portion of the crores of capital which at present lie idle in this country, in the promotion of such ventures, a great step will have been taken towards the solution of the problem of agricultural finance.

“ As for the case of estates which are of sufficient individual importance to render their preservation a matter of public interest, Government has never been backward, when special circumstances affecting whole classes of landholders have existed, in coming to their assistance; and large sums have been advanced to the Oudh taluqdars under the Act of 1870, to the Sindh zamindars under the Act of 1881, and to the landholders of Bundelkhand under the Acts of 1882 and 1903, to mention only instances which occur to my memory. But in the particular case with which we were dealing the other day, no difficulty is experienced in raising loans at the moderate interest of 6 per cent. from private sources on the security of official management, and there was clearly no case for the intervention of Government. In individual cases the Government of India have not always been able to comply with the proposals of Local Governments for advances. But in the very nature of things, they are generally cases where the liabilities are so heavy in comparison with the assets that no private lender will look at the security, and it is our duty to be careful of public money. If in

[Sir Denzil Ibbetson.]

regard to any particular estate I should be able to make out a good case for assistance, I do not anticipate that I should find my Hon'ble Finance Colleague obdurate in the matter.

"I referred just now to the subject of Co-operative Societies which so largely occupied the Council's attention some two years ago. They may like to know what progress has been made since then in the matter. It has been much more rapid than the Hon'ble Maharaja of Darbhanga seems to think; and, in my opinion, quite as rapid as is either wise or safe in the initial stage of what is admittedly an experiment. Up to date 465 societies have been actually registered, of which 439 are rural and 26 urban; and the total capital already accumulated is about 3 lakhs of rupees, of which more than one-half has been subscribed or deposited by members themselves. Our latest reports show that over half a lakh of rupees had at that time been actually advanced by Government to these societies; while the revised estimates contemplate an expenditure, during the expiring year, of Rs. 1,28,000 under this head. It is satisfactory to find that the principle of unlimited liability for rural societies, of which the Hon'ble Mr. Gokhale is, I think, unnecessarily afraid, has been adopted everywhere except in one province, and that even in that province hopes are entertained that it will ultimately be accepted by the people. There is not much information in the reports regarding the purposes for which the societies already established have granted loans, nor are any general statistics available as to the average amount of each loan. But it appears that the people are on the whole in favour of loans for unproductive as well as for reproductive expenditure, and the information tends to show that the societies are fulfilling their purpose of providing small folk with small loans at cheap rates. The subject of grain banks has attracted some attention in Bengal and Bombay, but no societies working entirely on a grain basis have as yet been registered.

"Last year I sketched with some fulness the general lines which we proposed to follow in the expansion of our Agricultural and Veterinary Departments. It will now be sufficient to say that those lines have been generally accepted by Local Governments who have based detailed proposals upon them, and that the Secretary of State, for whose sanction the general scheme was submitted, has approved of it with certain reservations as to the desirability of caution in our advance, and as to the difficulty of obtaining at once the large number of experts for which we had indented. I may remark, in passing, that both the Secretary of State and the Government of India are entirely in accord with the Hon'ble Mr. Gokhale as to the desirability of training an indigenous agency, so far as this may be found possible. Meanwhile progress is being made with the purchase of land and the construction of the necessary buildings, and the expert staff is being gradually selected and appointed. Hon'ble Members will have seen that the recurring grant under this head which I announced last year, has this year been raised from 20 to 24 lakhs, and will, I hope, accept the fact as an assurance of our good intentions in a matter of such vital importance to the prosperity of the country. The demand for protective sera for the inoculation of animals has increased so greatly that we are proposing to establish a second laboratory for their preparation in Southern India. And those who are interested in such matters will have noticed the publication of the first Annual Report of our Agricultural Department, and the appearance of the first numbers of two new publications, *The Agricultural Journal of India* and *The Journal of Tropical Veterinary Science*, which will be edited by our scientific experts.

"At Pusa good progress has been made. The whole of the arable land has been brought under cultivation, and has now been prepared sufficiently to enable us to start tests preparatory to laying out permanent experimental plots. The pasture lands also have been permanently improved by eradicating poor grass and substituting good feeding grasses. The buildings are progressing rapidly, several being already completed, and it is hoped that the main Phipps' Laboratory will be ready early in 1907, when it will be possible to open the College. Meanwhile good temporary laboratories have been constructed, and Indian candidates are being trained in each special branch for employment under the

[*Sir Denzil Ibbetson.*]

Provincial Departments of Agriculture. The whole of the expert staff have been appointed, and all are now resident at Pusa except the Agri-Bacteriologist, whose services have been temporarily lent to the Government of Bengal for employment on Indigo Research Work.

"The preliminary survey of the varieties of Indian cotton, to which I alluded last year as the necessary ground-work for any improvement on scientific lines, has been completed by the publication of Professor Gammie's *Indian Cottons*. Some progress has already been made in the ascertainment of the varieties best suited to particular tracts; and irrigation has been found to render possible the cultivation in the Deccan of the finer herbaceous cottons of Guzerat and the early sowing of improved varieties in the United Provinces. The trial of exotics has given excellent preliminary results in Sindh, where Egyptian cotton seems to grow well, and the area under it will this year reach 6,000 acres. It has yet to be seen whether continuous cultivation in Sindh will result in deterioration of the staple, but there are already grounds for hope that this will not be the case. I am told that careful selection of seed from plant to plant on Government farms has already resulted in improvement, which should shortly give some practical results: meanwhile the rougher and more general method of selection which I described last year is being continued, and promising reports have been received, particularly from the Punjab, Bombay, and the Central Provinces. The raising of new varieties by hybridization has been retarded in most provinces by want of expert staff, but Bombay has advanced considerably, and some selected hybrids are now being tested in the field with good promise of success. The tree cotton experiments have not yet yielded any definite result. The Syndicate to whose operations I referred last year has been unfortunate in the seasons; and the question of supplementing the grant of Rs. 45,000 which we have already made for its experimental work is under consideration. The British Cotton Growing Association have placed the sum of £10,000 at our disposal, to be spent as we think best during the next five years upon the extension and improvement of cotton-growing in India; and the Secretary of State has sanctioned the employment of a cotton expert on the Imperial staff, while Provincial Departments have opened several new farms in cotton tracts.

"In connection with jute, interest has mainly centered upon two questions, the deterioration of the quality of the fibre, and the shortage of supply. All enquiry tends to show that the deterioration is mainly due to fraudulent watering, and the simplest and most effectual cure for both evils probably lies in the extension of cultivation. This is now being seriously taken up by the Department of Agriculture of Eastern Bengal and Assam, and in Behar, while experimental trial of the crop is in progress in Madras, the Central Provinces and Bombay. A jute specialist has recently been appointed; and the co-operation of the commercial community in his inquiries will be cordially welcomed.

"As this is the sixth and will be the last time that I shall have the privilege of addressing the Council in connection with the Financial Statements, I should like to say a word upon a subject to which I have not hitherto had occasion to refer, but which is very closely connected with the agricultural interests of the country—I mean the Forest Department of India, for which my Hon'ble friend Mr. Sim has pleaded so eloquently—and the occasion is the more appropriate, since it was exactly fifty years ago last January that Dietrich Brandis, the father of scientific forestry in India, entered the service of Government. I doubt whether the general public realise the enormous actual and potential value of our forest property, the degree in which it already contributes to our revenues, and the success with which it is managed by the admirable service which is in charge of it.

"Twenty years ago the surplus revenue contributed by our forests to the public purse was a little over half-a-crore. The revised estimates for the year which is just expiring put it at a crore and-a-quarter. And this, in spite of the fact that all those measures for the ascertainment, development, and protection of our forests, which really represent

[*Sir Denzil Ibbetson.*]

capital expenditure upon the property, and which are not yet by any means complete, have been and still are paid for from revenue. The selection of forests for reservation or protection, their demarcation, the settlement of private rights in them, their protection from fire, the improvement of communications upon which the profitable extraction of timber depends, and the provision of accommodation for the officers in charge—all these represent non-recurring expenditure which has been met from current revenue ever since we first seriously undertook the management and protection of Indian forests, and which still absorbs a considerable portion of the gross income; and when these processes are complete, we may look for a still more marked expansion of the net surplus.

“But the question of forestry in India has aspects far more momentous than the mere money value of the timber which is produced. Upon the maintenance of our mountain forests depends the steady flow of the rivers from which our great irrigation canals draw their supplies, while the protection of our hill forests is often (as lamentable experience has taught us) the only safeguard against the devastation of the cultivated plains below them. With the increase of population and the bringing of hitherto unoccupied areas under cultivation, the demand for fuel and small timber is daily increasing; while if the Indian cultivator is ever persuaded to restore to his fields in the shape of manure a fair portion of what he takes from them in the form of fodder, that demand must expand enormously. Our forests, moreover, annually afford grazing to great numbers of the cattle upon which agriculture is dependent, while in time of drought, such as the present, they constitute invaluable reserves of grass. During the year which is just over, the Secretary of State has sanctioned proposals for the expansion and improved remuneration of the higher grades of the Forest Service, and we have under consideration similar proposals in connection with the executive grades, and with the reorganisation of the Provincial Service, and of the school at which it is trained. We are also considering proposals for the establishment in connection with that school (which we propose to raise to the status of a college) of an Institute of Forest Research, which will place Forestry upon an equal footing, in respect of scientific enquiry and instruction, with Agriculture and Veterinary Science.

“During the year Indian standard time has been introduced on all Indian railways and telegraphs, thus bringing for the first time our local standards into simple and intelligible relationship with those of the rest of the civilised world. The new time has been accepted by the whole of India with the single exception of Calcutta; and I cannot believe that the capital of the empire will long continue to hold aloof from a reform of such obvious convenience.

“Before closing these remarks, I must mention two Resolutions which have been published within the last few months on the subjects of Remissions and Suspensions of Revenue in seasons of drought, and of takavi advances to agriculturists in need of loans. To the latter I have already alluded. The liberal principles laid down in the former have been readily accepted by Local Governments, who are revising their rules in order to give effect to them. We have recently addressed the Secretary of State on the subject of the exemption of improvements from assessment to land revenue, and as soon as his orders are received instructions will issue on the subject. These three Resolutions will complete the general review of our Land Revenue System which was undertaken during Lord Curzon's term of office, and I think that even the sternest critics of that system will admit that much has been done during the past few years to define and make public the principles upon which it is based, to ensure leniency and liberality in their application, and to introduce elasticity into their operation.

“Turning now to the Department of Public Works, the most important event of the year has been the acceptance by the Government of India and the Secretary of State of the rough programme which was formulated by the Irrigation Commission as an approximate forecast of operations, and as the basis of our financial arrangements. The papers have been published; and Hon'ble

[*Sir Denzil Ibbetson.*]

Members will be aware that an expenditure of some 44 crores, or nearly thirty millions sterling, is contemplated within a period of twenty years, of which four-ninths may roughly speaking be said to be allotted to protective works, and will be provided from the moiety of the Famine Grant which is available for works of this character. This decision has a two-fold importance and significance. In the first place the principle is now for the first time definitely formulated and accepted, that it is not only legitimate but also our duty to spend very considerable sums from the general revenues upon works which will in all probability never be remunerative either directly or indirectly, but which will protect local areas and their inhabitants from the horrors of famine. And in the second place we now have, for the first time since the first Famine Commission reported in 1880, a programme, provisional no doubt, and liable to alteration as the examination of individual projects proceeds—but still a programme, however rough, based upon an examination by competent persons of the irrigational needs and possibilities of India as a whole, and upon the relative necessities of the several provinces. In each of these respects a great advance has been made, and the policy of the Government of India in respect of protective irrigation has now been definitely laid down for a generation at any rate.

“Meanwhile, as papers which were recently published will have shown the Council, good progress has been made in the examination of individual projects. Already, since the report of the Commission appeared, forty-three projects commanding over seven million, and designed to irrigate over three million acres, have received final sanction. But this is only part of the work which has been done. In those provinces in which it was needed, a hydraulic reconnaissance or stock-taking of irrigational possibilities is in progress; while numerous projects of greater or less importance are in an advanced stage of preparation. Among them is a protective work—the Tungabhadra scheme—which is the most costly irrigation project that has yet been framed in India, being estimated to cost some 12 crores of rupees, to irrigate annually nearly a million acres, and to afford protection in years of drought to another million. To enable us to deal promptly and effectively with these schemes, we have recently appointed a whole-time Inspector-General of Irrigation whose duty it will be to advise us in carrying into effect the enlarged programme which we have adopted.

“But the duties of the new Inspector-General will not be confined strictly to irrigation matters. In January 1905 the Secretary of State and the Associated Chambers of Commerce of India almost simultaneously invited our attention to the potentialities of the natural waterways of the country, and especially of Bengal, and to the desirability of maintaining and improving this means of communication. Our attention was naturally first directed to the channels of the great Ganges-Brahmaputra delta, which traverse one of the richest portions of India, and which, while virtually forbidding transit by rail or road, afford unexampled facilities for transit by water. The subject had already been under the consideration of His Honour Sir Andrew Fraser, who is fully alive to its importance; it has been decided to examine it as a whole; and, especially since two separate Local Governments will now be intimately concerned in its development, the Inspector-General of Irrigation will advise us upon the general aspects of the matter. Three branches of it are at present receiving special attention. It is proposed to spend some 28 lakhs of rupees upon the improvement of the Madaripur Bhil route, upon which 11 lakhs had already been spent up to the end of 1903-04. And the Tolly's Nallah scheme and the improvement of the Bhagirathi route are now under detailed examination. These are large schemes, which naturally have the first claim upon our consideration. But I quite agree with the Hon'ble Maharaja of Darbhanga that the smaller channels also have their value as feeders; and I hope that they, in their turn, will receive the consideration that they deserve.

“The improvement of the port of Chittagong has also occupied our attention, and the Government of India have contributed ten lakhs to the cost, and have thus fulfilled the promise of help from Imperial revenues which was made

[*Sir Denzil Ibbetson; Sir Arundel Arundel.*]

by Lord Curzon in February 1904. An expenditure of 8½ lakhs upon dredging plant and revetment has already been sanctioned, which will meet the more immediate requirements; and a complete estimate of the cost of the whole work to be done is now under preparation.

"The Hon'ble Rai Bahadur Sri Ram will find the answer to his question about the admission of Indians to the Public Works Department as recruited in England, in the Supplement to the *Gazette of India* of the 15th July 1905. They are admissible up to a limit of ten per cent. of the total number recruited each year; and as the recruitment for 1907 has been fixed at 39, this means a substantial advance upon existing rules."

The Hon'ble SIR ARUNDEL ARUNDEL said:—"My Lord, there is one drawback to the liberal grants which the Hon'ble the Finance Member has fortunately been able to make to the different Local Governments for such special objects as police, agriculture, education, etc. It is that some Hon'ble Members are disposed to look reproachfully at the Government of India for not having given a great deal more to these and other objects, and to forget that it is to their own Local Government they should appeal which is in possession of large funds under the decentralized system of finance out of which all administrative expenditure should ordinarily be met. The Hon'ble Mr. Sri Ram frankly says that the subsidies in aid of the Government of India are 'doled out,' and laments that much more has not been given, though he cordially approves of the abolition of the patwari or village service cess which has absorbed so much of the available surplus, and which must obviously prevent the Finance Member from making further subsidies."

"The Hon'ble Mr. Porter strongly advocates grants from the Financial Department for the housing of police-officers. But from the outset of the discussions on the report of the Police Commission it has been recognised that the expenditure on police buildings is a purely provincial liability. I fully recognise that there is much to be done; but most Local Governments have now a quasi-permanent financial settlement, and it rests with them to apply their growing revenues to purposes of this kind. In the era of reform inaugurated by the Police Commission the Government of India have taken upon themselves much heavy recurring expenditure that is involved, and the initial charges remain for the Provincial Governments."

"With regard to plague I think the Hon'ble Mr. Porter somewhat overstates his case. It is not all kinds of sanitary reforms that affect the spread of plague, and the connection between plague and large drainage schemes is, I venture to think, remote. What does help against plague is paving and making minor drains, etc., of masonry, because these improvements help to exclude rats and prevent the soil from becoming infected. Building improvements that let in light and air are also admittedly beneficial by tending to destroy the bacillus. But it cannot be admitted that the Government of India should finance large schemes of municipal drainage because plague exists and may continue to spread. I of course do not wish it to be supposed that there may not be other reasons which might justify the Local Government in seeking help when necessary from the Government of India for large schemes of municipal improvement."

"The Hon'ble Mr. Porter and the Hon'ble Mr. Sri Ram lament the absence of special grants for hostels or for other objects connected with secondary education. The desirability of hostels for the youth of schools and colleges now universally recognised has assumed prominence only within the last few years. It was, I think, due to Dr. Miller of Madras, who took time by the forelock and erected a hostel for his college out of his private purse. The advantages of hostels are so great that Local Governments are recognising an obligation to endeavour to provide them. But the obligation is essentially Provincial. The matter is also one in which private liberality may fairly be expected to aid. A District Board or Municipality numbering among its members most of the local magnates is exactly the sort of body that might be expected to stimulate local munificence, and to persuade well-to-do neigh-

[*Sir Arundel Arundel.*]

bours that the founders of educational institutions build for themselves the most enduring of all monuments.

"I cordially sympathize with the Hon'ble Nawab Bahadur Khwaja Salimulla of Dacca in his advocacy of improved educational facilities for the Mahomedan population of Eastern Bengal and Assam which he represents. I am confident that their needs will receive the fullest consideration from the Lieutenant-Governor, Sir Bamfylde Fuller.

"I understand the Hon'ble Mr. Gokhale to advocate universal free primary education throughout India. That would be a large order. The average monthly cost of a primary school is estimated to be Rs. 10. To increase this to Rs. 20 would cost over a crore of rupees even if not a single additional school were started.

"The first and greatest difficulty is money. The next is the reluctance of parents of the poorer classes to send their boys to a school and thus forego the value of their labour. In England it was found that the only way to surmount this difficulty was to make the education compulsory. In India we are many years distant from that consummation. But the hope and aspiration of the Hon'ble Member for universal free primary education is one that must meet with wide sympathy, and will be kept in view as the distant peak to be one day attained while the work of the present must be slow progress along the plain.

"I am glad to see that the Hon'ble Sri Ram, though he takes a gloomy view of the agricultural labourers' condition, does not repeat the pessimistic statement that India is steadily growing poorer—a statement that no budget, however prosperous, and no increase of trade however great, avails to abate. If the yield of the taxes increases, it is urged that money is needlessly wrung from the poor; if the yield falls off, it can only be due to increasing poverty. Such pessimists will doubtless remain pessimists to the end.

"This is the last occasion on which I shall have the honour of addressing this Council, and I will take this opportunity of saying that an Indian experience of over forty years has compelled me to realize the great improvement that has been brought about in the condition of the raiyat and the agricultural labourer in the course of that time. Roads and railways have benefited them no less and indeed more than the rest of the community, for food can now be brought to them if crops fail, while high prices are realized by the export of abundant harvests. Formerly a single failure of the monsoon meant widespread famine: now it is usually but local scarcity which can be successfully combated by the administrative officers. And here I must emphatically dissent from the Hon'ble Mr. Gokhale's statement that 'the exhaustion of the soil is fast proceeding, the cropping is becoming more and more inferior, &c.' My experience as a Settlement Officer and as a Collector in no way bears this out. I heard privately a few weeks ago on the best authority that the crops of the district which I left nearly fourteen years ago were never more splendid than they are this year.

"The Hon'ble Mr. Sri Ram says 'the labouring classes are in a chronic state of poverty hardly raised above the point of starvation.' If poverty means the absence of a credit balance with the village money-lender, the statement may be correct. But avoiding statistics and speaking from actual experience, I may say that I was for five years Collector and Magistrate of a district, Kistna, 8,000 miles in extent and yielding 60 lakhs of land-revenue per annum, which I knew well, and to allege that the labouring classes there were hardly raised above the point of starvation is entirely incorrect. Very many of the raiyats had saved the money and were money-lenders themselves to their poorer neighbours. The labourers had work and food sufficient for themselves and their families at all ordinary times. Signs of prosperity among the raiyats appeared in the widespread substitution of tiled roofs for thatched; in the importation of large quantities of gold coins—largely French—for use as ornaments; and not least in the number of graduate pleaders who settled in various towns of the district and drew comfortable incomes derived from litigants who were chiefly agricultural. One infallible test could always be applied, namely, that the little children in the poorer hamlets were ordinarily well fed and were neither pinched nor emaciated.

[*Sir Arundel Arundel ; the Commander-in-Chief.*]

I do not recollect to have heard of any cases of death from actual starvation during my tenure of office in that district, though it is possible there may have been, and the poor-law guardians of many a large town in England, to say nothing of a whole county, would be glad if they could say the same."

His Excellency THE COMMANDER-IN-CHIEF said :—"My Lord, my Hon'ble Colleagues, the Maharaja of Darbhanga and Mr. Gokhale, have both raised the question of army expenditure, and the latter has reiterated many of the arguments and assertions which we have heard at each Budget debate during the three years I have had the honour of sitting at this table.

"The Maharaja of Darbhanga has asked :—'What is the use of alliances if we are not to take advantage of them?'* But surely he must recognise that there are higher and more world-wide interests underlying our alliance with Japan than the mere pecuniary advantage to this country that he puts forward. It is, of course, evident that, owing to recent events, we have a breathing space in which to complete the precautionary measures which have been recognised to be indispensable. But that is no reason why we should abandon our efforts to remove obvious and acknowledged defects and deficiencies, or reduce our army below the standard that was considered necessary before any of these events occurred.

"I am glad, however, that this discussion has been raised ; as it gives me an opportunity of trying to place the matter of army expenditure before my Colleagues in a light in which it may not have been put to them before,

"I think it will be allowed that military expenditure must be considered from three broad standpoints :—

firstly, efficiency and sound organisation ;

secondly, economy in the expenditure of the funds voted for the army ;
and

thirdly, the strength of our forces, and the remuneration our men receive for their services.

"The time at our disposal is limited and I have no desire to encroach on your patience unnecessarily. But I should like to make a few remarks under these main heads which I trust will show my Hon'ble Colleagues that I unite with them in their desire to secure efficiency and economy in all matters—particularly military—and that I consider it would, of course, be unjustifiable to maintain any forces which can be proved to be superfluous for the necessities of this country.

"The Hon'ble Mr. Gokhale would prefer to rely entirely on what he terms 'citizen-soldiership,' framed on Japanese lines. From my short experience of this country and its inhabitants, I am not convinced that the people of India would welcome, with all his enthusiasm, the introduction of conscription, with rates of pay that would necessarily be very much lower than the soldier receives at present ; and, if Mr. Gokhale does not mean this, I cannot follow his argument that 'the present military burden will be largely reduced.' I cannot help thinking, also, that it is possible that the martial spirit which he wishes to develop might have drawbacks to the class he most closely represents which my Hon'ble Colleague has not fully contemplated.

"Although both of my Colleagues object generally to military expenditure, I hardly think either of them would be satisfied unless the army of this country were maintained in as efficient a manner as possible. I feel sure also that they will agree with me that in all great industries it is the unquestionable duty of employers of labour to do all in their power to remove any deficiency or defect in their arrangements which might be productive of needless risk or danger to their dependents. It is a simple, rudimentary obligation in the relations between master and servant, which I feel sure no member of the community would attempt to challenge, and I think those who represent the mercantile communities of this country will admit that it is only a wise policy to prevent their workpeople being hampered by antiquated machinery or insufficient materials.

[The Commander-in-Chief.]

"Now there is a class of public servant which I think should not be excluded from equal consideration in this respect. It is a class of men of whom we are justly proud, who have brought much credit to the Empire and on whom we have to rely for the maintenance of peace and security in this country. I refer to the Army in India. It must be remembered that these men are prepared to give their lives freely for the integrity and honour of this country and have proved the fact in innumerable instances. If, then, the owner of a mine only does his duty in securing his employées from the obvious risks which surround them in the exercise of their calling—if he would rightly be convicted of a grave dereliction of such duty if he were not to protect them from the dangers of fire-damp, or were to send them down into the shafts in worn-out cages—surely a Government only fulfils an equally essential obligation in endeavouring to protect its soldiers, who devote their lives to the State, from needless destruction, by giving them the means which are essential for the performance of their dangerous duties.

"There is also another aspect of the case which I think will appeal to my Hon'ble Colleague.

"We have recently had an example of how efficient organisation and preparation produce remarkable results in war. The Japanese prepared for possible eventualities, with the result that, when the time of trial came, they passed triumphantly through what everyone recognised was a critical turning point in their national history, instead of being crushed as some expected they would be in their recent struggle against a great Military Power. Do those who represent the best opinions in this country desire that it may be said that the Indian soldiers are inferior in fighting quality to our gallant allies, not because of any want of bravery or patriotism on the part of the men themselves, but because of their not being given the necessary organisation and equipments? I think not; and I feel sure that my Hon'ble Colleagues the Maharaja of Darbhanga and Mr. Gokhale would be the first to resent any disparaging remarks of this sort against their countrymen, and that they would wish to prevent the possibility of any such comments being even hinted at or suggested.

"In addition, therefore, to the paramount obligation of securing the peace and safety of the State, it seems to me to be incumbent on Government, both on the score of humanity and also for the honour and fair name of the people of this country, to see that our soldiers are not sent into the field imperfectly organised, with inferior weapons, and without the necessary ammunition and other essential warlike stores.

"That is what we are trying to do. We should, of course, prefer to have our measures even more highly perfected, so as to have a margin of safety which would give our troops the advantage over an enemy. But that is at present beyond us. We are merely trying to bring our equipments up to a standard equal to that of possible opponents, and remove defects which have too long remained unrectified. However we may desire to study economy, we are compelled to pay some measure of regard to the re-armaments and military progress in other countries, and are often forced against our wishes into expenditure which we should prefer to devote to other objects. It is also an unfortunate fact that, ever since the days of bows and arrows, the cost of lethal weapons and munitions of war has steadily increased. That, however, is a factor beyond our control. But we have been and are still doing the best we can to reduce the expenditure thus caused as much as possible. By the extension of Indian factories we hope to be able to turn out guns and other equipments more cheaply than we have hitherto been able to obtain them from England; and this course will have the further advantage to India that the money spent on labour will go to Indian workpeople.

"Under the arrangements which have recently been introduced, Army expenditure will, in future, be under the direct control of the Finance Department. I should, therefore, be trespassing on my Hon'ble friend Mr. Baker's preserves if I were to enlarge on the subject of economical expenditure of money: But I am conscious that he relies on my full and cordial co-operation, to prevent waste of all sorts, so that the funds voted for

[*The Commander-in-Chief.*]

the army may be expended with strict regard to economy and due regard to military efficiency.

“ At the last debate on the Budget, my Hon'ble Colleague, Mr. Gokhale, took exception to a remark that his knowledge of military matters was not extensive. I have not the temerity to repeat a proposition which he said was superfluous. But I do say that the correct appreciation of our military position necessitates long and careful examination, by the best experts we can get with full knowledge of the numerous factors which affect the problem. When such investigations have been completed and laid before the Government, it is for them to decide what means should be provided, that is, what the strength of the army should be. But I think everyone will agree with me that before even discussing any addition to our forces, it is our duty to try, by improvements in our arrangements, to make the best of those already at our disposal. This is what we are trying to do. This is mainly what the Reorganisation Scheme means, regarding which there seems to be considerable misapprehension. Some appear to have misgivings that a large increase to the forces is projected; others that the bulk of the expenditure is to be spent on buildings. Both assumptions are widely incorrect. As the result of a long and elaborate examination, it has been found that, by improved methods, we should be able, out of our existing forces, to place in the field an army of practically double the strength that was previously considered possible. The expenditure now being incurred, which is only a fraction of what would be required if we had to add an equal number of new units—is partly for the equipment of these additional troops. But it also includes the cost of new rifles; the introduction of quick-firing guns for the artillery, which, in turn involves larger reserves of ammunition and ammunition columns; improvements to our transport, the coast defences, and many other measures which have long been recognised as indispensable. The bulk of the expenditure is for these services, and only a small proportion is being incurred on the necessary accommodation required for the better distribution and consequent better organisation and training of the army. As I have shown, we are spending money in reorganising our existing materials, and not on any material addition to the forces; though, as a consequence of the experiences in South Africa and Manchuria, we are also trying to reduce the large deficiency in officers, and are building up a larger reserve for the Native army which is a move in the direction which the Hon'ble Mr. Gokhale advocates. In taking these precautionary measures, we are spreading the cost over a considerable period, so as to reduce inconvenience as far as possible; and when they have been completed, we may hope that military expenditure will be largely reduced.

“ When we come to the question of the remuneration which men in the army receive, I feel sure that my Hon'ble Colleagues do not consider the sepoy overpaid. Indeed, having regard to the increased cost of living, I should be somewhat surprised if they did not think the converse to be more correct.

“ I trust that I may have been able—even if it only be in some slight degree—to reassure my Hon'ble Colleagues that we are not indulging in military extravagances; but on the contrary, are endeavouring, by overhauling our existing machinery, to obviate increases which might otherwise have been forced upon us. It must be remembered that if we are to secure peace and tranquillity to this country, which are essential conditions of its material progress and advancement, we must be watchful; and, whilst resisting any tendency to be influenced by extreme views on either side, it is necessary that we should methodically and systematically organise the available means at our disposal. Capitalists will not place their money in India, or assist in the development of its resources, on which this country's prosperity so much depends, unless they are convinced that there is assured security. Therefore, if we desire to attract capital and act up to the motto ‘Advance India,’ we must be careful that no idea gets abroad that our position is insecure or that we are neglecting necessary precautions.

“ My Lord, in the gracious message which His Royal Highness the Prince of Wales sent to Your Excellency as he was leaving India, he referred

[*The Commander-in-Chief; the Lieutenant-Governor; Mr. Baker.*]

to the grand traditions of the army in this country, and to the keen spirit and general striving towards efficiency and preparedness for war which appeared to His Royal Highness to animate all ranks. I can assure Your Excellency that the Army of India deeply appreciates the high commendation thus bestowed upon them by our King Emperor's son. The loyalty, bravery and devotion of this army are all factors upon which confident reliance can be placed; but its preparedness to take the field must depend largely upon the action of Government, for even an army of heroes can only be sacrificed if it be not provided with the necessary organisation and equipments which are essential for success in modern war."

His Honour THE LIEUTENANT-GOVERNOR said:—"My Lord, I shall not detain the Council many minutes. I desire, in a word, to congratulate Your Excellency's Government on the Budget and my Hon'ble friend Mr. Baker on the manner in which it has been presented and the manner in which it has been received. It is not necessary for me to say anything in regard to the discussion that has taken place, except perhaps in regard to a remark or two which have fallen from my Hon'ble friend the Maharaja of Darbhanga. One matter which he discussed has been disposed of by my Hon'ble friend Sir Denzil Ibbetson, namely, the question of the waterways of Bengal. The other was the popular view—which I observe the Maharaja Bahadur did not venture himself to accept—of the connection between the development of railways and the development of malaria. I think he will find, when we come to discuss that question in another place, that the coincidence to which that view of the connection between railways and malaria owes its origin has not escaped the attention of the Government of Bengal, and I trust he will consider that we are dealing as adequately as we can with it.

"Only one word remains, namely, that I desire to express the gratitude of the Government of Bengal for the terms of our new contract. I shall not enter into details. They have been thoroughly threshed out between the Government of Bengal and the Government of India, and I am glad to find that my Hon'ble friend the Maharaja of Darbhanga has only a half-hearted wish to express that perhaps we might have got more. I need not say that I thoroughly re-echo that wish. We feel very much our want of money. It is a terrible thing to be surrounded by open mouths and claimant demands, and we have far too often to meet such requests for substantial help with the cold water of sympathetic words. At the same time we have received from the Government of India very generous treatment, and have now, I trust, some money with which to do some work, and we are not ungrateful to them."

The Hon'ble MR. BAKER said:—"My Lord, I think Your Excellency's Government has reason to be satisfied with the reception which the Budget has met with at the hands of Council. From the observations which have fallen from various speakers today, I gather that our specific proposals have met with general approval, especially those for the remission of the patwari cesses; but some disappointment seems to be felt that we have not made larger provision for expenditure on a variety of new objects. My Lord, I venture to think that that disappointment, if it is really felt, is not altogether reasonable. As Lord Curzon once said, we have been forcing the pace a good deal during the last few years, and we are already committed to very heavy recurring expenditure on police reform, the improvement of agriculture, primary education, and many other things. I am far from taking a pessimistic view of the situation, but having regard to the present unfavourable character of the seasons in several of the provinces, I really think it would have been rash for us to launch out upon any great new schemes at the present time. And there is another consideration of a more general character, which, I think, some gentlemen are apt to lose sight of, but which is really of great importance. The Hon'ble Home Member has already drawn attention to it in his speech today. It is this. Almost all the matters for which we are invited to provide additional grants are within the sphere of the Provincial Governments. We have conferred

[*Mr. Baker.*]

upon these Governments definite powers and responsibilities which extend to most branches of the civil administration and we have provided them with growing revenues, on what may fairly be described as a very liberal scale, to enable them to discharge their duties adequately in all branches. The Local Governments have not merely ample funds, but also full discretion in the expenditure of them. It would be wholly inconsistent with the first principles of the system of Provincial Settlements, if we were to dictate to any Local Government what it should spend on each individual head; and it is also an entire mistake to suppose that the money for improvement in the Provincialized branches of the administration ought to be or can only be provided in normal circumstances by special additional assignments from Imperial revenues. If any particular measure is outside the terms of the settlement, or is of such magnitude as to be beyond the powers of the Local Governments, then Imperial revenues may fairly contribute, as they have done on several occasions in the past. Police reform is a conspicuous instance of this. If we were to embark on a policy of making primary education free of charge to the public, as Mr. Gokhale suggests, that also would justify some special assistance from Imperial funds. But most of the objects for which we are pressed to find money are not of this class. Thus, the Hon'ble Mr. Sri Ram complains of the inadequate provision for technical education and for sanitation, and the Hon'ble Mr. Porter asks us to give additional grants to the United Provinces for police buildings, for hostels in secondary schools, and for subventions to Local Municipalities. He says that the United Provinces ask for no doles, but with all due deference it seems to me that is exactly what the Hon'ble Member does ask for. These are all ordinary items of Provincial expenditure, for which due allowance was made, though in general terms and not specifically, in the Provincial Settlement; and it is for the Local Government to provide the necessary funds. Any other course would make these particular items an Imperial charge, and would be destructive of Provincial responsibility.

"But I will admit that I have much sympathy with the Government of the United Provinces. The Hon'ble Mr. Sri Ram's detailed comparison of the Provincial Settlement with those of other provinces is inaccurate in certain respects; but it is quite true that, as a whole, though much more favourable than its predecessors, it is still distinctly less favourable than that of any other Local Government, conspicuously so as compared with those of Bombay, the Punjab, or the Central Provinces. Again it is undeniably true that the United Provinces have been very hard hit by the failure of the harvests and by the heavy expenditure they have had to incur on famine relief, by which its estimated balance at the end of 1906 will have been reduced to 5½ lakhs of rupees. If we are able to devise a more equitable method of allocating famine expenditure, I hope that we shall be able to apply it in such a way as to make up a part of the losses which the Local Government has already incurred. As regards the terms of the settlement, it is perhaps too soon to revise it altogether, but I shall be ready to bear the matter in mind when a suitable opportunity occurs. The same remarks apply in the case of the settlement with Madras to which Mr. Sim has referred, and the terms of which are generally similar to those of the United Provinces settlement.

"Next year, we shall undertake the revision of the Provincial Settlement of Burma, and I think I may promise that we shall bear in mind the appeal which Mr. Hall has made to us on behalf of this Province. I quite agree with him that liberal expenditure in Burma is likely to prove productive, and it shall be our object to accord it both just and generous treatment.

"Both the Nawab Bahadur of Dacca and the Maharaja of Darbhanga have commented on the small share which Bengal has received in the remission of taxation. The explanation of this may be summed up in the three words—'the permanent settlement.' In Bengal the land already pays far less in proportion than in any other part of India; and so far as strict justice is concerned, it has no claim even to the 4 lakhs a year which has fallen to its share. The justification for the remission of the zamindari dāk cess lies wholly in the

[Mr. Baker.]

fact that the district post is an administrative anachronism, and it could not be defended by any references to the equity of relieving the landed interest of that province.

"The Nawab Bahadur has expressed the hope that the balance may be redressed by a readjustment of the road cess in Bengal. I hope my Hon'ble friend does not ask for a reduction of the road cess—of which I can hold out no expectation. But it is true that in my judgment Bengal has a real grievance in regard to its local taxation. In Bengal, as in Madras and Bombay and most other provinces, the land pays one anna in the rupee of its annual value under the head of Provincial rates. But whereas in other provinces the whole of this cess belongs to the Local Boards for local purposes, in Bengal one-half of it has from the first been appropriated as an asset of general revenues. I am well aware of the historical reasons for this appropriation, and they have always appealed to me as being singularly devoid of force. I shall be very happy if within my term of office it should be in my power to redress this injustice to the province to which I have the honour to belong.

"The Hon'ble Mr. Logan has pointed out how seriously the finances of some of the Local Governments, and Bombay in particular, are affected by expenditure on famine relief, and he has urged that all such charges should be borne by Imperial Revenues instead of by the Provincial Governments. Mr. Sim has raised the same point in regard to the province which he represents. Mr. Logan is under a misapprehension in thinking that the grants in the present budget for relief works and remission of land revenue are Imperial grants. They are, of course, Provincial, in accordance with the terms of the Provincial Settlement. It is, however, unnecessary to dwell on this point.

"I do not regard the difficulties which undoubtedly attach to the present system in quite the same light as the Hon'ble Member, and I could not assent to the solution he has suggested. The management and conduct of 'wars, expeditions, and political missions' rest with the Imperial Government, and it is therefore right that the latter should pay for them. But the actual administration of famine relief must necessarily rest with the Local Government, and famine is the last matter in which financial responsibility should be divorced from administrative control. Even as it is, it is difficult enough to hold the scales evenly between the claims of economy on the one hand, and those of humane treatment of suffering people on the other. If there were a big famine in any province, and the Local Government were at liberty to pass on the entire bill to us, I shudder to think of the consequences to the finances of the Government of India.

"But having said this much, I will frankly admit that in my judgment the present system is really open to serious objection. No allowance is made for famine in the Provincial Settlements, and the established principle is that the entire resources of a Local Government must be exhausted before any assistance can be claimed from Imperial Revenues. The result is that the system is unfair as between one province and another. A province which is liable to relatively frequent famines, such as the United Provinces, Bombay, or the Central Provinces, is worse off than one which is comparatively immune, such as Burma or Eastern Bengal. Moreover, a province which is afflicted by famine shortly after it has obtained a *quasi*-permanent settlement, as has been the case with Bombay and the United Provinces, loses the advantage, to a greater or less extent, of the initial lump grants which were intended to give it a good start on its new career, for these are absorbed in meeting famine charges, instead of being available for Public Works, or improvements in the Civil Administration. The consequences are more serious under the present system of *quasi*-permanent settlements than they were formerly, for the quinquennial revision of the settlements no longer affords an opportunity of setting a crippled province on its legs again. Lastly, in the case of a small famine, one effect is actually to improve the financial position of the Imperial Government at the cost of the provinces: for expenditure is transferred from 'Reduction and Avoidance of Debt,' which is an Imperial head, to 'Famine Relief,' which is Provincial. This has actually occurred on the present occasion, and it is an undoubted anomaly.

[*Mr. Baker.*]

"The question is one of considerable difficulty, and various remedies have suggested themselves. I admit that a material change is required, and it is our intention, as soon as we get to Simla, to examine the matter thoroughly and endeavour to devise a sound solution. It will probably be necessary to consult the Local Governments, and the sanction of the Secretary of State will certainly be required if any radical alteration of principle is made. For the present, I will merely say that we are fully alive to the objections to the present system, and that it shall receive our prompt and careful attention.

"The Hon'ble Mr. Apcar has urged us to 'think imperially' in fixing the amount of our contribution towards the cost of the improvement of Calcutta. I can assure him that the Government of India are now and have always been ready to take a generous view of the claims of the capital to assistance from the State in carrying out this long delayed and greatly needed measure. The amount of our contribution was fixed at 50 lakhs in consultation with and with the sanction of the Secretary of State, and it is not open to me to undertake to increase it. But if sufficient grounds can be shown for reconsidering the amount, we shall no doubt be ready to do so. On the other hand, it is only just that those who benefit most by the scheme should bear the brunt of the burden. Some of the comments which I have seen in the Press on this subject might lead one to fear that this principle is not always borne sufficiently in mind.

"I regret that I cannot assent to the Hon'ble Mr. Apcar's suggestion that the continuance of the income tax is suspiciously like a breach of faith. This suggestion has been made before, in the Press and elsewhere; but, so far as I know, it has never been supported by any evidence whatsoever, and I can assure the Hon'ble Member that as a matter of plain historical fact it rests on no foundation. When the tax was imposed in 1886, Raja Piari Mohan Mukherji moved an amendment to limit the duration of it to one year. With reference to this, the Hon'ble Mr. Steel, representing the Bengal Chamber of Commerce, said that—

'The payers of income tax will now fairly claim that under the present Bill they will contribute at least their full share: and when any remission of taxation is possible, they will expect that their case shall be considered on its merits along with all other claims for relief which may be put forward.'

"Referring to these remarks of Mr. Steel, Sir Auckland Colvin, in opposing the amendment, said—

'With regard to the duration of the tax, the Hon'ble Mr. Steel has put the case in an extremely fair way, *viz.*, that if the Government finds itself in a position to make remissions of revenue hereafter, the question of the income tax should be put on the same footing and receive the same consideration as any other question of remission of revenue.'

"Again in 1890, in replying to a representation from the Bengal Chamber of Commerce, the Government of India wrote as follows:—

'It is unnecessary to remind the Chamber that no tax can be considered to be final either as regards form or rate, but I am to say that the Government of India has never given any sanction to the belief that the present income tax would be abolished or reduced in preference to any other tax which is now levied or which was levied in 1886.'

"Since the tax was imposed in 1886, the Government has never given any sort of pledge or promise, direct or indirect, to repeal the tax or treat it in any way differently from any other tax. Only two years ago, Sir Edward Law in this Council emphatically affirmed the absolute freedom which Government claimed to itself in this respect, and I can do no more than repeat what he then said. I can hold out no sort of expectation that the tax will be either repealed or reduced. It is almost the only contribution of importance which is made to the public revenues by the monied classes in this country whose incomes are derived from trade or other non-agricultural sources. These classes are universally admitted to derive great benefits from British rule; and in my judgment, they at present contribute not too much, but too little.

"Nor am I disposed to think that the limit of exemption should be raised. It seems to me that a man in this country with an income of ₹1,000 a year is better off and ranks higher in the social scale, than a person at

[Mr. Baker.]

home with an income of £160 a year.' The latter figure represents only about four and-a-half times the average income of a resident of the United Kingdom, whereas Rs. 1,000 represents no less than thirty times the average income of a resident of India. As regards the suggestion for a rebate on, or deduction from, incomes below a certain amount, it is perhaps possible that a case might be made out, but *primâ facie* it does not seem to be a matter of great or general importance.

" With reference to the point raised by the Hon'ble Mr. Sri Ram, I will have it enquired into; but *primâ facie* I am not sure that the rate of increase in the yield of the tax has been in any way abnormal.

" The Hon'ble Mr. Gokhale has raised a number of more or less important questions, with which it would be quite impossible to deal adequately in the time at my disposal.

" In the first place, he has suggested that in our accounts the receipts from Railways and from Productive Irrigation Works should be shown *net*, instead of showing the gross receipts on one side and the various charges on the other. This suggestion has been before Government more than once. Personally, I think that there is a great deal to be said in favour of it, but the view that has hitherto prevailed is that it would be misleading to omit from our main accounts items aggregating 25 millions sterling; nor would such a change be justifiable in accounts which profess to state the total revenue and the total expenditure chargeable thereon. A further practical difficulty has arisen in connection with the allocation of the figures between England and India, as it would apparently be necessary to exhibit very large *minus* figures, which would not be readily intelligible. I will have the matter further enquired into, but no change of this description can be introduced without the sanction of the Secretary of State, and I can therefore give no undertaking in the matter one way or the other. •

" The Hon'ble Member has also suggested that the figures which relate to 'local' revenue and expenditure should be excluded from our main accounts, which should be confined to those relating to Imperial and Provincial Finance. It so happens that a very similar proposal has been under our consideration during the past year, and I am myself of opinion that the balance of advantage is in favour of making the change, provided that steps are taken to exhibit the aggregate local transactions in a convenient and accessible form. Here also no change can be made without the approval of the Home authorities whose decision cannot be anticipated.

" Then the Hon'ble Member has put in a plea on behalf of the District Boards in Bombay. The principal source of income of these Boards is the local cess on land, which is a function of the land revenue: and when for any reason, such as famine, the land revenue is suspended or remitted, the Boards lose a large part of their revenue. In the Punjab, he says that in such circumstances the Local Government make up to the Boards the amount of the cesses which is lost.

" Mr. Gokhale was good enough to mention this matter to me a few days ago, and I have made such enquiries as were possible in the interval. I am informed, however, that the Hon'ble Member's information in regard to the practice in the Punjab is not correct. In that province the District Boards have to stand the loss when cesses are remitted, and the amount is not made up to them by the Local Government. If that is the case it cuts away the ground from under the Hon'ble Member's feet. We could not reasonably make a special rule for Bombay more favourable than that which obtains elsewhere. Apart from that, moreover, I do not think that the present practice is inequitable in itself. The fact that Bombay has not shared in the present remission of taxation is easily explained. Bombay has never—at least for so long as I am aware—had to pay the village officer's cess or the famine cess. It has all along enjoyed the very exemptions which we are only now extending to other parts of India. So far from Bombay having a grievance, it is rather the other provinces that have cause to complain that they have been left behind Bombay for so long.

[*Mr. Baker.*]

" Then, again, Mr. Gokhale has taken exception to the practice by which District Boards are required, in times of famine, to devote a great part of their resources to expenditure on relief works. I find that there are very numerous orders on this subject, some of them dating many years back; and it is not possible for me without much more time for consideration to make any complete or authoritative pronouncement on the subject. One order which I have found is to the effect that all municipal, local and district resources must be first exhausted before any call is made on Provincial or Imperial funds. I have no hesitation in saying that if that principle is to be interpreted literally, I entirely dissent from it. I doubt whether it has ever been really acted upon, and it is certainly not in accord with the policy which has governed the action of the Government of India in these matters for years past. Speaking with all due reserve, I think the utmost we can rightly require of a District Board in time of scarcity is that it shall economise in its ordinary expenditure in all reasonable ways; that it shall set apart as much of its funds as possible for expenditure on works; and that it shall adapt its programme of works as far as it can to subserve the purposes of famine relief. Beyond that I do not think any local body should be required to go. But I do not think we should go still further and relieve District Boards of all responsibility whatever in regard to famine. Apart altogether from legal obligations, the broad fact remains that District Boards form an integral part of the administrative machine, discharging functions in their own sphere which are comparable with those of Provincial Governments and the Government of India in their larger fields of duty. All three parts of the governmental machine should share the common responsibility, and should co-operate with each other in combating a famine not merely in the actual work, but also in the provision of funds, each in its own degree. In replying to Mr. Logan, I have already intimated that we are not satisfied that the Imperial Government at present bears its full share of the burden; but none of the three partners can fairly claim to be wholly exempted.

" Then the Hon'ble Member points out that the Gold Reserve Fund now exceeds the sum of 10 millions which was named by Lord Curzon two years ago as being sufficient for our purpose, and he asks me to say what we propose to do with the profits of coinage in future. I may remind the Hon'ble Member that last year Sir Edward Law expressed the opinion that we ought to have some 20 millions in the Gold Reserve Fund, and we are still a long way short of that figure. But personally I regard the matter in a somewhat different way. So long as India has a gold standard combined with a currency which consists mainly of rupees, I consider that we are bound to set apart the whole of the profit on additions to the coinage. Every penny of these profits is linked with an equivalent liability, which is none the less real because it may not have to be discharged for a long time to come. Sooner or later, gold will come into circulation in India, as it has done in nearly all countries in the world, and will tend to take the place of rupees. It may be many years before this comes about, and the process will probably be very gradual; but that it will come in the long run, I have no manner of doubt. When it does come, we shall have to reverse the process by which we have been adding to our silver currency in accordance with the requirements of trade; we shall have to dispose of the surplus stock of rupees, and replace them by gold. In this view, there can be no limit to the Gold Reserve Fund. Broadly speaking, every rupee that we coin from bullion may eventually have to be converted back into bullion, and the profit which we made from the first operation must be religiously reserved to meet the cost of the second. We must therefore resist all temptation to use these profits for ordinary current expenditure.

" But I agree that there is a limit beyond which it is not expedient in practice to store the accumulated profits in the form of ordinary sterling investments. My reason is that it will not be possible to throw more than a certain amount of such investments on to the market at once. If we hold more than can be readily liquidated, the investments will actually not be available when we require to draw upon them to meet the cost of conversion. We have certainly not reached such a limit yet, so that it is rather premature to discuss the

[*Mr. Baker.*]

question: but when it is reached, my view is that further accumulations should be applied to the reduction or avoidance of debt, preferably of sterling debt. The practical effect of employing them in this way would be that we should either expand our programme of productive railways and canals or that we should finance the latter with a smaller amount of borrowing.

"The question of military expenditure has been dealt with by His Excellency the Commander-in-Chief and all that I need say is that I resolutely adhere to the view which I expressed last year that it would not be sound or expedient to have recourse to borrowing for the purpose of carrying out the scheme of army reorganization unless we should find it impossible to finance it without undue difficulty out of revenue. Expenditure on public defence is not productive in the commercial sense, and is not a suitable object to be financed from borrowed funds. The only justification for such a course would be imperative and urgent necessity: and no such necessity has so far arisen.

"Mr. Gokhale returns to the charge once more in regard to the employment of our surpluses on the construction of productive public works, and urges the relative claims of sanitation, the provision of school houses, and mass education. Is not the Hon'ble Member rather forcing an open door? We are all entirely agreed with him that we ought not to maintain taxation on a higher level than we should otherwise require, merely in order that the revenue so collected may be spent on constructing railways. That would undoubtedly be wasteful, and unfair to the present generation of tax-payers. But when a surplus has actually accrued from any cause, such as a fortunate windfall, or from our revenues exceeding our expectations, or in any other way, then I remain of the opinion that we can ordinarily find no more beneficial way of utilizing the money than by investing it in productive works, whether Railways or Canals.

"I readily admit that there is nothing wrong in principle in using such money for other non-recurring expenditure, and as a fact we have often done so. Instances of recent date which occur to me are the 50 lakhs assigned for the improvement of Calcutta, the 20 lakhs for the extension of Simla, the various initial grants given from time to time to Local Governments in connection with their new Provincial settlements: and the 22 lakhs given two years ago by Lord Curzon's Government for what were called secondary requirements, such as museums, public parks and gardens, the Calcutta Zoo and the like.

"But the objection is that this practice does not make for economy. Once we begin to allot sums of money for expenditure on particular objects, not with any ordered design or because the latter are deliberately held to be necessary, but merely because money happens to be available at the moment, we set foot on an inclined plane which leads to the deepest morass of extravagance. Occasions may arise when such a course may be legitimate or expedient, but all such proposals must be most jealously scrutinized and kept under the closest restrictions. The Hon'ble Member expressly intimated that the objects on which the money should be spent must be non-recurring. Surely it was by an oversight that he included among them such essentially recurring charges as mass education and sanitary improvement!

"Most of the items included in Mr. Gokhale's somewhat overwhelming programme of economic and administrative reform do not fall within my province to deal with. But I must offer a few observations on his suggestions for financing his schemes. He suggests (1) that the funds set free by suspending Army re-organization or by carrying it out from borrowed money should be applied to the extension of Primary education; (2) that the profits on coinage should be reserved for the relief of rural indebtedness; (3) that the famine grant should be spent on industrial and technical education; (4) that co-operative credit societies should be allowed to make use of the deposits in the Post Office Savings Banks; and (5) that whatever surpluses accrue should be devoted to assisting Local Bodies in the construction of works of sanitary improvement.

"Now I have the keenest sympathy with every one of the objects on which the Hon'ble Member desires to see public money expended. In

[*Mr. Baker.*]

particular, I am greatly interested in his proposal for making primary education free, with the intention of ultimately making it compulsory. I hope and believe that some great scheme of this nature will eventually be carried into execution. though I am wholly unconvinced by the Hon'ble Member's figures that the cost of it will be anywhere in the neighbourhood of 30 lakhs of rupees. In the United Kingdom in 1904 over 13 millions sterling were spent on primary education from Parliamentary grants. We may make any allowances the Hon'ble Member likes to ask for an account of the different conditions of the two countries; but when every possible deduction has been made, is it conceivable that we can hope to give free primary education to a population six times as numerous, for $\frac{1}{20}$ th part of the cost? If we get off with $1\frac{1}{2}$ crores a year I shall be surprised: though I believe it would be money well spent.

"But the suggestions for financing the various projects are calculated to alienate my sympathies, and I cannot help thinking that if the Hon'ble Member had had more time for consideration, he would have omitted or modified them. The extension of primary education, and the making of it free, are objects worthy of a foremost place in our policy; but the funds ought emphatically not to be found by casting on to a future generation the present cost of national defence. The relief of rural indebtedness is a matter deserving of serious consideration: but, as I have already shown, the profits on coinage are not available for any such purpose. They must be reserved to meet the corresponding liability which attaches to them, and which will assuredly have to be discharged in the long run. So as regards the Famine Insurance Grant, we have often been told that it was an immoral act to absorb this grant, in former years to defray the cost of the Afghan War. I express no opinion as to that; but I do affirm that it would be no less immoral to divert it for expenditure on technical or industrial education, with which it has nothing whatever to do. I will not go through the rest of the list. I will merely assure the Hon'ble Member that while we welcome his co-operation and advice, and while I for one shall be ready to do everything in my power to further the causes which he and the Government alike have at heart, it is not by devices such as these that a solution is to be found.

"Turning from these matters, I think it may be of some interest if I lay before the Council a brief retrospect of the changes that have been effected in our fiscal system during the last 24 years, by the reduction, modification or abolition of old taxes, and the imposition of new ones. I propose to take as my starting point the year 1882-83, for the reason that that was the year in which the Government of Lord Ripon carried into effect certain important measures of fiscal reform to which reference is often made in this connection. Such a review as I contemplate may, I think, enable the observer not merely to take a bird's eye view of the course of Indian taxation in the past, but also to form a fairly correct estimate of the net improvement—for there has been an improvement—that has been effected in our fiscal system up to the present time. I shall make it as brief and free from technicality as possible, avoiding all details of little general interest, and though I shall present a few figures, they shall be very few, partly to avoid wearying the Council, and also because the actual yield of taxation is obviously affected by other causes than abolition or imposition.

"Viewed from the standpoint which I have indicated, the period from 1882-83 to the present time divides itself naturally into four groups of years, each of which presents strongly marked fiscal characteristics of its own.

"The first group extends from 1882-83 to 1885-86. By the time this period began the country had recovered from the effects of the famine of 1876-78, and from the financial burden imposed by the Afghan War, while the fall in sterling exchange, though beginning to be felt, was not yet acute. It was characterized by three important measures in relief of taxation. These were: -

firstly, the abolition of the import duties on cotton goods, and of the general import duties, or so much of them as still survived. The cost of this measure in the first year of its introduction was 106½ lakhs;

[Mr. Baker.]

secondly, the reduction of the salt duty from Rs 2-8-0 per maund (or Rs 2-14-0 in Bengal and Assam) to Rs 2. The cost of this, also in the first year of the change, was 119½ lakhs; and

thirdly, the abolition of the patwari cess in the United Provinces, at a cost of 24 lakhs. The aggregate cost of these three measures was rather over 230 lakhs of rupees per annum.

"The second group of years extends from 1886-87 to 1895-96. Its leading features were the increase of expenditure forced upon us by the approach of Russia towards our frontiers, and the annexation of Upper Burma; and the unprecedented depression of sterling exchange which severely augmented the burden of the home charges. These causes led to the rescission, one after the other, of the three measures of relief which had been carried out during the previous period, and to the imposition of three new taxes in addition. The measures actually adopted were as follows:—

Firstly, in 1886, the income-tax was substituted for the former license-tax: the gain in the first year of the change being 86½ lakhs.

Secondly, in 1888, the salt duty was raised again to Rs 2-8-0 per maund, the increased yield being 101½ lakhs in the first year, with a further advance of 51 lakhs the year after.

Thirdly, in the same year, an import duty of half an anna per gallon was imposed on petroleum, yielding 11½ lakhs. This rate of duty was doubled in 1894, the increased yield being 5½ lakhs.

Fourthly, in 1889, the patwari cess in the United Provinces was re-imposed, yielding 22½ lakhs.

Fifthly, between 1894 and 1896, the general import duties were re-imposed on a 5 per cent basis. There were some intermediate alterations in regard to cotton piece goods and yarns, on which it is unnecessary to dwell; but the ultimate result was that, as an exception to the general rule, piece goods were taxed at 3½ per cent instead of at 5 per cent, while yarns were free. An excise duty of corresponding amount was simultaneously imposed on piece goods woven in Indian mills. The increase of revenue from the general import duties and from cotton piece goods including the excise duty was 154 lakhs and 103 lakhs respectively.

"The aggregate increase of taxation imposed during these ten years may be taken at about 536 lakhs of rupees per annum.

"I now come to the third group of years, which extends from 1897-98 to 1902-03. This was a period of stationary taxation, the gain due to the gradual establishment of a stable exchange being counterbalanced by two great famines, and the cost of military operations on the North-West Frontier. The only fiscal measure carried out during this period was the remission of the pandhri tax in the Central Provinces, but this had brought in only the trifling sum of Rs 70,000 a year. During this period, there were large remissions of land revenue; and a good deal was done in the direction of improving the financial position of Local Governments; but these are not measures of the class now under consideration.

"The countervailing sugar duties of 1899 and 1902 belong to this group of years; but as these were not imposed for revenue purposes, and were very soon abolished, I do not refer to them further.

"The fourth and last group consists of the period from 1903-04 to the present time. Speaking broadly, this has been a time of plentiful harvests, steady exchange, expanding trade, of growing general prosperity, and of external peace.

"The expansion of the revenues has been such that we have been enabled not only to embark on many large schemes of administrative reform, but also to

[Mr. Baker.]

undertake the reduction of taxation on a scale surpassing that of twenty years previously—

In the *first* place the salt tax was reduced in 1903 to Rs. 2, and again in 1905 to Rs. 1-8-0, a maund, at a cost of 141 and 164 lakhs a year respectively ;

secondly, incomes between Rs. 500 and Rs. 1,000 per annum were exempted from income-tax with effect from 1903-04, at a cost of over 29 lakhs a year ;

thirdly, the famine cesses in Northern India were abolished last year at a cost of 22½ lakhs a year ; and

fourthly, we have decided, with effect from the ensuing year, to abolish local taxation on the land to the amount of more than 82 lakhs per annum.

“The sum of these five measures which have been carried out within the space of three years, reaches the respectable total of 438 lakhs a year. This no doubt falls short of the aggregate new taxation imposed or re-imposed during the second group of years by about a crore of rupees ; but with regard to this it may fairly be observed, (1) that it represents the progress achieved in a relatively short space of time ; (2) that the remissions might easily have been greatly enhanced had not Government decided with, I believe, very general public approval, to apply a large part of its surplus resources to useful and productive expenditure on police, education, agriculture, and public works, to increasing the resources of the Provincial Governments, to improving the efficiency of the army, and to strengthening the finances of District Boards ; and (3) that we are not necessarily at the end of our programme, and if our revenues continue to expand as they have latterly done, it may hereafter be within our power to take further steps for the relief of the tax-payer.

“A merely statistical comparison, however, is of little value. A more fruitful and instructive method is to compare the fiscal position as it stands now with that which obtained in 1882-83, the year which I took as the starting point of my review. Proceeding in this way, I think that the results so far obtained may fairly be summarised as follows :—

Firstly, we have reduced the salt tax from Rs. 2-8-0 or Rs. 2-14-0 per maund to Rs. 1-8-0 throughout India, except Burma, where it is Rs. 1. I do not wish to dwell on the effect of this measure in cheapening the cost of a necessary of life, because I have never believed that the tax pressed with undue severity even on the poor. But the importance of the reduction in creating a fiscal reserve is obvious and immense. If we allow for increase in consumption, not less than 3½ crores of rupees per annum could be obtained from this source by a stroke of the pen if necessity should arise, and this sum may be relied on to expand with the progressive increase of the population.

Secondly, we have broadened the basis of taxation by re-establishing the general customs duties on imports by sea. I freely admit that, in view of the chaotic condition to which the import tariff had been reduced in the late seventies, the Government of Lord Ripon had probably little option but to sweep the whole mass of anomalies away. But in my judgment, in the conditions prevailing in India, there are few more appropriate and less onerous forms of taxation than a light duty on imports from over sea. Our duties are pitched on so moderate a scale that, to the best of my belief, there is not a consumer who feels them, and not an indigenous industry which is injured by them. The revenue they yield, unfelt and unresented, has placed it in our power to effect the successive reductions of direct taxation to which I have already alluded ; and although it fell to the lot of Sir Evelyn Baring in 1882 to abolish them in this country, it is significant to observe

[*Mr. Baker.*]

that Egypt, which has benefited so greatly from the wise and vigorous guidance of Lord Cromer for more than twenty years, now derives one-tenth of her entire gross revenue from this source, a proportion not far short of double that which obtains in India today.

Thirdly, we have effected a valuable reform in our system of direct taxation by substituting the income-tax for the old license-tax. It is unnecessary on the present occasion to enter upon the well-worn theme of the unpopularity of these taxes. Whatever views may be entertained on that point, all reasonable persons will agree that the income-tax is greatly superior to that which it superseded. The license-tax exempted the whole official and professional classes, and fell almost exclusively upon trade. Its incidence and the range of incomes included within its net varied widely in different Provinces: and in some places it extended to incomes so low as Rs 200 a year. From all these defects, the present tax is free: and the raising of the limit of exemption to Rs 1,000, releasing over 60 per cent of the assesseees, has removed the chief remaining element that was vulnerable to criticism.

Fourthly, a high place in our list of results should be assigned to the reform and reduction of local taxation. It is not merely that we have relieved the landed interest and the agricultural tax-payer from a variety of supplements to his regular assessment, always irritating and often considerable in amount. That alone would have been an advance of no small value. But I attach much greater importance to the fact that we have for the greater part got rid, I trust for ever, of the practice of making appropriations from the proceeds of local taxation for the benefit of Provincial or Imperial revenues, and have gone a very long way towards establishing the principle that no local taxation shall be levied save that which is devoted exclusively to local, as distinguished from general, purposes, and, so far as possible, is administered by local bodies.

Lastly, there is one more feature in regard to which the fiscal system, as it now stands, is conspicuously stronger than in 1882-83, and it is worth while to refer to it, though it is not directly concerned with questions of taxation. I allude to the greatly diminished reliance which is now placed on the revenue from opium, as compared with twenty years ago. In 1882-83, the net receipts from opium were 721 lakhs of rupees, and formed 14·1 per cent of the total receipts classed as Principal Heads of Revenue. In 1905-06, they amounted only to 546 lakhs, or to 7·8 per cent of the aggregate of the Principal Heads of Revenue. When it is remembered how uncertain the opium revenue is, and how liable to violent fluctuations from causes over which we can exercise no control, the dwindling away of its relative importance in our fiscal system must be regarded as a matter for lively satisfaction.

"In the foregoing summary, I have made no allusion to the numerous changes introduced from time to time in the stamp and excise duties; I have not referred to the greater leniency of our assessment of the land revenue, or to the smaller proportion which it now bears to the sum total of our resources; nor would it have been relevant to refer to the signal change that has come over the position in regard to the net yield of our railways, our canals, and, to a lesser extent, the postal and telegraph services. Putting all these on one side, I venture to think that the results which I have now laid before the Council constitute an advance of which the Government of India have no cause to feel ashamed. Opinions may differ as to whether our predecessors and ourselves have accomplished as much as we might with the means at our disposal. I for one shall not quarrel with our critics if they urge us on to further developments on similar lines. There is no such thing as finality in finance. Though not a little has been done, it would be easy to compile a lengthy list of further

[*Mr. Baker ; the President.*]

reforms which still await the hour and the means. I shall resist the temptation to essay that fascinating but dangerous and not very profitable task ; and I shall be content to assure the Council that it will be our aim to persevere steadfastly with the task that lies before us, to remove every avoidable impediment to the development of trade, to improve communications, to facilitate the free movement of labour, to stimulate all indigenous industries, to encourage the profitable employment of capital, Indian capital first, and foreign capital afterwards, and while providing as generously as we can for the administrative needs of the country, in education, agriculture, public health, and public safety, to take as our watchword, first, and last, and all the time, Lord Cromer's well-known dictum, to keep taxation low."

His Excellency THE PRESIDENT said :—" I must in the first place congratulate my friend the Hon'ble Mr. Baker for the very lucid statement he has placed before us—a statement which I think we may all agree in accepting as distinctly satisfactory—all the more so that we are fairly entitled to recognise that the expenditure proposed for 1906-1907 represents no spasmodic effort on the part of the Government of India but that it is the continuation of a well-considered policy which the growing revenues of the country has enabled the Hon'ble Member to carry out. We appear to have no reason to imagine that we are under the influence of that intoxication known as a 'boom' in the New World, followed too often by the depressing effects of financial dissipation. The speeches which we have heard from Hon'ble Members today all hold out hopes of a solid and assured financial future, the chief problem of which will, I hope, be not as to how and when we are to secure our revenue, but as to how and when we can best spend it.

" I am very far from saying that we are free from trouble. We have famine and sickness with us still ; a partial failure of the monsoon and a further delay in the winter rainfall have told the inevitable tale in parts of Northern and Central India ; but still there has been no such misery as that of 1899 and 1900, and we may fairly hope that the money spent on irrigation in recent years and on the development of famine relief organisation may surely and steadily reduce our famine areas ; whilst, as the Hon'ble Sir Denzil Ibbetson has told us, the Government of India owe a debt of gratitude to the noble liberality with which the Chiefs have realised their obligations in their own afflicted territories. The plague, however, stares us gruesomely in the face and is ever reminding us of the efforts we are urgently called upon to make for the sanitary welfare of the people.

" Yet on every side there is indication of progress and of development, of which there is no better evidence than the increase in railway earnings, and the number of railways under construction, and with certain exceptions there is a general increase of revenue.

" The net result is a surplus of 253 lakhs of rupees, 122 lakhs of which we propose to devote to the remission of taxation, the relief of local bodies and the assistance of administrative improvement. In a country of great undeveloped resources it must often be a question whether a revenue surplus should be in the main devoted to the further development of the country or to the reduction of taxation of its population. For my own part I believe that the future prosperity of India depends so largely upon the welfare of its agricultural population that relief in the direction we propose will have a widespread effect and will as a consequence further that development in other directions which we are so anxious to encourage. Sir Denzil Ibbetson has given us an insight into the valuable work of the Department he so ably administers, and if, after so short a residence in India, I may venture to give an opinion, I cannot say how fully I agree with him as to what I take to be his views in respect to agricultural indebtedness and agricultural expansion. We all know the cruel burden the former entails on the agricultural population ; but I doubt the possibility of the Government of India ever being able to pay off this debt,

[The President.]

and, like the Hon'ble Member, I doubt the policy of their doing so if they could. I believe that co-operative societies, agricultural banks and carefully arranged systems of Government loans, coupled with the encouragement given to individual energy, will do much more to spoil the money-lenders' market and do it in a much more healthy way than any entire acceptance by Government of the debts of the agricultural community could ever do. Expert instruction in agriculture, will too, as years go on, undoubtedly conduce to the same success as has attended the scientific care which has done so much to realise for India the wealth of revenue contained in her magnificent forests.

"But though I am inclined to recognise agriculture as the staple industry of the country, I am far from losing sight of the great commercial development and the rapid expansion of trade, of which the Hon'ble Mr. Hewett has spoken. The records of the Department of Commerce and Industry tell us not only of over-sea trade, the improvement of our harbours, and the establishment of commercial relations with other countries, but also of the interior industrial development of India, much of which is only as yet beginning and the possibilities of which are so enormous; and nothing in the speech of the Hon'ble Member is to my mind more important than that sentence in which he conveyed the assurance that the Government of India earnestly desire to encourage local enterprise and that they mean to insist that in the case of articles required by Government which can be produced in this country at the same price and of the same quality as imported articles, the preference shall be given to local productions.

"I am in thorough sympathy with all the Hon'ble Rai Sri Ram Bahadur has said in this direction. His contribution to the debate on education generally has been most valuable, but in an industrial sense the attention he has drawn to technical education deserves our most careful consideration. Technical instruction in other countries is growing apace, though it is not so very long since the necessity for it was so generally admitted as it is now. Competition has forced it upon us. We must not lag behind. The wealth, the welfare, the strength of a country that would hold its own in the world must depend largely upon the employment of its manhood in the development of its own resources. But now-a-days, in these days of rapid and easy sea transport, and in the face of our system of open markets, the home producer and home manufacturer must be prepared to face foreign competition or to fail. I am afraid he cannot expect his fellow-countrymen for the sake of patriotism to buy his goods if they are inferior and more expensive than goods from other lands, and I say to the supporters of Swadeshi,—that much abused word—that if 'Swadeshi' means an earnest endeavour to develop home industries in an open market for the employment and for the supply of the people of India, no one will be more heartily with them than myself. But if by Swadeshi is meant an inability to recognise the signs of the times, a mistaken desire to maintain industrial systems long out of date, to create false markets by prohibiting the people of India from the purchase of better and cheaper goods, it will have no sympathy from me.

"The ancient hand-loom cannot compete with modern machinery. There are indigenous arts in India which I hope may be for ever preserved—the ingenuity, the characteristic skill of a people, should always be dear to them; but the success of modern industries and the preservation of indigenous industries is becoming every day more and more dependent upon scientific and technical knowledge, and if the resources of India are to be developed by the people of India, such development must depend largely upon local enterprise, upon the investment of Indian money and upon a recognition of the absolute necessity of expert training. There is no lack of opportunity for such native enterprise, which will well merit the assistance and encouragement the Hon'ble Rai Sri Ram Bahadur has so justly claimed for it.

"I have ventured to deal only very superficially with the chief points raised in this Debate and with which the Heads of Departments have so ably dealt—points which chiefly concern the resources of India, its revenue, and the welfare of its population. But there is, on the other hand, the heavy expenditure we have to face in many branches of the administration, and

[The President.]

chiefly in respect to the Army, to which the Hon'ble Mr. Gokhale has taken such strong exception. I have listened to all he has said with the respect due to one who very eloquently represents the advanced views of a section of the Indian people—views which, though we may perhaps often disagree with, are the result of a study of the Indian political life of today and of a patriotic desire to share in the administration of public affairs—views which I shall always be ready to listen to and discuss. Recent events may at first sight appear to justify much of what the Hon'ble Mr. Gokhale has said. Russia's reverses in the Far East and our alliance with Japan undoubtedly at the present moment minimise the dangers of our Indian frontier, but I am afraid I cannot follow the Hon'ble Mr. Gokhale in his conclusion that these dangers have disappeared for ever. He has told us that the tide of European aggression in China has been rolled back for good, that the power of Russia has been broken and that her prestige in Asia has gone. I am afraid these are mere assumptions which I can hardly accept. I am afraid I feel much more impelled to consider, what effect Russian reverses may have on the pride of a high-spirited military race, and I wonder in how long or in how short a time she may feel confident of recovering her lost prestige.

"Mr. Gokhale advises us to hang up our military reorganisation till a more disquieting situation arises; that is to say, wait till the moment of danger arises before we put our house in order—and to trust to a military scramble towards efficiency. I hope that the danger of such military scrambles has at last impressed their risks upon us.

"He has also referred to the position of the people of India in respect to the military services. The position is a difficult one, and in some points it is not satisfactory; but I do assert this, and I know my colleagues will agree with me, that the position is in no way due to a want of appreciation of the loyal services of the magnificent officers and soldiers of the Indian Army.

"His Excellency the Commander-in-Chief has so clearly placed before us the view he takes of military requirements and military reorganisation that I need say very little. He has devoted a brilliant ability to the task of placing the Army of India on a footing of sound efficiency—an efficiency which can guarantee security, whilst he has reminded us that in the midst of a rising prosperity and increasing cost of living we cannot ignore the daily comfort of the Indian troops who serve us.

"Military expenditure is necessarily heavy in respect to the up-keep of all great armies. The criticism of such expenditure is often short-sighted. The price paid for an army is the premium paid for the insurance of the country. The huge armies of modern nations are not due either to any tendency to over-insure or to the promptings of mere military ambition. They exist in the first place for the maintenance of peace, because nations know that on their armed strength depends their immunity from attack. No nation can hope to be great and prosperous without being strong amongst its fellows. Its wealth, the welfare of its people, its commerce, its investments, its interior development, depend upon its security from hostile pressure—a security guaranteed only by the efficiency of its military forces—by the power of the strong arm. As long as the whole world continues armed to the teeth we must be prepared to pay for the safety of our existence. I hope we shall never be deceived into a false security.

"It is pleasant to remember that their Royal Highnesses the Prince and Princess of Wales, though they deeply realised the wants of the loyal population who so enthusiastically received them, visited India when its future seemed full of promise. I trust that promise may be fulfilled and that ever-increasing revenues will help to solve the administrative problems which surround us, and will ensure the progress and happiness of the people."

The Council adjourned *sine die*.

J. M. MACPHERSON,
Secretary to the Government of India,
Legislative Department.

CALCUTTA;

The 30th March, 1906.
